

Tips to Stay Cool & Save Money

- 1** Run dryers, dishwashers and other large appliances **after dark**
- 2** **Seal doors & windows** to keep cool air in and warm air out
- 3** Keep vents **open and dust-free**
- 4** Switch to a **low-flow showerhead** to reduce water and energy use
- 5** Save energy by upgrading to **high-efficiency natural gas appliances**

TIPS TO STAY WARM *this winter*

**Texas
Gas Service**
A Division of ONE Gas

- 1** Set the temperature on your water heater **to 120°F or the “warm” setting**
- 2** **Seal gaps and cracks** around windows and doors to stop air leaks and prevent energy loss
- 3** **Change or clean the filters** on your air conditioning and heating units
- 4** **Install inexpensive foam gaskets** to seal outlets and electrical switches
