

# TEXAS GAS SERVICE IS HELPING YOU SAVE.

The Energy Efficiency Program works with local assistance agencies to provide free high-efficiency natural gas water heaters, furnaces and ranges to qualifying low-income, elderly and mobility-challenged customers, eliminating the upfront costs and lowering utility bills in the long term.\*

For more information about the Low-Income Free Equipment Program, call our Technical Specialist at 512-370-8237 or email [EnergyEfficiency@TexasGasService.com](mailto:EnergyEfficiency@TexasGasService.com).

\* Free Equipment recipients must own the equipment to be replaced, be eligible for the Texas Gas Service Energy Efficiency Program and obtain a referral from a participating assistance agency.
