Coffin Renner

December 20, 2019

To the Honorable Mayors and Council Members:

Attached is a copy of the Statement of Intent of Texas Gas Service Company, a Division of ONE Gas, Inc. ("TGS" or the "Company"), to change gas utility rates within the incorporated areas of the Central Texas Service Area ("CTSA"), the Gulf Coast Service Area ("GCSA") and the City of Beaumont. In addition to the rate and tariff changes contained in the Statement of Intent, TGS is also requesting consolidation of the CTSA, GCSA and City of Beaumont into a single Central-Gulf Service Area ("CGSA"). For that reason, the filing contains three sets of schedules that reflect: (1) combined CGSA data (2) stand-alone CTSA data; and (3) stand-alone GCSA data. The combined CGSA data provides the basis for the Company's requested rates. The Company is also providing a version of the CGSA cost of service schedules that is fully integrated and linked to all supporting workpapers. The Company requests that the proposed rates and tariffs contained in the Statement of Intent become effective on February 6, 2020, which is 48 days from the date of this filing. No action on the part of the CTSA Cities, GCSA Cities or City of Beaumont is required to permit the Company's proposed rates to take effect.

Simultaneous with this city-level filing, the Company is also making a Statement of Intent filing with the Railroad Commission of Texas for the unincorporated areas of the CTSA and GCSA in which it is requesting the same rate and tariff changes that are contained in the city-level filing for the incorporated areas of the CTSA, GCSA and the City of Beaumont. As part of the Commission filing, the Company is also requesting a finding, to the extent necessary, that the acquisition of ONEOK Transmission Company and its assets that occurred June 30, 2019, is in the public interest. Additionally, TGS is requesting that the Commission approve new depreciation rates. Although there is no requirement that the Company file testimony with a city-level Statement of Intent filing, the Company is providing the cities with a copy of the testimony that is being filed with the Commission.

If you have any questions, please do not hesitate to contact me.

Best regards,

Kate Norman

Kate Norman

TEXAS GAS SERVICE COMPANY, A DIVISION OF ONE GAS, INC., STATEMENT OF INTENT TO CHANGE GAS UTILITY RATES WITHIN THE INCORPORATED AREAS OF THE CENTRAL TEXAS SERVICE AREA, GULF COAST SERVICE AREA AND CITY OF BEAUMONT

To All Cities Within Texas Gas Service Company's Central Texas and Gulf Coast Service Areas and the City of Beaumont:

Texas Gas Service Company ("TGS" or "the Company"), a Division of ONE Gas, Inc. ("ONE Gas") and a "gas utility" under Texas Utilities Code § 101.003(7), respectfully files this Statement of Intent, pursuant to Subchapter C of Chapter 104 of the Texas Utilities Code and the rules of the Gas Services Department of the Railroad Commission of Texas ("Commission"), to change gas utility rates within the City of Beaumont and the incorporated areas of the Central Texas Service Area ("CTSA"), which includes Austin, Bee Cave, Cedar Park, Cuero, Dripping Springs, Gonzales, Kyle, Lakeway, Lockhart, Luling, Rollingwood, Shiner, Sunset Valley, Nixon, West Lake Hills and Yoakum and the Gulf Coast Service Area ("GCSA"), which includes Bayou Vista, Galveston, Groves, Jamaica Beach, Nederland, Port Arthur and Port Neches. As part of this rate filing, the Company also proposes to consolidate the CTSA, the GCSA, and the City of Beaumont into a new service area called the Central-Gulf Service Area ("CGSA"). Consistent with this request to consolidate service areas, the Company's proposed rates were developed based on the cost of providing service to the entire proposed CGSA. Contemporaneously with this filing, TGS is also filing a Statement of Intent to Change Rates for the unincorporated areas of the CTSA and GCSA with the Commission.

The Company requests that the proposed rate schedules and tariffs for the proposed new CGSA, attached to this Statement of Intent as **Exhibit A** and incorporated herein by reference, become effective on February 6, 2020, which is 48 days from the date of this filing.¹ No action on the part of the cities is required to permit these proposed rates to take effect. In support of its request, the Company respectfully shows as follows:

1

¹ TGS is proposing an effective date past the statutory 35-day effective date period to accommodate holiday-related closures.

I. INTRODUCTION AND SUMMARY OF THE RATE REQUEST

TGS calculated the revenue requirement for this filing using the system-wide cost of providing service to all customers within the incorporated and unincorporated areas of the proposed CGSA. The new rates will affect all customers in the proposed CGSA, which include residential, commercial, commercial transportation, industrial, industrial transportation, public authority, public authority transportation, public school space heating, public school space heating transportation, compressed natural gas, compressed natural gas transportation, and electrical cogeneration transportation customers.

For the 12-month period ended June 30, 2019, updated for known and measurable adjustments through September 30, 2019, the Company's overall, combined revenue requirement for the proposed CGSA on a system-wide basis totaled approximately \$126 million, as adjusted.² The total revenue TGS received during the test year from customers within proposed CGSA was approximately \$109 million, leaving a revenue deficiency on a combined basis of approximately \$17 million.

If approved, the requested rates will increase TGS's revenues in the proposed CGSA by \$17 million, which is an increase of 9.43% including gas costs, or 15.64% excluding gas costs. Because the proposed changes will increase TGS's total aggregate revenues within the proposed CGSA by more than 2.5%, the proposed rate increases constitute a "major change" in rates as that term is defined by Texas Utilities Code § 104.101. Additionally, the proposed rates will not exceed 115% of the average of all rates for similar services of all municipalities served by the Company within the same county.

As part of this rate filing, the Company is also requesting: (1) Commission approval of new depreciation rates for Direct and Division distribution and general plant within the proposed CGSA; (2) a prudence determination for capital investment made in the proposed CGSA through December 31, 2019; (3) a finding from the Commission that ONE Gas' acquisition of ONEOK

2

² TGS included September 30, 2019 Construction Work in Progress ("CWIP") balances as an adjustment to construction completed not classified ("CCNC"). TGS will true-up net plant after December 31, 2019 to exclude any plant that is not used and useful at that time and will provide updated plant in service amounts, CCNC and accumulated reserves balances, along with related updated accumulated deferred income taxes and revenue growth, by February 14, 2020.

Transmission Company ("OTC") and its assets is consistent with the public interest under Texas Utilities Code § 102.051; (4) a finding from the Commission that the approvals of the administrative orders by the Gas Services Department of the Commission based on the Accounting Order in Gas Utilities Docket ("GUD") No. 10695 are reasonable and accurate; (5) approval of the form of notice pursuant to the proposed Rate Schedule PIT; and (6) approval to recover the reasonable rate case expenses associated with this filing through a surcharge on rates, as provided by law. The exact amount will not be known until the case is complete.

The rate schedules and tariffs, attached hereto as **Exhibit A** to the Rate Filing Package and made a part hereof, support the rate changes proposed by the Company. The proposed CGSA rate schedules and tariffs would be applicable to the entire CGSA, should consolidation as requested be approved. Implementation of new CGSA tariffs necessarily entails withdrawal of the Company's existing City of Beaumont tariffs and CTSA and GCSA incorporated and environs tariffs for which the Company is proposing changes. The Company is proposing: (1) a new residential A/B rate design that will provide options for customers based on their usage patterns; (2) Rate Schedules 70 and 7Z for unmetered gas street lights; (3) Rate Schedule EDIT-Rider to flow excess deferred income taxes back to customers; (4) Rate Schedule HARV-Rider to recover approved Hurricane Harvey; (5) Rate Schedules PIT and PIT-Rider to recover pipeline integrity testing costs; (6) and Rate Schedule NER to allow TGS to defer and later seek recovery of future extraordinary expenses associated with TGS's efforts to restore service after storms and other natural disasters or events, less any insurance reimbursement. Additional proposed revisions to the Company's rate schedules and tariffs are detailed in Section E of this Statement of Intent.

II. JURISDICTION

TGS is a gas utility as that term is defined in § 101.003(7) of the Texas Utilities Code. Pursuant to Texas Utilities Code § 103.001, the cities have original jurisdiction to set the rates TGS requests for customers within their respective incorporated areas. Consistent with such jurisdiction, the proposed rates identified in Exhibit A are applicable to the Company's natural gas service within the incorporated areas of the proposed CGSA.

III. CONSOLIDATION OF SERVICE AREAS

In developing the requested rates, the Company is proposing to consolidate the CTSA, GCSA and the City of Beaumont into a new, combined service area known as the CGSA.³ The CTSA is currently comprised of the incorporated areas of Austin, Bee Cave, Cedar Park, Cuero, Dripping Springs, Gonzales, Kyle, Lakeway, Lockhart, Luling, Rollingwood, Shiner, Sunset Valley, Nixon, West Lake Hills and Yoakum, Texas and their associated environs, including the environs of Buda, Texas. The GCSA is currently comprised of the incorporated areas of Bayou Vista, Galveston, Groves, Jamaica Beach, Nederland, Port Arthur and Port Neches, Texas and their associated environs. While the Company's past practice has been to develop separate rates based on the individual costs of service of the CTSA and GCSA, the Company seeks in this proceeding, consistent with prior Commission decisions for TGS, to consolidate these two service areas as well as the City of Beaumont and use a system-wide cost of service for the entire proposed CGSA to realize efficiencies from the centralization of its existing operations in the separate service areas. The Company's proposed rates for customers in the CTSA, GCSA, and City of Beaumont are based on the system-wide cost of providing service to the proposed CGSA.

If the Company's consolidation request is not approved, the Company requests approval of new base rates for the CTSA and GCSA based on the separate cost of service schedules for each service area that are included with the Statement of Intent filing. Costs for the City of Beaumont are reflected in the GCSA schedules.

IV. DETAILS OF PROPOSED CHANGES

A. Rate Filing Package

In addition to this Statement of Intent, the Rate Filing Package consists of the following:

| • | SOI Exhibit A | Proposed Rate Schedules and Tariffs |
|---|---------------|-------------------------------------|
| • | SOI Exhibit B | Proposed Revenue Change by Class |
| • | SOI Exhibit C | Average Bill Impact by Class |
| • | SOI Exhibit D | Direct Testimony |
| • | SOI Exhibit E | Proposed Notice |

³ If consolidation and creation of the CGSA is not approved, TGS requests, at a minimum, that the City of Beaumont be consolidated into the GCSA.

SOI Exhibit F Proposed Protective Agreement

• SOI Exhibit G Cost of Service Schedules

• SOI Exhibit H Workpapers

B. Test Year

The Company's proposed cost of service for the proposed CGSA as set forth in this Statement of Intent and Rate Filing Package is based on the 12-month period ended June 30, 2019, updated for known and measurable changes through September 30, 2019.

C. Effective Date

The Company requests that the proposed rates be effective for meters read on and after February 6, 2020.

D. Class and Number of Customers Affected

The proposed changes to the Company's rate schedules will affect all customers in the proposed CGSA. The table below shows the approximate number of customers by class who will be affected by the proposed rate changes:

| Customer Class | CTSA Customers Incorporated/Environs | GCSA Customers Incorporated/Environs |
|---|---|---|
| Residential | 229,420/22,251 | 41,183/1,142 |
| Commercial | 11,658/650 | 1,782/28 |
| Industrial | 21/No Customers | No Customers |
| Public Authority | 519/47 | 261/4 |
| Public School Space Heating | 4/1 | No Customers |
| Compressed Natural Gas | 3/No Customers | No Customers |
| Commercial Transportation | 327/9 | 30/No Customers |
| Public Authority Transportation | 384/6 | No Customers |
| Public School Space Heating Transportation | 80/2 | No Customers |
| Industrial Transportation | 32/1 | 4/No Customers |
| Electrical Cogeneration Transportation | 1/No Customers | No Customers |
| Compressed Natural Gas Transportation | 3/1 | No Customers |

The City of Beaumont has one residential and one commercial customer.

_

⁴ TGS included September 30, 2019 CWIP balances as an adjustment to CCNC. TGS will true-up net plant after December 31, 2019 to exclude any plant that is not used and useful at that time and will provide updated plant in service amounts, CCNC and accumulated reserves balances, along with related updated accumulated deferred income taxes and revenue growth, by February 14, 2020.

Exhibits B and **C**, attached, show the amount of the proposed change and the effect of the proposed change on an average bill for each class of customers.

E. Proposed Rate Schedules and Tariffs

TGS seeks approval of the following rate schedules and tariffs for the proposed CGSA, which are attached to this Statement of Intent as **Exhibit A** and incorporated herein by reference. One change that applies to all proposed CGSA tariffs is a revision to the "Territory" sections to include all CTSA Cities, GCSA cities and the City of Beaumont in the incorporated tariffs and to include CTSA environs, CTSA environs and environs of the City of Beaumont in the environs tariffs. In addition, TGS proposes the following specific changes:

- 1. Proposed Rate Schedules for General Sales Customers: For residential, commercial, industrial, public authority and public schools general sales customers, the Company proposes TGS proposes to add references to Rate Schedule EDIT-Rider, Rate Schedule HARV-Rider, and Rate Schedule NER-Rider, under "Other Adjustments."
 - a. Rate Schedules 10 and 1Z: For Residential gas sales service, the Company proposes to add residential builders to the "Applicability" sections; and add a new residential A/B rate design that will provide options for customers based on their usage patterns.
 - b. Rate Schedules 20 and 2Z: For Commercial gas sales service, the Company proposes to include all CTSA Cities, GCSA Cities and the City of Beaumont in the "Territory" section in the incorporated tariffs and to include all CTSA environs, GCSA environs and Beaumont, Texas environs in the "Territory" section in the environs tariffs; add references to Rate Schedule EDIT-Rider, Rate Schedule HARV-Rider, and Rate Schedule NER-Rider, under "Other Adjustments;" and remove unmetered service language in the "Conditions" section of GCSA and City of Beaumont because this provision is contained in the Company's proposed Rate Schedules 70 and 7Z.
 - c. Rate Schedules 30 and 3Z: For Industrial gas sales service, the Company proposes to include all CTSA Cities, GCSA Cities and the City of Beaumont in the "Territory" section in the incorporated tariffs and to include all CTSA environs, GCSA environs and Beaumont, Texas environs in the "Territory" section in the environs tariffs; add references to Rate Schedule EDIT-Rider, Rate Schedule HARV-Rider, and Rate Schedule NER-Rider, under "Other Adjustments;" and remove curtailment language in the "Conditions"

- sections because these provisions are contained in the curtailment plan on file with the Commission.
- d. Rate Schedules 40 and 4Z: For Public Authority gas sales service, the Company proposes to include all CTSA Cities, GCSA Cities and the City of Beaumont in the "Territory" section in the incorporated tariffs and to include all CTSA environs, GCSA environs and Beaumont, Texas environs in the "Territory" section in the environs tariffs; add references to Rate Schedule EDIT-Rider, Rate Schedule HARV-Rider, and Rate Schedule NER-Rider, under "Other Adjustments;" and remove unmetered service language in the "Conditions" section of GCSA and City of Beaumont Rate Schedules 40 and 4Z because this provision is contained in the Company's proposed Rate Schedules 70 and 7Z.
- e. Rate Schedules 48 and 4H: For Public School Space Heating gas sales service, the Company proposes to include all CTSA Cities, GCSA Cities and the City of Beaumont in the "Territory" section in the incorporated tariffs and to include all CTSA environs, GCSA environs and Beaumont, Texas environs in the "Territory" section in the environs tariffs and add references to Rate Schedule EDIT-Rider, Rate Schedule HARV-Rider, and Rate Schedule NER-Rider, under "Other Adjustments."
- f. Rate Schedules T-1, T-1-ENV and T-TERMS: For Transportation service, the Company proposes to include all CTSA Cities, GCSA Cities and the City of Beaumont in the "Territory" section in the incorporated tariffs and to include all CTSA environs, GCSA environs and Beaumont, Texas environs in the "Territory" section in the environs tariffs and add references to Rate Schedule EDIT-Rider, Rate Schedule HARV-Rider, and Rate Schedule NER-Rider, under "Other Adjustments." For Rate Schedule T-TERMS the Company proposes to include definitions for commercial, electrical cogeneration, and industrial service under "Definitions" to provide clarity and match the terminology in the proposed CGSA Rules of Service.
- g. Rate Schedules C-1 and C-1-ENV: For Cogeneration service, the Company proposes to include all CTSA Cities, GCSA Cities and the City of Beaumont in the "Territory" section in the incorporated tariffs and to include all CTSA environs, GCSA environs and Beaumont, Texas environs in the "Territory" section in the environs tariffs and add references to Rate Schedule EDIT-Rider, Rate Schedule HARV-Rider, and Rate Schedule NER-Rider, under "Other Adjustments."
- h. Rate Schedules CNG-1 and CNG-1-ENV: For Compressed Natural Gas service, the Company proposes to include all CTSA Cities, GCSA Cities and the City of Beaumont in the "Territory" section in the incorporated tariffs and to include all CTSA environs, GCSA environs and Beaumont, Texas environs in the "Territory" section in the environs tariffs; add

references to Rate Schedule EDIT-Rider, Rate Schedule HARV-Rider, and Rate Schedule NER-Rider, under "Other Adjustments;" and clarify the reference and availability of the Average Payment Plan/Average Bill Calculation Plan (ABC/APP Plan) under "Conditions."

- i. Rate Schedules 1-INC and I-ENV: For the Cost of Gas clauses, the Company proposes to include all CTSA Cities, GCSA Cities and the City of Beaumont in the "Territory" section in the incorporated tariffs and to include all CTSA environs, GCSA environs and Beaumont, Texas environs in the "Territory" section in the environs tariffs; add clarifying language to section B.7 regarding lost and unaccounted for gas to match section B.5; add clarifying language to section B.8 in the incorporated tariff and revise section B.3 in the environs tariff to make consistent with; approved cost of gas clauses in GUD Nos. 10656, 10739, and 10766; revise sections B.3, B.5, B.7, and H.4 in the incorporated cost of gas clause to include the use of financial instruments; and revise sections B, D, E, G, and H to make the language consistent with the cost of gas clauses in the existing CTSA.
- j. Rate Schedule WNA: Provides a mechanism whereby incorporated customer bills are adjusted up or down each billing cycle to reflect differences in actual weather compared to normal weather, as defined in the rate case and discussed in the testimony of Ms. Buchanan. Revisions have been made to Rate Schedule WNA to: add the incorporated and environs GCSA and Beaumont customers to the applicability section; and reflect updated weather factors for each class consistent with Ms. Buchanan's weather normalization calculation in this case.
- k. *Rate Schedule EDIT-Rider:* Provides a mechanism for the flow back to customers of the annual amortization of EDIT, via a one-time bill credit.
- 1. Rate Schedules PIT and PIT-Rider: Provides a mechanism to recover pipeline integrity testing costs incurred in a given calendar year through a volumetric rate to be applied to customer bills during the following April through March.
- m. Rate Schedule HARV-Rider: Provides a mechanism for the recovery of reasonable and necessary expenses TGS incurred to restore service as a direct result of Hurricane Harvey.
- n. Rate Schedules NER and NER-Rider: Provides a mechanism to defer and seek recovery of operations and maintenance ("O&M") expenses resulting from natural events.
- o. *Rate Schedules 70 and 7Z:* Provides a mechanism to provide unmetered service to customers using natural gas for gas lighting only.

- p. Rate Schedules RCE and RCE-ENV: Provides a mechanism to recover all reasonable rate case expenses incurred by the Company and cities in connection with the Statement of Intent filings that have been made with the CTSA cities, GCSA cities, City of Beaumont and the Commission.
- q. Rate Schedule PSF: Provides a mechanism to recover the annual fee to support the pipeline safety functions of the Commission.
- r. Rules of Service: For the Rules of Service, the Company proposes
 - 1. Including the incorporated and environs areas of the CTSA, GCSA and Beaumont in § 1 Tariff Applicability;
 - 2. Updating § 1.3, Definitions, to include all definitions of terminology in the Rules of Service consistent with approved Rules of Service in GUD Nos. 10739 and 10766, as well as add a definition for "electrical cogeneration service," while removing definition for "power generation service" to establish consistency with terminology used across all proposed CGSA tariffs;
 - 3. Revisions to § 4.5 to better reflect the current course of action customers can take to obtain copies of their tariffs and rate schedules;
 - 4. Revisions to § 4.6 to clarify how and when the Company provides general information to new customers;
 - 5. Revisions to § 7.1 to make advance contribution in aid of construction from an applicant of new service discretionary;
 - 6. Revision to § 7.4 and § 15.8 to clarify that there is no charge to the customer when Company personnel inspect or perform tests on new installations or appliances prior to initiation of service;
 - 7. Addition of § 10.6 which specifies that when a franchise agreement may be in conflict with the terms and conditions of Section § 10, Security Deposits, the franchise agreement terms apply;
 - 8. Revisions to the table in § 11.1 to include the City of Beaumont and the Gulf Coast Cities' atmospheric and standard serving pressures;
 - 9. Revision to § 12.2 to establish consistency across the Rules of Service regarding a customer's obligations to grant premise and meter access to Company personnel;
 - 10. Revisions to § 13.7 to clarify payment options administered by contracted vendors;
 - 11. Addition of § 13.8, Deferred Payment Plans, to provide terms and conditions of deferred payment plans that may be offered by the Company to customers consistent with Commission Rule § 7.45(2)(D);
 - 12. Addition of § 17.3 which relates to the suspension of gas utility service disconnection during an extreme weather emergency consistent with Commission Rule § 7.46, and the Company proposes to withdraw the existing CTSA, GCSA and Beaumont environs Rules of Service addendum;
 - 13. Revisions to § 20 to update the language to better reflect current plan descriptions; and

14. Revisions to § 21, Fees and Deposits, to establish greater consistency for service fees and deposits among the Company's service areas.

The Company proposes to withdraw the existing CTSA, GCSA, and Beaumont environs Rules of Service addendum waiving the deposit requirement for victims of family violence because the provision is now included in § 5.5 of the proposed Rules of Service.

F. Effect of Proposed Rate Changes

The specific proposed changes to the Company's rates are shown in the following side-by-side comparison of existing and proposed rates for the proposed CGSA:

| | Incorporated and Unincorporated/Environs Current Rates | | | | | |
|---|--|---------------------------|--|---|---|--|
| Customer Class | CTSA Incorporated Rates | CTSA Environs Rates | GCSA Incorporated Rates | GCSA Environs Rates | City of Beaumont Rates | Proposed CGSA Rates |
| Residential (No. of Customers Affected) | 229,420 | 22,251 | 41,183 | 1,142 | 1 | |
| Customer Charge | \$18.81 | \$18.81 | \$12.42 | \$14.17 | \$12.10 | \$14.00 (Option A) \$27.58 (Option B) |
| Volumetric Charge (per Ccf) | \$0.12064 | \$0.12064 | \$0.45616 | \$0.40680 | \$0.45616 | \$0.55702 (Option A) \$0.10435 (Option B) |
| Commercial (No. of Customers Affected) | 11,658 | 650 | 1,782 | 28 | 1 | |
| Customer Charge | \$53.33 | \$53.33 | \$51.11 | \$59.92 | \$49.49 | \$53.33 |
| Volumetric Charge (per Ccf) | \$0.11614 | \$0.11614 | \$0.22140 (First 250 Ccf) \$0.19380 (All Over 250 Ccf) | \$0.20185 (First 250 Ccf) \$0.17425 (All Over 250 Ccf) | \$0.22140 (First 250 Ccf) \$0.19380 (All Over 250 Ccf) | \$0.12678 |

G. Witness Testimony

Attached as **Exhibit D** to the Statement of Intent is the direct testimony supporting the Company's requested revenue requirement. The attached testimony includes the following witnesses:

- G. David Scalf is Vice-President of Rates and Regulatory for ONE Gas. Mr. Scalf introduces TGS's Statement of Intent filing and the witnesses, provides an overview of ONE Gas and the Company's request to consolidate its existing CTSA, GCSA and the City of Beaumont into a new consolidated service area, the CGSA, and addresses two adjustments in Schedule G from a management perspective: (1) incentive compensation and (2) meal and hotel costs.
- Shantel Norman is Vice-President of Operations for TGS. Ms. Norman provides an overview of operations within the proposed CGSA; supports the proposed consolidation to create the CGSA; addresses the reasonableness and necessity of capital investment and

O&M expenses; addresses ONE Gas' recent acquisition of OTC and the planned integration of the associated pipeline into TGS's system; and addresses the Company's Pipeline Integrity Testing Program.

- Stacey L. McTaggart is the Rates and Regulatory Director for TGS. Ms. McTaggart addresses the proposed consolidation of the existing CTSA, GCSA and City of Beaumont into the new CGSA; the request for a finding that ONE Gas' acquisition of the former OTC assets in June 2019, now held by ONE Gas Pipeline Company ("OPC"), is consistent with the public interest; the transfer of the OPC assets into TGS's existing system; the Company's compliance with certain regulatory and statutory requirements; affiliate cost recovery issues related to Utility Insurance Company ("UIC") and OPC; the Company's compliance with the Accounting Order issued by the Commission in GUD No. 10695 related to the federal Tax Cut and Jobs Act of 2017; the Company's proposed EDIT Rider to return excess deferred income taxes to customers; the proposed treatment of cloud-based computing costs in future filings; TGS's recovery of costs associated with the Company's response to Hurricane Harvey; the Company's recovery of pipeline integrity testing costs; the proposed Natural Events Response Rider; and the Company's recovery of rate case expenses.
- *Janet L. Buchanan* is the Rates and Regulatory Director for Kansas Gas Service. Ms. Buchanan supports TGS's revenue adjustments.
- *Gracie Guerra* is a Rates Analyst for TGS and provides an overview of the cost of service and overall revenue requirement calculation and supports TGS's Direct rate base.
- *Mindy R. Edwards* is a Rates Analyst for ONE Gas and supports certain TGS Division and Corporate capital investment that is included in the CGSA revenue requirement as well as Corporate depreciation and amortization expense.
- *Marie J. Michels* is a Manager of Rates and Regulatory Analysis for TGS. Ms. Michels supports Direct expense adjustments including an adjustment for O&M expenses related to the operation of the OPC pipeline, among others adjustments.
- Anthony Brown is a Rates Specialist for TGS. Mr. Brown supports the cost allocation methodology used to determine TGS's share of allocated costs and certain Corporate expense adjustments.
- *Allison N. Edwards* is a Manager of Rates and Regulatory Analysis for ONE Gas. Ms. Edwards supports adjustments related to meal and hotel costs.
- Stacey R. Borgstadt is a Manager of Rates and Regulatory Analysis for ONE Gas. Ms. Borgstadt explains Direct, TGS Division and Corporate expense adjustments related to payroll and incentive compensation.
- *Timothy S. Lyons* is a Partner with the firm ScottMadden, Inc. Mr. Lyons sponsors the Company's cash working capital study and proposed cash working capital amounts.

- *Jeff D. Branz* is the Director of Compensation and Benefits for ONE Gas. Mr. Branz addresses the reasonableness of ONE Gas' compensation philosophy and structure, as well as related costs for base pay, incentive plans and benefits.
- *Cyndi King* is Director of Treasury and Finance for ONE Gas. Ms. King provides testimony supporting the recovery of a return on the Company's prepaid pension asset.
- *Mark W. Smith* is a Vice-President and the Treasurer for ONE Gas. Mr. Smith describes the insurance services that ONE Gas affiliate, UIC, provided to TGS during the test year.
- *Jeffrey J. Husen* is a Vice-President and the Chief Accounting Officer and Controller for ONE Gas. Mr. Husen describes the calculation of the Company's Excess Deferred Income Tax or EDIT.
- *Janet M. Simpson* is an accountant and vice-president at Dively Energy Services. Ms. Simpson presents the calculations for the Company's Accumulated Deferred Income Tax.
- Ronald E. White is an engineer and President of Foster Associates Consultants, LLC. Dr. White sponsors and describes a study of the depreciation rates for the Company's plant located in the proposed CGSA, as well as for common facilities shared among all TGS service areas, including corporate assets.
- Bruce H. Fairchild is a financial accountant and former professor and regulator. Dr. Fairchild is a principal with Financial Concepts and Applications, Inc. Dr. Fairchild addresses and supports the Company's requested return on equity, cost of debt, capital structure, and overall return on invested capital (weighted average cost of capital).
- *Crystal D. Drumm* is a Rates Specialist for ONE Gas. Ms. Drumm describes and supports the Company's proposed interclass cost allocations and rate design.
- *Paul H. Raab* is an Economic Consultant with energytools, llc and describes and supports TGS's proposed rate design, including options that allow for customer choice.
- *Christy M. Bell* is a Rates Analyst for TGS. Ms. Bell describes the proposed CGSA rate schedules and tariffs as well as rate schedules and tariffs currently in effect for the CTSA, GCSA, and the City of Beaumont.

V. REQUEST FOR PUBLIC INTEREST FINDING

TGS is requesting a finding from the Commission that ONE Gas' acquisition of OTC and its assets is consistent with the public interest under Texas Utilities Code § 102.051.

VI. RATE CASE EXPENSES

Pursuant to Texas Utilities Code § 104.051, TGS requests recovery of all reasonable and necessary rate case expenses from affected customers through a surcharge to the final approved rates.

VII. PUBLIC NOTICE

The Company will promptly undertake to notify the public of the proposed change in its gas rates consistent with the requirements of Texas Utilities Code § 104.103. The public notice that TGS will provide regarding the requested change in rates for the proposed CGSA is attached as **Exhibit E** to the Statement of Intent. The Company will submit proof of notice promptly upon completion thereof along with a copy of the notice.

VIII. COMPANY REPRESENTATIVES FOR NOTIFICATION

TGS's authorized representatives are:

Please serve all pleadings, motions, orders, and other documents filed in this proceeding upon TGS's authorized representatives at the above-stated addresses.

IX. PROTECTIVE AGREEMENT

The Company's Rate Filing Package includes certain confidential materials. In addition, the scope of discovery in this case may require the production of additional confidential material.

Accordingly, TGS attaches as **Exhibit F** to this Statement of Intent a Protective Agreement to be used in this case. TGS will provide confidential material upon execution of Exhibit A attached to the Protective Agreement.

X. CONCLUSION

TGS requests that: (1) rates are approved for the proposed CGSA consistent with those proposed herein, to become effective for meters read on and after February 6, 2020; (2) consolidation of the existing CTSA, GCSA and City of Beaumont is approved to create the CGSA; (3) the Commission approve new depreciation rates for Direct and Division distribution and general plant; (4) capital investment in the proposed CGSA made through December 31, 2019 is deemed prudent; (5) the Commission find the acquisition of ONEOK Transmission Company and its assets is consistent with the public interest; (6) the Commission find the approvals of the administrative orders by the Gas Services Department of the Commission based on the Accounting Order in GUD No. 10695 are reasonable and accurate; (7) the form of notice pursuant to proposed Rate Schedule PIT is approved; (8) all reasonable rate case expenses incurred in connection with this Statement of Intent filing are authorized for recovery by the Company; and (9) for such further relief to which the Company may be entitled.

Respectfully submitted,

By: Kate Vorman

ATTORNEYS FOR TEXAS GAS SERVICE COMPANY

SOI Exhibit A
Proposed Rate Schedules and Tariffs
Page 1 of 115

Texas Gas Service Company, a Division of ONE Gas, Inc. Central-Gulf Service Area

RATE SCHEDULE 10

RESIDENTIAL SERVICE RATE

APPLICABILITY

Applicable to a residential customer or builder in a single dwelling, or in a dwelling unit of a multiple dwelling or residential apartment, for domestic purposes. A residential consumer includes an individually-metered residential unit or dwelling that is operated by a public housing agency acting as an administrator of public housing programs under the direction of the U.S. Department of Housing and Urban Development and builders prior to sale or re-sale of a property for domestic purposes. This rate is only available to full requirements customers of Texas Gas Service Company, a Division of ONE Gas, Inc.

TERRITORY

The incorporated areas of the Central-Gulf Service Area which includes Austin, Bayou Vista, Beaumont, Bee Cave, Cedar Park, Cuero, Dripping Springs, Galveston, Gonzales, Groves, Jamaica Beach, Kyle, Lakeway, Lockhart, Luling, Nederland, Nixon, Port Arthur, Port Neches, Rollingwood, Shiner, Sunset Valley, West Lake Hills and Yoakum, Texas.

COST OF SERVICE RATE CHOICES

During each monthly billing period:

For Rate A

A customer charge per meter per month of \$14.00 plus All Ccf per monthly billing period @ \$0.55702 per Ccf

For Rate B

A customer charge per meter per month of \$27.58 plus All Ccf per monthly billing period @ \$0.10435 per Ccf

CUSTOMER CHOICE RATE PLACEMENT

Each customer's individual rate schedule will be determined based on the annual normalized volume at the customer's service location for the prior twelve (12)-month period. An anticipated annual normalized usage level assessment will be conducted on each new service and for existing service that has less than twelve (12) months of service. The results of this assessment will decide the initial rate choice for the new account.

If the customer's service location's annual normalized volume is less than 360 Ccf, then the customer's account will be placed on Rate A.

If the customer's service location's annual normalized volume is 360 Ccf or greater, then the customer's account will be placed on Rate B.

A customer may switch rate choices at any time during the year provided that the customer agrees to remain on the alternative rate for a period of no less than twelve (12) months after switching options. Changes will be effective with the Customer's next scheduled bill.

RATE SCHEDULE 70

UNMETERED GAS LIGHT SERVICE RATE

APPLICABILITY

Applicable to any Customer on Texas Gas Service Company, a Division of ONE Gas, Inc.'s system requiring natural gas service for gas lighting only, without the use of metering device. Gas service is only available to Customers utilizing standard gas lighting equipment manufactured with an orifice burner assembly or equivalent that is intended for lighting of sidewalks and other walk ways. The Company, in its sole discretion, shall determine if Customer's lighting equipment qualifies for this tariff and shall contract with Customer for the appropriate monthly charge based upon Customer's complete installation of gas lighting equipment. Gas service under this rate schedule is available only with the Company as the sole supplier of gas for Customer and is not available for resale to others or for standby or supplemental service. This rate is only available to full requirements customers of Texas Gas Service Company, a Division of ONE Gas, Inc.

TERRITORY

The incorporated areas of the Central-Gulf Service Area which includes Austin, Bayou Vista, Beaumont, Bee Cave, Cedar Park, Cuero, Dripping Springs, Galveston, Gonzales, Groves, Jamaica Beach, Kyle, Lakeway, Lockhart, Luling, Nederland, Nixon, Port Arthur, Port Neches, Rollingwood, Shiner, Sunset Valley, West Lake Hills and Yoakum, Texas.

COST OF SERVICE RATE

The total hourly rated consumption of all gas lighting equipment included, expressed in Ccf at the location, shall be multiplied by 730 for gas lighting equipment that runs continuously or 365 for gas lighting equipment with a light sensor, to determine the average monthly consumption of the service. The result, rounded to the next highest Ccf, shall then be billed the rates provided in this rate schedule:

Residential \$ 0.10435 per Ccf Commercial \$ 0.12678 per Ccf Industrial \$ 0.12703 per Ccf Public Authority \$ 0.12551 per Ccf

OTHER ADJUSTMENTS

<u>Cost of Gas Component</u>: The basic rates for cost of service set forth above shall be increased by the amount of the Cost of Gas Component for the billing month computed in accordance with the provisions of Rate Schedule 1-INC.

<u>Taxes</u>: Plus applicable taxes and fees (including franchise fees) related to above.

CONDITIONS

The Customer shall ensure that the installation of lighting equipment conforms to industry safety standards. The Company reserves the right to review Customer's installation of lighting equipment from time to time to determine if it conforms to terms and conditions as set forth in this tariff and the executed service agreement with the Customer. Customer shall notify Company in writing within 30 days of any change in number of gas lights or other material changes made to the gas lighting installation.

Subject to all applicable laws and orders, and the Company's rules and regulations on file with the regulatory authority.

<u>Taxes</u>: Plus applicable taxes and fees (including franchise fees) related to above.

CONDITIONS

Gas taken under this rate shall be used exclusively for the purpose of cogeneration and fuel cell technology as defined in the Applicability section of this rate schedule and not for other purposes. The gas taken under this rate will be separately metered.

This rate will not be available for standby use.

The curtailment priority of any customer served under this rate schedule shall be the same as the curtailment priority which would pertain if gas were used directly to provide energy for uses as defined and listed in the Company's curtailment plan.

Subject to all applicable laws and orders, and the Company's rules and regulations on file with the regulatory authority.

SOI Exhibit A Proposed Rate Schedules and Tariffs Page 14 of 115

Texas Gas Service Company, a Division of ONE Gas, Inc. Central-Gulf Service Area RATE SCHEDULE CNG-1 Page 1 of 2

COMPRESSED NATURAL GAS SERVICE RATE

APPLICABILITY

Applicable to any non-residential customer of Texas Gas Service Company, a Division of ONE Gas, Inc., (the "Company") for usage where customer purchases natural gas which will be compressed and used as a motor fuel. Service will be separately metered. This rate does <u>not</u> include compression by the Company beyond normal meter sales pressure.

TERRITORY

The incorporated areas of the Central-Gulf Service Area which includes Austin, Bayou Vista, Beaumont, Bee Cave, Cedar Park, Cuero, Dripping Springs, Galveston, Gonzales, Groves, Jamaica Beach, Kyle, Lakeway, Lockhart, Luling, Nederland, Nixon, Port Arthur, Port Neches, Rollingwood, Shiner, Sunset Valley, West Lake Hills and Yoakum, Texas.

COST OF SERVICE RATE

During each monthly billing period:

A customer charge per meter per month of \$192.63 plus

All Ccf per monthly billing period @ \$0.06684 per Ccf

OTHER ADJUSTMENTS

<u>Cost of Gas Component</u>: The basic rates for cost of service set forth above shall be increased by the amount of the Cost of Gas Component for the billing month computed in accordance with the provisions of Rate Schedule 1-INC.

<u>Excess Deferred Income Taxes Rider:</u> The billing shall reflect adjustments in accordance with provisions of the Excess Deferred Income Taxes Rider, Rate Schedule EDIT-Rider.

<u>Hurricane Harvey Surcharge Rider:</u> The billing shall reflect adjustments in accordance with provisions of the Hurricane Harvey Surcharge Rider, Rate Schedule HARV-Rider, if applicable.

<u>Natural Event Response Rider</u>: The billing shall reflect adjustments in accordance with provisions of the Natural Event Response Rider, Rate Schedule NER.

<u>Pipeline Integrity Testing Rider</u>: The billing shall reflect adjustments in accordance with provisions of the Pipeline Integrity Testing Rider, Rate Schedule PIT.

Rate Case Expense Rider: The billing shall reflect adjustments in accordance with provisions of the Rate Case Expense Surcharge Rider, Rate Schedule RCE.

<u>Taxes</u>: Plus applicable taxes and fees (including franchise fees) related to above.

SOI Exhibit A Proposed Rate Schedules and Tariffs Page 15 of 115

Texas Gas Service Company, a Division of ONE Gas, Inc. Central-Gulf Service Area

RATE SCHEDULE CNG-1 Page 2 of 2

COMPRESSED NATURAL GAS SERVICE RATE (Continued)

CONDITIONS

Subject to all applicable laws and orders, and the Company's rules and regulations on file with the regulatory authority.

The Company's Average Payment Plan, also known as the Average Bill Calculation Plan (ABC/APP Plan), is not available to customers served on this rate schedule.

This rate does not include any road use fees, permits, or taxes etc. It provides for the delivery of uncompressed natural gas only.

Customer must provide affidavit to the Company certifying that the gas delivered will be compressed for use as motor fuel.

Compressor station subject to inspection by Company engineers.

Rate Schedule 1-INC Page 1 of 5

COST OF GAS CLAUSE

A. APPLICABILITY

This Cost of Gas Clause shall apply to all general service rate schedules of Texas Gas Service Company, a Division of ONE Gas, Inc. ("Company") in all incorporated areas of its Central-Gulf Service Area including Austin, Bayou Vista, Beaumont, Bee Cave, Cedar Park, Cuero, Dripping Springs, Galveston, Gonzales, Groves, Jamaica Beach, Kyle, Lakeway, Lockhart, Luling, Nederland, Nixon, Port Arthur, Port Neches, Rollingwood, Shiner, Sunset Valley, West Lake Hills and Yoakum, Texas.

B. <u>DEFINITIONS</u>

- 1. Cost of Gas The rate per billing unit or the total calculation under this clause, consisting of the Commodity Cost, the Reconciliation Component, any surcharges or refunds, Uncollectible Cost of Gas, and the revenue associated fees and taxes.
- 2. Commodity Cost The Cost of Purchased Gas multiplied by the Purchase/Sales Ratio plus an adjustment for any known and quantifiable under or over collection prior to the end of the reconciliation period.
- 3. Cost of Purchased Gas The estimated cost for gas purchased by the Company from its suppliers or the estimated weighted average cost for gas purchased by the Company from all sources where applicable. Such cost shall include not only the purchase cost of natural gas, but shall also include all reasonable costs for services such as gathering, treating, processing, transportation, capacity and/or supply reservation, storage, balancing including penalties, and swing services necessary for the movement of gas to the Company's city gate delivery points. The cost of purchased gas may also include costs related to the purchase and transportation of Renewable Natural Gas (RNG). Renewable Natural Gas is the term used to describe pipeline-quality biomethane produced from biomass. The cost of purchased gas shall also include gains and losses from the utilization of natural gas financial instruments that are executed by the Company for the purpose of mitigating price volatility. Companies affiliated with the Company shall not be allowed to charge fees for transactions related to natural gas financial instruments utilized for purposes in this Cost of Gas Clause and hence cannot realize a profit in this regard.
- 4. Reconciliation Component The amount to be returned to or recovered from customers each month from October through June as a result of the Reconciliation Audit.
- 5. Reconciliation Audit An annual review of the Company's books and records for each 12-month period ending with the production month of June to determine the amount of over or under collection occurring during such 12-month period. The audit shall determine: (a) the total amount paid for gas purchased by the Company (per Section B(3) above) to provide service to its general service customers during the period, including prudently incurred gains or losses on the use of natural gas financial instruments; (b) the revenues received from operation of the provisions of this Cost of Gas Clause reduced by the amount of revenue associated fees and taxes paid by the Company on those revenues; (c) the total amount of refunds made to customers during the period and any other revenues or credits received by the Company as a result of relevant gas purchases or operation of this Cost of Gas Clause; (d) the total amount accrued

COST OF GAS CLAUSE (Continued)

for imbalances under the transportation rate schedule(s) net of fees and applicable taxes; (e) the total amount of Uncollectible Cost of Gas during the period; and (f) an adjustment, if necessary, to remove lost and unaccounted for gas costs during the period for volumes in excess of 5 percent of purchases.

- 6. Purchase/Sales Ratio A ratio determined by dividing the total volumes purchased for general service customers during the 12-month period ending June 30 by the sum of the volumes sold to general service customers. For the purpose of this computation all volumes shall be stated at 14.65 psia. Such ratio as determined shall in no event exceed 1.0526 i.e. 1/(1 0.05) unless expressly authorized by the applicable Regulatory Authority.
- 7. Reconciliation Account The account maintained by the Company to assure that over time it will neither over nor under collect revenues as a result of the operation of the Cost of Gas Clause. Entries shall be made monthly to reflect: (a) the total amounts paid to the Company's supplier(s) for gas applicable to general service customers as recorded on the Company's books and records (per Section B(3) above), including prudently incurred gains or losses on the use of natural gas financial instruments; (b) the revenues produced by the operation of this Cost of Gas Clause; (c) refunds, payments, or charges provided for herein or as approved by the regulatory authority; (d) amounts accrued pursuant to the treatment of imbalances under any transportation rate schedule(s), (e) total amount of Uncollectible Cost of Gas during the period; and (f) an adjustment, if necessary, for lost and unaccounted for gas during the period in excess of 5 percent of purchases.
- 8. Uncollectible Cost of Gas The amounts actually written off after the effective date of this rate schedule related to cost of gas will be tracked along with any subsequent recovery/credits related to the Cost of Gas Clause. Annually the charge offs minus recoveries will be included in the annual reconciliation and factored into the resulting reconciliation component.

C. COST OF GAS

In addition to the cost of service as provided under its general service rate schedules, the Company shall bill each general service customer for the Cost of Gas incurred during the billing period. The Cost of Gas shall be clearly identified on each customer bill.

D. <u>DETERMINATION AND APPLICATION OF THE RECONCILIATION COMPONENT</u>

If the Reconciliation Audit reflects either an over recovery or under recovery of revenues, such amount, plus or minus the amount of interest calculated pursuant to Section E below, if any, shall be divided by the general service sales volumes, adjusted for the effects of weather, growth, and conservation for the period beginning with the October billing cycle through the June billing cycle preceding the filing of the Reconciliation Audit. The Reconciliation Component so determined to collect any revenue shortfall or to return any excess revenue shall be applied, subject to refund, for a 9 month period beginning with the October billing cycle and continuing through the next June billing cycle at which time it will terminate.

Texas Gas Service Company, a Division of ONE Gas, Inc. Central-Gulf Service Area

Rate Schedule 1-INC Page 3 of 5

COST OF GAS CLAUSE (Continued)

E. INTEREST ON FUNDS

Concurrently with the Reconciliation Audit, the Company shall determine the amount by which the Cost of Gas was over or under collected for each month within the period of audit. The Company shall debit or credit to the Reconciliation Account for each month of the reconciliation period: (1) an amount equal to the outstanding over collected balance multiplied by interest of 6 percent per annum compounded monthly; or (2) an amount equal to the outstanding under collected balance multiplied by interest of 6 percent per annum compounded monthly. The Company shall also be allowed to recover a carrying charge calculated based on the arithmetic average of the beginning and ending balance of gas in storage inventory for the prior calendar month times the authorized rate of return.

F. SURCHARGE OR REFUND PROCEDURES

In the event that the rates and charges of the Company's supplier are retroactively reduced and a refund of any previous payments is made to the Company, the Company shall make a similar refund to its general service customers. Similarly, the Company may surcharge its general service customers for retroactive payments made for gas previously delivered into the system. Any surcharge or refund amount will be included in the Reconciliation Account.

Refunds or charges shall be entered into the Reconciliation Account as they are collected from or returned to the customers. For the purpose of this Section F, the entry shall be made on the same basis used to determine the refund or charge component of the Cost of Gas and shall be subject to the calculation set forth in Section (E) Interest on Funds, above.

G. COST OF GAS STATEMENT

The Company shall file a Cost of Gas Statement with the Regulatory Authority by the beginning of each billing month. The Cost of Gas Statement shall set forth: (a) the estimated Cost of Purchased Gas; (b) that cost multiplied by the Purchase/Sales Ratio; (c) the amount of the Cost of Gas caused by any surcharge or refund; (d) the Reconciliation Component; (e) the revenue associated fees and taxes to be applied to revenues generated by the Cost of Gas; (f) the Cost of Gas calculation, including gains and losses from hedging activities for the month; and (g) the beginning and ending date of the billing period. The statement shall include all data necessary for the Regulatory Authority to review and verify the calculations of the Cost of Gas.

H. ANNUAL RECONCILIATION REPORT

The Company shall file an Annual Reconciliation Report with the Regulatory Authority which shall include but not necessarily be limited to:

Supersedes Rate Schedule Dated

COST OF GAS CLAUSE (Continued)

- 1. A tabulation of volumes of gas purchased and costs incurred listed by account or type of gas, supplier and source by month for the 12 months ending June 30.
- 2. A tabulation of gas units sold to general service customers and related Cost of Gas Clause revenues.
- 3. A tabulation of all other costs and refunds made during the year and their effect on the Cost of Gas Clause to date.
- 4. A description of the hedging activities conducted each month during the 12 months ending June 30, including the types of transaction used, resulting gains and losses, any changes in the hedging program implemented during the period and the rationale for the changes. The report should include the customer impact of hedging activities stated as costs to the average residential and commercial customer during the period.
- 5. A description of the imbalance payments made to and received from the Company's transportation customers within the service area, including monthly imbalances incurred, the monthly balances resolved, and the amount of the cumulative imbalance. The description should reflect the system imbalance and imbalance amount for each supplier using the Company's distribution system during the reconciliation period.
- 6. A tabulation of uncollectible cost of gas during the period and its effect on the Cost of Gas Clause to date.

This report shall be filed concurrently with the Cost of Gas Statement for October. If the Regulatory Authority thereafter determines that an adjustment to the Reconciliation Component is required, such adjustment shall be included in the Reconciliation Component for the next annual Reconciliation Audit following the date of such determination.

Supersedes Rate Schedule Dated

1-INC dated May 22, 2019 (City of Beaumont)

RATE SCHEDULE RCE

RATE CASE EXPENSE SURCHARGE

A. <u>APPLICABILITY</u>

The Rate Case Expense Surcharge (RCE) rate as set forth in Section (B) below is implemented pursuant to City Ordinances, other regulatory approval or by operation of law. This rate shall apply to the following rate schedules of Texas Gas Service Company, a Division of ONE Gas, Inc. ("Company") in the incorporated areas served in the Central-Gulf Service Area including Austin, Bayou Vista, Beaumont, Bee Cave, Cedar Park, Cuero, Dripping Springs, Galveston, Gonzales, Groves, Jamaica Beach, Kyle, Lakeway, Lockhart, Luling, Nederland, Nixon, Port Arthur, Port Neches, Rollingwood, Shiner, Sunset Valley, West Lake Hills and Yoakum, Texas: 10, 20, 30, 40, 48, C-1, CNG-1, and T-1.

B. RCE RATE

All Ccf during each billing period: \$\\$ per Ccf

This rate will be in effect until all approved and expended rate case expenses are recovered under the applicable rate schedules. The Company will recover \$ in actual expense and up to \$ in estimated expense, not to exceed actual expense. The Rate Case Expense Surcharge will be a separate line item on the bill.

C. OTHER ADJUSTMENTS

Taxes: Plus applicable taxes and fees (including franchises fees) related to above.

D. CONDITIONS

SOI Exhibit A
Proposed Rate Schedules and Tariffs
Page 21 of 115

Texas Gas Service Company, a Division of ONE Gas, Inc. Central-Gulf Service Area

RATE SCHEDULE 1Z

RESIDENTIAL SERVICE RATE

APPLICABILITY

Applicable to a residential customer or builder in a single dwelling, or in a dwelling unit of a multiple dwelling or residential apartment, for domestic purposes. A residential consumer includes an individually-metered residential unit or dwelling that is operated by a public housing agency acting as an administrator of public housing programs under the direction of the U.S. Department of Housing and Urban Development and builders prior to sale or re-sale of a property for domestic purposes. This rate is only available to full requirements customers of Texas Gas Service Company, a Division of ONE Gas, Inc.

TERRITORY

Environs of the Central-Gulf Service Area, which includes the unincorporated areas of Austin, Bayou Vista, Beaumont, Bee Cave, Buda, Cedar Park, Cuero, Dripping Springs, Galveston, Gonzales, Groves, Jamaica Beach, Kyle, Lakeway, Lockhart, Luling, Nederland, Nixon, Port Arthur, Port Neches, Rollingwood, Shiner, Sunset Valley, West Lake Hills and Yoakum, Texas.

COST OF SERVICE RATE CHOICES

During each monthly billing period:

For Rate A

A customer charge per meter per month of \$14.00 plus All Ccf per monthly billing period @ \$0.55702 per Ccf

For Rate B

A customer charge per meter per month of \$27.58 plus All Ccf per monthly billing period @ \$0.10435 per Ccf

CUSTOMER CHOICE RATE PLACEMENT

Each customer's individual rate schedule will be determined based on the annual volume at the customer's service location for the prior twelve (12)-month period. An anticipated annual usage level assessment will be conducted on each new service and for existing service that has less than twelve (12) months of service. The results of this assessment will decide the initial rate choice for the new account.

If the customer's service location's annual volume is less than 360 Ccf, then the customer's account will be placed on Rate A.

If the customer's service location's annual volume is 360 Ccf or greater, then the customer's account will be placed on Rate B.

A customer may switch rate choices at any time during the year provided that the customer agrees to remain on the alternative rate for a period of no less than twelve (12) months after switching options. Changes will be effective with the Customer's next scheduled bill.

CONDITIONS

RATE SCHEDULE 7Z

UNMETERED GAS LIGHT SERVICE RATE

APPLICABILITY

Applicable to any Customer on Texas Gas Service Company, a Division of ONE Gas, Inc.'s system requiring natural gas service for gas lighting only, without the use of metering device. Gas service is only available to Customers utilizing standard gas lighting equipment manufactured with an orifice burner assembly or equivalent that is intended for lighting of sidewalks and other walk ways. The Company, in its sole discretion, shall determine if Customer's lighting equipment qualifies for this tariff and shall contract with Customer for the appropriate monthly charge based upon Customer's complete installation of gas lighting equipment. Gas service under this rate schedule is available only with the Company as the sole supplier of gas for Customer and is not available for resale to others or for standby or supplemental service. This rate is only available to full requirements customers of Texas Gas Service Company, a Division of ONE Gas, Inc.

TERRITORY

Environs of the Central-Gulf Service Area which includes the unincorporated areas of Austin, Bayou Vista, Beaumont, Bee Cave, Buda, Cedar Park, Cuero, Dripping Springs, Galveston, Gonzales, Groves, Jamaica Beach, Kyle, Lakeway, Lockhart, Luling, Nederland, Nixon, Port Arthur, Port Neches, Rollingwood, Shiner, Sunset Valley, West Lake Hills and Yoakum, Texas.

COST OF SERVICE RATE

The total hourly rated consumption of all gas lighting equipment included, expressed in Ccf at the location, shall be multiplied by 730 for gas lighting equipment that runs continuously or 365 for gas lighting equipment with a light sensor, to determine the average monthly consumption of the service. The result, rounded to the next highest Ccf, shall then be billed the rates provided in this rate schedule:

Residential \$ 0.10435 per Ccf Commercial \$ 0.12678 per Ccf Industrial \$ 0.12703 per Ccf Public Authority \$ 0.12551 per Ccf

OTHER ADJUSTMENTS

<u>Cost of Gas Component</u>: The basic rates for cost of service set forth above shall be increased by the amount of the Cost of Gas Component for the billing month computed in accordance with the provisions of Rate Schedule 1-ENV.

Taxes: Plus applicable taxes and fees related to above.

CONDITIONS

The Customer shall ensure that the installation of lighting equipment conforms to industry safety standards. The Company reserves the right to review Customer's installation of lighting equipment from time to time to determine if it conforms to terms and conditions as set forth in this tariff and the executed service agreement with the Customer. Customer shall notify Company in writing within 30 days of any change in number of gas lights or other material changes made to the gas lighting installation.

Subject to all applicable laws and orders, and the Company's rules and regulations on file with the regulatory authority.

Texas Gas Service Company, a Division of ONE Gas, Inc. Central-Gulf Service Area

RATE SCHEDULE C-1-ENV Page 1 of 2

ELECTRICAL COGENERATION RATE

APPLICABILITY

Service under this rate schedule is available to any customers who use natural gas for the purpose of cogeneration or the use of fuel cell technology. Cogeneration is defined as the use of thermal energy to produce electricity with recapture of by-product heat in the form of steam, exhaust heat, etc. for industrial process use, space heating, food processing or other purposes.

TERRITORY

Environs of the Central-Gulf Service Area, which includes the unincorporated areas of Austin, Bayou Vista, Beaumont, Bee Cave, Buda, Cedar Park, Cuero, Dripping Springs, Galveston, Gonzales, Groves, Jamaica Beach, Kyle, Lakeway, Lockhart, Luling, Nederland, Nixon, Port Arthur, Port Neches, Rollingwood, Shiner, Sunset Valley, West Lake Hills and Yoakum, Texas.

COST OF SERVICE RATE

During each monthly billing period:

| A customer charge per meter per month of | \$ 104.70 plus |
|--|----------------|
|--|----------------|

| For the First | 5,000 Ccf/Month | \$0.07720 per Ccf |
|---------------|-------------------|-------------------|
| For the Next | 35,000 Ccf/Month | \$0.06850 per Ccf |
| For the Next | 60,000 Ccf/Month | \$0.05524 per Ccf |
| All Over | 100,000 Ccf/Month | \$0.04016 per Ccf |

OTHER ADJUSTMENTS

<u>Cost of Gas Component</u>: The basic rates for cost of service set forth above shall be increased by the amount of the Cost of Gas Component for the billing month computed in accordance with the provisions of Rate Schedule 1-ENV.

<u>Excess Deferred Income Taxes Rider:</u> The billing shall reflect adjustments in accordance with provisions of the Excess Deferred Income Taxes Rider, Rate Schedule EDIT-Rider.

<u>Hurricane Harvey Surcharge Rider:</u> The billing shall reflect adjustments in accordance with provisions of the Hurricane Harvey Surcharge Rider, Rate Schedule HARV-Rider, if applicable.

<u>Natural Event Response Rider</u>: The billing shall reflect adjustments in accordance with provisions of the Natural Event Response Rider, Rate Schedule NER.

<u>Rate Case Expense Rider</u>: The billing shall reflect adjustments in accordance with provisions of the Rate Case Expense Surcharge Rider, Rate Schedule RCE-ENV.

<u>Pipeline Integrity Testing Rider</u>: The billing shall reflect adjustments in accordance with provisions of the Pipeline Integrity Testing Rider, Rate Schedule PIT.

<u>Taxes</u>: Plus applicable taxes and fees related to above.

Texas Gas Service Company, a Division of ONE Gas, Inc. Central-Gulf Service Area RATE SCHEDULE C-1-ENV Page 2 of 2

ELECTRICAL COGENERATION RATE (Continued)

CONDITIONS

Gas taken under this rate shall be used exclusively for the purpose of cogeneration and fuel cell technology as defined in the Applicability section of this rate schedule and not for other purposes. The gas taken under this rate will be separately metered.

This rate will not be available for standby use.

The curtailment priority of any customer served under this rate schedule shall be the same as the curtailment priority which would pertain if gas were used directly to provide energy for uses as defined and listed in the Company's curtailment plan.

SOI Exhibit A Proposed Rate Schedules and Tariffs Page 34 of 115

Texas Gas Service Company, a Division of ONE Gas, Inc. Central-Gulf Service Area

RATE SCHEDULE CNG-1-ENV Page 1 of 2

COMPRESSED NATURAL GAS SERVICE RATE

APPLICABILITY

Applicable to any non-residential customer for usage where customer purchases natural gas which will be compressed and used as a motor fuel. Service will be separately metered. This rate does <u>not</u> include compression by Texas Gas Service Company, a Division of ONE Gas, Inc. (the "Company") beyond normal meter sales pressure.

TERRITORY

Environs of the Central-Gulf Service Area, which includes the unincorporated areas of Austin, Bayou Vista, Beaumont, Bee Cave, Buda, Cedar Park, Cuero, Dripping Springs, Galveston, Gonzales, Groves, Jamaica Beach, Kyle, Lakeway, Lockhart, Luling, Nederland, Nixon, Port Arthur, Port Neches, Rollingwood, Shiner, Sunset Valley, West Lake Hills, and Yoakum, Texas.

COST OF SERVICE RATE

During each monthly billing period:

A customer charge per meter per month of \$ 192.63 plus

All Ccf per monthly billing period @ \$0.06684 per Ccf

OTHER ADJUSTMENTS

<u>Cost of Gas Component</u>: The basic rates for cost of service set forth above shall be increased by the amount of the Cost of Gas Component for the billing month computed in accordance with the provisions of Rate Schedule 1-ENV.

<u>Excess Deferred Income Taxes Rider:</u> The billing shall reflect adjustments in accordance with provisions of the Excess Deferred Income Taxes Rider, Rate Schedule EDIT-Rider.

<u>Hurricane Harvey Surcharge Rider:</u> The billing shall reflect adjustments in accordance with provisions of the Hurricane Harvey Surcharge Rider, Rate Schedule HARV-Rider, if applicable.

<u>Natural Event Response Rider</u>: The billing shall reflect adjustments in accordance with provisions of the Natural Event Response Rider, Rate Schedule NER.

<u>Pipeline Integrity Testing Rider</u>: The billing shall reflect adjustments in accordance with provisions of the Pipeline Integrity Testing Rider, Rate Schedule PIT.

<u>Rate Case Expense Rider</u>: The billing shall reflect adjustments in accordance with provisions of the Rate Case Expense Surcharge Rider, Rate Schedule RCE-ENV.

Taxes: Plus applicable taxes and fees related to above.

Texas Gas Service Company, a Division of ONE Gas, Inc. Central-Gulf Service Area RATE SCHEDULE CNG-1-ENV Page 2 of 2

COMPRESSED NATURAL GAS SERVICE RATE (Continued)

CONDITIONS

Subject to all applicable laws and orders and the Company's rules and regulations on file with the regulatory authority.

The Companys Average Payment Plan, also known as the Average Bill Calculation Plan (ABC/APP Plan), is not available to customers served on this rate schedule.

This rate does not include any road use fees, permits, or taxes etc. It provides for the delivery of uncompressed natural gas only.

Customer must provide an affidavit to the Company certifying that the gas delivered will be compressed for use as motor fuel.

The Customer's compressor station is subject to inspection by Company engineers.

Texas Gas Service Company, a Division of ONE Gas, Inc. Central-Gulf Service Area

Rate Schedule 1-ENV Page 1 of 4

COST OF GAS CLAUSE

A. <u>APPLICABILITY</u>

This Cost of Gas Clause shall apply to all general service rate schedules of Texas Gas Service Company, a Division of ONE Gas, Inc. ("Company") in all unincorporated areas of its Central-Gulf Service Area including Austin, Bayou Vista, Beaumont, Bee Cave, Buda, Cedar Park, Cuero, Dripping Springs, Galveston, Gonzales, Groves, Jamaica Beach, Kyle, Lakeway, Lockhart, Luling, Nederland, Nixon, Port Arthur, Port Neches, Rollingwood, Shiner, Sunset Valley, West Lake Hills and Yoakum, Texas.

B. DEFINITIONS

- 1. Cost of Gas The rate per billing unit or the total calculation under this clause, consisting of the Commodity Cost, the Reconciliation Component, any surcharges or refunds, Uncollectible Cost of Gas, and the revenue associated fees and taxes.
- 2. Commodity Cost The Cost of Purchased Gas multiplied by the Purchase/Sales Ratio plus an adjustment for any known and quantifiable under or over collection prior to the end of the reconciliation period.
- 3. Cost of Purchased Gas The estimated cost for gas purchased by the Company from its suppliers or the estimated weighted average cost for gas purchased by the Company from all sources where applicable. Such cost shall include not only the purchase cost of natural gas but shall also include all reasonable costs for services such as gathering, treating, processing, transportation, capacity and/or supply reservation, storage, balancing including penalties, and swing services necessary for the movement of gas to the Company's city gate delivery points. The cost of purchased gas may also include costs related to the purchase and transportation of Renewable Natural Gas (RNG). Renewable Natural Gas is the term used to describe pipeline-quality biomethane produced from biomass. The cost of purchased gas shall not include the cost of financial instruments unless the use of such financial instruments is approved in advance and in writing by the Director of the Oversight and Safety Division of the Railroad Commission of Texas. Such approval would be requested as part of the Company's annual gas purchase plan, which shall be submitted annually to the Commission no later than June 15.
- 4. Reconciliation Component The amount to be returned to or recovered from customers each month from October through June as a result of the Reconciliation Audit.
- 5. Reconciliation Audit An annual review of the Company's books and records for each 12-month period ending with the production month of June to determine the amount of over or under collection occurring during such 12-month period. The audit shall determine: (a) the total amount paid for gas purchased by the Company (per Section B(3) above) to provide service to its general service customers during the period, including prudently incurred gains or losses on the approved use of natural gas financial instruments; (b) the revenues received from operation of the provisions of this Cost of Gas Clause reduced by the amount of revenue associated fees and taxes paid by the Company on those revenues; (c) the total amount of refunds made to customers during the period and any other revenues or credits received by the Company as a result of relevant gas purchases or operation of this Cost of Gas Clause; (d) the total amount accrued for imbalances under the transportation rate schedule(s) net of fees and applicable taxes; (e) the total amount of Uncollectible Cost of Gas during the period; and (f) an adjustment, if necessary, to remove lost and unaccounted for gas costs during the period for volumes in excess of 5 percent of purchases.

Proposed Rate Schedules and Tariffs
Page 37 of 115

Texas Gas Service Company, a Division of ONE Gas, Inc. Central-Gulf Service Area

Rate Schedule 1-ENV Page 2 of 4

COST OF GAS CLAUSE (Continued)

- 6. Purchase/Sales Ratio A ratio determined by dividing the total volumes purchased for general service customers during the 12 month period ending June 30 by the sum of the volumes sold to general service customers. For the purpose of this computation all volumes shall be stated at 14.65 psia. Such ratio as determined shall in no event exceed 1.0526 i.e. 1/(1 0.05) unless expressly authorized by the applicable Regulatory Authority.
- 7. Reconciliation Account The account maintained by the Company to assure that over time it will neither over nor under collect revenues as a result of the operation of the Cost of Gas Clause. Entries shall be made monthly to reflect: (a) the total amounts paid to the Company's supplier(s) for gas applicable to general service customers as recorded on the Company's books and records (per Section B(3) above), including prudently incurred gains or losses on the use of approved natural gas financial instruments; (b) the revenues produced by the operation of this Cost of Gas Clause; (c) refunds, payments, or charges provided for herein or as approved by the regulatory authority; (d) amounts accrued pursuant to the treatment of imbalances under any transportation rate schedule(s); (e) total amount of Uncollectible Cost of Gas during the period; and (f) an adjustment, if necessary, for lost and unaccounted for gas during the period in excess of 5 percent of purchases.
- 8. Uncollectible Cost of Gas The amounts actually written off after the effective date of this rate schedule related to cost of gas will be tracked along with any subsequent recovery/credits related to the Cost of Gas Clause. Annually the charge offs minus recoveries will be included in the annual reconciliation and factored into the resulting reconciliation component.

C. COST OF GAS

In addition to the cost of service as provided under its general service rate schedules, the Company shall bill each general service customer for the Cost of Gas incurred during the billing period. The Cost of Gas shall be clearly identified on each customer bill.

D. DETERMINATION AND APPLICATION OF THE RECONCILIATION COMPONENT

If the Reconciliation Audit reflects either an over recovery or under recovery of revenues, such amount, plus or minus the amount of interest calculated pursuant to Section E below, if any, shall be divided by the general service sales volumes, adjusted for the effects of weather, growth, and conservation for the period beginning with the October billing cycle through the June billing cycle preceding the filing of the Reconciliation Audit. The Reconciliation Component so determined to collect any revenue shortfall or to return any excess revenue shall be applied, subject to refund, for a 9 month period beginning with the October billing cycle and continuing through the next June billing cycle at which time it will terminate.

E. INTEREST ON FUNDS

Concurrently with the Reconciliation Audit, the Company shall determine the amount by which the Cost of Gas was over or under collected for each month within the period of audit. The Company shall debit or credit to the Reconciliation Account for each month of the reconciliation period: (1) an amount equal to the outstanding over collected balance multiplied by interest of 6 percent per annum compounded monthly; or (2) an amount equal to the outstanding under collected balance multiplied by interest of 6 percent per annum

COST OF GAS CLAUSE (Continued)

compounded monthly. The Company shall also be allowed to recover a carrying charge calculated based on the arithmetic average of the beginning and ending balance of gas in storage inventory for the prior calendar month times the authorized rate of return.

F. SURCHARGE OR REFUND PROCEDURES

In the event that the rates and charges of the Company's supplier are retroactively reduced and a refund of any previous payments is made to the Company, the Company shall make a similar refund to its general service customers. Similarly, the Company may surcharge its general service customers for retroactive payments made for gas previously delivered into the system. Any surcharge or refund amount will be included in the Reconciliation Account.

Refunds or charges shall be entered into the Reconciliation Account as they are collected from or returned to the customers. For the purpose of this Section F, the entry shall be made on the same basis used to determine the refund or charge component of the Cost of Gas and shall be subject to the calculation set forth in Section (E) Interest on Funds, above.

G. COST OF GAS STATEMENT

The Company shall file a Cost of Gas Statement with the Regulatory Authority by the beginning of each billing month. The Cost of Gas Statement shall set forth: (a) the estimated Cost of Purchased Gas; (b) that cost multiplied by the Purchase/Sales Ratio; (c) the amount of the Cost of Gas caused by any surcharge or refund; (d) the Reconciliation Component; (e) the revenue associated fees and taxes to be applied to revenues generated by the Cost of Gas; (f) the Cost of Gas calculation, including gains and losses from approved hedging activities for the month; and (g) the beginning and ending date of the billing period. The statement shall include all data necessary for the Regulatory Authority to review and verify the calculations of the Cost of Gas.

H. ANNUAL RECONCILIATION REPORT

The Company shall file an Annual Reconciliation Report with the Regulatory Authority which shall include but not necessarily be limited to:

- 1. A tabulation of volumes of gas purchased and costs incurred listed by account or type of gas, supplier and source by month for the 12 months ending June 30.
- 2. A tabulation of gas units sold to general service customers and related Cost of Gas Clause revenues.
- 3. A tabulation of all other costs and refunds made during the year and their effect on the Cost of Gas Clause to date.

- 4. A description of the hedging activities conducted each month during the 12 months ending June 30, including the types of transaction used, resulting gains and losses, any changes in the hedging program implemented during the period and the rationale for the changes. The report should include the customer impact of hedging activities stated as costs to the average residential and commercial customer during the period.
- 5. A description of the imbalance payments made to and received from the Company's transportation customers within the service area, including monthly imbalances incurred, the monthly balances resolved, and the amount of the cumulative imbalance. The description should reflect the system imbalance and imbalance amount for each supplier using the Company's distribution system during the reconciliation period.
- 6. A tabulation of uncollectible cost of gas during the period and its effect on the Cost of Gas Clause to

This report shall be filed concurrently with the Cost of Gas Statement for October. If the Regulatory Authority thereafter determines that an adjustment to the Reconciliation Component is required, such adjustment shall be included in the Reconciliation Component for the next annual Reconciliation Audit following the date of such determination.

RATE SCHEDULE RCE-ENV

RATE CASE EXPENSE SURCHARGE

A. APPLICABILITY

The Rate Case Expense ("RCE") Surcharge rate as set forth in Section (B) below is pursuant to Gas Utilities Docket No.: Statement of Intent Filed by Texas Gas Service Company, a Division of ONE Gas, Inc. to Increase Gas Utility Rates Within the Unincorporated Areas of the Central Texas Service Area and Gulf Coast Service Area and, Final Order Finding of Fact No.. This rate shall apply to the following rate schedules of the Company in the unincorporated areas served in the Central-Gulf Service Area including Austin, Bayou Vista, Beaumont, Bee Cave, Buda, Cedar Park, Cuero, Dripping Springs, Galveston, Gonzales, Groves, Jamaica Beach, Kyle, Lakeway, Lockhart, Luling, Nederland, Nixon, Port Arthur, Port Neches, Rollingwood, Shiner, Sunset Valley, West Lake Hills and Yoakum, Texas: 1Z, 2Z, 3Z, 4H, 4Z, C-1-ENV, CNG-1-ENV, and T-1-ENV.

B. RCE RATE

All Ccf during each billing period: \$ per Ccf

This rate will be in effect until all approved and expended rate case expenses are recovered under the applicable rate schedules. The Company will recover \$ in actual expense and up to \$ in estimated expense, not to exceed actual expense. The Rate Case Expense Surcharge will be a separate line item on the bill.

C. OTHER ADJUSTMENTS

Taxes: Plus applicable taxes and fees related to above.

D. <u>CONDITIONS</u>

Subject to all applicable laws and orders, and the Company's rules and regulations on file with the regulatory authority.

E. COMPLIANCE

The Company shall file an annual rate case expense reconciliation report within 90 days after each calendar year end until and including the calendar year end in which the rate case expenses are fully recovered. The Company shall file the report with the Railroad Commission of Texas addressed to the Director of Oversight and Safety Division, Gas Services Department and referencing Gas Utilities Docket No. . Rate Case Expense Recovery Report. The report shall detail the monthly collections for RCE surcharge by customer class and show the outstanding balance. Reports for the Commission should be filed electronically at GUD Compliance@rrc.texas.gov or at the following address:

Compliance Filing
Director of Oversight and Safety Division
Gas Services Dept.
Railroad Commission of Texas
P.O. Box 12967
Austin, TX 78711-2967

RATE SCHEDULE EDIT-RIDER

EXCESS DEFERRED INCOME TAX CREDIT

A. APPLICABILITY

This Excess Deferred Income Tax Credit applies to all general service rate schedules of Texas Gas Service Company, a Division of ONE Gas, Inc. ("Company") currently in force in the Company's Central-Gulf Service Area within the incorporated and unincorporated areas of Austin, Bayou Vista, Beaumont, Bee Cave, Buda (environs only), Cedar Park, Cuero, Dripping Springs, Galveston, Gonzales, Groves, Jamaica Beach, Kyle, Lakeway, Lockhart, Luling, Nederland, Nixon, Port Arthur, Port Neches, Rollingwood, Shiner, Sunset Valley, West Lake Hills and Yoakum, Texas: 10, 20, 30, 40, 48, C-1, CNG-1, 1Z, 2Z, 3Z, 4H, 4Z, C-1-ENV, CNG-1-ENV, T-1, and T-1-ENV.

B. <u>CALCULATION OF CREDIT</u>

The annual amortization of the regulatory liability for excess deferred income taxes resulting from the Tax Cuts and Jobs Act of 2017 and in compliance with GUD No. 10695, will be credited to customers annually on a one-time, per bill basis and will show as a separate line item on the customer's bill until fully amortized.

EDIT CREDIT – The total amount, if any, of the credit in a given year will be determined by:

- The average rate assumption method ("ARAM") as required by the Tax Cuts and Jobs Act of 2017 Section 13001(d) for protected property; and
- A 10-year amortization for nonprotected property.

TRUE-UP ADJUSTMENT – The Excess Deferred Income Tax credit shall be trued-up annually. The True-Up Adjustment will be the difference between the amount of that year's EDIT Credit and the amount actually credited to customers.

EDIT CREDIT PER CUSTOMER – The EDIT credit per customer will be determined by allocating that year's credit, plus/minus any prior year true up adjustment, among the customer classes utilizing the same class revenue allocation as approved in the most recent general rate case, and then by dividing each class's portion by the number of customers in that class.

C. <u>EDIT CREDIT PER CUSTOMER</u>

Residential: \$
Commercial: \$
Industrial: \$
Public Authority: \$
Public Schools Space Heat: \$

Taxes: Plus applicable taxes and fees (including franchises fees) related to above.

D. OTHER ADJUSTMENTS

Taxes: Plus applicable taxes and fees (including franchise fees) related to above.

RATE SCHEDULE EDIT-RIDER

EXCESS DEFERRED INCOME TAX CREDIT (Continued)

E. ANNUAL FILING

The Company shall make a filing with the Commission each year no later than December 31, including the following information:

- a. the total dollar amount of that year's EDIT Credit;
- b. the total dollar amount actually credited to customers;
- c. true-up amount, if any, due to the difference between items a. and b., above;
- d. the amount of the upcoming year's EDIT Credit; and
- e. the amounts of the upcoming year's EDIT Credit per Customer.

F. CONDITIONS

RATE SCHEDULE HARV-RIDER

HURRICANE HARVEY SURCHARGE

A. <u>APPLICABILITY</u>

The Hurricane Harvey Surcharge rate as set forth in Section (B) below is for the recovery of losses incurred by the Company as a direct result of Hurricane Harvey and not recoverable from any other source. The rate shall apply to the following gas sales and standard transportation rate schedules of Texas Gas Service Company, a Division of ONE Gas, Inc. ("Company") currently in force in the Company's Central-Gulf Service Area within the incorporated and unincorporated areas of Austin, Bayou Vista, Beaumont, Bee Cave, Buda (environs only), Cedar Park, Cuero, Dripping Springs, Galveston, Gonzales, Groves, Jamaica Beach, Kyle, Lakeway, Lockhart, Luling, Nederland, Nixon, Port Arthur, Port Neches, Rollingwood, Shiner, Sunset Valley, West Lake Hills and Yoakum, Texas: 10, 20, 30, 40, 48, C-1, CNG-1, 1Z, 2Z, 3Z, 4H, 4Z, C-1-ENV, CNG-1-ENV, T-1, and T-1-ENV.

B. SURCHARGE RATE

All Ccf during each billing period: \$0.00182 per Ccf

This rate will be in effect until all approved and expended Hurricane Harvey costs and associated rate case expenses are recovered under the applicable rate schedules.

C. OTHER ADJUSTMENTS

Taxes: Plus applicable taxes and fees (including franchise fees) related to above.

D. CONDITIONS

Subject to all applicable laws and orders, and the Company's rules and regulations on file with the regulatory authority.

E. COMPLIANCE

TGS shall file a reconciliation report annually on or before December 31, commencing in 2020. TGS shall file the report with the Railroad Commission of Texas, addressed to the Director of the Oversight and Safety Division and referencing Gas Utilities Docket No. _____, Hurricane Harvey Surcharge Recovery Report. The report shall include:

- (1) The volumes used by month by customer class during the applicable period,
- (2) The amount of surcharge recovered, by month
- (3) The outstanding balance, by month

Texas Gas Service Company, a Division of ONE Gas, Inc. Central-Gulf Service Area RATE SCHEDULE NER Page 1 of 3

NATURAL EVENT RESPONSE (NER) RIDER

PURPOSE

The purpose of this Natural Event Response Rider is to authorize Texas Gas Service Company, a Division of ONE Gas, Inc. (the "Company") to defer and seek recovery of the reasonable and necessary expenses incurred by the Company in responding to and restoring natural gas service following a hurricane, tropical storm, tornado, earth quake, ice storm, flood or other wind-related or water-related event ("Event"), net of any related insurance reimbursements. These natural event response expenses shall be deferred when incurred and subsequently recovered through a separate monthly volumetric charge (the Natural Event Response or "NER" Surcharge) that shall be shown as a separate line item on the customer's monthly bill and calculated for each customer class as described below. Regular Company labor and capital expenditures associated with a Natural Event Response shall continue to be recovered through base rates and any interim rate adjustments implemented pursuant to Section 104.301 of the Gas Utility Regulatory Act.

APPLICABILITY

This Rider shall be applied to all gas sales and transportation customers within the service territory designated below, except special contract customers.

TERRITORY

This Rider shall apply throughout the Company's Central-Gulf Service Area ("CGSA"), both within the incorporated municipal limits of Austin, Bayou Vista, Beaumont, Bee Cave, Cedar Park, Cuero, Dripping Springs, Galveston, Gonzales, Groves, Jamaica Beach, Kyle, Lakeway, Lockhart, Luling, Nederland, Nixon, Port Arthur, Port Neches, Rollingwood, Shiner, Sunset Valley and West Lake Hills and Yoakum, Texas (collectively, the "CGSA Cities"), and in the unincorporated areas (environs) adjacent to the CGSA Cities.

QUALIFYING EXPENSES

This Rider applies only to expenses incurred in response to a defined natural event in the CGSA, net of any insurance reimbursements associated with that Event. The operating and maintenance expense items that qualify for recovery under this Rider shall include contractor costs and Company overtime labor; travel, hotel and meal expenses; vehicle expenses; communication expenses; tools, materials and supplies; and any other operating and maintenance expenses reasonably necessary to safely and effectively respond to an event and restore natural gas service. Capital expenditures by the Company, and the regular labor cost of Texas Gas Service Company employees shall not be recovered under this Rider. Lost revenue due to an Event and insurance reimbursements for lost revenue shall not be recovered under this Rider.

Texas Gas Service Company, a Division of ONE Gas, Inc. Central-Gulf Service Area RATE SCHEDULE NER Page 2 of 3

NATURAL EVENT RESPONSE (NER) RIDER (Continued)

DEFERRED ACCOUNTING

The Company is authorized and directed to defer, as a regulatory asset, all Natural Event Response expenses incurred starting on January 1, 2020, and all related insurance reimbursements and revenues specifically collected under this Rider shall be applied to the deferred expense account. The Company shall not earn a return on any regulatory asset created under this provision, and no such regulatory asset shall be included in the Company's invested capital (rate base) for ratemaking purposes.

REQUEST FOR SURCHARGE

Following a defined natural event, the Company shall file a report with the Commission and the CGSA Cities showing all expenses incurred in response to the event, all related insurance reimbursements, and a proposed surcharge calculated as set forth below. The report shall separately identify and list such expenses by account number, expense type and project number. The Commission and the CGSA Cities shall review the report, request supporting documentation, and approve an appropriate surcharge within 120 days.

CALCULATION OF NER SURCHARGES

The Natural Event Response Surcharges established under this Rider shall be designed so as to recover the Total Natural Event Response Expense incurred due to a defined Event, over a proposed recovery period in years which may vary by Event. The surcharge shall be calculated as follows:

The Total NER Expense shall be divided by the proposed recovery period to produce the annual NER Expense.

| Annual NER Expense | = | Total NER Expense |
|--------------------|---|----------------------------------|
| • | | Proposed Recovery Period (Years) |

The Annual NER Expense shall be divided by the estimated average annual usage to produce the NER Surcharge.

NER Surcharge = <u>Annual NER Expense</u> Estimated Annual Usage

The surcharge thus calculated and approved for each event shall remain in place until all approved costs under that event are recovered.

Texas Gas Service Company, a Division of ONE Gas, Inc. Central-Gulf Service Area RATE SCHEDULE NER Page 3 of 3

NATURAL EVENT RESPONSE (NER) RIDER (Continued)

ANNUAL REPORT

On or before January 31st after each calendar year, the Company shall file a report verifying the prior year's collections under this Rider. TGS shall file the report with the CGSA Cities and with the Railroad Commission of Texas, addressed to the Director of the Oversight and Safety Division and referencing the Gas Utilities Docket number(s) approving each surcharge. The report shall include:

- 1. The total amount to be recovered
- 2. The amounts collected during the prior period
- 3. The volumes used by month by customer class during the applicable period;
- 4. The amount of surcharge recovered, by month;
- 5. The outstanding balance by month;
- 6. Any credits or other offset for over-recovery; and
- 7. The remaining balance to be recovered

NOTICE TO AFFECTED CUSTOMERS

When requesting a surcharge under this Rider as set forth above, the Company shall provide written notice to each affected customer of (a) the proposed NER Surcharge ,(b) the number of years the surcharge is expected to be in effect, and (c) the effect the PIT Surcharge is expected to have on the average monthly bill for each affected customer class. The written notice shall be provided in English with Spanish translation available on request, shall be the only information contained on the piece of paper on which it is printed, and may be provided either by separate mailing or by insert included with the Company's monthly billing statements. The notice shall be presumed to be complete three calendar days after the date the separate mailing or billing statement is deposited in a postage-paid, properly addressed wrapper in a post office or official depository under care of the United States Postal Service.

RATE SCHEDULE NER-RIDER

NATURAL EVENT RESPONSE RIDER

A. APPLICABILITY

The Natural Event Response ("NER") surcharge rate as set forth in Section (B) below is for the recovery of costs associated with the operation and maintenance expenses resulting from the Company's response to a natural event as defined in Rate Schedule NER. The rate shall apply to the following gas sales and standard transportation rate schedules of Texas Gas Service Company, a Division of ONE Gas, Inc. currently in force in the Company's Central-Gulf Service Area within the incorporated and unincorporated areas of of Austin, Bayou Vista, Beaumont, Bee Cave, Cedar Park, Cuero, Dripping Springs, Galveston, Gonzales, Groves, Jamaica Beach, Kyle, Lakeway, Lockhart, Luling, Nederland, Nixon, Port Arthur, Port Neches, Rollingwood, Shiner, Sunset Valley and West Lake Hills and Yoakum, Texas: 10, 20, 30, 40, 48, C-1, CNG-1, T-1, 1Z, 2Z, 3Z, 4Z, 4H, C-1-ENV, CNG-1-ENV and T-1-ENV.

B. SURCHARGE RATE

All Ccf during each billing period: \$0.XXXXX per Ccf

C. OTHER ADJUSTMENTS

Taxes: Plus applicable taxes and fees related to above.

D. CONDITIONS

PIPELINE INTEGRITY TESTING (PIT) RIDER

PURPOSE

The purpose of this Pipeline Integrity Testing Rider is to promote the public interest in pipeline safety by enabling Texas Gas Service Company, a Division of ONE Gas, Inc. (the "Company") to recover the reasonable and necessary Pipeline Integrity Safety Testing expenses incurred by the Company during the prior year (including contractor costs but excluding the labor cost of Texas Gas Service Company employees. These legally mandated operating and maintenance expenses shall be recovered through a separate monthly volumetric charge (the Pipeline Integrity Testing or "PIT" Surcharge) that shall be shown as a separate line item on the customer's monthly bill and calculated for each customer class as described below. Capital expenditures associated with the Pipeline Integrity Program shall continue to be recovered through base rates and any interim rate adjustments implemented pursuant to Section 104.301 of the Gas Utility Regulatory Act.

APPLICABILITY

This Rider shall be applied to all gas sales and transportation customers within the service territory designated below, except special contract customers.

TERRITORY

This Rider shall apply throughout the Company's Central-Gulf Service Area ("CGSA"), both within the incorporated municipal limits of Austin, Bayou Vista, Beaumont, Bee Cave, Cedar Park, Cuero, Dripping Springs, Galveston, Gonzales, Groves, Jamaica Beach, Kyle, Lakeway, Lockhart, Luling, Nederland, Nixon, Port Arthur, Port Neches, Rollingwood, Shiner, Sunset Valley, West Lake Hills and Yoakum, Texas (collectively, the "CGSA Cities"), in the environs area of Buda, Texas, and in the unincorporated areas (environs) adjacent to the CGSA Cities.

QUALIFYING EXPENSES

This Rider applies only to the legally mandated safety testing of the Company's transmission lines in the CGSA under the Pipeline Integrity Safety Testing Program. The operating and maintenance expense items that qualify for recovery under this Rider shall include the contractor costs associated with land and leak survey, permitting, and job order preparation and completion; the clearing of right-of-way; any needed notifications to adjacent businesses and residences; traffic control equipment and personnel; Direct Current Voltage Gradient ("DCVG"), Close Interval ("CI"), and other surveys to ensure the integrity of the pipeline system; any required rigid bypasses; flushing of the lines and testing and disposal of the flush water; hydrostatic testing of the lines and analysis and disposal of the test water; any required "pigging" of the lines in connection with safety testing; any required x-ray welding; metallurgical testing of the pipeline or components thereof; site restoration, painting, and clean-up; expenses associated with providing a supply of compressed natural gas ("CNG") to ensure uninterrupted service to customers during testing; and any other operating and maintenance expenses reasonably necessary to safely and effectively perform required safety testing of the Company's pipelines in the CGSA. Neither capital expenditures by the Company, nor the labor cost of Texas Gas Service Company employees, shall be recovered under this Rider.

PIPELINE INTEGRITY TESTING (PIT) RIDER (Continued)

CALCULATION OF PIT SURCHARGES

The Pipeline Integrity Testing Surcharges established under this Rider shall be designed so as to recover the Total Testing Expense incurred in the prior year for Pipeline Integrity Safety Testing, except that qualifying expenses incurred in 2019 and 2020 shall be included for recovery in the first filing, and shall be calculated as follows:

The Total Annual Testing Expense shall be divided by the estimated average annual usage to produce the annual PIT Surcharge.

PIT Surcharge = <u>Total Annual Testing Expense</u> Estimated Annual Usage

Based upon customer data for the prior calendar year and any other relevant factors, the estimated annual usage may be revised annually to account for customer growth, and the resulting revised PIT Surcharge shall be applied to each class for the ensuing 12-month recovery period.

ANNUAL RECONCILIATION

After completion of each annual recovery period, the total revenues collected under this Rider for that year shall be reconciled against the revenues previously calculated to be collected for that year, and the PIT Surcharge for each class shall be adjusted upward or downward so that the Company recovers any underrecoveries or refunds any overrecoveries that may have accrued under the Rider, plus monthly interest on those underrecoveries or overrecoveries at the cost of long-term debt approved in the Company's most recent general rate case in which rates were set for application to customers in the CGSA. The reconciliation shall be filed with the regulatory authority on or before February 21st of each year, and the regulatory authority shall complete its review of the reconciliation on or before March 21st of each year, so that the Company can implement the reconciled PIT Surcharges beginning with the first billing cycle for April of each succeeding year.

DEFERRED ACCOUNTING

The Company is authorized and directed to defer, as a regulatory asset, all Pipeline Integrity Safety Testing expenses incurred during the testing cycle starting on January 1, 2016 and all revenues specifically collected under this Rider shall be applied to the deferred expense account. The Company shall not earn a return on any regulatory asset created under this provision, and no such regulatory asset shall be included in the Company's invested capital (rate base) for ratemaking purposes.

PIPELINE INTEGRITY TESTING (PIT) RIDER (Continued)

ANNUAL REPORT & APPLICABLE PSCC

On or before February 21st after each calendar year, the Company shall file a report with the Commission and the CGSA Cities showing all Pipeline Integrity Safety Testing expenses incurred during the previous calendar year and verifying the prior year's collections and any underrecoveries or overrecoveries accruing to date under this Rider. The report shall separately identify and list such expenses by account number and project number. Prior to the effective date of this Rider and on or before February 21st of each succeeding year while this Rider is in effect, the Company shall also file an Addendum to this Rider with the Commission and the CGSA Cities (a) identifying the PIT Surcharges that will be applied during the ensuing 12-month recovery period from April 1st through March 31st, and (b) providing the underlying data and calculations on which each PIT Surcharge for that period is based.

NOTICE TO AFFECTED CUSTOMERS

In addition to the annual report and Addendum to this Rider required above, the Company shall provide, on or before March 31st after each calendar year, written notice to each affected customer of (a) the PIT Surcharge that will be applied during the ensuing 12-month period from April 1st through March 31st, and (b) the effect the PIT Surcharge is expected to have on the average monthly bill for each affected customer class. The written notice shall be provided in both English and Spanish, shall be the only information contained on the piece of paper on which it is printed, and may be provided either by separate mailing or by insert included with the Company's monthly billing statements. The Company shall also file an affidavit annually with the Commission and the CGSA Cities certifying that notice has been provided to customers in this manner. The notice shall be presumed to be complete three calendar days after the date the separate mailing or billing statement is deposited in a postage-paid, properly addressed wrapper in a post office or official depository under care of the United States Postal Service. The initial notice shall be filed with, reviewed, and approved by the regulatory authority, and each subsequent notice shall follow the same format as that of the approved initial notice.

RATE SCHEDULE PIT-RIDER

PIPELINE INTEGRITY TESTING (PIT) SURCHARGE RIDER

A. <u>APPLICABILITY</u>

The Pipeline Integrity Testing Surcharge (PIT) rate as set forth in Section (B) below is for the recovery of costs associated with pipeline integrity testing as defined in Rate Schedule PIT. This rate shall apply to the following rate schedules of Texas Gas Service Company, a Division of ONE Gas, Inc. (Company) in the incorporated and unincorporated areas of and adjacent to the Central-Gulf Service Area (CGSA): 10, 20, 30, 40, 48, C-1, CNG-1, T-1, 1Z, 2Z, 3Z, 4Z, 4H, C-1-ENV, CNG-1-ENV and T-1-ENV.

B. PIT RATE

\$0.XXXXX per Ccf

This rate will be in effect until all approved and expended pipeline integrity testing expenses are recovered under the applicable rate schedules.

C. OTHER ADJUSTMENTS

Taxes: Plus applicable taxes and fees (including franchises fees) related to above.

PIPELINE SAFETY AND REGULATORY PROGRAM FEES

TEXAS ADMINISTRATIVE CODE

TITLE 16 ECONOMIC REGULATION

PART 1 RAILROAD COMMISSION OF TEXAS

CHAPTER 8 PIPELINE SAFETY REGULATIONS

SUBCHAPTER C REQUIREMENTS FOR NATURAL GAS PIPELINES ONLY

Rule §8.201 Pipeline Safety and Regulatory Program Fees

- (a) Application of fees. Pursuant to Texas Utilities Code, §121.211, the Commission establishes a pipeline safety and regulatory program fee, to be assessed annually against operators of natural gas distribution pipelines and pipeline facilities and natural gas master metered pipelines and pipeline facilities subject to the Commission's jurisdiction under Texas Utilities Code, Title 3. The total amount of revenue estimated to be collected under this section does not exceed the amount the Commission estimates to be necessary to recover the costs of administering the pipeline safety and regulatory programs under Texas Utilities Code, Title 3, excluding costs that are fully funded by federal sources for any fiscal year.
- (b) Natural gas distribution systems. The Commission hereby assesses each operator of a natural gas distribution system an annual pipeline safety and regulatory program fee of \$1.00 for each service (service line) in service at the end of each calendar year as reported by each system operator on the U.S. Department of Transportation (DOT) Gas Distribution Annual Report, Form PHMSA F7100.1-1 due on March 15 of each year.
 - (1) Each operator of a natural gas distribution system shall calculate the annual pipeline safety and regulatory program total to be paid to the Commission by multiplying the \$1.00 fee by the number of services listed in Part B, Section 3, of Form PHMSA F7100.1-1, due on March 15 of each year.
 - (2) Each operator of a natural gas distribution system shall remit to the Commission on March 15 of each year the amount calculated under paragraph (1) of this subsection.
 - (3) Each operator of a natural gas distribution system shall recover, by a surcharge to its existing rates, the amount the operator paid to the Commission under paragraph (1) of this subsection. The surcharge:
 - (A) shall be a flat rate, one-time surcharge;

SOI Exhibit A
Proposed Rate Schedules and Tariffs
Page 53 of 115

Texas Gas Service Company, a Division of ONE Gas, Inc. All Service Areas

RATE SCHEDULE PSF Page 2 of 3

PIPELINE SAFETY PROGRAM FEES (Continued)

- (B) shall not be billed before the operator remits the pipeline safety and regulatory program fee to the Commission;
- (C) shall be applied in the billing cycle or cycles immediately following the date on which the operator paid the Commission;
- (D) shall not exceed \$1.00 per service or service line (For the calendar year 2018 annual pipeline safety and regulatory program fee, billed effective with meters read on and after March 29, 2019, Texas Gas Service Company, a Division of ONE Gas, Inc. will bill all customers a one-time customer charge per bill of \$1.00, based on \$1.00 per service line); and
- (E) shall not be billed to a state agency, as that term is defined in Texas Utilities Code, §101.003.
- (4) No later than 90 days after the last billing cycle in which the pipeline safety and regulatory program fee surcharge is billed to customers, each operator of a natural gas distribution system shall file with the Commission's Gas Services Division and the Pipeline Safety Division a report showing:
 - (A) the pipeline safety and regulatory program fee amount paid to the Commission;
 - (B) the unit rate and total amount of the surcharge billed to each customer;
 - (C) the date or dates on which the surcharge was billed to customers; and
 - (D) the total amount collected from customers from the surcharge.
- (5) Each operator of a natural gas distribution system that is a utility subject to the jurisdiction of the Commission pursuant to Texas Utilities Code, Chapters 101 105, shall file a generally applicable tariff for its surcharge in conformance with the requirements of §7.315 of this title, relating to Filing of Tariffs.
- (6) Amounts recovered from customers under this subsection by an investor-owned natural gas distribution system or a cooperatively owned natural gas distribution system shall not be included in the revenue or gross receipts of the system for the purpose of calculating municipal franchise fees or any tax imposed under Subchapter B, Chapter 182, Tax Code, or under Chapter 122, nor shall such amounts be subject to a sales and use tax imposed by Chapter 151, Tax Code, or Subtitle C, Title 3, Tax Code.
- (c) Natural gas master meter systems. The Commission hereby assesses each natural gas master meter system an annual pipeline safety and regulatory program fee of \$100 per master meter system.
 - (1) Each operator of a natural gas master meter system shall remit to the Commission the annual pipeline safety and regulatory program fee of \$100 per master meter system no later than June 30 of each year.

PIPELINE SAFETY PROGRAM FEES (Continued)

- (2) The Commission shall send an invoice to each affected natural gas master meter system operator no later than April 30 of each year as a courtesy reminder. The failure of a natural gas master meter system operator to receive an invoice shall not exempt the natural gas master meter system operator from its obligation to remit to the Commission the annual pipeline safety and regulatory program fee on June 30 each year.
- (3) Each operator of a natural gas master meter system shall recover as a surcharge to its existing rates the amounts paid to the Commission under paragraph (1) of this subsection.
- (4) No later than 90 days after the last billing cycle in which the pipeline safety and regulatory program fee surcharge is billed to customers, each natural gas master meter system operator shall file with the Commission's Gas Services Division and the Pipeline Safety Division a report showing:
 - (A) the pipeline safety and regulatory program fee amount paid to the Commission;
 - (B) the unit rate and total amount of the surcharge billed to each customer;
 - (C) the date or dates on which the surcharge was billed to customers; and
 - (D) the total amount collected from customers from the surcharge.
- (d) Late payment penalty. If the operator of a natural gas distribution system or a natural gas master meter system does not remit payment of the annual pipeline safety and regulatory program fee to the Commission within 30 days of the due date, the Commission shall assess a late payment penalty of 10 percent of the total assessment due under subsection (b) or (c) of this section, as applicable, and shall notify the operator of the total amount due to the Commission.

Texas Gas Service Company, a Division of ONE Gas, Inc. Central-Gulf Service Area

RATE SCHEDULE WNA Page 1 of 2

WEATHER NORMALIZATION ADJUSTMENT CLAUSE

APPLICABILITY

The Weather Normalization Adjustment Clause (WNA) shall apply to the following general service rate schedules of Texas Gas Service Company, a Division of ONE Gas, Inc. ("Company") in the incorporated and unincorporated areas served in the Central-Gulf Service Area including Austin, Bayou Vista, Beaumont, Bee Cave, Buda (environs only), Cedar Park, Cuero, Dripping Springs, Galveston, Gonzales, Groves, Jamaica Beach, Kyle, Lakeway, Lockhart, Luling, Nederland, Nixon, Port Arthur, Port Neches, Rollingwood, Shiner, Sunset Valley, West Lake Hills, and Yoakum, Texas: Rate Schedules 10, 1Z, 20, 2Z, 40, 4Z, 48 and 4H. The WNA shall be effective during the September through May billing cycles.

PURPOSE

The WNA refunds over-collections or surcharges under-collections of revenue due to colder or warmer than normal weather, as established in the Company's most recent rate filing.

WNA MECHANISM

In order to reflect weather effects in a timely and accurate manner, the WNA adjustment shall be calculated separately for each billing cycle and rate schedule. The weather factor, determined for each rate schedule in the most recent rate case, shows the effect of one heating degree day on consumption for that rate schedule. During each billing cycle, the weather factor is multiplied by the difference between normal and actual heating degree days for the billing period and by the number of customers billed. This WNA volume adjustment is priced at the current cost of service rate per Ccf to determine a WNA revenue adjustment, which is spread to the customers in the billing cycle on a prorata basis. The WNA for each billing cycle and rate schedule shall be based on the following formula:

WNA Rate =
$$\frac{\text{WNAD}}{\text{CV}}$$
, where

WNAD = Weather Normalization Adjustment Dollars to be collected from each billing cycle and rate schedule. This factor shall be based on the following formula:

CV = Current Volumes for the billing period.

FILING WITH THE CITIES AND THE RAILROAD COMMISSION OF TEXAS (RRC)

The Company will file monthly reports showing the rate adjustments for each applicable rate schedule. Supporting documentation will be made available for review upon request. By each October 1, the Company will file with the Cities and the RRC an annual report verifying the past year's WNA collections or refunds.

Supersedes Rate Schedule Dated

RATE SCHEDULE T-1 Page 1 of 3

TRANSPORTATION SERVICE RATE

APPLICABILITY

Applicable to customers who have elected Transportation Service not otherwise specifically provided for under any other rate schedule.

Service under this rate schedule is available for the transportation of customer-owned natural gas through Texas Gas Service Company, a Division of ONE Gas, Inc.'s (the "Company") distribution system. The customer must arrange with its gas supplier to have the customer's gas delivered to one of the Company's existing delivery receipt points for transportation by the Company to the customer's facilities at the customer's delivery point. The receipt points shall be specified by the Company at its reasonable discretion, taking into consideration available capacity, operational constraints, and integrity of the distribution system.

AVAILABILITY

Natural gas service under this rate schedule is available to any individually metered, non-residential customer for the transportation of customer owned natural gas through the Company's Central-Gulf Service Area distribution system which includes the incorporated areas of Austin, Bayou Vista, Beaumont, Bee Cave, Cedar Park, Cuero, Dripping Springs, Galveston, Gonzales, Groves, Jamaica Beach, Kyle, Lakeway, Lockhart, Luling, Nederland, Nixon, Port Arthur, Port Neches, Rollingwood, Shiner, Sunset Valley, West Lake Hills and Yoakum, Texas. Such service shall be provided at any point on the Company's System where adequate capacity and gas supply exists, or where such capacity and gas supply can be provided in accordance with the applicable rules and regulations and at a reasonable cost as determined by the Company in its sole opinion.

COST OF SERVICE RATE

During each monthly billing period, a customer charge per meter per month listed by customer class as follows:

Commercial \$ 265.33 per month

Industrial \$ 520.96 per month

Public Authority \$ 104.70 per month

Public Schools Space Heat \$ 234.70 per month

Compressed Natural Gas \$ 217.63 per month

Electrical Cogeneration \$ 104.70 per month

Rate Schedule T-TERMS Page 1 of 7

GENERAL TERMS AND CONDITIONS FOR TRANSPORTATION SERVICE

1.1 REQUIREMENTS FOR TRANSPORTATION SERVICE

Nothing shall be deemed to supersede the respective rights and obligations of Texas Gas Service Company, a Division of ONE Gas, Inc. ("Company") and Customer as provided by Texas statutes, rules, and/or regulations. The Company reserves the right to seek modification or termination of transportation service or any of the tariffs to which it applies and the unilateral right to seek regulatory approval to make any changes to, or to supersede, the rates, charges and terms of transportation service.

1.2 **DEFINITIONS**

The following definitions shall apply to the indicated words as used in this Tariff:

Shall mean the Company's incremental cost to purchase Adder:

natural gas.

Aggregation Areas: Shall mean aggregation pools established by the Company

> within geographic, operational, administrative, and/or other appropriate parameters, for the purposes of nominating and

imbalances.

Btu: Shall mean British thermal unit(s) and shall be computed on a

> temperature base of 60° Fahrenheit and at the standard pressure base of the applicable service area and on a grossreal-dry basis and shall not be corrected for real water vapor as obtained by means commonly acceptable to the industry,

and "MMBtu" shall mean 1,000,000 Btu.

Commercial Service: Service to Consumers engaged primarily in the sale or

furnishing of goods and services and any usage not otherwise

provided for.

Commission or The Commission: The Railroad Commission of Texas.

Texas Gas Service Company, a Division of ONE Gas, Inc. Company:

Consumption Period: Shall mean a volumetric billing period.

Supersedes Rate Schedules Dated October 26, 2016 (Cities of Austin, Bee Cave, Cedar Park, Dripping Springs, Kyle, Lakeway, Rollingwood, Sunset Valley, and West Lake Hills, TX) January 6, 2017 (Cities of Cuero, Gonzales, Lockhart, Luling, Nixon, Shiner, and Yoakum, TX) November 23, 2016 (Unincorporated Areas of the Central Texas Service Area)

May 9, 2016 (Incorporated and Unincorporated Areas of the Gulf Coast Service Area)

May 22, 2019 (City of Beaumont)

GENERAL TERMS AND CONDITIONS FOR TRANSPORTATION SERVICE (Continued)

Cumulative Tolerance Limit: Shall mean the percent of aggregate historical annual

deliveries of a Qualified Supplier's Aggregation Area pool of customers for the most recent year ended on June 30. The Company, at its sole discretion, may make adjustments to the

Cumulative Tolerance Limit.

<u>Customer:</u> Any person or organization now being billed for gas service

whether used by him or her, or by others.

<u>Day or Gas Day:</u> Shall mean the 24-hour period commencing at 9:00 a.m.

(Central Standard Time) on one calendar day and ending at 9:00 a.m. (Central Standard Time) the following calendar

day.

<u>Dekatherm (Dth):</u> Shall mean 1,000,000 Btu's (1 MMBtu). This unit will be on

a dry basis.

<u>Electrical Cogeneration Service:</u> Service to Consumers who use natural gas for the purpose of

generating electricity. This service uses thermal energy to produce electricity with recapture of by-product heat in the form of steam, exhaust heat, etc. for industrial process use,

space heating, food processing or other purposes.

Electronic Flow Measurement (EFM): A device that remotely reads a gas meter.

Gas or Natural Gas: Shall mean the effluent vapor stream in its natural, gaseous

state, including gas-well gas, casing head gas, residue gas resulting from processing both casing head gas and gas-well gas, and all other hydrocarbon and non-hydrocarbon

components thereof.

<u>Industrial Service</u>: Service to Consumers engaged primarily in a process which

changes raw or unfinished materials into another form of product. This classification shall embrace all Consumers included in Division A (except Major Groups 01 and 02) and Division D of the Standard Industrial Classification Manual.

Mcf: Shall mean 1,000 cubic feet of Gas.

Supersedes Rate Schedules Dated
October 26, 2016 (Cities of Austin, Bee Cave, Cedar Park, Dripping Springs, Kyle, Lakeway, Rollingwood,
Sunset Valley, and West Lake Hills, TX)

Month: Shall mean the period beginning at 9:00 a.m. Central

Standard Time on the first Day of each calendar month and ending at 9:00 a.m. Central Standard Time on the first Day of

the next succeeding calendar month.

Monthly Tolerance Limit: Shall mean 5% of the aggregate deliveries for a Qualified

Suppliers Aggregation Area pool of customers for such

month.

<u>Payment in Kind (PIK):</u> Shall mean a reimbursement for lost and unaccounted for gas.

PDA: Shall mean a predetermined allocation method.

<u>Pipeline System:</u> Shall mean the current existing utility distribution facilities of

Company located in the State of Texas.

<u>Point of Delivery:</u> Shall mean the point or points where gas is delivered from the

Pipeline System to Customer.

<u>Point of Receipt:</u> Shall mean the point or points where Company shall receive

Gas into the Pipeline System from Customer.

<u>Point Operator:</u> Shall mean the person or entity that controls the Point of

Receipt or Point of Delivery.

Qualified Supplier: Shall mean an approved supplier of natural gas for

transportation to customers through the Company's pipeline

system.

Regulatory Authority: The City Council or equivalent municipal governing body of

each respective city in the Central-Gulf Service Area, or the

Railroad Commission of Texas, as applicable.

Service Area: The area receiving gas utility service provided by the

Company under the terms of this Tariff.

<u>Tariff:</u> Shall mean every rate schedule, or provision thereof, and all

terms, conditions, rules and regulations for furnishing gas service filed with the regulatory authorities or agencies having jurisdiction over Company or the services provided

hereunder.

GENERAL TERMS AND CONDITIONS FOR TRANSPORTATION SERVICE (Continued)

Transportation Form: Shall mean the Company approved selection of transportation

service document.

Transportation Rate Schedule: A rate schedule designed for service to any Customer for the

transportation of Customer-owned natural gas through the

Company's distribution system.

<u>Transportation Service</u>: The transportation by the Company of natural gas owned by

someone other than the Company through the Company's

distribution system.

Week: Shall mean a period of 7 consecutive Days beginning at 9:00

a.m. Central Standard Time on each Monday and ending at

the same time on the next succeeding Monday.

Year: Shall mean a period of 365 consecutive Days, or 366

consecutive Days when such period includes a February 29.

1.3 COMPANY'S RESPONSIBILITY

Company shall deliver to Customer, at the Point of Delivery, volumes of gas, as received from designated Qualified Supplier, for the Customer, at a mutually agreed upon Point of Receipt, less Payment in Kind (PIK).

a) In no event shall Company be required to expand, modify, construct, rearrange, or change the operations of the Pipeline System in order to receive gas from or on behalf of Customer or in order to deliver gas to Customer at any existing Points of Delivery. Company reserves the right in its sole discretion to remove, relocate, expand, or rebuild, without approval of Customer, any portion of the Pipeline System. Customer shall make no alterations, additions, or repairs to or on the Pipeline System.

1.4 <u>CUSTOMER'S RESPONSIBILITY</u>

Customer, by selecting service under a transportation service rate schedule by completing a Transportation Form, warrants and agrees that:

- a) Gas received by Company for the Customer shall be free from all adverse claims, liens, and encumbrances;
- b) Customer shall indemnify and hold Company harmless from and against all suits, actions, causes of action, claims and demands, including attorneys' fees and costs, arising from or out of any adverse claims by third parties claiming ownership of, or an interest in said gas caused by the failure to provide clear title to the gas;

GENERAL TERMS AND CONDITIONS FOR TRANSPORTATION SERVICE (Continued)

- c) Customer acknowledges Company shall not be responsible in any way for damages or claims relating to the Customer's gas or the facilities of the Customer or others containing such gas prior to receipt into Company's facilities or after delivery to the Customer;
- d) Customer must provide Company with a signed Transportation Form identifying its Qualified Supplier. Customer may designate no more than one Qualified Supplier. This authorization shall be in a form agreeable to Company and shall remain in effect until a signed replacement is received by Company;
- e) Customer acknowledges the Qualified Supplier's responsibilities under Section 1.5;
- f) Transportation Service is not available for a term less than 12 months. Termination of transportation service may, at the Company's sole discretion, delay Customer's request to resume transportation service;
- g) Electronic flow measurement (EFM) may be required for Customers under transportation service, at the Company's sole discretion. The Customer may be required to reimburse the Company for any cost related to the installation of the EFM as well as provide for or reimburse the Company for any ongoing maintenance, repair, or communications costs; and
- h) In the event Customer's source of gas supply is terminated by Customer's Qualified Supplier due to non-payment or other reasons, or if customer is otherwise unable to continue as a transportation customer, Customer may, upon the first of the month after 30 calendar days advance notice to Company, obtain service from Company under the general sales tariff applicable to Customer. Prior to commencing such service, Company may, in its sole discretion, require Customer to post a deposit or bond.

1.5 QUALIFIED SUPPLIER'S RESPONSIBILITY

Qualified Supplier shall act on behalf of the Customer to procure gas supplies, deliver gas supplies plus Payment in Kind volume, into mutually agreed upon Points of Receipt and shall act as the Customer's agent with respect to nominations, operational notices and resolution of imbalances.

- a) Qualified Suppliers shall aggregate their Customers' volumes for balancing purposes, into Aggregation Areas, as determined, in the Company's sole discretion.
- b) Qualified Supplier shall submit nominations to the Company's gas scheduling department, in accordance with their currently effective nomination process, which can be provided to the parties upon request. Customer and Qualified Supplier shall exercise commercially reasonable best efforts to deliver to the Pipeline System Dths of gas that Company is to deliver from the Pipeline System to Customer during any particular Hour, Day, Week and Month, including but not limited to volumes needed for peak Day usage for Customer's facilities. Qualified Supplier shall not intentionally nominate more or less gas than is anticipated for consumption by Customer(s), except as may be needed for balancing purposes to the extent Company accepts such nomination.

GENERAL TERMS AND CONDITIONS FOR TRANSPORTATION SERVICE (Continued)

- c) Before the start of the Gas Day, the Point Operator and Company shall establish a predetermined allocation (PDA) method to specify how gas received or delivered by Company shall be allocated in accordance with confirmed nominations at such point. Only one PDA methodology shall be applied per allocation period.
- d) Daily Quantity of Transportation Service Gas: Company shall receive and deliver gas hereunder as nearly as practicable at uniform hourly and daily rates of flow. It is recognized that it may be physically impracticable, because of measurement, gas control limitations and other operating conditions, to stay in zero imbalance each hour and each day; therefore, the daily and hourly quantities received may, due to the aforementioned reasons, vary above or below the daily and hourly quantities delivered. If the quantities received and the quantities delivered hereunder should create an imbalance at the end of any hour, Day, Week, or Month, then Company and Customer shall adjust receipts and/or deliveries at any time to the end that the quantities received and delivered shall be kept as near to zero imbalance as practicable.
- e) Quality of Transportation Service Gas: The gas procured by a Qualified Supplier, for receipt by Company, shall conform to the standards prescribed in Company's applicable rate schedules, Agreements, and applicable local, state or federal laws, rules and/or regulations.

1.6 <u>IMBALANCES</u>

Qualified Supplier shall, to the extent practicable, not deliver into the Pipeline System more or less Dths of Gas than Company delivers to the Aggregation Area of Customers, at the Points of Delivery, during a Consumption Period. The following imbalance provisions shall be applied to the Qualified Supplier for its Aggregation Area of Customers.

- a) If Company receives less Dths of Gas than are delivered to the Aggregate Area Customers at the Points of Delivery in excess of the Monthly Tolerance Limit or Cumulative Tolerance Limit in any particular Consumption Period, then Qualified Supplier shall purchase such under-delivered volumes at 105% of the applicable index, plus the Adder.
- b) If Company receives more Dths of Gas than are delivered to the Aggregate Area Customers at the Points of Delivery in excess of the Monthly Tolerance Limit or Cumulative Tolerance Limit in any particular Consumption Period, Qualified Supplier shall sell such excess Gas to Company at 95% of the applicable index.
- c) The applicable index and Adder will be defined in the Qualified Supplier Agreement and amended from time to time.

GENERAL TERMS AND CONDITIONS FOR TRANSPORTATION SERVICE (Continued)

- d) A proportional share of any upstream pipeline transportation service charges and penalties incurred by the Company, that in whole or in part, are the result of Qualified Supplier's scheduling and/or managing the upstream transportation of the Customer's gas to Company's interconnection point(s) with the upstream pipeline(s). Proceeds from this charge will be credited to the Reconciliation Account. The Company will bill Qualified Supplier for these charges and penalties manually on a separate bill. Payment shall be required in accordance with applicable Rules of Service.
- e) The Company will provide monthly imbalance statements along with calculations of the charges in accordance with the aforementioned provisions to the Qualified Supplier each month.
- f) Payments for imbalance settlements will be due each month within 15 business days of the imbalance statement date. The Company may elect at its sole discretion to accrue the imbalance settlement provisions each month and only require periodic settlement rather than monthly payments.
- g) On or about 15 days after the Company receives necessary volumetric information from other parties for each Consumption Period after commencement of Gas receipts and deliveries hereunder, Company shall render to the Qualified Supplier a statement for the preceding Consumption Period showing the total Dths of Gas received and delivered and each Point of Receipt and Point of Delivery. If information necessary for statement purposes is in the possession of Customer, Customer shall furnish such information to Company on or before the 6th Day of the Month in which the statement requiring such data is to be rendered.
- h) Both parties hereto shall have the right at any and all reasonable times within 24 months from the time period in question, to examine the books and records of the other to the extent necessary to verify the accuracy of any statement, computation, or demand made hereunder.

GENERAL STATEMENT

1.1 TARIFF APPLICABILITY

Texas Gas Service Company, a Division of ONE Gas, Inc. is a gas utility operating within the State of Texas. This Tariff applies to Texas Gas Service Company, a Division of ONE Gas, Inc.'s Central-Gulf Service Area, comprising the Cities and environs of Austin, Bayou Vista, Beaumont, Bee Cave, Cedar Park, Cuero, Dripping Springs, Galveston, Gonzales, Groves, Jamaica Beach, Kyle, Lakeway, Lockhart, Luling, Nederland, Nixon, Port Arthur, Port Neches, Rollingwood, Shiner, Sunset Valley, West Lake Hills, and Yoakum, and the environs of Buda, Texas. This Tariff supersedes and replaces all tariffs previously approved and applied in the Central Texas, Gulf Coast Service Areas and the City of Beaumont.

Service under this Tariff is subject to the original jurisdiction of the municipalities in the Central-Gulf Service Area and the Railroad Commission of Texas. The Company will provide service to any person and/or business within its service area in accordance with the rates, terms and conditions provided for in its Tariff and regulations.

1.2 RATE SCHEDULES

All Customers shall be served under rate schedules filed with the municipality or Railroad Commission of Texas. Customers shall be assigned to rate schedules in accordance with the class of the particular Customer, the usage which will be made of the gas and that Customer's volume requirements. The Company shall advise an Applicant or Customer regarding the most advantageous rate for his or her usage if more than one rate is applicable. A Customer assigned to a rate schedule shall remain on that schedule for a minimum of one year except that an assignment made in error may be corrected immediately. In the event of a question regarding the Customer's classification, the questions shall be resolved by reference to the coding of the Customer's primary business in the latest edition of the Standard Industrial Classification Manual of the United States Government's Office Management and Budget.

1.3 DEFINITIONS

The following definitions shall apply to the indicated words as used in this Tariff:

Adder: Shall mean the Company's incremental cost to purchase

natural gas.

Aggregation Areas: Shall mean aggregation pools established by the Company

within geographic, operational, administrative, and/or other appropriate parameters, for the purposes of nominating and

imbalances.

Agricultural Service: Service to Consumers engaged in agricultural production.

Applicant: Any person, organization or group of persons or

organizations making a formal request either orally or in

writing for gas service from the Company.

<u>Automated Meter Reading (AMR):</u> The process of remotely reading a gas meter.

GENERAL STATEMENT (Continued)

1.3 DEFINITIONS (Continued)

Btu:

Average Day Usage:

The gas demand of a given Customer for gas in any one month divided by 30. Gas demand is considered to be equivalent to consumption during each billing month, provided however, that when service has been curtailed, demand shall be considered to be actual consumption plus estimated curtailment during the period.

Blanket Builder: A builder or someone acting for a builder who is invoiced for

the installation of service lines.

Shall mean British thermal unit(s) and shall be computed on a temperature base of sixty degrees (60°) Fahrenheit and at the standard pressure base of the applicable service area and on a gross-real-dry basis and shall not be corrected for real water vapor as obtained by means commonly acceptable to the industry, and "MMBtu" shall mean one million

(1,000,000) Btu.

<u>Commercial Service</u>: Service to Consumers engaged primarily in the sale or

furnishing of goods and services and any usage not otherwise

provided for.

Commission or The Commission: The Railroad Commission of Texas.

Company: Texas Gas Service Company, a Division of ONE Gas, Inc.

<u>Consumer:</u> Any person or organization receiving gas service from the

Company for his or her own appliances or equipment whether or not the gas is billed directly to him or her. (For example, a rental unit where the utilities are part of the rent, the

landlord is a Customer and the tenant is a Consumer.)

Consumption Period: Shall mean a volumetric billing period.

<u>Customer:</u> Any person or organization now being billed for gas service

whether used by him or her, or by others.

<u>Cumulative Tolerance Limit:</u> Shall mean the percent of aggregate historical annual

deliveries of a Qualified Supplier's Aggregation Area pool of customers for the most recent year ended on June 30. The Company, at its sole discretion, may make adjustments to the

Cumulative Tolerance Limit.

GENERAL STATEMENT (Continued)

1.3 DEFINITIONS (Continued)

<u>Day or Gas Day:</u> Shall mean the 24-hour period commencing at 9:00 a.m.

(central clock time) on one calendar day and ending at 9:00

a.m. (central clock time) the following calendar day.

Dekatherm (Dth): Shall mean 1,000,000 Btu's (1 MMBtu). This unit will be on

a dry basis.

Domestic Service: Service to any Consumer which consists of gas service used

directly for heating, air conditioning, cooking, water heating and similar purposes whether in a single or multiple dwelling

unit.

<u>Electrical Cogeneration Service:</u> Service to Consumers who use natural gas for the purpose of

generating electricity. This service uses thermal energy to produce electricity with recapture of by-product heat in the form of steam, exhaust heat, etc. for industrial process use,

space heating, food processing or other purposes.

Electronic Document: Any document sent electronically via email or the internet.

<u>Electronic Flow Measurement (EFM):</u> An electronic means of obtaining readings on a gas meter.

Electronic Fund Transfer (EFT): The process to convert a paper check or electronic bill

payment request to an electronic transfer. Paper checks

received by Company or their agents are destroyed.

<u>Electronic Radio Transponder (ERT):</u> A device that assists with remotely reading a gas meter.

Excess Flow Valve (EFV): A safety device installed below ground inside the natural gas

service line between the main and the meter intended to

reduce the risk of accidents in limited situations.

Expedited Service: Customer request for same day service or service during non-

business hours for connection or reconnection of gas service.

Gas or Natural Gas: Shall mean the effluent vapor stream in its natural, gaseous

state, including gas-well gas, casing head gas, residue gas resulting from processing both casing head gas and gas-well gas, and all other hydrocarbon and non-hydrocarbon

components thereof.

General Rate Schedule: A rate schedule available to all Customers of the appropriate

class or classes for usages indicated therein.

GENERAL STATEMENT (Continued)

1.3 DEFINITIONS (Continued)

<u>Industrial Service</u>: Service to Consumers engaged primarily in a process which changes raw or unfinished materials into another form of product. This classification shall embrace all Consumers

included in Division A (except Major Groups 01 and 02) and Division D of the Standard Industrial Classification Manual.

<u>Irrigation or Irrigation Pumping</u> (SIC Division A - Major Group 01) who use gas for

<u>Service:</u> operating engine-driven pumping equipment.

Mcf: Shall mean one thousand (1,000) cubic feet of Gas.

Month: Shall mean the period beginning at 9:00 a.m. central clock

time on the first Day of each calendar month and ending at 9:00 a.m. Central clock time on the first Day of the next

succeeding calendar month.

Monthly Tolerance Limit: Shall mean five percent (5%) of the aggregate deliveries for

a Qualified Suppliers Aggregation Area pool of customers for

such month.

Optional Rate Schedule: A General Rate Schedule which may be selected by a

Customer in lieu of another general schedule but which may

require installation of special equipment.

Overtime Rate: The fee charged by the Company to perform work outside its

normal business hours or on holidays and includes changes to previously scheduled work that must be performed outside

the Company's normal business hours.

Payment in Kind (PIK): Shall mean a reimbursement for lost and unaccounted for gas.

PDA: Shall mean a predetermined allocation method.

Pipeline System: Shall mean the current existing utility distribution facilities of

the Company located in the State of Texas.

<u>Point of Delivery:</u> Shall mean the point or points where gas is delivered from the

Pipeline System to Customer.

Point of Receipt: Shall mean the point or points where the Company shall

receive Gas into the Pipeline System from Customer.

<u>Point Operator:</u> Shall mean the person or entity that controls the Point of

Receipt or Point of Delivery.

GENERAL STATEMENT (Continued)

1.3 **DEFINITIONS** (Continued)

Qualified Supplier: Shall mean an approved supplier of natural gas for

transportation to customers through the Company's pipeline

system.

The City Council or equivalent municipal governing body of Regulatory Authority:

each respective city in the Central-Gulf Service Area, or the

Railroad Commission of Texas, as applicable.

Service Area: The area receiving gas utility service provided by the

Company under the terms of this Tariff.

Special Rate Schedule: A rate schedule designed for a specific Customer.

Any group of interconnected pipelines and appurtenances System:

owned or operated by the Company and independent from

any other such group of facilities.

Tariff: Shall mean every rate schedule, or provision thereof, and all

> terms, conditions, rules and regulations for furnishing gas service filed with the regulatory authorities or agencies having jurisdiction over the Company or the services

provided hereunder.

Temporary Service: Any service which will not be utilized continuously at the

same location for a period of two or more years.

Transportation Form: Shall mean the Company approved selection of transportation

service document.

<u>Transportation Rate Schedule:</u> A rate schedule designed for service to any Customer for the

transportation of Customer-owned natural gas through the

Company's distribution system.

Transportation Service: The transportation by the Company of natural gas owned by

someone other than the Company through the Company's

distribution system.

Week: Shall mean a period of seven (7) consecutive Days beginning

at 9:00 a.m. Central clock time on each Monday and ending

at the same time on the next succeeding Monday.

Shall mean a period of three hundred sixty-five (365) Year:

consecutive Days, or three hundred sixty-six (366)

consecutive Days when such period includes a February 29.

SOI Exhibit A Proposed Rate Schedules and Tariffs Page 78 of 115

Texas Gas Service Company, a Division of ONE Gas, Inc. Rules of Service – Central-Gulf Service Area

Section 3: RATES AND UTILITY CHARGES

Please see current Rate Schedules on file with each applicable Regulatory Authority.

CONDITION OF SERVICE

4.1 PROVISION OF SERVICE

The Company will provide gas service to any person or organization located within the Central-Gulf Service Area from the Company's facilities or in certain cases, the facilities of its supplier, in accordance with the provisions of this Tariff including Rate Schedules and Rules of Service.

4.2 FEES AND CHARGES

All fees and charges made by the Company to provide and maintain utility services as provided for in this Tariff. If the Customer elects transportation service, the commodity cost of gas shall be determined between the Customer and the Customer's selected supplier.

4.3 RESALE OF GAS

Gas delivered by the Company shall not be redelivered or resold for the use thereof by others unless otherwise expressly agreed to in writing by the Company - except, however, that those Customers receiving gas for redistribution to the Customer's tenants may separately meter each tenant's distribution point for the purpose of prorating the Customer's actual amount of gas delivered among the various tenants on a per unit basis.

4.4 CONTINUITY OF SERVICE

a) Service interruptions

- i) The Company shall make all reasonable efforts to prevent interruptions of service. When interruptions occur, the Company will reestablish service within the shortest possible time consistent with prudent operating principles so that the smallest number of Customers is affected.
- ii) The Company shall make reasonable provisions to meet emergencies resulting from failure of service and will issue instructions to its employees covering procedures to be followed in the event of an emergency in order to prevent or mitigate interruption or impairment of service.
- iii) In the event of emergency or local disaster resulting in disruption of normal service, the Company may, in the public interest, interrupt service to other Customers to provide necessary service to civil defense or other emergency service agencies on a temporary basis until normal service to these agencies can be restored.
- b) Record of interruption. Except for momentary interruptions which do not cause a major disruption of service, the Company shall keep a complete record of all interruptions, both emergency and scheduled. This record shall show the cause of interruptions, date, time duration, location, approximate number of Customers affected, and, in cases of emergency interruptions, the remedy and steps taken to prevent recurrence, if applicable.

CONDITION OF SERVICE (Continued)

4.4 CONTINUITY OF SERVICE (Continued)

- c) Report to Railroad Commission of Texas. The Commission shall be notified in writing within 48 hours of interruptions in service affecting the entire system or any major division thereof lasting more than four continuous hours. The notice shall also state the Company's belief as to the cause of such interruptions. If any service interruption is reported to the Commission otherwise (for example, as a curtailment report or safety report), such other report is sufficient to comply with the terms of this paragraph.
- d) The procedure under which curtailments of service will be made is described in the Curtailment Plan on file with the Railroad Commission of Texas.
- e) The Company does not guarantee uninterrupted service to any Customer and shall not be liable for damages resulting from any loss of service to any Customer.

4.5 AVAILABILITY OF TARIFF

A copy of this Tariff including all applicable rates can be requested through TGS's customer service number at 1-800-700-2443 (non-emergency number) or requested under the 'Contact Us' section of www.texasgasservice.com. Upon the request of any Customer or Applicant, the Company shall make copies of the Tariff which may be purchased by the Customer or Applicant through TGS's customer service. The Company may charge a fee for each copy not in excess of the Company's reasonable cost to reproduce the material.

4.6 CUSTOMER INFORMATION

The Company shall make available, during normal business hours, such additional information on Rates and Services as any Customer or Applicant may reasonably request. Upon any Customer's request, the Company shall inform the Customer how to read the Customer's meter. The Company shall annually provide each Customer with notice of the availability of a concise description in English and Spanish of the Customer's rights and the Company's obligations under this Tariff. A new Customer shall be provided with an informational brochure in the mail after requested service initiation or included with the first bill mailed.

4.7 CUSTOMER COMPLAINTS

Upon receipt of a complaint, either in writing or by telephone, from the Regulatory Authority on behalf of a Customer, the Company will make a suitable investigation and advise the Regulatory Authority and complainant of the results thereof. An initial response must be made by the next business day. The Company must make a final and complete response within 15 days from the date of the complaint, unless additional time is granted within the 15 day period. Each complainant shall be advised of his or her right to file the complaint with the Regulatory Authority if not satisfied by the Company.

CONDITION OF SERVICE (Continued)

4.8 <u>LIMITATION OF LIABILITY</u>

The Customer assumes all responsibility for all facilities and their installation, maintenance, operation, functionality, testing and condition thereof on the Customer's side of the point of delivery of gas to the property of the Customer or to the premises of the Consumer, as defined in Section 6.2. The Company is not liable to a Customer, and Customer shall indemnify, hold harmless, and defend the Company and its employees or agents from any and all claims or liability for personal injury, damage to property, or any incidental, consequential, business interruption, or other economic damages or losses in any manner directly or indirectly connected to, arising from, or caused by acts or omissions of any person or party on the Customer's side of said point of delivery, as defined in Section 6.2.

The Company shall be liable to the Customer or Consumer only for personal injury or property damages from or caused directly by the negligent acts or omissions of the Company or its employees occurring on the Company's side of the point of delivery. The Company shall not be liable or responsible for personal injury, property damages, or any other loss or damages arising from or caused by the negligent or intentional act or omission of any person, other than an employee of the Company, who adjusts, repairs, disconnects, changes, alters, or tampers with the Company's meter or facilities in any way.

The Company shall be liable to third parties only for personal injury or property damage directly arising from the negligence or gross negligence of the Company or its employees when acting within the scope of their employment.

In no event shall the Company or its employees be liable for incidental, consequential, business interruption, or other economic damages or losses of Customer, Consumer, or third parties in any manner, directly or indirectly, arising from, caused by, or growing out of the interruption or termination of gas utility service.

The Customer shall make or procure conveyance to the Company of perpetual right-of-way across the property owned or controlled by the Customer that is satisfactory to the Company, provides clear access to Company's facilities, and enables the Company to provide service to Customer's property or the premises of the Consumer.

INITIATION OF SERVICE

5.1 REGULAR SERVICE

Application for service can be made by telephone or through the internet. Each Applicant must comply with the appropriate requirements of this Tariff before service shall be instituted. No written agreement shall be required for residential service under the standard provisions of this Tariff; commencement of service by the Company and the use of gas service by the Customer shall be evidence of such agreement. Any Customer requesting service under any special provision of this Tariff must execute a written agreement for service in the form prescribed by the Company designating those provisions which shall apply. Each Applicant may be required to produce two forms of verifiable identification; one being a government-issued identification card bearing a photograph of Applicant; and verifiable proof of their right to occupy a specific service address as of a specific date of occupancy.

5.2 SPECIAL CONTRACTS

Under certain special conditions, the Company may agree to rates, terms or conditions of service other than those provided in this Tariff. Such service must be established under the terms of a special contract or service agreement. To the extent that the provisions of any special contract are at variance with this Tariff, the provisions of the contract shall apply.

5.3 TEMPORARY SERVICE

Temporary Service shall be furnished under the same rate schedules applicable to regular service of a similar kind.

5.4 FEES AND CHARGES

The Company shall charge a non-refundable fee to each Applicant to compensate for the cost involved in initiation or reconnection of service or when service is transferred from one name to another at any location, or whenever a meter is reset or relocated on the same premises at the request of the Customer, all as specified in Section 21.1 of this Tariff.

Whenever the Applicant requests expedited service, the Company will accomplish the work as expeditiously as possible and the Customer will be charged at the Company's approved rate for service work. Expedited service and the charges therefore shall be made only on request of the Applicant. Whenever service is furnished from the facilities of a third party and the Company must pay any special fees to that third party, the Company may, at its option, pass that charge plus 20 percent for handling through to the Applicant requesting service. See Section 21.1 relating to fees for the above.

5.5 ESTABLISHMENT OF CREDIT

Each Applicant for service shall be required to make a security deposit in accordance with Section 10 of this Tariff to establish and maintain satisfactory credit. These deposits shall be computed in the same manner for the same class of service, provided however, that a deposit shall be waived if:

INITIATION OF SERVICE (Continued)

<u>5.5</u> <u>ESTABLISHMENT OF CREDIT (Continued)</u>

- a) The Applicant has been a Customer for the same kind of service within the last two years and did not have more than one occasion in which a bill for service from any such utility service account was delinquent and no disconnection for non-payment was made;
- b) The Applicant furnishes an acceptable letter of credit;
- c) The Applicant demonstrates a satisfactory credit rating by presentation of satisfactory credit references capable of quick, inexpensive verification (applicable to residential Customers only);
- d) The Applicant is 65 years of age or older and has no outstanding balance for natural gas utility service which accrued within the last two years (applicable to residential Customers only);
- e) The application is made for or guaranteed by an agency of the federal, state or local government; or
- f) The Applicant has been determined to be a victim of family violence as defined by TEX. FAM. CODE ANN., §71.004. This determination shall be evidenced by the applicant/s submission of a certification letter developed by the Texas Council on Family Violence (made available on its Web site).

5.6 GROUNDS FOR REFUSAL TO SERVE

The Company may refuse service to any Applicant for any of the following reasons:

- a) Failure to pay fees, advances or contributions or to make any deposit required for service under this Tariff:
- b) Failure of the Applicant to furnish any service or meter location specified for service under this Tariff:
- c) Existence of an unsafe condition such as a leak in the Applicant's piping system which, in Company's sole opinion, may endanger life or property;
- d) The Applicant is indebted to the Company for the same class of utility service at the same or another service location within the Company's system; or
- e) Delinquency in payment for gas service by another occupant if that person still resides at the premises to be served.

The right to refuse service shall terminate when the Applicant has complied with the Company's requirements or corrected the cause for the refusal to serve.

SOI Exhibit A Proposed Rate Schedules and Tariffs Page 84 of 115

Texas Gas Service Company, a Division of ONE Gas, Inc. Rules of Service – Central-Gulf Service Area

INITIATION OF SERVICE (Continued)

5.7 REASONABLE TIME

The Company shall have a reasonable amount of time to institute service following application therefore or execution of an agreement for service. The time may vary depending on approvals and permits required, the extent of the facilities to be built, and the Company's workload at the time.

METERING AND DELIVERY OF GAS

6.1 METER LOCATION

The Company shall have the sole right to determine the location of the meter in accordance with the needs of the service.

Each Applicant shall furnish and subsequently maintain a suitable location on his or her premises for the Company's meter and related facilities at a point selected by the Company. Meters shall be located where they will be safely accessible for reading and service, adequately ventilated, and not subject to damage. Meters shall not be located within any enclosed area unless the enclosure is solely intended as a meter house. It may be necessary for the Company to install bollards or guard posts around the meters for safety.

6.2 POINT OF DELIVERY

The point of delivery of gas sold by the Company to the Customer shall be at the outlet side of the Company's meter, provided that in those cases in which the Customer owns a section of the underground pipe between the Customer's property line and the meter, the point of delivery shall be at the property line. The title of all gas sold by the Company to the Consumer shall pass from the Company at the point of delivery. The point(s) of delivery and point(s) of redelivery for Transportation Service shall be as provided in the contract entered into between the Customer and the Company.

6.3 MULTIPLE METERS

Each Customer or group of Customers located on the same lot or tract of land may be served from a single meter location. The Company may, at its option, permit additional meter locations to simplify installation of facilities or provide better service. Whenever more than one meter location is permitted for the same Customer, the Company shall bill the usage through each meter separately, provided that any combined billings in effect at the time of adoption of this Tariff may be continued until the affected Customer discontinues service or upon order by the Regulatory Authority.

6.4 CONNECTION TO COMPANY FACILITIES

No Consumer shall make any connection or alteration of any kind on any of the Company's facilities upstream of the Company's meter or shall permit any other person to make such connection or alteration.

INSTALLATION OF EQUIPMENT

7.1 EQUIPMENT FURNISHED BY THE COMPANY

The Company shall furnish and install at its expense, the service pipe from the Company's existing main to the property line nearest the meter and the equipment related thereto, including meter valve and service regulator. Whenever the meter is located at any point other than the property line, the Company shall determine the estimated cost of that portion of the service between the property line and the meter set. This estimate shall be based on the size and footage to be installed and charged in accordance with Section 8 and other applicable provisions of this Tariff. Although affixed to or buried in the Customer's property, the entire service and meter set shall become the property of the Company and shall be operated and maintained by the Company.

7.2 EQUIPMENT FURNISHED BY THE APPLICANT

The Applicant shall furnish and install at his or her expense, all piping and equipment required to conduct and utilize the gas furnished, from the outlet of the meter set to the point(s) of utilization and those portions of the service line and meter set not furnished by the Company as described in Section 7.1 above. The adequacy, safety and compliance with applicable codes and ordinances shall be the responsibility of the Applicant and no action of the Company in accordance with this Tariff shall release the Applicant of the responsibility for the facilities installed by him or her.

7.3 STATUTES, CODES, AND ORDINANCES

All piping and installations owned by the Applicant shall comply with all applicable legal requirements, whether federal, state, county, municipal, or otherwise, and shall be properly designed for the pressures and volumes to be handled. In those locations where there are no applicable state or local requirements, the applicable provisions of the National Fuel Gas Code 54; ANSI Z223.1 and any amendments thereto shall apply.

7.4 CHECKS AND TESTS

The Company shall have the right to check new installations prior to initiation of service and to make any test of the Applicant's facilities it deems necessary, at no charge to the customer.

7.5 REFUSAL TO SERVE

The Company shall refuse service to any Applicant who refuses entry for observation or whose facilities do not comply with the applicable provisions of this Tariff. The right to refuse service shall terminate with the correction of the condition(s) which was cause for refusal. Initiation of service, however, shall not be considered to be acceptance or approval by the Company of such facilities.

EXTENSION OF FACILITIES

<u>8.1</u> <u>EXTENSION OF MAINS</u>

The Company shall install the necessary facilities to provide service to Applicants whose premises are located beyond the Company's existing distribution facilities in accordance with the provisions of this Section. The expenditure for such extensions must either be cost justified or the Applicant(s) and Company must mutually agree to terms that justify the installation.

8.2 DESIGN AND COST OF FACILITIES

As soon as practical after an application for service is received, the Company shall determine the extent of the facilities required to serve the new customer and the cost thereof. This cost shall include all amounts to be spent for system improvements necessary to deliver the required gas, such as mains, regulator and meter stations, upgrading and/or reinforcement, all in accordance with the Company's current practice. Whenever the Company chooses to install facilities of greater capacity than would be required to serve the new customer for which the application is being made or to permit supply from another source, the estimate of costs shall be based on only the size and capacity normally used to serve requirements similar to that of the Applicant.

8.3 ALLOWANCE FOR NEW BUSINESS

The Company shall also determine the number of existing permanent Customers located along the route of the extension expected to be served therefrom. To be included, the occupant of each premise must request service and demonstrate capability for using such service through a major gas burning appliance. Single or groups of individually owned mobile homes shall be included only if the wheels and hitch have been removed from each mobile home and/or substantial improvements have been made to the property. Mobile home parks may be served either through a master meter or individual meters served by a Company-owned system, provided that required mains can be installed and dedicated streets or rights-of-way have been provided to the Company for installation of facilities as evidenced by agreement executed on the Company's form. An allowance to be determined by the Company may be given for each Customer whose premises exist at the time of application to be served from the proposed main extension. In order to qualify for this allowance, the Customer must file an application and agree to initiate gas service upon completion of the Company's facilities.

8.4 ADVANCES

The mutually agreed upon terms will determine the amount of advance required. The Applicant shall have 30 calendar days after notification of the amount required to execute an extension agreement on the Company's form and pay the required advance. At the end of that time, the Company may revise its estimates to reflect any changes in costs or conditions which will affect the amount of the advance. The Company may waive collection of any advance based on an economic analysis of the project.

8.5 CONSTRUCTION OF FACILITIES

As soon as practical after the advance has been paid or it has been determined that no advance will be required, the Company shall begin construction of the required facilities and thereafter prosecute the

EXTENSION OF FACILITIES (Continued)

8.5 CONSTRUCTION OF FACILITIES (Continued)

work with reasonable diligence. The Company shall not be responsible for delays in the construction of the facilities occasioned by events or conditions reasonably beyond the Company's control. Whenever the construction of the new facilities requires the acquisition of rights-of-way across the Applicants(s) land(s), these rights-of-way shall be provided by the Applicant(s) in the Company's name and on its form at no cost to the Company (except for fees involved in the recording of documents).

8.6 REVIEW OF ADVANCES

The Company shall review each extension agreement on the first anniversary of the signing of that agreement. Upon the Applicant(s) request if the extension provided for in the agreement has not been installed through no fault of the Company, the agreement shall be considered to be terminated and a complete refund made to the Applicant(s). Once the extension has been installed and service has been initiated, the Company shall thereafter review the extension agreement at its second through fifth execution date. At each review, the number of Customers then served directly from the extension shall be compared with the number served on the last prior anniversary date. A refund, shall be given for each additional Customer served, based on mutually agreed upon terms provided that the total of the refunds given does not exceed the cost of the extension of facilities.

8.7 REFUND LIMITATIONS

The Company may, at its sole option, make a refund at any time. In no case, however, shall a refund be given unless the number of Customers then served is greater than the number for whom refunds have previously been given. No refund shall be given which shall cause the total refunds to be greater than the total amount of the advance. No interest shall be paid on any advance made under the provisions of this Section. At the end of the five year period, any remaining amount of the advance shall be retained by the Company as a contribution in aid of construction.

8.8 DELIVERY OF REFUNDS

Upon Applicant(s) request, when a refund is due, a check in the appropriate amount and a letter setting forth the method of calculation of the refund and the balance remaining un-refunded shall be made to the person or business in whose name the extension agreement is made or to his or her assignee. If that letter is returned undelivered, the check shall be cancelled and the next review made without regard to that refund. All sums described in this Section which are returned undelivered and remain unclaimed in the Company's possession for a period of six months following expiration of the five year period of the extension agreement shall be retained by the Company and considered a contribution in aid of construction.

CUSTOMER-OWNED SYSTEMS

9.1 INDIVIDUALLY METERED SYSTEMS

The Company shall not render service to any Customer through a meter not connected to a system owned by the Company or one of the Company's suppliers.

9.2 MASTER METERS

The Company shall provide service through a master meter into the piping systems of others to be distributed to more than one Consumer, except when the gas served is resold to those Consumers on either a commodity or separate cost of service basis; provided, however, that those Customers purchasing gas for redistribution to the Customer's own tenants only on the Customer's premises may separately meter each tenant distribution point for the purpose of prorating the Consumer's actual purchase price of gas delivered among the various tenants on a per unit basis, and further provided that the provisions of this Section 9 shall not preclude the Company from supplying natural gas to a third party for resale to the public as fuel for natural gas powered vehicles (NGV's).

SECURITY DEPOSITS

10.1 REQUIREMENTS

The Company shall require a security deposit from any present or prospective Customer in accordance with Sections 5.5 and 18.1 of this Tariff to guarantee payment of bills, and from any present Customer who during the last 12 consecutive months has on more than one occasion paid their utility bill after becoming delinquent. However, the deposit requirement may, at the option of the Company be based on annual usage experienced at the particular address with application of one-sixth of the annual amount as determined as the required deposit. If actual use is at least twice the amount of the estimated billings, a new deposit requirement may be calculated and an additional deposit may be required within two days. The deposit shall be refunded to residential Customers in the form of cash or credit to a customer's account when the Customer has paid 12 consecutive bills without having service disconnected for non-payment, and without having one or more occasion in which a bill was delinquent or a payment was returned, and the Customer is not currently delinquent.

10.2 RECEIPTS

The Company shall maintain such records as may be necessary to permit any Customer to receive any deposit return to which he or she is entitled without presentation of the receipt. A record of any unclaimed deposits shall be maintained by the Company for at least 4 years.

10.3 INTEREST

The Company shall pay interest on all security deposits for the time held at the rate as set by the Public Utility Commission annually except when

- a) The deposit is held 30 days or less;
- b) Notice is sent to the Customer's last known address that the deposit is no longer required;
- c) The service to which the deposit relates has been discontinued; or
- d) All or any part of the deposit has been applied to a delinquent account.

Interest on deposits earned during the preceding year shall be paid to the Customer annually. Payment shall be made either by check or as a credit on the monthly bill at the Company's option.

10.4 RETURN OF DEPOSITS

Deposits on residential accounts returned to the Customer in accordance with Section 10.1 above shall be applied in the first calendar quarter following the month in which the good payment record is established. Whenever the deposit of any Customer is returned to the Customer, the Company shall pay all previously unpaid interest with the payment.

10.5 ACCEPTABLE FORMS OF DEPOSIT

Any one of the following forms of credit security may be accepted from Customers and Applicants for service:

SECURITY DEPOSITS (Continued)

10.5 ACCEPTABLE FORMS OF DEPOSIT (Continued)

- a) A cash deposit of as much as one-sixth (1/6) the estimated annual billings for service requested; but no less than the minimum deposit set forth in Section 21.2;
- b) For commercial customers only, a nontransferable, irrevocable letter of credit from an established financial institution, payable for as much as one-sixth (1/6) the estimated annual billings for services requested and, which can be drawn on for a minimum of two (2) years; but no less than the minimum deposit set forth in Section 21.2; or
- c) For commercial customers only, a surety bond issued by a reputable insurance company which can be drawn on for a minimum of 2 years.

10.6 FRANCHISE AGREEMENTS

To the extent the terms of a franchise agreement are inconsistent with this Section, the terms of the franchise agreement controls. Applicable to customers inside the corporate limits of an incorporated municipality that imposes a municipal franchise fee to Company for the gas service provided to Customer.

GAS MEASUREMENT

11.1 PRESSURE

The standard serving and measurement pressure shall be 4 ounces (0.25 psig) or 7" Water Column above the standard atmospheric pressure in the area served. The atmospheric pressure and standard serving pressure determined to be the average in the cities and environs of the Central-Gulf Service Area are listed below.

| Cities and their Environs | Atmospheric Pressure PSIA | Standard Serving Pressure PSIA |
|---------------------------|---------------------------|--------------------------------|
| Austin | 14.40 | 14.65 |
| Bayou Vista | 14.70 | 14.95 |
| Beaumont | 14.70 | 14.95 |
| Bee Cave | 14.40 | 14.65 |
| Buda | 14.40 | 14.65 |
| Cedar Park | 14.40 | 14.65 |
| Cuero | 14.48 | 14.73 |
| Dripping Springs | 14.40 | 14.65 |
| Galveston | 14.70 | 14.95 |
| Gonzales | 14.48 | 14.73 |
| Groves | 14.70 | 14.95 |
| Jamaica Beach | 14.70 | 14.95 |
| Kyle | 14.40 | 14.65 |
| Lakeway | 14.40 | 14.65 |
| Lockhart | 14.48 | 14.73 |
| Luling | 14.48 | 14.73 |
| Nederland | 14.70 | 14.95 |
| Nixon | 14.48 | 14.73 |
| Port Arthur | 14.70 | 14.95 |
| Port Neches | 14.70 | 14.95 |
| Rollingwood | 14.40 | 14.65 |
| Shiner | 14.48 | 14.73 |
| Sunset Valley | 14.40 | 14.65 |
| Yoakum | 14.48 | 14.73 |
| West Lake Hills | 14.40 | 14.65 |

The Consumer and the Company may, at the Company's option, agree to a higher serving pressure. Service regulators shall be set as close as practical to the standard serving pressure under a load condition of approximately 10 percent of meter capacity. Increases in serving pressure because of the inadequacy of the Consumer's facilities shall not be permitted.

11.2 UNIT OF MEASUREMENT

The standard unit of measurement shall be one hundred cubic feet (Ccf). A cubic foot shall be defined as the amount of gas which occupies a volume of one cubic foot at the standard serving pressure and at a temperature of 60 degrees Fahrenheit.

GAS MEASUREMENT (Continued)

11.2 UNIT OF MEASUREMENT (Continued)

Whenever the Company delivers gas at any pressure other than the standard serving pressure, volumes shall be corrected to the standard serving pressure in the manner provided in this Tariff, provided however, that such correction may be made to any other standard provided in the rate schedules or special agreement under which the Customer is served. The Company may, at its sole option, waive the correction of measurement for temperature deviation.

11.3 BILLING UNIT

Unless otherwise specified on the rate schedules or by special agreement, Customers shall be billed on the basis of Ccf measured at or corrected to the standard serving pressure. The index of the meter shall be the sole determinant of volumes passing through the meter. Whenever the meter reads directly in hundreds or smaller units, a reading of one-half a billing unit or more (500 Ccf or more) shall be considered a whole billing unit. Readings of less than one-half a unit shall be disregarded for billing. In those cases in which heating value is used as the billing unit, the calculation of the heating value in BTU's shall be made in accordance with Section 11.7 of this Tariff.

11.4 PRESSURE CORRECTION - STANDARD METERING

Whenever gas is delivered to any Customer served under a rate schedule which provides for standard metering, the Company shall correct actual volumes measured to volumes which would have been measured if the gas had been delivered at the standard serving pressure. Corrections shall be made by one of the following methods.

a) The Company may install pressure or pressure and temperature compensating measurement equipment whenever the cost of this equipment is justified by the volumes served. Such measurements shall be equipped with devices which mechanically or electronically correct the actual measured volumes in accordance with Boyle's Law. Variations in actual atmospheric pressure shall not be considered.

The Company may use factor billing whenever the volumes to be delivered are too small to justify special metering. The factor shall be determined by dividing the actual serving pressure by the standard serving pressure, both expressed in absolute units based on the standard atmospheric pressure in the area as specified in Section 11.1 hereof. This factor shall be applied to the measured volumes to determine the correct number of billing units.

11.5 METERING - SPECIAL POSITIVE DISPLACEMENT

Whenever gas is delivered to any Customer served under a rate schedule which provides for special metering and positive displacement or turbine type metering is used, all volumes shall be determined in accordance with the recommendations of the manufacturer of the meter. Meters may be read in actual volumes which shall then be corrected to the standard billing unit or may be furnished with devices designed to correct the actual volumes to the standard billing units. The following criteria shall be used in the correction of volumes or design and calibration of correcting devices:

GAS MEASUREMENT (Continued)

11.5 METERING - SPECIAL POSITIVE DISPLACEMENT (Continued)

- a) Pressure correction shall be made in accordance with Boyle's Law. Calculations based on pressure reading on a continuously recording chart shall use the average pressure indicated thereon applied to the measured volumes. Correcting devices shall be set at the specified serving pressure and the service regulators shall be adjusted as close to that pressure as practical. Corrections for deviations from Boyle's Law ("supercompressability") may be made whenever the volumes delivered justify the cost of making such corrections.
- b) The flowing temperature of the gas shall be assumed to be 60 degrees Fahrenheit unless temperature correction is provided. Corrections shall be made in accordance with Charles' Law.
- whenever a continuously recording instrument is used, the average temperature indicated thereon shall be applied to the measured volumes. The specific gravity of the gas shall be assumed to be the value last indicated by test or reported by the upstream pipeline supplier prior to the installation of the metering facilities. Whenever subsequent reports or tests indicate significant changes in gravity, volume calculations shall be changed prospectively to reflect the new gravity.

11.6 METERING - SPECIAL ORIFICE

Whenever gas is delivered to any Customer served under a rate schedule with provisions for special metering and orifice metering is used, all volumes shall be determined in accordance with the recommendations for measuring gas contained in the American Gas Association's Gas Measurement Committee Report No. 3, Orifice Metering of Natural Gas (1992), and subsequent revisions thereof. Orifice meter charts shall be calculated using a standard integrating device or other method recognized in the industry. The following criteria shall be used in the correction of volumes or design and calibration of orifice metering:

- a) Correction for deviation of gas from Boyle's Law shall be made in accordance with Report No. 3.
- b) Temperature of gas passing the meter shall be assumed to be 60 degrees Fahrenheit unless suitable equipment has been installed to measure actual flowing temperature. The arithmetical average of the temperature recorded during each meter charge period while the gas is flowing shall be used in the computations of volumes during the period.
- c) The standard atmospheric pressure for the area served shall be used for measurement irrespective of any variation in the actual barometric pressure.
- d) The specific gravity of the gas shall be assumed to be the value last obtained in a spot test made with a gravity balance, impact type unit or other acceptable method. Tests shall be made as frequently as found necessary to assure accurate measurement.

11.7 BTU MEASUREMENT

The heating value of gas for use in billing shall be defined as the gross thermal value of one cubic foot of gas at a pressure of 14.73 psia and temperature of 60 degrees Fahrenheit on a dry basis.

GAS MEASUREMENT (Continued)

11.7 BTU MEASUREMENT (Continued)

The number of billing units delivered shall be determined by multiplying the heating value determined in accordance with this Section by the volumes delivered during the period, expressed in the same units and measured at, or corrected to 14.73 psia and 60 degrees Fahrenheit, and multiplying by the factor necessary to convert the heating value/measurement units to the billing units provided in the appropriate rate schedule. The heating value of the gas shall be determined using one of the following methods:

- a) Processing a continuous sample of the main stream at the meter location through a recording calorimeter of a standard type;
- b) Analysis of gas samples accumulated from the main stream at the meter location in a sample bottle of an approved type;
 - i) passing the sample through a recording calorimeter of a standard type;
 - ii) passing the sample through a flow calorimeter of a standard type; or
 - passing the sample through a chromatograph to determine the chemical composition and calculating the total heating value from the sum of the constituents.

11.8 CUSTOMER-OWNED METERS

A Customer may install and operate a meter or any other device to measure gas volumes, pressure, temperature, BTU content or specific gravity downstream of the point of delivery. Unless expressly otherwise agreed to by the Company and Customer, however, the Company's meter and equipment shall be the sole determinant of volumes for Company's billing purposes.

METER READING AND ACCURACY

12.1 METER READING

Meters shall be read as nearly as may be practical on the same day of each calendar month. Whenever a reading of a general service meter is missed or the meter is not registering, the Company shall estimate the amount of gas used during the period. Such estimates shall be based on either -

- a) That Customer's use of gas during the same period(s) in previous years;
- b) That Customer's normal use of gas during preceding months; or
- c) The use of a similar Customer for the period missed.

If practical, an actual reading shall be made after two consecutive estimated bills. All meters in Special Service shall be read at least once a month. Whenever such a meter fails to register or is misread, the amount of gas used during the preceding period shall be estimated using data applicable to that Special Service Customer only. The Company will make a special reading of any meter upon request and payment of a service charge will be made in accordance with Section 21.1. The time of the special reading shall be agreed upon with the Customer so that he or she may be present. If the original reading was in error (subject to consumption between the two readings) the service charge will be refunded to the Customer.

12.2 ACCESS TO THE METER

The Customer shall permit the Company safe access to the meter at all reasonable times for reading thereof and at all reasonable times for reading, maintenance, testing, or replacement of the meter. Upon the Customer's failure or refusal to grant such access, the Company may issue a written notice to the Customer, advising them the situation must be corrected and access granted within 5 working days and that failure to do so can result in the disconnection of service and removal of the meter. Additional fees may apply and will be assessed to such Customer as specified in Section 21.1.

12.3 METER ACCURACY

The accuracy limit of all Company meters is established at two percent (2%) fast or slow. Any meter found to be registering outside of the limits of accuracy shall immediately be removed or repaired. As long as the meter is operating within the limits of accuracy, it shall be the conclusive determination as to the quantities of gas delivered to the Customer on whose service it is set.

12.4 METER TESTING AT CUSTOMER REQUESTS

The Company shall have the right to remove and/or test the meter used to determine the quantity of gas delivered. The Customer may request that the Company make a special test of the meter through which he or she is served. Requests for such tests shall be made in writing and the Company shall have 10 days after receipt of the request to remove the meter for testing or to test the meter in place. Tests on removed meters shall be conducted within a reasonable time. If the test is to be performed after the period of presumed accuracy listed by the manufacturer or if the test is to be performed for a residential or small commercial Customer for whom no such test has been performed within the previous four (4) years for the same Customer at the same location, no service charge will be assessed. Otherwise, the Customer shall pay a service charge for such test as specified in Section 21.1.

METER READING AND ACCURACY (Continued)

BILLING ADJUSTMENTS - GENERAL SERVICE 12.5

Whenever it has been determined that a meter reading and the subsequent billing has been in error, the Company shall recalculate the affected bill(s). If the date and amount of the error can be definitely fixed, the Company shall refund or may bill the affected Customer for the entire difference between the actual bills rendered and the amount which should have been billed. If a meter is found to have registered inaccurately (such as a meter found to be registering fast or slow), the Company shall refund or bill an amount equal to the difference between the actual bills rendered and the amount which would have been billed if the meter was 100 percent accurate during the time since the last previous test or six months, whichever is less. If the meter is found not to have registered, then the rebilling shall be limited to a threemonth period previous to the time the meter is found not to be registering. The determination of amounts used but not metered is to be based on consumption during other like periods by the same Customer at the same location, when available, and on consumption under similar conditions at the same location or of other similarly situated Customers, when not available. Undercharges billed to the Customer may be repaid in a series of equal installments over a reasonable period of time. This Section shall not apply to meter errors found as a result of routine testing in the Company's or its designee's meter shop.

12.6 PROVISIONS FOR SPECIAL SERVICE

The following modifications shall apply to the provisions of this Section for all Special Service rate schedules and service under special written agreements:

- a) Orifice and turbine meters shall be tested at least four times per year at intervals not to exceed 120 days. Should the Customer so elect, tests shall be made in the presence of his or her representative.
- b) Whenever a meter is found to be registering above or below the limits of accuracy, adjustment of the bill (either up or down) shall be limited to the monthly billing subsequent to the last meter test. The adjustment shall be made upon the basis of the best data available, using the first of the following methods, whichever is most appropriate:
 - i) by using registration of Customer's check meter(s);
 - ii) by correcting the error, if the percentage of error is ascertainable by calibration test or mathematical calculation; or
 - by estimating the quantity of gas delivered by comparison with deliveries during the iii) preceding period under similar conditions when accurate registration was obtained.

12.7 PERIODIC TESTS

The Company shall make periodic tests of meters, associated devices and instruments to assure their accuracy. Such tests shall be scheduled within the calendar year or earlier, when the interval is stated in years; or within the calendar month, or earlier when the interval is stated in months. The basic periodic test interval shall be no longer than provided for in the manufacturer's recommendations, a copy of which is available upon request.

BILLING AND PAYMENT OF BILLS

13.1 RENDERING OF BILLS

Bills for all service shall be rendered monthly as promptly as feasible after the meter has been read. Bills shall be due and payable in full on or before the due date, which shall be stated on the face of the bill and shall not be earlier than fifteen (15) days after the bill is mailed (including electronic mail). Bills shall be considered to have been rendered when deposited in the United States Mail with postage prepaid thereon or, when the customer has elected to receive billings via electronic mail, when the electronic document has been sent. Payment shall be considered received when the correct amount has been received through a company authorized payment method. If not paid by the date due, the bill shall be considered delinquent.

13.2 BILLING PERIOD

Bills shall be rendered at regular monthly intervals unless otherwise authorized or unless service is rendered for a period of less than a month.

13.3 ESTIMATED BILLS

In the event any meter cannot be read at the end of the billing period, the Company shall bill the Customer on the basis of an estimated consumption determined in accordance with Section 12.1 of this Tariff. The next bill based on actual reading after an estimated bill shall make any corrections necessary to bring the Customer's account to a current status for the actual consumption.

13.4 DISPUTED BILLS

- a) In the event of a dispute between the Customer and the Company regarding the bill, the Company will make such investigation as is required by the particular case and report the results to the Customer. If the Customer wishes to obtain the benefits of subsection b) of this Section, notification of the dispute must be given to the Company prior to the date the bill becomes delinquent. In the event the dispute is not resolved, the Company shall inform the Customer of the complaint procedures of the appropriate regulatory authority.
- b) Notwithstanding any other subsection of this section, the Customer shall not be required to pay the disputed portion of the bill which exceeds the amount of that Customer's average usage for the billing period at current rates until the earlier of the following: resolution of the dispute or the expiration of the 60-day period beginning on the day the disputed bill is issued. For purposes of this section only, the Customer's average usage for the billing period shall be the average of the Customer's usage for the same billing period during the preceding two years. Where no previous usage history exists, the average usage shall be estimated on the basis of usage levels of similar Customers and under similar conditions.

13.5 PAYMENT RE-PROCESSING FEE

The Company may charge or add to the Customer's account and collect a fee (as provided in Section 21.1 d) to recover costs for reprocessing any payment, including paper check, electronic transfer payment, and debit and credit card payment, that has been rejected or returned to the Company by the bank for any reason other than bank error.

BILLING AND PAYMENT OF BILLS (Continued)

13.6 E-STATEMENTS

The Customer may at its option receive bills and notices via electronic mail, thereby eliminating paper bills and notices.

13.7 PAYMENT OPTIONS

The Company, at its option and discretion, may contract with payment vendors to provide various payment options and authorize these vendors to accept payments from Customers on the Company's behalf. Payment options may be electronic, telephonic, in person, or by mail and may include automatic bank draft, credit/debit card, check or cash. Contracted payment vendors may charge Customers an additional fee of the use of that payment option and shall be solely responsible for collecting that fee from the Customer.

13.8 DEFERRED PAYMENT PLANS

The Company, at its sole discretion, may offer a deferred payment plan for delinquent Customer accounts. Deferred payment plans shall conform to the following guidelines:

- a) Every deferred payment plan entered into due to the Customer's inability to pay the outstanding bill in full must provide that service will not be discontinued if the customer pays current bills and a reasonable amount of the outstanding bill and agrees to pay the balance in reasonable installments until the bill is paid.
- b) For purposes of determining reasonableness, the following shall be considered:
 - i) size of delinquent account;
 - ii) Customer's ability to pay;
 - iii) Customer's payment history;
 - iv) time that the debt has been outstanding;
 - v) reasons why debt has been outstanding; and
 - vi) other relevant factors concerning the circumstances of the Customer.
- c) A deferred payment plan, if reduced to writing shall state immediately preceding the space provided for the Customer's signature and in bold-face print at least two sizes larger than any other used that, "If you are not satisfied with this agreement, do not sign. If you are satisfied with this agreement, you give up your right to dispute the amount due under the agreement except for the Company's failure or refusal to comply with the terms of this agreement."
- d) A deferred payment plan may include a one-time late payment penalty up to but no more than 5% of the original amount of the outstanding bill with no prompt payment discount allowed except in cases where the outstanding bill is unusually high as a result of the Company's error (such as an

SOI Exhibit A Proposed Rate Schedules and Tariffs Page 100 of 115

Texas Gas Service Company, a Division of ONE Gas, Inc. Rules of Service – Central-Gulf Service Area

inaccurately estimated bill or an incorrectly read meter). A deferred payment plan shall not include a finance charge.

- e) If a Customer has not fulfilled terms of a deferred payment agreement or refuses to sign the same if it is reduced to writing, the Company shall have the right to disconnect pursuant to disconnection rules in Section 17.2 of this Tariff and, under such circumstances, it shall not be required to offer a subsequent negotiation of a deferred payment agreement prior to disconnection.
- f) The Company shall not refuse a Customer participation in a deferred payment plan on the basis of race, color, creed, sex, marital status, age, or any other form of discrimination prohibited by law.

QUALITY OF GAS

14.1 HEATING VALUE

Gas delivered to Consumers in all service areas shall have an average gross heating value of at least 900 British Thermal Units per cubic foot measured when saturated with water vapor at a pressure of 14.73 psia and temperature of 60 degrees Fahrenheit. Gas of lesser heating value may be delivered for short periods, providing that the average heating value for the calendar month in which the reduction occurs is equal to or greater than the standard and that the burning characteristics of the gas are not significantly altered.

14.2 CHARACTER OF GAS

All gas furnished to Consumers in the Central-Gulf Service Area shall be of merchantable quality suitable for use in standard gas burning appliances. Merchantable quality shall mean that the gas must be commercially free from dust, resins, water and hydrocarbons in liquid form at the pressure and temperature at which the gas is delivered.

14.3 ODORIZATION

All gas shall be odorized with a chemical odorant at a sufficient rate to make it readily detectable. Gas containing enough natural odorant as prescribed by the Railroad Commission of Texas need not be odorized unless the odorant level drops below the acceptable level.

SERVICE WORK

15.1 CERTAIN SERVICES PROVIDED AT NO CHARGE

When a Customer or Consumer smells or detects natural gas and contacts the Company, the Company shall provide to the Consumer at no-charge to the Customer or Consumer leakage and pressure investigations to ensure that unsafe conditions do not exist. Where leakage or unsafe conditions are determined by the Company to be in the Customer's or Consumer's piping or equipment, the Customer or Consumer will be so advised and service will be discontinued until such time that all leakage and other unsafe conditions have been properly corrected by the Customer or Consumer. In addition, when service is initiated, gas air adjustments on a standard domestic and commercial gas range and water heater will be made.

Any other work performed on any Consumer's appliances or housepiping will be on a charge basis.

15.2 OTHER SERVICE

The Company may have personnel available for and may undertake other service work on the Consumer's premises on a charge basis, as time permits. Charges shall be made at the Company's standard rate in the Service Area and such work and the associated revenues and costs shall be considered non-utility.

15.3 EXPEDITED SERVICE

A Customer may request an expedited service. Charges may apply. (See Section 21 – Fees and Deposits)

15.4 NO ACCESS

A fee may be charged to a Customer who requests a specific time for service, if the Company agrees to the time, sends appropriate personnel to the appointed location and the Customer is not present to allow access to the premises. (See Section 21 – Fees and Deposits)

15.5 MATERIALS OR EQUIPMENT FURNISHED BY THE COMPANY

The Company shall furnish and install the service pipe, and equipment related thereto, including meter valve and service regulator, from the Company's main to the Customer's meter. Although affixed to or buried in the Customer's property, the entire service line and meter set shall become the property of the Company and shall be operated and maintained by the Company.

15.6 MATERIALS OR EQUIPMENT FURNISHED BY THE APPLICANT

The Applicant shall furnish and install at his or her expense all piping, conversions of existing equipment, and appliances required to conduct and utilize the gas furnished by the Company. The adequacy, safety, and compliance with applicable codes and ordinances of piping, conversion equipment and appliances shall remain the responsibility of the Applicant and no action of the Company in accordance with this Tariff shall release the Applicant of the responsibility to furnish and install the facilities required by this Section.

SERVICE WORK (Continued)

15.7 CODES AND ORDINANCES

All piping, installations, and conversion equipment owned by the Applicant shall comply with all applicable federal, state, and city ordinances and shall be properly designed for the pressures and volumes to be handled. Where there are no appropriate ordinances, the applicable provisions of the National Fuels Gas Code 54; ANSI Z223.1, and any amendments thereto shall apply.

15.8 INSPECTIONS AND TESTS

The Company shall have the right to inspect new installations and/or conversions of appliances and equipment prior to initiation of service and to require any test or repair of the Applicant's facilities it deems necessary, at no charge to the customer.

15.9 REFUSAL TO SERVE

The Company shall refuse service to any Applicant who refuses Company or Company's representatives access to or entry for observation or whose facilities do not comply with the applicable provision of this Tariff. The right to refuse service shall terminate upon satisfactory correction of the condition that was the cause for refusal. Initiation of service, however, shall not be considered acceptance or approval by the Company of such facilities.

MAINTENANCE OF EQUIPMENT

16.1 MAINTENANCE BY COMPANY

The Company shall maintain all facilities owned by it and shall be responsible for the safe conduct and handling of the gas until it passes the point of delivery. The Company's representative shall have the right to enter the Customer's premises at any reasonable time, in the event of an emergency at any time, to read the meter or make any necessary inspection, repair, adjustment, or replacement of any property owned by the Company.

16.2 MAINTENANCE BY THE CUSTOMER

The Customer shall maintain all facilities owned by him or her and shall be responsible for the safe conduct and handling of the gas after it passes the point of delivery. The Customer shall remove, repair or adjust any Customer-owned property which may pose a threat of damage to the property of the Company. The Customer shall take all reasonable means to assure that no one other than an employee of the Company shall adjust, repair, disconnect or change the meter or other Company facilities in any way. In case of loss or damage to the Company's property from the negligence or willful acts of the Customer or Consumer or the Customer's or Consumer's representatives, the Customer will reimburse the Company for all costs of repairing or replacing the damaged property, including any costs of collection such as attorney's fees.

16.3 LEAKS - RIGHT TO DISCONNECT FOR

The Customer or Consumer shall give the Company notice of any leaking or escaping gas as soon as it is detected. Upon receipt of this notice, the Company shall investigate the matter as promptly as feasible under the circumstances. If the Company's test indicates leakage in the Customer's or Consumer's facilities, the Company shall have the right to disconnect service immediately until the Customer or Consumer has had the condition corrected. If leakage is found to be from Company owned facilities, the Company shall have the right to disconnect service for a reasonable period of time until it can be corrected by the Company. The Company shall have the right to disconnect service immediately if any of the Customer's or Consumer's appliances or equipment is, in the Company's opinion, operating in an unsafe manner.

16.4 FACILITIES CURRENTLY OWNED BY THE CUSTOMER

Any facilities downstream of the meter installed by the Customer shall remain the property and responsibility of the Customer. Whenever the condition of the facility is such that replacement is required, the work shall be done by the Company pursuant to the provisions of Section 16.7 of this Tariff. New facilities will continue to be installed pursuant to Sections 7.1 and 7.2 of this Tariff.

16.5 RESPONSIBILITY

Nothing in this Section shall make the Company responsible for the safe upkeep of any Customer or Consumer-owned facilities.

MAINTENANCE OF EQUIPMENT (Continued)

16.6 RELOCATION OF COMPANY FACILITIES

- a) A charge of not more than actual cost may be made for relocating a meter or other Company equipment on the same premises at the request of the Customer or Consumer.
- b) If the Company shall for its own convenience and not for the safety or convenience of the Customer, change the point of delivery or change the location of its equipment on private property, the Company shall bear the expense.

16.7 REPLACEMENT OF CUSTOMER-OWNED PIPING

- a) When repair or replacement of Customer-owned piping becomes necessary due to deterioration of the line, damage to the line (except when caused by Customer or Customer's agent), relocation of the Company's distribution main, or for other safety reasons, the Company will relocate Customer's meter to the exterior of the building wall, as close as possible to the existing stub out (where piping exits the structure), and will replace the service piping up to the stub out. The Company will own and be responsible for all service piping from the main line to the meter, and Customer will own and be responsible for all piping from the meter to the building.
- b) The Customer may be billed for all costs of the meter relocate and pipeline replacement.
- c) In the absence of any provision contained in a deed of dedication authorizing the Company to install the service piping and meter on Customer's premises, the owner of the premises shall execute an agreement establishing the meter location, authorizing the Company to install or replace the line, and granting Company access for such work. If the Customer or owner of the premises refuses to give Company personnel or Company authorized personnel appropriate access to the property for purposes of installation, the Customer will retain responsibility for his/her facilities and shall bear the expense of any replacement or repairs.

DISCONTINUANCE OF SERVICE

17.1 BY CUSTOMER

The Customer shall be responsible for all charges for gas service from the time Customer gives notice of the intention to discontinue service until the Company has read the meter, or for five working days from the date of such notice, whichever is the shorter period of time.

17.2 FOR NON-PAYMENT

The Company shall have the right to discontinue service to any Customer for non-payment of bills or other charges authorized by this Tariff or the applicable rate schedules, following the due date specified in Section 13.1 hereof. Before discontinuing service for non-payment, the Company shall mail a separate written notice to the Customer in English and Spanish with the words "TERMINATION NOTICE" or similar language prominently displayed. This notice shall include a telephone number to contact the Company, the amount of the delinquent bill and the date by which the bill must be paid to avoid disconnection, and a statement of how to contact the Company in case of illness or other emergency. If a representative of the Company makes an attempt to collect a past due amount, a collection fee per visit shall be assessed to such Customers as specified in Section 21.1.

No Customer shall be disconnected for non-payment:

- a) Within a period of 5 working days after mailing of the notice or the day following the date indicated in the notice, whichever is the later time.
- b) After full payment of the delinquent bill except when there is not sufficient time to advise Company's service personnel of receipt of the payment.
- c) Before 7:00 AM or after 7:00 PM on any day or on Friday, Saturday, Sunday, Holiday, or day before a holiday unless Company personnel are available the following day for the purpose of making collections or reconnecting service.
- d) If within 5 working days after the date of delinquency of the bill the Company receives a written request from the Customer not to discontinue service for health reasons and the request is accompanied by a written statement from a licensed physician. Upon receipt of such request, the Company will suspend termination of service for a period up to 20 days. The Customer shall sign a deferred payment plan agreement which provides for payment of such service along with timely payments for subsequent monthly billings.

17.3 EXTREME WEATHER EMERGENCY

Except where there is a known dangerous condition or a use of natural gas service in a manner that is dangerous or unreasonably interferes with service to others, the Company shall not disconnect natural gas service to:

a) A delinquent residential customer during an extreme weather emergency. An extreme weather emergency means a day when the previous day's highest temperature did not exceed 32 degrees Fahrenheit and the temperature is predicted to remain at or below that level for the next 24 hours according to the nearest National Weather Station for the county where the customer takes service.

DISCONTINUANCE OF SERVICE (Continued)

17.3 EXTREME WEATHER EMERGENCY (Continued)

- b) A delinquent residential customer for a billing period in which the Company receives a written pledge, letter of intent, purchase order, or other written notification from an energy assistance provider that it is forwarding sufficient payment to continue service.
- c) A delinquent residential customer on a weekend day, unless personnel or agents of the Company are available for the purpose of receiving payment or making connections and reconnecting service.

The Company shall defer collection of the full payment of bills that are due during an extreme weather emergency until after the emergency is over and shall work with customers to establish a payment schedule for deferred bills.

Beginning in the September or October billing periods, the Company shall give notice as follows:

- a) The Company shall provide a copy of Railroad Commission of Texas Rule 7.460, Suspension of Gas Utility Service Disconnection During an Extreme Weather Emergency, to the social service agencies that distribute funds from the Low Income Home Energy Assistance Program within the Company's service areas.
- b) The Company shall provide a copy of Railroad Commission of Texas Rule 7.460, Suspension of Gas Utility Service Disconnection During an Extreme Weather Emergency, to any other social service agency of which the Company is aware that provides financial assistance to low income customers in the Company's service areas.
- c) The Company shall provide a copy of Railroad Commission of Texas Rule 7.460, Suspension of Gas Utility Service Disconnection During an Extreme Weather Emergency, to all residential customers of the Company and customers who are owners, operators or managers of master metered systems. Owners, operators or managers of master metered systems shall provide a copy of this rule to all their customers.

17.4 SPECIAL CONDITIONS

The Company shall have the right to discontinue service to any Consumer for any of the following reasons:

- a) Without notice for the presence of what the Company considers to be an unsafe condition on the Consumer's premises or if an emergency exists;
- b) Without notice for willful destruction or damage to or tampering with the Company's property by the Consumer or by others with knowledge or negligence of the Consumer;
- c) Within 5 working days after written notice if the Consumer uses his or her equipment in any way which causes or creates a potential for adverse affect on the Company's service to others;
- d) Without notice if failure to curtail by such Consumer endangers the supply to Consumers in Priority Class A or B;

DISCONTINUANCE OF SERVICE (Continued)

17.4 SPECIAL CONDITIONS (Continued)

- e) 5 working days after written notice from the Company for refusal to grant Company personnel or its designee's access to the Consumer's premises at any reasonable time for any lawful purpose;
- f) 5 working days after written notice from the Company for use, sale or delivery of gas in violation of the provisions of this Tariff or violation of any applicable laws, orders or ordinances, provided that disconnection may be made without notice if the violation creates an unsafe condition;
- g) For Customers acquiring their own supplies of gas, the Company may discontinue service upon request of a Supplier, provided however, that the Supplier represents to the Company that notice has been given to the Customer by the Supplier of delinquency in payment at least five working days prior to Supplier's request for disconnection, and provided that Supplier agrees to indemnify and hold harmless the Company from any potential resulting liability;
- h) If a Customer fails to uphold the terms of a deferred payment plan; or
- i) Within 5 working days after written or electronic notice, for Consumers enrolled in e-bill, that any payment including paper check, electronic transfer payment, and debit or credit card payment, that has been rejected or returned to the Company by the bank.

17.5 RIGHT OF ENTRY

The Company shall have the right to enter the Consumer's premises at any reasonable time to shut off service in accordance with this Tariff and to remove its meter and any other Company property. If the Company is required to take legal action to enforce its rights hereunder, the Company shall be entitled to recover all of its necessary expenses and fees including, but not limited to attorneys' fees, police escort fees and/or the cost to relocate the meter at the Customer's expense.

17.6 ABANDONMENT OF SERVICE

Unless requested by the Customer, service shall not be abandoned (permanent disconnection of any Customer other than a temporary Customer) without permission of the Regulatory Authority. Failure of the Customer to request reinstitution of service within a reasonable period of time after disconnection shall be considered a request for permanent discontinuance of service.

RE-ESTABLISHMENT OF SERVICE

18.1 FOR NON-PAYMENT

When service has been disconnected for non-payment, the Company shall require that the Customer pay the total amount of his or her account then due plus the prescribed reconnect fee or make satisfactory arrangements for that payment before service is reinstituted. In addition, the Company shall require that the Customer re-establish satisfactory credit in accordance with Section 5 of this Tariff.

18.2 FOR OTHER REASONS

If disconnection has been made by the Company for reasons other than non-payment, service shall not be reinstated until the condition for which it was terminated has been corrected to the Company's satisfaction. The Customer shall also be required to pay a reconnect fee before service is turned on. When service has been disconnected at the Customer's request for a period of one year or more, the request for service shall be treated as a new application. When service has been disconnected for less than one year, the request shall be treated in the same manner as a disconnection for non-payment.

18.3 RECONNECTION

The Company shall restore service as soon as feasible after receipt of a reconnection request and compliance with the requirements of this Section. The Company shall charge a non-refundable reconnection fee for all Customers in accordance with Section 21.1. The restoration of service will be accomplished as expeditiously as scheduling permits. If the Customer requests service after hours or earlier than reconnection would otherwise be scheduled, the Company shall offer expedited service in accordance with Section 21.1. Customer shall be advised that an additional fee will be charged and must agree to pay such charge. In the event the Company is required to make more than one call because the reason for disconnection has not been properly corrected, the reconnect fee may be charged for each call made. No fee shall be charged for any reconnection made after disconnection due to Company's operation. See Section 21.1 for fees.

SOI Exhibit A Proposed Rate Schedules and Tariffs Page 110 of 115

Texas Gas Service Company, a Division of ONE Gas, Inc. Rules of Service – Central-Gulf Service Area

NOTICE

19.1 GENERAL

Notice is required for all matters in this Tariff other than billing and payment of bills, which shall be deemed to have been given by the Customer when a letter with postage prepaid has been deposited in the United States Mail addressed to the Company at the office specified on the front sheet of this Tariff, and to the Customer when addressed to Customer at his or her last known service address, or to either party when directly communicated to the other party in person or by telephone.

AVERAGE BILL CALCULATION PLAN or AVERAGE PAYMENT PLAN

20.1 DESCRIPTION-RESIDENTIAL

Any residential Customer may elect to participate in the Company's Average Payment Plan, also known as the Average Bill Calculation Plan ("ABC/APP Plan"), or as such ABC/APP Plan may be modified from time to time for payment of charges for gas service. In the event the Company modifies the ABC/APP Plan, the Company shall notify individual Customers of those changes when the Customer requests enrollment. In general, the conditions under which a Customer may participate in the ABC/APP Plan are set forth below:

- a) The Company reserves the right to adjust the monthly ABC/APP Plan payments of any Customer at any time for changes in conditions or rates;
- b) The Company shall advise each Customer in the ABC/APP Plan of the monthly ABC/APP Plan payment to be paid by the Customer. Each participating Customer will receive a regular monthly gas bill which will reflect actual consumption and charges for that billing month and the amount of any debit or credit balance before the payment of that month's ABC/APP Plan payment. The Customer shall continue to pay the monthly ABC/APP Plan payment amount each month for gas service, notwithstanding the current gas service charge shown on the bill;
- c) In addition to the monthly ABC/APP Plan amount, any other charges incurred by the Customer shall be paid monthly when due;
- d) Interest shall neither be charged to the Customer on accrued ABC/APP Plan debit balances nor paid by the Company on accrued ABC/APP Plan credit balances;
- e) Any amount due the Customer or the Company will be settled and paid at the time a Customer, for any reason, ceases to be a participant in the ABC/APP Plan;
- f) Any Customer's participation in the ABC/APP Plan may be discontinued by the Company if the monthly plan payment has not been paid on or before the due date of the monthly plan payment;
- g) If any Customer in the ABC/APP Plan shall cease, for any reason, to participate in the ABC/APP Plan, then the Company may deny that Customer's reentry into the ABC/APP Plan until the following year.

FEES AND DEPOSITS

<u>21.1</u> <u>FEES</u>

All fees and charges shall be adjusted by taxes and fees (including franchise fees) where applicable. In the incorporated areas of Bayou Vista, Cuero, Galveston, Gonzales, Groves, Jamaica Beach, Lockhart, Luling, Nederland, Nixon, Port Arthur, Shiner and Yoakum only, all fees and charges (excluding advances, contributions in aid of construction and deposits) shall be adjusted by the amount which represents the actual gross receipts, occupation, revenue taxes and franchise fees paid by Texas Gas Service Company, a Division of ONE Gas, Inc.

a) Initiation of Service:

i) Connect: (Section 5.4)

\$35.00

A connection fee shall be charged to any Applicant for the cost involved in initiation of service. This fee shall be charged when a meter is set and/or gas turned on.

ii) Read-In: (Section 5.4)

\$15.00

A read-in fee shall be charged to any Applicant for the cost involved in initiation of service. This fee shall be charged when only a meter reading is required.

iii) Special Handling & Expedited Service: (Sections 5.4 and 15.3)

In addition to initiation of service fee above, a fee may be charged to any Applicant whose request to initiate service cannot be worked during normal business hours or requires special handling. Applicant must be advised that an additional fee will be charged and must agree to pay such charge. These charges include:

1) Special Handling

\$15.00

The Company may, at Applicant or Customer's request, provide special handling in order to meet the Applicant or Customer's requirements. Special handling <u>does not</u> include calling the Applicant/Customer in advance or A.M. or P.M. scheduling

2) Expedited Service and Overtime Rate

\$60.00

The Applicant or Customer's request for expedited service may be scheduled at any time to fit the Company's work schedule, and an Expedited Service charge shall be collected. The Company shall not be obligated to provide Expedited Service when the personnel and resources to do so are not reasonably available.

b) Services - Others

As stated below

Whenever service is furnished from the facilities of others and the Company must pay any special fees to the supplying Company, the Applicant may be requested to reimburse the Company for such charge.

FEES AND DEPOSITS (Continued)

21.1 FEES (Continued)

c) <u>Customer Requested Meter Test:</u> (Section 12.4)

| | Positive Displacement | <u>Charge</u> |
|----|---|----------------------|
| | Up to 1500 cubic feet per hour Over 1500 cubic feet per hour | \$150.00 \$200.00 |
| | Orifice Meters | |
| | All sizes | \$200.00 |
| d) | Payment Re-processing Fee: (Section 13.5) | \$25.00 |
| e) | Collection Fee: (Section 17.2) | \$15.00 |

A Collection Fee shall be charged to any Customer whose failure to respond to a termination notice necessitates the dispatch of a Company representative to attempt collection of payment from Customer.

f) Reconnect Fees: (Section 18.3)

\$35.00

A reconnect fee shall be charged to any Customer whose service is terminated and then re-initiated unless terminated in error by the Company. This fee is the same as the Standard Initiation Fee charged for new service.

| (i) | Regular Labor and After Hours Rates | \$45.00 (Regular) |
|-----|-------------------------------------|-----------------------|
| | | \$60.00 (After Hours) |

Charge for non-routine services including but not limited to repeat high bill investigations and building meter loops.

g) Special Read: (Section 12.1) \$15.00

A special read fee shall be charged for customer requested reading of a meter of which estimated billing has been made. This is not in connection with Section 12.4.

h) Meter Exchange (Customer Request): (Section 16.6) \$150.00

A fee will be charged for customers requested meter exchanges when a meter is working properly or is done for the customer's convenience.

FEES AND DEPOSITS (Continued)

21.1 FEES (Continued)

i) Meter Tampering – Residential: (Section 16.2)

\$150.00

A fee will be charged to repeat customers who knowingly tamper with Company property (i.e. broken meter locks, broken stop cocks, tampered meter dials, and broken meter blind seals).

j) <u>Unauthorized Consumption:</u> (Section 16.2)

\$30 plus expenses

Charges for the replacement of an illegally broken meter seal or locking device to the Customer who could be reasonably expected to benefit from gas service received through said meter.

k) No Access Fee: (Section 15.4)

\$15.00

A fee charged to a Customer who schedules an appointment but fails to appear.

1) <u>Meter Removal Fee:</u> (Section 12.2)

\$25.00

m) Account Research Fee:

\$20.00/hr

A fee will be charged for Customer account information requiring research of accounting/billing information.

n) <u>Police Escort Fee:</u> (Section 17.4)

As stated below

A fee charged when the Company is required to use law enforcement personnel to escort it into locked sites or sites requiring animal control in order for the Company to access a meter. Company will charge the stated amounts or current rate charged by the entity providing the police escort for this service.

o) Excess Flow Valve Installation Fee:

\$400.00

Pursuant to Code of Federal Regulations, §192.383(d) a fee for installation of an excess flow valve (EFV) will be assessed when a Customer requests such installation on the Customer's service line. The EFV will be installed at a date mutually agreeable to both Company and Customer, but after January 1, 2018. The Company reserves the sole right to conduct any required maintenance that may result from the installation. The customer shall be assessed a one-time installation fee.

FEES AND DEPOSITS (Continued)

21.2 DEPOSITS

a) Advances: (Section 8.4)

As stated below

Estimated expenditure to serve the premises of new business beyond the existing distribution facilities of the Company.

b) <u>Customer Deposits</u>: (Section 10.1) As stated below

Minimum deposit residential: \$75.00 Minimum non residential deposit: \$250.00 Exhibit B Proposed CGSA Revenue Change by Class

(1) Bill impacts are shown for those schedules with customers during the test year. The test year cost of gas in each area is included in the bill calculations. Bills under current and recommended rates do not include revenue-related taxes and do not include the Conservation Adjustment Clause rate, which is applicable in the incorporated CTSA. Taxes vary across different locations in the service area.

(2) Bills are based on the following average usage levels:

| | Proposed C | GSA |
|-----------------------------|------------|---------|
| | Year-Round | January |
| Residential - Rate Option A | 18 | 48 |
| Residential - Rate Option B | 45 | 121 |
| Commercial | 263 | 441 |
| Industrial | 2,565 | 5,228 |
| Public Authority | 442 | 1,002 |
| Public School Space Heating | 1,927 | 2,295 |
| Compressed Natural Gas | 17 | 30 |

(3) Transportation customers secure their own gas. While the Company has no way of knowing the customer's cost of gas, these bill comparisons assume that customers obtain their gas at a cost that is five percent less than the Company's gas cost. These transportation bill comparisons are only illustrations of the level of total bills and the percentage changes in those bills. Bills are based on the following average usage levels.

| | Proposed C | GSA |

| 1 | | DIRECT TESTIMONY OF G. DAVID SCALF |
|----|----|--|
| 2 | | I. <u>INTRODUCTION AND QUALIFICATIONS</u> |
| 3 | Q. | PLEASE STATE YOUR NAME AND BUSINESS ADDRESS. |
| 4 | A. | My name is G. David Scalf. My business address is 15 E. 5th Street, Tulsa, |
| 5 | | Oklahoma 74103. |
| 6 | Q. | BY WHOM ARE YOU EMPLOYED AND IN WHAT CAPACITY? |
| 7 | A. | I am employed by ONE Gas, Inc. ("ONE Gas") as the Vice President of Rates and |
| 8 | | Regulatory Affairs. In this role, I am responsible for the rates and regulatory |
| 9 | | activities of ONE Gas' three natural gas distribution utilities - Oklahoma Natural |
| 10 | | Gas, Kansas Gas Service, and Texas Gas Service Company ("TGS" or the |
| 11 | | "Company"). |
| 12 | Q. | PLEASE DESCRIBE YOUR EDUCATIONAL BACKGROUND AND |
| 13 | | PROFESSIONAL EXPERIENCE. |
| 14 | A. | I am a Certified Public Accountant with a Bachelor of Science Degree in Finance. |
| 15 | | I practiced in public accounting for ten years and for approximately nine years, I |
| 16 | | worked in various positions within the Public Utility Division of the Oklahoma |
| 17 | | Corporation Commission. In August 2003, I joined Oklahoma Natural Gas as a |
| 18 | | Regulatory Analyst. I served in various roles at Oklahoma Natural Gas, including |
| 19 | | Manager of Financial Accounting, Manager of Contract Administration and |
| 20 | | Director of Rates and Regulatory. I assumed my current position with ONE Gas in |
| 21 | | October 2016. |
| | | |

| 1 | Q. | HOW DOES YOUR BACKGROUND AND EXPERIENCE PROVIDE |
|----|----|--|
| 2 | | INSIGHT ON ISSUES RAISED IN THE COMPANY'S STATEMENT OF |
| 3 | | INTENT? |
| 4 | A. | My career in public utility regulation and the natural gas distribution business has |
| 5 | | spanned over 20 years. During that time, I have been extensively involved with |
| 6 | | numerous aspects of regulatory filings that include: preparation of all aspects of |
| 7 | | general rate case applications; review of work papers and testimony of all witnesses |
| 8 | | participating in rate cases; interfacing with regulatory commission staff and all |
| 9 | | stakeholder groups including public advocacy and industry groups; and compliance |
| 10 | | with regulatory statutes and requirements. I have testified before the Oklahoma |
| 11 | | Corporation Commission numerous times regarding rate base, expenses, |
| 12 | | accounting, and regulatory policy issues. During my employment at the Oklahoma |
| 13 | | Corporation Commission, I participated in numerous audits of general rate cases |
| 14 | | filed by various natural gas, electric, and water utilities. |
| 15 | Q. | HAVE YOU PREVIOUSLY TESTIFIED BEFORE ANY REGULATORY |
| 16 | | AUTHORITIES IN TEXAS? |
| 17 | A. | Yes, I provided pre-filed testimony in the Rio Grande Valley Service Area |
| 18 | | municipal level statement of intent filed in June 2017. |
| 19 | Q. | WAS THIS TESTIMONY PREPARED BY YOU OR UNDER YOUR |
| 20 | | DIRECTION? |
| 21 | A. | Yes, it was. |
| 22 | Q. | WHAT IS THE PURPOSE OF YOUR TESTIMONY? |
| 23 | A. | My testimony introduces TGS's Statement of Intent filing and the witnesses, in |

addition to myself, who are also filing testimony on behalf of the Company. I

24

provide an overview of ONE Gas and the Company's request to consolidate its
existing Central Texas Service Area ("CTSA"), Gulf Coast Service Area ("GCSA")
and the City of Beaumont into a new Central-Gulf Service Area ("CGSA"). Finally,
I address two adjustments in Schedule G from a management perspective: (1)
incentive compensation and (2) meal and hotel costs. Other Company witnesses,
which I identify below, also address these two subjects in testimony.

II. OVERVIEW OF TGS'S STATEMENT OF INTENT FILING

8 Q. PLEASE PROVIDE AN OVERVIEW OF ONE GAS.

Α.

A.

ONE Gas is in its sixth year as a stand-alone, fully regulated natural gas utility trading on the New York Stock Exchange under the symbol "OGS." Headquartered in Tulsa, Oklahoma, ONE Gas operates as an independent natural gas distribution company focusing on delivering natural gas safely and reliably to customers in three states - Oklahoma, Kansas and Texas. ONE Gas has 3,614 employees, 878 of which are in Texas. As a 100% regulated company, focused solely on distribution operations, all costs ONE Gas incurs support its natural gas distribution business.

Q. WHY IS TGS FILING A STATEMENT OF INTENT AT THIS TIME?

Following ONE Gas' separation from ONEOK, Inc. in January 2014, TGS filed a rate case in each of its service areas, including three rate cases in which separate services areas were consolidated. Those statements of intent, filed between 2015 and 2018, established rates that more accurately reflected the cost of providing service to customers, allowed TGS to obtain approval of consistent tariffs and rate schedules for its various service areas and approved consolidation of several TGS service areas. This Statement of Intent provides an opportunity for TGS to continue

1 its efforts to achieve additional efficiencies through further service area 2 consolidation and to request rates that more accurately reflect the current and 3 expected costs of providing service in the proposed CGSA at the time new rates will go into effect. 4

5 Q. WHAT TEST YEAR WAS UTILIZED IN THIS FILING?

6 A. The Company's Statement of Intent filing is based on the financial results for the 7 test year ended June 30, 2019, as adjusted for known and measurable changes 8 through September 30, 2019.¹

Q. WHY IS TGS REQUESTING A RATE INCREASE IN THIS STATEMENT **OF INTENT?**

11 A. In terms of revenue requirement, the Company's cost of service schedules show 12 that TGS is experiencing a revenue deficiency primarily driven by plant investment 13 and related depreciation expense, payroll-related expenses, and increasing 14 regulatory and safety requirements. TGS has continued to invest in system safety 15 and reliability, resulting in an increase of over \$160 million in net plant. In addition, 16 TGS must continue to invest in its employees and has experienced increases in 17 necessary personnel-driven expense items, such as wages, salaries, and employee 18 benefits. Regulatory and safety requirements to document, test, survey, repair, plan 19 and replace system assets continue to increase. The costs associated with these

with related updated accumulated deferred income taxes and revenue growth, by February 14, 2020.

requirements include operating expenses for activities such as leak repair, leak

9

10

20

¹ As Company witnesses Gracie Guerra and Mindy R. Edwards explain, TGS included September 30, 2019 Construction Work in Progress balances as an adjustment to construction completed not classified ("CCNC"). TGS will true-up net plant after December 31, 2019 to exclude any plant that is not used and useful at that time and will provide updated plant in service amounts, CCNC and accumulated reserves balances, along

survey, and distribution integrity management. TGS also made additional capital investments in its natural gas distribution system that included investments due to government relocations and technology that enhances the Company's ability to provide safe and reliable service. The Company continues to incur these types of costs annually due to aging infrastructure, more stringent natural gas pipeline safety and system integrity regulations, and the need to invest in technology that allows the Company to increase operational capabilities and efficiencies and improve customer service. These issues have resulted in a revenue deficiency that does not provide the Company with an opportunity to earn a reasonable return on its investment. The overall increase in the cost of service is partially offset by a reduction in the Federal income tax rate to 21% from 35%.

Q. HAS TGS TAKEN REASONABLE ACTIONS TO MANAGE COSTS?

A.

Yes, it has. The ongoing evolution of the energy markets creates greater competition and, with that, greater customer choice. Therefore, TGS is incented to reasonably manage its costs so that the Company will remain competitive and customers will continue to choose natural gas. In addition, the Company's continued success relies in part on being efficient and cost-conscious and on its employees operating safely and in a responsible manner. The Company has taken, and continues to take, steps to ensure that resources are used wisely and that costs are reasonably managed. TGS also strives to provide excellent customer service by improving performance through increased productivity and to balance personal interactions and technology to deliver efficient and satisfying experiences to our customers.

| 1 | Q. | PLEASE PROVIDE EXAMPLES OF THE COMPANY | Y'S |
|----|----|--|------|
| 2 | | IMPROVEMENTS IN CUSTOMER SERVICE ACTIVITIES. | |
| 3 | A. | Examples of improved customer service activities are: | |
| 4 | | (1) Electronic Statement Growth - Approximately one-third of ONE | Gas |
| 5 | | customers receive electronic statements, which results in a savings in postage | and |
| 6 | | materials; | |
| 7 | | (2) Enhanced Customer Communications - proactively putting information | tion |
| 8 | | in customers' hands such as improved phone application and website, new text | and |
| 9 | | e-mail campaigns for billing, payment reminders, and account updates to red | luce |
| 10 | | the need for customer calls and potentially reduce disconnect orders; | |
| 11 | | (3) Courtesy Collection Calls - payment reminder calls that are made w | hen |
| 12 | | a customer is past due on a bill, which gives customers another opportunity to m | ıake |
| 13 | | a payment before being disconnected; and | |
| 14 | | (4) Interactive Voice Response ("IVR") Enhancements - upgraded ph | one |
| 15 | | and IVR systems with enhanced capabilities and functionality provide more w | ays |
| 16 | | for customers to find the answers they need without having to take the time to | talk |
| 17 | | to a customer service agent. | |
| 18 | | These initiatives are designed to provide customers with greater flexibility | and |
| 19 | | more options other than speaking with a live customer service agent in orde | r to |
| 20 | | address customer account matters. | |
| 21 | Q. | PLEASE GENERALLY DESCRIBE THE RELIEF REQUESTED IN TI | HIS |
| 22 | | STATEMENT OF INTENT. | |
| 23 | A. | The Company's cost of service demonstrates a total annual net revenue deficie | ncy |
| 24 | | of \$17,046,666 for the proposed CGSA. The Company proposes to eliminate | this |

1 annual earnings deficiency and to have its rates set at a level that provides TGS a 2 return on equity of 10.0%. The Company is also requesting new depreciation rates, 3 as discussed in the testimony of Company witness Dr. Ronald E. White. In addition to the rate relief requested in this Statement of Intent, TGS is also seeking approval 4 5 to consolidate the GCSA, CTSA and the City of Beaumont into a single, new 6 service area known as the Central-Gulf Service Area. If consolidation and creation 7 of the CGSA is not approved, TGS requests, at a minimum, that the City of 8 Beaumont be consolidated into the GCSA. In addition, TGS is requesting a 9 prudence determination for the capital investment made since the last CTSA and GCSA rate cases. Finally, TGS is also seeking a determination that ONE Gas' 10 11 acquisition of ONEOK Transmission Company ("OTC") and its related assets is 12 consistent with the public interest under Gas Utility Regulatory Act ("GURA") § 102.051. 13 14 Q. WHAT IMPACT WILL THE REQUESTED RATE INCREASE HAVE ON 15 AVERAGE MONTHLY RESIDENTIAL BILLS IN THE PROPOSED CGSA? 16 17 A. The proposed rate increase will result in an increase to the average monthly bill for 18 the 270,604 residential customers in the incorporated areas of the proposed CGSA 19 and the 23,393 residential customers in the environs areas of the proposed CGSA, as shown in the table below.² 20

-

² The changes in year-round average bills shown in Columns (d) and (e) vary due to differences in current rates.

| | | | | Char | ige |
|----------|-----------------------------|---------|-------------|---------|-------|
| Line No. | Description | Current | Recommended | Dollars | % |
| | (a) | (b) | (c) | (d) | (e) |
| 1 | Residential - Rate Option A | | | | |
| 2 | CTSA Incorporated | \$29.20 | \$32.33 | \$3.13 | 10.7% |
| 3 | CTSA Environs | \$29.20 | \$32.33 | \$3.13 | 10.7% |
| 4 | GCSA Incorporated | \$29.57 | \$32.33 | \$2.76 | 9.3% |
| 5 | GCSA Environs | \$30.44 | \$32.33 | \$1.89 | 6.2% |
| 6 | City of Beaumont | \$29.25 | \$32.33 | \$3.08 | 10.5% |
| 7 | Residential - Rate Option B | | | | |
| 8 | CTSA Incorporated | \$44.71 | \$52.99 | \$8.28 | 18.5% |
| 9 | CTSA Environs | \$44.71 | \$52.99 | \$8.28 | 18.5% |
| 10 | GCSA Incorporated | \$55.21 | \$52.99 | -\$2.22 | -4.0% |
| 11 | GCSA Environs | \$54.74 | \$52.99 | -\$1.75 | -3.2% |
| 12 | City of Beaumont | \$54.89 | \$52.99 | -\$1.90 | -3.5% |

The proposed rates for all rate classes are identified in the direct testimony of Company witness Paul H. Raab and are reflected in the tariffs sponsored by Company witness Christy M. Bell. In addition to proposed gas sales, transportation, and cost of gas tariffs, the Company's filing includes other tariff and rate schedules such as a weather normalization clause, a rate case expense recovery rider, a pipeline integrity testing expense rider, and an excess deferred taxes rider. The Company is also proposing a Hurricane Harvey rider to recover response costs associated with the 2017 hurricane, and a Natural Event Response Rider that addresses the treatment of future natural event response costs. In addition, the Company proposes revised service fees and updated language in its transportation tariffs and rules of service.

| 1 | Q. | PLEASE IDENTIFY | THE | ISSUES | OF | FIRST | IMPRESSION | IN | THIS |
|---|----|------------------|-------|---------------|----|-------|------------|----|------|
| 2 | | STATEMENT OF INT | ΓENT. | | | | | | |

A.

A.

The issues of first impression are related to recovery of: (1) compensation and benefit costs under a new statute, GURA § 104.060, which is addressed in my testimony and by Company witnesses Jeff D. Branz and Stacey R. Borgstadt; and (2) meal costs of \$25 per person per meal, exclusive of taxes and tip amounts, and some hotel costs over \$150 per night, exclusive of taxes, which is addressed in my testimony and that of Company witness Allison N. Edwards. In addition, the Company is proposing new residential A/B rate design options that are structured to allow customers some choice in how their customer charge and usage rates are structured based on their individual usage characteristics, as explained by Mr. Raab.

Q. PLEASE DESCRIBE THE COMPANY'S A/B RATE DESIGN PROPOSAL.

The Company is proposing two residential rates. Rate Option A benefits customers with lower than average usage. It includes a lower monthly customer charge of \$14.00 but a higher volumetric rate of \$0.55701 per Ccf. Rate Option B benefits residential customers with higher than average usage. It includes a \$27.58 monthly customer charge but a much lower volumetric rate of \$0.10434 per Ccf. Importantly, the proposed rate design substantially mitigates the potential rate increase for low-usage residential customers as compared to a traditional rate design that applies the same customer charge and usage charge to all customers within the residential class. Both lower-use customers and higher-use customers benefit from the Company's proposed rate design as discussed in the testimony of Mr. Raab. The lowest use customers will, in fact, experience an overall rate decrease as shown in Exhibit PHR-5 to Mr. Raab's testimony. At the same time,

the proposed rate design ensures that higher-use customers will not experience significantly higher bill impacts during the winter months. For example, Rate Option B, which has a higher customer charge but lower volumetric charge, helps to levelize monthly charges for higher-use customers throughout the year.

If the proposed residential rate design is approved, the Company will initially place customers on the appropriate rate for the customer based on each customer's usage from the prior year. Subsequently, the customer will have the option to choose either Rate Option A or Rate Option B based on their own preference, provided that they remain on the rate they choose for a full year. The Company is excited to introduce an innovative new rate design in Texas that will allow customers some amount of choice in how they are billed for gas service.

Q. HAS A SIMILAR A/B RATE DESIGN BEEN PUT IN PLACE IN OTHER ONE GAS JURISDICTIONS?

- 14 A. Yes. The A/B rate design has been successfully implemented in ONE Gas'
 15 Oklahoma division, Oklahoma Natural Gas, and has been in place for fifteen years.
- 16 Q. HAS THE COMPANY INCLUDED REQUESTS RELATED TO FILINGS
 17 TGS PREVIOUSLY MADE WITH REGULATORY AUTHORITIES?
 - A. Yes, it has. TGS is requesting recovery of necessary costs it incurred to restore service following Hurricane Harvey in 2017, consistent with a settlement agreement the City of Galveston approved in July 2019 and the Railroad Commission of Texas ("Commission") approved in October 2019.³ Company

³ City of Galveston Ordinance 19-040; Statement of Intent of Texas Gas Service Company a Division of ONE Gas, Inc., to Increase Rates to Recover Hurricane Harvey Response Costs Within the Gulf Coast Service Area, GUD No. 10844, Final Order (Oct. 1, 2019). The Commission's order reflects it was exercising

witness Stacey L. McTaggart addresses the Hurricane Harvey costs in her testimony and the related request for approval of a Natural Event Response Rider that is designed to address deferral and recovery of costs associated with future storm or natural disaster events that may occur in the proposed CGSA.

TGS is also requesting a finding from the Commission that ONE Gas' June 2019 acquisition of OTC and its assets is consistent with the public interest. Company witness Shantel Norman discusses the purchase of these assets as they relate to the Company's operations. Ms. McTaggart addresses the Company's notification to the Commission of this transaction as required by GURA Section 102.051⁴ and supports the request for a finding that the acquisition of OTC, now ONE Gas Pipeline Company ("OPC"), and its assets is consistent with the public interest. Ms. McTaggart also explains TGS's plan to incorporate the OPC assets into its existing system. Relatedly, several additional Company witnesses address necessary adjustments to the test year cost of service to support incorporating the OPC assets into the existing TGS system.

Q. PLEASE IDENTIFY THE WITNESSES SUBMITTING TESTIMONY IN THIS FILING ON BEHALF OF TGS.

In addition to my testimony, the Company's witnesses and the subjects addressed in the testimony are identified below. Please also note that Exhibit GDS-1 is a copy of the Table of Contents Summary to the CGSA Cost of Service schedules, which lists all the schedules and workpapers in this filing, along with the sponsor(s).

⁴ Application filed by ONE Gas, Inc. to Report an Acquisition from ONEOK Transmission Company L.L.C., GUD No. 10877 (July 18, 2019).

A.

original jurisdiction over environs areas and appellate jurisdiction over the areas within the cities of Groves, Nederland, Port Arthur and Port Neches, Texas, all of which supported the settlement agreement.

| Witness | Title | Testimony Subjects |
|----------------------|---|--|
| Shantel Norman | Vice-President of Operations for TGS | Provides an overview of operations within the proposed CGSA; supports the proposed consolidation to create the CGSA; addresses the reasonableness and necessity of capital investment and Operations and Maintenance ("O&M") expenses; addresses ONE Gas' recent acquisition of OTC and the planned integration of the associated pipeline into TGS's system; and addresses the Company's Pipeline Integrity Testing Program. |
| Stacey L. McTaggart | Rates and Regulatory Director for TGS | Addresses the proposed consolidation of the existing CTSA, GCSA and City of Beaumont into the new Central-Gulf Service Area; the request for a finding that ONE Gas' acquisition of the former OTC assets in June 2019, now held by OPC, is consistent with the public interest; the transfer of the OPC assets into TGS's existing system; the Company's compliance with certain regulatory and statutory requirements; affiliate cost recovery issues related to Utility Insurance Company ("UIC") and OPC; the Company's compliance with the Accounting Order issued by the Commission in Gas Utilities Docket ("GUD") No. 10695 related to the federal Tax Cut and Jobs Act of 2017 (the "Act"); the Company's proposed EDIT Rider to return excess deferred income taxes to customers; the proposed treatment of cloud-based computing costs in future filings; TGS's recovery of costs associated with the Company's response to Hurricane Harvey; the Company's recovery of pipeline integrity testing costs; the proposed Natural Events Response Rider; and the Company's recovery of rate case expenses. |
| Janet L. Buchanan | Director of Rates and Regulatory Reporting for Kansas Gas Service | Supports TGS's revenue adjustments. |
| Gracie Guerra | Rates Analyst for TGS | Provides an overview of the cost of service and overall revenue requirement calculation and supports TGS's Direct rate base. |
| Mindy R. Edwards | Rates Analyst for ONE Gas | Supports certain TGS Division and Corporate capital investment that is included in the proposed CGSA revenue requirement as well as Corporate depreciation and amortization expense. |
| Marie J. Michels | Manager of Rates and Regulatory Analysis for TGS | Supports Direct expense adjustments including an adjustment for O&M expenses related to the operation of the OPC pipeline, among others adjustments. |

| Anthony Brown | Rates Specialist for TGS | Supports the cost allocation methodology used to determine TGS's share of allocated costs and certain Corporate expense adjustments. |
|------------------------|---|---|
| Allison N. Edwards | Manager of Rates and Regulatory Analysis for ONE Gas | Supports adjustments related to meal and hotel costs. |
| Stacey R. Borgstadt | Manager Rates and Regulatory Analysis for ONE Gas | Explains Direct, TGS Division and Corporate expense adjustments related to payroll and incentive compensation. |
| Timothy S. Lyons | Partner with ScottMadden, Inc. | Sponsors TGS's lead-lag study that determines TGS's cash working capital requirement to be included in rate base. |
| Jeff D. Branz | Director of Compensation and Benefits for ONE Gas | Addresses the reasonableness of ONE Gas' compensation philosophy and structure and related costs of base pay, incentive plans and benefits. |
| Cyndi King | Director of Treasury and Finance for ONE Gas | Supports the recovery of a return on TGS's portion of the prepaid pension asset. |
| Mark W. Smith | Vice-President and Treasurer for ONE Gas | Describes ONE Gas' captive insurance company, UIC. |
| Jeffrey J. Husen | Vice President, Chief Accounting Officer and Controller for ONE Gas | Addresses the Tax Cuts and Jobs Act of 2017 and the calculation of Excess ADIT. |
| Janet M. Simpson | Accountant and Vice- President at Dively Energy Services | Presents TGS's ADIT calculations. |
| Ronald E. White | Engineer and President of Foster Associates Consultants, LLC | Sponsors a study of the depreciation rates for TGS plant located in the proposed CGSA and for common facilities shared among all TGS service areas, including Corporate assets. |
| Bruce H. Fairchild | Principal with Financial Concepts and Applications, Inc. | Supports TGS's requested return on equity, cost of debt, capital structure, and overall return on invested capital. |
| Crystal D. Drumm | Rates Specialist for ONE Gas | Describes the class cost of service study and supports TGS's proposed class revenue allocation. |
| Paul H. Raab | Economic Consultant | Describes and supports TGS's proposed rate design, including options that allow for customer choice. |

Q. IS ONE GAS UNIQUE IN OFFERING EMPLOYEES INCENTIVE

2 **COMPENSATION?**

1

13

14

15

16

17

18

19

20

21

22

23

A.

3 A. No, ONE Gas is not unique in offering employees incentive compensation 4 opportunities as a component of the overall compensation package as the market 5 compensation studies indicate. Incentive compensation is necessary to provide a 6 level of compensation that allows ONE Gas to attract and retain qualified 7 employees who are necessary for the provision of safe and reliable service. In 8 addition, ONE Gas' incentive compensation programs benefit customers by 9 providing tangible ways to focus and motivate productive and efficient employee behavior. 10

11 Q. WHY IS IT APPROPRIATE FOR TGS TO RECOVER INCENTIVE 12 COMPENSATION COSTS?

It is appropriate for TGS to recover its requested incentive compensation costs because they are a reasonable and necessary cost for the Company. As Mr. Branz's testimony states, total employee compensation, including STI and LTI pay, is reasonable and slightly below or generally at the median of the market. Furthermore, the Company's incentive compensation costs include necessary costs for employees who are involved in the day-to-day functions and operations of the Company, including customer service representatives, field personnel who ensure the safety of customer premises, and employees whose work is critical to TGS's ability to meet required safety and regulatory requirements. All non-bargaining unit employees are eligible to earn incentive compensation through their performance.

| 1 | Q. | ARE THERE ANY UNIQUE ASPECTS OF ONE GAS THAT SUPPORT |
|----|----|--|
| 2 | | THE REASONABLENESS AND NECESSITY OF THE INCENTIVE |
| 3 | | COMPENSATION COSTS TGS IS REQUESTING IN THIS CASE? |
| 4 | A. | Yes, as I stated previously, ONE Gas is a fully regulated entity and operates only |
| 5 | | regulated local distribution companies, including TGS. Due to ONE Gas' fully |
| 6 | | regulated nature, all of the work performed by ONE Gas and TGS employees is |
| 7 | | focused on serving customer interests and operating a safe and reliable system. |
| 8 | | Because efforts from all employees are directed towards meeting customer needs, |
| 9 | | the compensation costs TGS incurs are reasonable and necessary for the provision |
| 10 | | of service. |
| 11 | Q. | ARE YOU FAMILIAR WITH ARGUMENTS TGS HAS FACED IN PRIOR |
| 12 | | RATE FILINGS CHALLENGING THE RECOVERY OF INCENTIVE |
| 13 | | COMPENSATION COSTS? |
| 14 | A. | Yes, I am. In prior filings, TGS responded to arguments related to whether |
| 15 | | customers or shareholders benefited from a particular goal in the incentive |
| 16 | | compensation plans, including the position that TGS should recover incentive |
| 17 | | compensation costs only for achievement of operational or safety goals. |
| 18 | Q. | DOES THE COMPANY AGREE WITH THE RATIONALE FOR THOSE |
| 19 | | CHALLENGES? |
| 20 | A. | No. In my experience with regulatory filings, no other item in a utility's cost of |
| 21 | | service is subject to a customer-versus-shareholder benefit test for recovery of those |
| 22 | | costs. As I understand the standard for recovering costs, including for incentive |
| 23 | | compensation, the costs must only be reasonable and necessary in order to be |
| 24 | | recovered through rates. To meet this standard for recovery, TGS has provided |

| 1 | | evidence in prior cases demonstrating that the STI and LTI plans and goals are |
|----|----|---|
| 2 | | based on recent market studies and that incentive pay is designed to compensate |
| 3 | | employees in a reasonable way. Based on that evidence, which TGS has also |
| 4 | | presented in this filing, the incentive compensation costs requested by TGS should |
| 5 | | be considered reasonable and necessary and recovered through rates. |
| 6 | Q. | ARE THERE ANY RECENT STATUTORY CHANGES RELATED TO |
| 7 | | INCENTIVE COMPENSATION COSTS? |
| 8 | A. | Yes. Effective June 2019, Texas Utilities Code § 104.060 directly addresses a gas |
| 9 | | utility's request to recover employee compensation and benefits costs through rates. |
| 10 | | The new law states that base salaries, wages, incentive compensation and benefits |
| 11 | | shall be presumed reasonable and necessary if the expenses are consistent with |
| 12 | | market compensation studies issued not earlier than three years before the initiation |
| 13 | | of a rate case. Mr. Branz discusses in his testimony the recent market compensation |
| 14 | | studies ONE Gas uses to determine benefits, base pay, and incentive compensation |
| 15 | | levels. Under the statute, the presumption does not extend to incentive |
| 16 | | compensation for Named Executive Officers related to attaining financial goals. |
| 17 | | Ms. Borgstadt discusses the adjustment for incentive compensation costs, which |
| 18 | | includes removing incentive compensation related to financial metrics for Named |
| 19 | | Executive Officers, in her testimony. |
| 20 | Q. | PLEASE EXPLAIN THE SIGNIFICANCE OF THE NEW STATUTE WITH |
| 21 | | RESPECT TO TGS'S INCENTIVE COMPENSATION COST RECOVERY |
| 22 | | IN THIS FILING. |
| 23 | A. | Despite TGS providing market compensation studies in every recent rate case to |
| | | |

support recovery of reasonable incentive compensation costs, that evidence did not

mean TGS was able to recover all of its requested costs. Instead, in past cases, the Commission evaluated recovery of incentive compensation costs based on whether customers or shareholders were the purported beneficiaries of an incentive plan goal. The statute's focus on the use of market studies means that for the first time, all of the incentive compensation costs TGS seeks to recover in this case must be presumed to be reasonable and necessary costs that should be recovered because TGS's compensation and benefit expense are consistent with market compensation studies issued not earlier than three years before the initiation of this proceeding to establish rates. The statute confirms ONE Gas' position that market compensation studies are an important and reasonable source for both the gas utility and regulatory authorities to rely on to determine reasonable base pay and incentive compensation amounts, as well as recovery of those costs.

IV. MEAL AND HOTEL COSTS

- Q. WHAT ARE THE COMPANY'S REQUESTS REGARDING MEAL AND HOTEL COSTS IN THIS STATEMENT OF INTENT?
- A. TGS is requesting recovery of certain reasonable costs in excess of the \$25-per meal and \$150-per night thresholds. Specifically, TGS: (1) requests recovery of meal costs of \$25 per person, per meal exclusive of tax and the tip amounts; and (2) after reviewing and analyzing the internal data on hotel expenses, requests recovery of certain hotel expenses over \$150 per night when those costs are reasonable due to factors outside of ONE Gas' or the Company's control.

| 1 | Q. | HAS THE COMMISSION PREVIOUSLY ADDRESSED TGS'S |
|----|----|---|
| 2 | | RECOVERY OF MEAL AND HOTEL COSTS? |
| 3 | A. | Yes. For several years, the Commission and other parties in rate proceedings have |
| 4 | | reviewed the reasonableness of TGS's requested meal and hotel costs. In those |
| 5 | | cases, TGS removed meal costs in excess of \$25 per person per meal and hotel costs |
| 6 | | greater than \$150 per night, and using that practice, TGS's recovery of the |
| 7 | | remaining meal and hotel costs has not been controversial. During GUD No. 9988 |
| 8 | | in 2010, however, the Commission disallowed TGS's requested meal and hotel |
| 9 | | costs. At that time, the Commission had not established a consistent practice |
| 10 | | regarding these types of costs. |
| 11 | Q. | WHAT DETERMINATION DID THE COMMISSION MAKE |
| 12 | | REGARDING TGS'S MEAL AND HOTEL COSTS IN GUD NO. 9988? |
| 13 | A. | The Commission determined that TGS's supporting documentation of its travel and |
| 14 | | meal expenses was inadequate for regulatory review because the Company did not |
| 15 | | provide supporting documentation with sufficient detail to allow parties or the |
| 16 | | Commission to determine whether the meal and hotel costs were reasonable, |
| 17 | | necessary, and related to the provision of gas service. |
| 18 | Q. | SINCE THE COMMISSION ISSUED THE FINAL ORDER IN GUD. NO. |
| 19 | | 9988 IN 2010, HAS ONE GAS OR TGS MADE ANY CHANGES TO MEAL |
| 20 | | AND HOTEL EXPENSE PROCESS AND PROCEDURES? |
| 21 | A. | Yes. Since the Final Order was issued in GUD No. 9988, ONE Gas and the |
| 22 | | Company have made significant improvements related to requirements for |
| 23 | | employee meal and hotel expenses, including required documentation. ONE Gas |
| 24 | | reviews its Business Travel and Expenditure Policy, attached to my testimony as |

- 1 Confidential Exhibit GDS-2, to update it when necessary, and the table below
- 2 provides a summary of revisions that were made to the Business Travel and
- 3 Expenditure Policy between 2010 and 2018.

Business Travel and Expenditure Policy

2010

<u>2018</u>

Receipts required for expenses greater than \$25.00 Online credit card statement includes a description of each charge.

Meals - itemized receipt required

Meals - must include the business purpose of the
meal.

Meals charged to a hotel room must be show separately and be identified as meals.

Catering - Groups exceeding 5 attendees must include headcount

Original receipts for hotels must be attached to an expense report regardless of the amount.

Meals with alcohol must be identified as "Meal with Alcohol" with the alcohol itemized.

Monthly, 10 employees were selected for an audit of their submitted online credit card forms. These were reviewed to ensure the employee and approving manager were in compliance with the policy regarding receipts, authorized charges, and appropriate descriptions.

Entertainment that included alcohol must be identified as "Entertainment with Alcohol" with the alcohol charges itemized.

ONE Gas has negotiated rates with certain hotels, which should be used when possible.

Hotel charges must be supported with the Itemized Receipt. Itemized Receipts are also required for meals charged to the room.

The supervisor approving the expense report is responsible for ensuring the reports are submitted timely, includes required documentation, and charges are reasonable and consistent with Company policy.

Supervisors are responsible for ensuring their employees are educated about and follow this policy and for resolving any policy violations. Supervisors may be more restrictive than this policy, but cannot be less restrictive.

Expense reports are randomly selected for audit by Concur to ensure the charges and supporting documentation follow ONE Gas' policy.

| 1 | Q. | HOW DOES THE ONE GAS BUSINESS TRAVEL AND EXPENDITURE |
|----|----|--|
| 2 | | POLICY ADDRESS MEAL AND HOTEL EXPENSES INCURRED BY |
| 3 | | EMPLOYEES? |
| 4 | A. | At times, ONE Gas and TGS business require that our employees work at locations |
| 5 | | other than their offices or primary work locations. This can occur when an |
| 6 | | employee must attend training or meet with customers and other stakeholders. For |
| 7 | | example, employees incur expenses when they work in the field to ensure the |
| 8 | | reliability of the Company's facilities and equipment, restore service after a natural |
| 9 | | disaster, manage employees across ONE Gas' three-state service territory, or travel |
| 10 | | to attend conferences or training to maintain their knowledge and skills. For |
| 11 | | instance, the Company has determined based on a review of internal data that |
| 12 | | approximately 84% of hotel stays that occurred during the test year were in ONE |
| 13 | | Gas' three states of operation (Kansas, Oklahoma, Texas). In addition, the |
| 14 | | Company's manual review of hotel costs showed that approximately 70% of hotel |
| 15 | | stays were less than \$150 per night, exclusive of taxes, demonstrating the Company |
| 16 | | is managing hotel costs well. |
| 17 | | The Business Travel and Expenditure Policy requires that meal and lodging |
| 18 | | expenses be reasonable, while providing the employee with a certain level of safety, |
| 19 | | service, and comfort. ONE Gas has negotiated lodging rates, and employees must |
| 20 | | use these hotels when possible. Hotel and meal costs must also be supported with |
| 21 | | an itemized receipt. After an employee incurs meal or hotel costs, the employee's |
| 22 | | direct supervisor is responsible for verifying and confirming that all charges are in |
| | | |

circumstances and properly supported by receipts or other documentation.

23

24

compliance with ONE Gas' policies, are business-related, reasonable under the

| 1 | Э. | DOES | THE | BUSINESS | TRAVEL | AND | EXPENDITURE | POLICY |
|---|----|-------------|-----|-----------------|--------|------------|--------------------|---------------|
|---|----|-------------|-----|-----------------|--------|------------|--------------------|---------------|

- 2 **ADDRESS TIPS?**
- 3 A. Yes. Section 8.1 of the policy explains that business meals should include a
- 4 reasonable tip that ranges from 15-20% or a minimum of \$2.00. If employees
- 5 exceed the tip amounts in the policy, the additional amount may be considered a
- 6 personal expense, and the employee would be responsible for reimbursing ONE
- 7 Gas for that amount.

20

A.

8 Q. ARE THERE ADDITIONAL TOOLS ONE GAS AND THE COMPANY USE

Yes. In 2012, an expense tracking software, Concur, was purchased to facilitate

9 **TO TRACK EXPENSES?**

was related to alcohol.

- 11 managing employee expenses. Prior to the implementation of Concur, the efforts 12 to identify meal, alcohol, and lodging activity that exceeded previously used 13 threshold amounts were extremely time intensive and manually driven. For 14 example, one of the challenges at the time of GUD No. 9988 was that the 15 accounting system could not track the number of people at a meal. In addition, the 16 accounting system could not reflect the number of nights stayed in a hotel or 17 whether the charges were for more than one person's room. There are instances 18 where more than one employee's room may be included on one bill and for more 19 than one night. Lastly, the accounting system could not identify that an expense
- 21 Q. HOW DOES CONCUR ASSIST WITH MANAGING BUSINESS AND
- TRAVEL EXPENDITURES AT ONE GAS AND THE COMPANY?
- 23 A. Concur requires detailed information from the employee to finish an expense
- report, such as the name or number of attendees for meals, dates the employee(s)

stayed in a hotel, and transactions can be flagged as "Meal or Meal/Entertainment with Alcohol." Concur lets the employee know of potential inconsistencies with the Employee Expense Policy and also prompts the employee to provide any missing information. In addition, an electronic copy of all receipts must be included with the expense report for manager review and approval. If information provided in Concur does not comply with ONE Gas guidelines, the transaction is flagged for further review during the approval or audit process. Concur requires an employee to provide the transaction date, expense type, expense category, business purpose, transaction amount, merchant name and locations, meal attendee names or number of attendees at a catering activity, meals with alcohol (if applicable), and hotel stay dates providing the number of nights.

A.

Q. DOES CONCUR INCLUDE AUDITING FUNCTIONALITIES THAT ALLOW FOR FURTHER REVIEW OF THE COSTS?

Yes. The audit process is identified as Concur Detect and performs a 100% analysis of each expense report. Concur Detect checks each report for multiple scenarios and applies a risk rating (low, medium, high) to each report. Each report assigned a high risk will be sent to the Treasury department to review and determine whether the report should be returned to the employee for correction or continue to be processed for approval. Items reviewed during the Concur Detect process include verification that receipts are attached to each expense report, verification that hotel costs are itemized as required by ONE Gas policy, and flagging any potential unauthorized expenses.

| 1 | Q. | WHAT STEPS DOES THE COMPANY TAKE REGARDING POTENTIAL |
|----------------------|--------------|--|
| 2 | | NON-COMPLIANCE ISSUES WITH EMPLOYEE EXPENSES? |
| 3 | A. | ONE Gas' Treasury department investigates to determine if the item is in violation |
| 4 | | of policy. If the item is a violation, then the report is returned to the employee and |
| 5 | | supervisor with an explanation and additional training so they can make the |
| 6 | | correction and resubmit the report to comply with the policy. If expenses have been |
| 7 | | incurred that are not consistent with the policy, the employee will reimburse ONE |
| 8 | | Gas. |
| | | |
| 9 | Q. | HAS THE COMMISSION ESTABLISHED A CONSISTENT PRACTICE |
| 9 | Q. | HAS THE COMMISSION ESTABLISHED A CONSISTENT PRACTICE RELATED TO RECOVERY OF MEAL AND HOTEL COSTS SINCE GUD |
| | Q. | |
| 10 | Q. A. | RELATED TO RECOVERY OF MEAL AND HOTEL COSTS SINCE GUD |
| 10 11 | | RELATED TO RECOVERY OF MEAL AND HOTEL COSTS SINCE GUD NO. 9988? |

| 10 11 12 13 | | RELATED TO RECOVERY OF MEAL AND HOTEL COSTS SINCE GUD NO. 9988? Yes. The Commission has determined that it is reasonable for utility rates to include meal costs up to \$25 per meal per person, excluding taxes, and lodging |

.

⁵ Statement of Intent Filed to Change the Rate CGS and Rate PT of Atmos Pipeline - Texas, GUD No. 10000, Final Order at FoF 33 (April 18, 2011).

⁶ *Id.* at 14. In addition to applying the meal and hotel thresholds in GUD No. 10000, the Commission ordered Atmos Pipeline-Texas to establish that "any expenses in excess of \$25 for meals and \$150 for lodging are just and reasonable, exclusive of taxes."

Page 25 of 26 1 Q. WHY IS THE COMPANY REQUESTING RECOVERY OF TIPS AND 2 TAXES IN ADDITION TO RECOVERY OF MEAL COSTS UNDER \$25 3 PER PERSON PER MEAL? 4 Α. The Company's position in this case is consistent with the language in the Final 5 Order in GUD No. 10000, in which the Commission determined that it is reasonable 6 that the \$25 per meal per person exclude taxes. Based on the language in the Final 7 Order from GUD No. 10000, it appears that the Commission was trying to 8 recognize and exclude the additional reasonable costs associated with a meal and

only address the actual cost of the meal. In addition, tips employees include with

meal costs must also comply with the Business Travel and Expenditure Policy,

which I explained above. For these reasons, the Company requests a similar

exclusion for tip amounts to allow reasonable tips to also be recovered through

rates.

14 Q. WHY HAS THE COMPANY INCLUDED CERTAIN HOTEL EXPENSES

OVER \$150 PER NIGHT?

According to the Final Order issued in GUD No. 10000, the utility must establish that any expense in excess of \$150 per night for hotels is just and reasonable, exclusive of taxes. While the Company Business Travel Expenditures policy does not place a specific dollar limit on hotel expenses, costs for lodging must be reasonable, while providing the employee a reasonable level of convenience, safety, service and comfort. Here, the \$150 per person per night does not allow for consideration of reasonable judgment in instances in which appropriate lodging options are not available at or below that specific rate. For example, it may be more efficient for an employee to stay downtown in a higher priced hotel and be able to

1 walk to a business meeting. Additionally, as Ms. Allison Edwards explains in her 2 testimony, the costs of hotels fluctuate between the geographic locations to which 3 the employees are required to travel. 4 Q. ARE THE MEAL AND HOTEL COSTS INCLUDED IN THE COMPANY'S 5 STATEMENT OF INTENT FILING REASONABLE AND NECESSARY? 6 A. Yes. The Company has reviewed this issue in past cases including GUD No. 9988 7 and followed the recommendations and findings in those cases in order to improve 8 its documentation of the reasonableness and necessity of these costs. The Company 9 supports the Commission and parties' reviewing all costs, including meal and hotel 10 costs, to confirm the Company will recover only reasonable and necessary costs. 11 The Company has shown that for hotels, there are times when issues related to 12 safety, geography, or seasonality, support a finding of reasonableness for hotel costs that are more than \$150 per night. In addition, compliance with ONE Gas' 13 14 Business Travel Expenditure Policy also supports the reasonableness and necessity 15 of the meal and hotel costs that TGS is requesting to recover in this case. 16 Q. DOES THIS CONCLUDE YOUR TESTIMONY? 17 A. Yes, it does.

AFFIDAVIT OF G. DAVID SCALF

BEFORE ME, the undersigned authority, on this day personally appeared David Scalf who having been placed under oath by me did depose as follows:

- 1. "My name is David Scalf. I am over the age of eighteen (18) and fully competent to make this affidavit. I am employed as Vice President of Rates and Regulatory Affairs of ONE Gas, Inc. The facts stated herein are true and correct based upon my personal knowledge.
- 2. I have prepared the foregoing Direct Testimony and the information contained in this document is true and correct to the best of my knowledge."

SUBSCRIBED AND SWORN TO BEFORE ME by the said G. David Scalf on this

day of December, 2019.

Further affiant sayeth not.

| 1 | | DIRECT TESTIMONY OF SHANTEL NORMAN |
|----------|----|--|
| 2 | | I. <u>INTRODUCTION AND QUALIFICATIONS</u> |
| 3 | Q. | PLEASE STATE YOUR NAME AND BUSINESS ADDRESS. |
| 4 | A. | My name is Shantel Norman. My business address is 1301 South MoPac |
| 5 | | Expressway, Suite 400, Austin, Texas 78746. |
| 6 | Q. | BY WHOM ARE YOU EMPLOYED AND IN WHAT CAPACITY? |
| 7 | A. | I am the Vice-President of Operations for Texas Gas Service Company ("TGS" or |
| 8 | | the "Company"), which is a Division of ONE Gas, Inc. ("ONE Gas"). |
| 9 | Q. | WHAT ARE YOUR RESPONSIBILITIES IN YOUR CURRENT |
| 10 | | POSITION? |
| 11 | A. | As Vice-President of Operations, I have primary responsibility for Field Operations |
| 12 | | in the Company's six service areas in Texas. These responsibilities include: |
| 13 14 | | Construction and maintenance on TGS's distribution and transmission systems; |
| 15 | | • Field customer service; |
| 16 | | Meter reading; |
| 17 | | • Collections; |
| 18 | | Compliance-related activities; and |
| 19 | | • Operations and maintenance ("O&M") and capital budgets. |
| 20 | Q. | PLEASE DESCRIBE YOUR EDUCATIONAL BACKGROUND AND |
| 21 | | PROFESSIONAL EXPERIENCE. |
| 22 | A. | I received a Bachelor of Science Degree in Natural Gas Engineering from Texas |
| 23 | | A&M-Kingsville. I am a Registered Mechanical Engineer in the State of Texas |
| 24 | | (P.E. #84755). I began my employment with Southern Union Gas in July 1995 and |

served in roles of increasing responsibility in Engineering where my responsibilities focused on issues including pipeline integrity, operator qualifications, state and federal inspection audits, maintenance of operation standards, capital and O&M budgets, and system replacement. From May 2006 to October 2008, I worked as a Gas Engineering Manager for CPS Energy and led the Codes & Standards, Customer Engineering and System Reliability sections. In November 2008, I returned to TGS (formerly Southern Union Gas) and worked as a Process Improvement and Quality Assurance Manager, where I led the process improvement efforts by developing and managing projects to increase efficiency, improve customer satisfaction, reduce costs and achieve best practices. I was Director of Gas Supply from July 2010 to July 2017 and led the gas supply functions to ensure accurate gas usage forecasting, available supplies of natural gas and transportation capacity. I next served as Director of Field Compliance, with responsibilities for overseeing line location, leak survey, pressure control and measurement and cathodic protection, from July 2017 to February 2018. I began serving in my current position as Vice President of Operations in March 2018.

17 Q. HAVE YOU PREVIOUSLY TESTIFIED BEFORE ANY REGULATORY 18 COMMISSIONS?

- 19 A. Yes, I filed testimony with the Railroad Commission of Texas ("Commission") in
 20 Gas Utilities Docket ("GUD") Nos. 10739 and 10766.
- Q. WAS THIS TESTIMONY PREPARED BY YOU OR UNDER YOUR
 DIRECTION?
- A. Yes, it was.

A.

7 Q. WHAT IS THE PURPOSE OF YOUR TESTIMONY?

My testimony provides an overview of the Company's current system and operations in the Central Texas Service Area ("CTSA") and the Gulf Coast Service Area ("GCSA") and related environs areas that are the subject of this rate filing. I also support the Company's request to consolidate the CTSA and GCSA as well as the City of Beaumont into a new, combined service area that will be known as the Central-Gulf Service Area ("CGSA") if consolidation is approved. In addition, my testimony, along with the testimony of other TGS witnesses, supports the reasonableness and necessity of the Company's requested O&M expenses in the proposed CGSA and a determination that the capital investment that has been made in the proposed CGSA through June 30, 2019, adjusted for known and measurable changes through September 30, 2019, is used and useful and was prudently incurred. In addition, certain plant balances will be updated after December 31, 2019, which will support a prudence determination for capital investment through December 31, 2019. The capital investment included in this case includes Direct,

¹ As Company witnesses Gracie Guerra and Mindy Edwards explain, TGS included September 30, 2019 CWIP balances as an adjustment to CCNC. TGS will true-up net plant after December 31, 2019 to exclude any plant that is not used and useful at that time and will provide updated plant in service amounts, CCNC and accumulated reserves balances by February 14, 2020.

TGS Division and Corporate investments. My testimony demonstrates that this capital investment and the related expenses are a necessary part of maintaining a safe and reliable natural gas distribution system.

A.

I also address ONE Gas' recent acquisition of ONEOK Transmission Company ("OTC") from ONEOK, Inc. ("ONEOK"), including an explanation of TGS's activities as the operator of the pipeline and the Company's desire to integrate the pipeline into TGS's system. ONE Gas Pipeline Company ("OPC") is an affiliate of TGS that was created at the time of the acquisition to hold the former OTC assets. My testimony on this subject supports testimony filed by Company witness Stacey L. McTaggart, who addresses and supports TGS's request for a finding from the Commission that the acquisition of OTC is consistent with the public interest. Finally, I describe the reasonableness and necessity of the Company's Pipeline Integrity Testing expense.

II. TGS SYSTEM AND OPERATIONS

Q. PLEASE DESCRIBE THE TGS SYSTEM AND ITS OPERATIONS IN TEXAS.

TGS is a division of ONE Gas, which operates as an independent natural gas distribution company focusing on delivering natural gas safely and reliably to customers in Oklahoma, Kansas and Texas and is headquartered in Tulsa, Oklahoma. TGS provides safe, clean and reliable natural gas service to approximately 663,000 customers in 100 communities within its six service areas in Texas. A map of the areas TGS currently serves is attached to my testimony as Exhibit SN-1. As of June 30, 2019, ONE Gas is also now the owner of a pipeline

formerly owned by ONEOK, located in TGS's CTSA. I address this in more detail below.

3 O. PLEASE ELABORATE ON ONE GAS' FOCUS ON SAFETY.

10

11

12

13

14

15

16

17

18

19

20

21

A.

ONE Gas continually seeks to improve processes for risk assessment and risk mitigation as part of its integrity management programs, as well as its procedures for ensuring full compliance with all laws and regulations. ONE Gas measures: (1) preventable vehicle incident rate; (2) total recordable incident rate; and (3) days away, restricted and transferred. Exhibit SN-2 shows ONE Gas' progress over the last several years with respect to the first three metrics compared to general industry achievement based on data gathered by the American Gas Association. The data in Exhibit SN-2 confirms that ONE Gas has improved significantly from being in the 4th quartile in 2009 to the 1st quartile in recent years. In early 2019, ONE Gas added an additional metric, which measures how often Company personnel arrive onsite for an emergency call out in less than thirty minutes. For the newest metric, Exhibit SN-2 shows only one partial year of data, because that is when ONE Gas began tracking the information. The data in Exhibit SN-2 demonstrates an improvement in the percent of onsite arrivals less than thirty minutes since ONE Gas implemented the metric. Exhibit SN-2 also confirms that ONE Gas is exceeding its 2019 target for the onsite time metric of 63% on a year-to-date basis.

Q. PLEASE DESCRIBE THE SERVICE AREAS THAT ARE THE SUBJECT OF THIS STATEMENT OF INTENT.

- A. TGS proposes to consolidate two of its existing service areas, the CTSA and the GCSA, to form a new, combined service area called the Central-Gulf Service Area.
- 24 The Company also provides service to a few customers within the city of Beaumont

| and is seeking to include Beaumont in the proposed CGSA as well. If consolidation |
|---|
| for the CGSA is not approved, TGS requests the City of Beaumont to be |
| consolidated into the GCSA. TGS provides natural gas distribution service to more |
| than 265,420 customers in the CTSA, which includes the incorporated and environs |
| areas of Austin, Bee Cave, Cedar Park, Cuero, Dripping Springs, Gonzales, Kyle, |
| Lakeway, Lockhart, Luling, Nixon, Rollingwood, Shiner, Sunset Valley, West |
| Lake Hills, and Yoakum, and the environs of Buda. In addition, TGS provides |
| service to 44,436 customers in the GCSA, which includes the incorporated and |
| environs areas of Bayou Vista, Galveston, Groves, Jamaica Beach, Nederland, Port |
| Arthur, and Port Neches, and the environs areas of Beaumont. If the proposed |
| service area consolidation is approved, all of the cities and environs areas would be |
| served as part of the CGSA. TGS and its predecessor utilities have served these |
| areas for approximately 85 years through a system that includes approximately |
| 2,947 miles of distribution mains and 1,843 miles of service lines in the CTSA and |
| 807 miles of distribution mains and 572 miles of service lines in the GCSA. These |
| system assets combined represent more than \$534,696,683 in net investment. As |
| of the end of the test year, the Company directly employed 415 Division and Direct |
| CTSA and GCSA people with a combined annual payroll of \$28,083,252 and |
| remitted nearly \$3.9 million in annual property taxes to local taxing authorities in |
| the CTSA and GCSA. |

| 1 | Q. | PREVIOUSLY YOU MENTIONED ONE GAS' ACQUISITION OF A |
|----|----|--|
| 2 | | PIPELINE FROM ONEOK. PLEASE DESCRIBE THE PIPELINE AND |
| 3 | | ITS OPERATIONS. |
| 4 | A. | ONE Gas acquired OTC and its assets from ONEOK on June 30, 2019. As part of |
| 5 | | the transaction, ONE Gas formed an affiliate of TGS called ONE Gas Pipeline |
| 6 | | Company to own the assets. The assets are located in the existing CTSA. Prior to |
| 7 | | ONE Gas' acquisition of the pipeline, TGS had operated the line for ONEOK since |
| 8 | | 2003. Since the acquisition, TGS continues to operate the pipeline under the |
| 9 | | existing Operating Agreement. There was no interruption or disruption in service |
| 10 | | to customers after the acquisition. Ms. McTaggart addresses affiliate issues related |
| 11 | | to OPC in her testimony. |
| 12 | Q. | PLEASE EXPLAIN THE COMPANY'S FUNCTIONAL OPERATING |
| 13 | | MODEL. |
| 14 | A. | As TGS noted in prior CTSA and GCSA rate cases, ONE Gas' functional operating |
| 15 | | model has been in place since 2013 and allows ONE Gas to operate its LDCs as |
| 16 | | one company, rather than three separate companies. Many activities that affect the |
| 17 | | Company's operations are centralized at the corporate level in Tulsa, the TGS |
| 18 | | Division level statewide, and within specific regions of Texas. Because ONE Gas' |
| 19 | | leadership and workforce are responsible for a specific function, ONE Gas can |
| 20 | | better align common processes across the enterprise, regardless of the state where |
| 21 | | that function is completed. |
| 22 | | The centralized approach to decision-making processes and management of |
| 23 | | the Company's gas service means that the employees within the service area |
| 24 | | boundaries do not represent the full scope of the activities, personnel and workload |

| 1 | associated with the Company's actual operations in the CTSA or GCSA. For |
|----|---|
| 2 | example, project planning and management is coordinated at the ONE Gas level to |
| 3 | ensure that capital projects are evaluated and prioritized based on total system |
| 4 | needs. This, in turn, enables the Company to efficiently monitor and maintain its |
| 5 | systems and ensure the provision of safe and reliable service. Examples of |
| 6 | functions that are centralized at ONE Gas include Asset Management and Resource |
| 7 | Management. Examples of functions that are centralized at a statewide level |
| 8 | include: |
| 9 | • Leak survey; |
| 10 | Pressure control and measurement; |
| 11 | Cathodic protection; and |
| 12 | • Line locating. |
| 13 | Examples of departments that are centralized at the statewide level include the |
| 14 | following departments: |
| 15 | Financial Accounting; |
| 16 | • Fleet; |
| 17 | Customer Information Center; |
| 18 | Dispatch; and |
| 19 | • Gas Supply. |
| 20 | In addition to organizing the workload by function, ONE Gas and TGS have also |
| 21 | focused on integrating systems and process changes to support the implementation |
| 22 | and use of technology relating to construction, maintenance and replacement of |
| 23 | assets. This has led to more efficient operations as well as enhanced |

| 1 | | communication among necessary personnel at all levels of the Company and ONE |
|----|----|---|
| 2 | | Gas related to operation of the Company's system. |
| 3 | Q. | ARE CAPITAL INVESTMENT DECISIONS BASED ON THE NEEDS OF |
| 4 | | THE ENTIRE TGS SYSTEM RATHER THAN THE NEEDS OF ANY |
| 5 | | INDIVIDUAL SERVICE AREA? |
| 6 | A. | Yes, they are. Project planning and management is coordinated at a Company-wide |
| 7 | | level. An increase in regulatory focus by the Pipeline and Hazardous Materials |
| 8 | | Safety Administration ("PHMSA") on the timely monitoring and repair or |
| 9 | | replacement of utilities' assets has led ONE Gas to establish a work group that |
| 10 | | focuses on and coordinates the monitoring and replacement activity throughout all |
| 11 | | service areas. Personnel from the Company's Engineering Department and |
| 12 | | Operations Department identify potential projects. The Asset Management |
| 13 | | Department then optimizes potential projects utilizing a risk-based approach and |
| 14 | | prioritizes the proposed projects based on the relative risk. Additionally, Asset |
| 15 | | Management develops optimized annual and long-term work plans by proposing |
| 16 | | projects throughout the Company that maximize risk reduction under given |
| 17 | | financial, resource and regulatory constraints. |
| 18 | Q. | WILL THE COMPANY'S REQUEST FOR CONSOLIDATION AFFECT |
| 19 | | OPERATIONS IN THE PROPOSED SERVICE AREA? |
| 20 | A. | No. The geographic location of a TGS service area does not dictate how the |
| 21 | | Company operates in a given region, and many of the same people, myself |
| 22 | | included, are regularly involved in the coordinated operation, maintenance and |
| 23 | | management of the Company's system throughout the state. |
| | | |

The centralization resulting from the functional operating model allows for the efficient and timely use of materials, supplies, and other Company resources, including personnel. For example, a centralized Customer Information Center ensures that customers within the proposed CGSA receive uniform responses to similar inquiries concerning payment activity, establishing or changing service, and service or payment disputes. Similarly, a centralized dispatch center ensures that field operation employees in the proposed CGSA are efficiently deployed to provide timely service to customers. The centralization of functions such as leak survey, pressure control and measurement, and cathodic protection on a statewide basis promotes efficiency and consistency, allowing the Company to more effectively monitor the status of its assets within the CGSA.

Q.

A.

IN YOUR OPINION, IS THE CREATION OF THE CGSA, AS DESCRIBED ABOVE, REASONABLE FROM AN OPERATIONAL PERSPECTIVE?

Yes, it is reasonable given the coordinated way in which TGS operates and maintains its system in the existing service areas, as well as managing those activities at the TGS and ONE Gas levels. It is important to note that TGS will not have to adopt new operational changes if the Commission approves the consolidation request because any operational changes necessary to operate in a coordinated manner have already taken place. The proposed consolidation simply reflects the operating changes that have already occurred. As I discussed above, the existing areas have similar operations, already share personnel for certain services, and rely on centralized management of certain functions and operations.

| 1 | | III. <u>OPERATIONS AND MAINTENANCE EXPENSES</u> |
|----|----|--|
| 2 | Q. | WHAT ARE O&M EXPENSES? |
| 3 | A. | These are expenses that relate to the normal operating, maintenance and |
| 4 | | administrative activities of a business. |
| 5 | Q. | PLEASE DESCRIBE THE O&M EXPENSES THAT ARE NECESSARY TO |
| 6 | | PROVIDE SAFE AND RELIABLE SERVICE. |
| 7 | A. | One of the primary drivers of O&M expense is maintenance activities that are |
| 8 | | performed daily to provide safe and reliable gas service and effective and efficient |
| 9 | | customer service. In addition, TGS must invest in its employees and has |
| 10 | | experienced reasonable and necessary increases in personnel-driven expenses, such |
| 11 | | as wages and salaries and employee benefits, which Company witnesses Stacey R. |
| 12 | | Borgstadt and Jeff D. Branz address in more detail in their testimonies. Company |
| 13 | | employees are in the field performing tasks necessary for safety and regulatory |
| 14 | | compliance, such as: |
| 15 | | Cathodic protection; |
| 16 | | Distribution integrity; |
| 17 | | • Leak survey; |
| 18 | | • Leak monitoring; |
| 19 | | Leak repair; and |
| 20 | | • Line locating. |
| 21 | | Similarly, technicians perform tasks that include: |
| 22 | | Meter maintenance; |
| 23 | | • Pressure regulation; |
| 24 | | • Odorant testing; |

| 1 | | | • Service initiation; and | l | | |
|----|----|----------|--------------------------------------|---------------|----------------------|------------------------|
| 2 | | | Right-of-way mainter | nance. | | |
| 3 | | These | operational functions are | supported l | by back-office fun | nctions necessary to |
| 4 | | operate | e the natural gas distributio | n system in | a safe and reliable | manner and provide |
| 5 | | outstan | nding customer service. | | | |
| 6 | Q. | PLEAS | SE ELABORATE C | N THE | COMPANY'S | REGULATORY |
| 7 | | COMI | PLIANCE OBLIGATIO | NS. | | |
| 8 | A. | The Co | ompany is subject to many | rules and re | egulations imposed | d by the Federal and |
| 9 | | state go | overnments. For instance | , pursuant t | o Commission Ru | ıle § 8.206(g), TGS |
| 10 | | has ado | opted a prescriptive progra | am for leak | surveys that requi | res the Company to |
| 11 | | conduc | et leak surveys no less freq | uently than | : | |
| 12 | | 1) | Annually for all systems | within a bus | siness district; | |
| 13 | | 2) | Every five years for non-l | ousiness dist | trict polyethylene s | systems or segments |
| 14 | | | within a system; | | | |
| 15 | | 3) | Every three years for all | other non-b | usiness district, ca | thodically protected |
| 16 | | | steel systems or segments | s within a sy | stem; and | |
| 17 | | 4) | Every two years for all | other non-b | ousiness district sy | ystems or segments |
| 18 | | | within a system. | | | |
| 19 | | Likewi | se, pursuant to PHMSA r | equirements | applicable to natu | ural gas distribution |
| 20 | | compa | nies ² the Company has de | veloped and | d implemented a d | listribution integrity |
| 21 | | manage | ement program ("DIMP") | . These PH | MSA regulations | require the operator |
| 22 | | to estal | blish a risk-based approac | ch to pipelir | ne maintenance an | d safety rather than |

 2 See generally 49 C.F.R. 192.1001-.10015 (2017) (distribution integrity management standards).

| 1 | | adhere to a prescriptive set of uniform regulations applicable to all operators. As a |
|----|----|---|
| 2 | | companion to DIMP, Commission Rule § 8.209 requires all natural gas distribution |
| 3 | | companies to develop and implement a risk-based program for the removal or |
| 4 | | replacement of distribution facilities, including steel service lines. The risk-based |
| 5 | | program works in conjunction with the DIMP, using scheduled replacements to |
| 6 | | manage identified risks associated with the integrity of distribution facilities. |
| 7 | Q. | HAS ONE GAS TAKEN THE INITIATIVE TO IMPLEMENT MORE |
| 8 | | STRINGENT PROCESSES AND PROCEDURES TO ENSURE THE |
| 9 | | SAFETY OF ITS DISTRIBUTION SYSTEM? |
| 10 | A. | Yes. ONE Gas has implemented more stringent standards for leak classification |
| 11 | | and repairs. ONE Gas regularly reviews its leak classification and repair standards |
| 12 | | for enhancements to its procedures. The more stringent standards are appropriate |
| 13 | | for management of the system, and the resulting leak repair or system maintenance |
| 14 | | is a reasonable and necessary expense. In 2017, the Company began utilizing |
| 15 | | LocusSurvey to schedule, plan and complete leak survey activities. LocusSurvey |
| 16 | | is a mobile application that uses GPS-enabled smartphones to track leak survey |
| 17 | | routes and capture survey results. The location of the leak survey route is overlaid |
| 18 | | onto a GIS map of the TGS assets to track pipe segments that have been surveyed |
| 19 | | to provide near real-time reporting and monitoring. |
| 20 | Q. | WHAT EFFORTS DOES TGS TAKE TO CONTROL O&M COSTS ON AN |
| | | |

Q. WHAT EFFORTS DOES TGS TAKE TO CONTROL O&M COSTS ON AN ON-GOING BASIS?

22

23

24

A. Executive management works closely with local management to establish appropriate O&M budgets to maintain a safe and reliable system and provide effective customer service while also balancing the need to control O&M expenses.

| To control O&M costs, TGS regularly reviews various metrics. For example, TGS |
|--|
| conducts periodic reviews of the mix of contractors and in-house labor utilized in |
| operations to ensure the efficient and effective use of resources. Overtime is |
| reviewed on at least a monthly basis to determine whether adjustments are needed |
| to staffing levels, scheduled work, and employee schedules to minimize total labor |
| costs. The ability to share resources across service area boundaries also aids the |
| Company in maximizing the productivity of its resources. The Company also |
| regularly reviews its budget forecasts to assess variances between actual expenses |
| and forecasted amounts. |

A.

10 Q. DOES THE PROCUREMENT PROCESS ALSO HELP TGS CONTROL 11 O&M COSTS?

12 A. Yes, it does. By utilizing a centralized purchasing department, the Company can
13 make use of volume discounts through approved vendors. Direct purchases of
14 materials are kept to a minimum.

15 Q. WHAT IS THE AMOUNT OF O&M EXPENSE BEING REQUESTED IN 16 THIS FILING?

The O&M amount requested is approximately \$80 million. Of this amount, approximately \$48,474,104 is attributable to O&M activities undertaken directly by the CTSA and GCSA and approximately \$31,972,112 is attributable to allocated costs, which include TGS Division and ONE Gas Corporate costs necessary to provide service in these service areas. Company witness Anthony Brown sponsors the allocated costs. TGS is also requesting an adjustment to O&M expense to reflect costs related to operating and maintaining the OPC pipeline,

| 1 | | which is being integrated into IGS's existing system. Company witness Marie |
|----|----|---|
| 2 | | Michels addresses this adjustment in her testimony. |
| 3 | Q. | HOW WAS THE AMOUNT OF THE O&M ADJUSTMENT RELATED TO |
| 4 | | OPC DETERMINED? |
| 5 | A. | Prior to ONE Gas' acquisition of OTC, TGS operated and maintained the pipeline |
| 6 | | for ONEOK. After the acquisition, TGS continued those activities for OPC. TGS |
| 7 | | would bill or invoice OPC monthly for the O&M expenses TGS incurred, and OPC |
| 8 | | would reimburse TGS for that service. The post-test year adjustment to reflect |
| 9 | | necessary O&M costs TGS will incur when the pipeline is part of TGS's system is |
| 10 | | based on TGS's historical experience with actual O&M costs for the OPC line. |
| 11 | Q. | PLEASE DESCRIBE WHAT O&M ACTIVITIES TGS PERFORMS ON |
| 12 | | THE OPC ASSETS AND HOW IS THAT COST DETERMINED? |
| 13 | A. | TGS performs the same O&M activities for the OPC assets as it does for other |
| 14 | | system assets. These include leak repair, leak survey, right of way maintenance, |
| 15 | | line locating, standby during third party digging, odorization, operation and |
| 16 | | maintenance of regulators, and installation and monitoring of cathodic protection. |
| 17 | | Company employees or contractors perform these activities at the same cost TGS |
| 18 | | incurs for its own O&M activities. |
| 19 | Q. | IS THE LEVEL OF O&M EXPENSE REQUESTED IN THIS FILING |
| 20 | | REASONABLE AND NECESSARY? |
| 21 | A. | Yes, it is. The level of O&M expense requested is reasonable and necessary to |
| 22 | | continue the safe and reliable operation of the system and to provide effective and |
| 23 | | efficient customer service. Moreover, the services provided by TGS Division and |

1 Corporate employees are integral to the provision of safe and reliable service to 2 customers and, as Mr. Brown explains, are also reasonable.

IV. CAPITAL INVESTMENT

Q. WHAT IS CAPITAL INVESTMENT?

A. Capital investment is money used for the acquisition and installation of equipment or facilities that are expected to have an extended period of use prior to being replaced or retired. Capital investment in TGS's infrastructure and other assets is necessary to maintain and expand the utility system in order to provide safe and reliable service to customers. Safety, reliability and growth are the primary drivers behind most of the capital investment made in the proposed CGSA.

Q. HAS THE COMPANY INCLUDED CAPITAL INVESTMENT MADE IN THE PROPOSED CGSA IN THIS STATEMENT OF INTENT FILING?

Yes, this filing includes capital investment made in the proposed CGSA since the last rate cases in the CTSA and GCSA through the test year ending June 30, 2019 and a known and measurable adjustment for capital invested through September 30, 2019.³ In addition, as I noted previously, certain plant balances will be updated through December 31, 2019, and TGS will provide that information. TGS is requesting a prudence determination for capital investment made: (1) from January 1, 2016 through December 31, 2018 for the GCSA environs and for the incorporated and unincorporated areas of the CTSA; and (2) from January 1 through December 31, 2019 for the environs and incorporated areas of the GCSA and CTSA. Exhibits SN-3 and SN-4 contain investment reports for capital

³ TGS serves Beaumont customers using GCSA plant.

| 1 | investment in CTSA and GCSA, including Corporate and TGS Division |
|---|---|
| 2 | investment, for January 1, 2016 through September 30, 2019. 4 TGS is not |
| 3 | requesting a prudence determination for investment in the incorporated areas of the |
| 4 | GCSA made from January 1, 2016 through December 31, 2018 because the cities |
| 5 | within the GCSA already made the necessary prudence determination in the |
| 6 | Company's annual Cost of Service Adjustment filings. |

7 Q. DO THE CAPITAL INVESTMENT AMOUNTS FOR WHICH TGS IS 8 REQUESTING A PRUDENCE DETERMINATION INCLUDE 9 INVESTMENTS REFLECTED IN TGS'S INTERIM RATE ADJUSTMENT 10 FILINGS?

11 A. Yes. The capital investments amounts include the investments reflected in TGS's

12 interim rate adjustment filings (collectively referred to as the "GRIP filings") as

13 follows:

| CTSA Incorporated: | GRIP Period | Date of City Ordinances |
|--------------------|-------------|-------------------------|
| | 2016 | May - June 2017 |
| | 2017 | April - May 2018 |
| | 2018 | May - June 2019 |
| CTSA Environs: | | |
| | | |
| <u>GUD No.</u> | GRIP Period | Date of Final IRA Order |
| 10610 | 2016 | June 6, 2017 |
| 10714 | 2017 | June 5, 2018 |
| 10824 | 2018 | June 4, 2019 |
| CCCA F | | |
| GCSA Environs: | | |
| GUD No. | GRIP Period | Date of Final IRA Order |
| 10666 | 2016 | March 20, 2018 |
| 10781 | 2017 | January 23, 2019 |
| 10857 | 2018 | September 11, 2019 |
| | | |

⁴ By February 14, 2020, TGS will provide an investment report for capital investment for October 1, 2019 through December 31, 2019.

| 1 | | In addition, the Company requests a determination that its GRIP filings are just and |
|----|----|---|
| 2 | | reasonable in accordance with Texas Utilities Code § 104.301. |
| 3 | Q. | PLEASE DESCRIBE THE CAPITAL INVESTMENT THAT HAS BEEN |
| 4 | | AND CONTINUES TO BE MADE IN THE PROPOSED CGSA. |
| 5 | A. | Generally, these capital investments are made to: (1) comply with regulatory |
| 6 | | requirements; (2) replace pipeline facilities that have reached the end of their useful |
| 7 | | service lives; (3) add pipeline for serving new customers; and (4) relocate pipeline |
| 8 | | facilities as required by city, county and state roadway projects. |
| 9 | | Some examples include: |
| 10 | | • Replacement of approximately 2,100 feet of 12-inch bare steel main and |
| 11 | | nearly 1,000 feet of 12-inch coated steel main and services with new 12- |
| 12 | | inch coated steel main along Dean Keeton Boulevard in the City of |
| 13 | | Austin. The replacement of aging pipe in a heavily populated area |
| 14 | | improved the safety and reliability of the system. |
| 15 | | • Relocation of approximately 1,020 feet of 4-inch polyethylene main and |
| 16 | | twelve services lines to accommodate a City of Austin storm drain |
| 17 | | project on Wooldridge Drive. |
| 18 | | • Replacement and relocation of main along 25th Street in the City of |
| 19 | | Galveston in connection with the City's repaving and drainage system |
| 20 | | improvements. |
| 21 | Q. | IN TERMS OF CAPITAL PROJECTS, HOW MUCH HAS THE COMPANY |
| 22 | | INVESTED IN THE PROPOSED CGSA SINCE THE LAST RATE CASES? |
| 23 | A. | TGS is committed to making the investments necessary to replace aging |
| 24 | | infrastructure and respond to the needs of its customers. Since 2016, the Company |

1 has, on a combined basis, increased its net plant in the proposed CGSA by 2 approximately \$39 million per year or 8.65% per year, which totals \$157 million 3 as shown on Exhibit SN-5. These capital costs are necessary for the Company's operations and are reasonable and prudent. 4 5 HAVE ANY ADJUSTMENTS BEEN MADE TO CAPITAL INVESTMENTS Q. 6 IN THIS FILING? 7 A. Yes, in addition to an adjustment for Plant in Service through September 30, 2019, 8 the Company has proposed other adjustments to capital investment. 9 adjustments are addressed by Ms. Guerra and Ms. Mindy Edwards.⁵ 10 WILL CAPITAL INVESTMENT FOR THE OPC ASSETS BE INCLUDED Q. IN TGS'S REQUESTED CAPITAL INVESTMENT AND PRUDENCE 11 12 **REVIEW IN THIS CASE?** 13 A. Yes. Ms. McTaggart and Ms. Guerra address the rate base amount for OPC in their 14 direct testimony. 15 ARE THE OPC ASSETS USED AND USEFUL FOR THE PROVISION OF Q. **SERVICE?** 16 17 A. Yes. As I noted previously, TGS has operated and maintained the assets for several 18 years and continues to do so currently under ONE Gas' ownership. Specifically, 19 OPC provides service to eleven customers on the assets.

⁵ Ms. Guerra addresses direct plant and any adjustments to direct plant, while Ms. Edwards addresses TGS Division and ONE Gas corporate plant and any adjustments to this plant.

_

| 1 | Q. | COULD TOU PLEASE PROVIDE SOME ADDITIONAL INFORMATION |
|----|----|---|
| 2 | | ABOUT TECHNOLOGY INVESTMENTS THAT SERVE TO REDUCE |
| 3 | | RISK, INCREASE EFFICIENCY AND ENHANCE CUSTOMER |
| 4 | | SERVICE? |
| 5 | A. | One area where TGS has invested in technology is asset investment and planning. |
| 6 | | TGS has implemented technology to enhance the Company's planning process and |
| 7 | | expand the planning horizon. These investments increase the safety and reliability |
| 8 | | of the TGS system by helping to ensure pipeline replacements are prioritized |
| 9 | | appropriately and capital investments are made in a cost-effective and efficient |
| 10 | | manner. ONE Gas also utilizes a work management system to increase operational |
| 11 | | capabilities, efficiencies and record-keeping. This system provides enhanced |
| 12 | | dispatching of operations, enhanced data capture through integrated record- |
| 13 | | keeping, the elimination of paper, and improved mapping. Crews now have |
| 14 | | information and records about TGS's facilities available on their mobile devices |
| 15 | | and they are capturing their work electronically in the field. |
| 16 | Q. | PLEASE DESCRIBE THE PROCESS BY WHICH THE COMPANY |
| 17 | | IDENTIFIES CAPITAL PROJECTS. |
| 18 | A. | Projects are identified by the Company's Asset Management, Resource |
| 19 | | Management, Engineering, and Operations personnel, who in turn work with |
| 20 | | federal, state, and local governmental authorities, as well as private developers, to |
| 21 | | determine where new system investments need to be made. For each proposed |
| 22 | | project, engineering alternatives are evaluated, the preferred course of action is |
| 23 | | selected, and average cost metrics are applied to develop and assign a cost estimate |
| 24 | | to each project. |

| 1 | General plant expenditures are reviewed to identify and prioritize |
|---|---|
| 2 | investment projects needed to maintain working equipment and structures, ensure |
| 3 | safety, enhance efficiencies, and meet regulatory requirements. |

4 Q. ARE ALL CAPITAL INVESTMENTS ESTABLISHED AT THE

BEGINNING OF EACH FISCAL YEAR?

A.

A.

No, they are not. Based on experience, the Company recognizes that some investment needs will arise during the year that are not specifically known in advance. For example, leaks can occur on the system at any time of year, and the Company must budget and allocate capital accordingly. Likewise, state, county, and municipal officials submit relocation requests throughout the year. For example, a government agency may postpone or delay a project until late in the year if funds are not available for the project earlier in the year. The projected level of capital expenditures for these items is developed based on experience and by working with the appropriate planning departments. Growth project budgets are based on known projects and experience. TGS's investments in General Plant, like all other capital investments, are identified through Company work processes and are subject to capital funding evaluation.

Q. DOES THE COMPANY HAVE PROCESSES IN PLACE TO CONTROL CAPITAL COSTS?

Yes, it does. All the Company's processes for identifying, prioritizing, evaluating, reviewing, and managing capital projects are designed to ensure that every capital investment in the system is necessary for providing safe and reliable service and reasonable in cost. Once a project has been approved, the Company's capital budgeting process includes additional cost controls to ensure that construction

| 1 | | projects remain within funded limits. Before the work on a project begins, and |
|----|----|--|
| 2 | | before payments are made, required managerial approvals are obtained. TGS senior |
| 3 | | management also meets on a regular basis to review capital spending levels and |
| 4 | | make adjustments as appropriate. |
| 5 | Q. | DOES THE PROCUREMENT PROCESS ALSO HELP CONTROL |
| 6 | | CAPITAL COSTS? |
| 7 | A. | Yes, by utilizing a centralized purchasing department, the Company can take |
| 8 | | advantage of volume discounts through approved vendors. Direct purchases of |
| 9 | | materials are kept to a minimum. |
| 10 | Q. | IS ALL THE CAPITAL INVESTMENT INCLUDED IN THE COMPANY'S |
| 11 | | FILING AND BOOKED TO PLANT USED AND USEFUL IN PROVIDING |
| 12 | | UTILITY SERVICE? |
| 13 | A. | Yes, it is. All investments included in this filing are currently used and useful in |
| 14 | | providing utility service as of the end of the test year and adjustments through |
| 15 | | September 30, 2019. ⁶ |
| 16 | Q. | ARE ALL THE CAPITAL INVESTMENTS INCLUDED IN THE |
| 17 | | COMPANY'S FILING REASONABLE AND NECESSARY? |
| 18 | A. | Yes, they are reasonable and necessary. Each capital investment must be approved |
| 19 | | through a thorough decision-making process. Each investment made in the |
| 20 | | proposed CGSA was prudent, reasonable in amount, and necessary for TGS to |
| 21 | | maintain a safe and reliable system and to provide an appropriate level and quality |
| | | |

•

⁶ Given the nature of the Company's adjustment regarding CWIP as described in the testimonies of Ms. Guerra and Ms. Edwards, the Company anticipates that the final number will be known following the end of calendar year 2019.

of gas utility service to our customers. This is also true for TGS Division and
Corporate investment that is allocated to the proposed CGSA and contributes to the
Company's ability to provide service in the proposed CGSA.

4 Q. DO ANY ADDITIONAL FACTORS AFFECT CAPITAL INVESTMENTS?

A.

A.

Yes. Pipeline safety and system integrity requirements imposed by the federal government through statute and regulations, which the Company supports, require significant capital investment and lead to increased operating costs. To respond to these challenges, first and foremost, the Company invests capital to maintain and improve the safety, reliability and efficiencies of operating the system and serving customers. Aging asset replacement is part of the Company's on-going capital budget, and during the test year ending June 2019, TGS retired or replaced over 9.5 miles of distribution mains in the proposed CGSA. The Company has implemented new technology to reduce risk, increase operational capabilities and efficiencies and improve customer service.

V. <u>PIPELINE INTEGRITY TESTING PROGRAM</u>

Q. WHAT IS THE PIPELINE INTEGRITY TESTING PROGRAM AND WHAT AGENCIES ARE RESPONSIBLE FOR ITS ADMINISTRATION?

Pipeline integrity testing is a combined federal and state regulatory initiative designed to ensure the safe transportation of natural gas by pipeline by requiring pipeline operators to regularly test the structural integrity of their gas pipelines. It is part of a broader national regulatory program implemented by the federal Office of Pipeline Safety ("OPS") within PHMSA to ensure the safe transportation of natural gas, petroleum, and other hazardous materials. These regulations are found in 49 C.F.R. Part 192, Subpart O. The OPS works in partnership with the

Commission and its counterparts in other states to achieve the program's public safety objectives. In Texas, the Commission has been delegated responsibility for administering and enforcing pipeline integrity requirements for intrastate pipelines and, to that end, has adopted state regulations that supplement the applicable regulations and requirements of PHMSA. The Company's pipeline integrity testing program is specifically implemented to comply with these state and federal regulations.

8 Q. WHEN DID TGS FIRST IMPLEMENT ITS PIPELINE INTEGRITY 9 TESTING PROGRAM?

- A. The initial testing began in 2003. Under the program, TGS tested all transmission facilities subject to the regulations as part of a Baseline Assessment over a ten-year period. Since that Baseline Assessment was conducted, TGS is required to reassess its facilities at least once every seven years, with certain higher risk facilities subjected to more frequent testing. The Company has 11.7 miles of gas transmission main in the proposed CGSA subject to this integrity testing.
- 16 Q. DOES THE COMPANY TEST ROUGHLY THE SAME LENGTH OF
 17 PIPELINES EACH YEAR IN ORDER TO MEET THE PROGRAM'S
 18 REQUIREMENTS?
 - A. No, it does not. Pursuant to state and federal regulations, the Company must assess risks to its entire pipeline across the state in order to determine the priority by which pipelines should be tested each year. Once the risk assessment and testing schedule has been established statewide, TGS coordinates and schedules testing in

- an efficient and cost-effective manner. Accordingly, the miles of pipe tested and
 the associated level of expense in a given year may vary. Ms. McTaggart and
 Company witness Christy M. Bell discuss the Company's proposal to account for
 and recover these necessary expenses in the proposed CGSA.
- 5 Q. ARE PIPELINE INTEGRITY TESTING COSTS REASONABLE AND
- 6 **NECESSARY?**
- 7 A. Yes, they are reasonable and necessary. The Company is required to incur these 8 costs pursuant to federal and state regulations that require the Company to regularly 9 test its pipelines. The Company only seeks to recover the actual costs it incurs in 10 meeting the requirements of the pipeline integrity testing program. Moreover, 11 given the nature and focus of this important safety initiative, it is important that the 12 Company recover those costs on a timely basis. In addition, the Commission and 13 many cities in which TGS operates have previously approved the Company's 14 request to recover pipeline integrity testing costs through an annual rider, which 15 Ms. McTaggart addresses in her testimony.
- 16 Q. DOES THIS CONCLUDE YOUR DIRECT TESTIMONY?
- 17 A. Yes, it does.

| 1 | | DIRECT TESTIMONY OF STACEY L. MCTAGGART |
|----|----|--|
| 2 | | I. <u>INTRODUCTION AND QUALIFICATIONS</u> |
| 3 | Q. | PLEASE STATE YOUR NAME AND BUSINESS ADDRESS. |
| 4 | A. | My name is Stacey L. McTaggart, and my business address is 1301 South MoPac |
| 5 | | Expressway, Suite 400, Austin, Texas 78746. |
| 6 | Q. | BY WHOM ARE YOU EMPLOYED AND IN WHAT CAPACITY? |
| 7 | A. | I am the Rates and Regulatory Director for Texas Gas Service Company ("TGS" |
| 8 | | or the "Company"), which is a Division of ONE Gas, Inc. ("ONE Gas"). I am |
| 9 | | responsible for managing the regulatory matters for TGS. |
| 10 | Q. | PLEASE DESCRIBE YOUR EDUCATIONAL BACKGROUND AND |
| 11 | | PROFESSIONAL EXPERIENCE. |
| 12 | A. | I received a Bachelor of Business Administration degree in finance and accounting |
| 13 | | from St. Edward's University in August 1988. From 1983 to 1990, I worked for |
| 14 | | NCNB Texas, now Bank of America. In April 1990, I joined Southern Union |
| 15 | | Company as a Rate Analyst. In that capacity, I was responsible for the preparation |
| 16 | | of rate schedules and testimony in connection with rate requests in the various |
| 17 | | regulatory jurisdictions in which Southern Union Company operated. From April |
| 18 | | 1993 to January 1997, I served as a Utility Specialist at the Railroad Commission |
| 19 | | of Texas ("Commission"). At the Commission, I participated in numerous cases as |
| 20 | | either a Staff witness or a technical examiner. In January 1997, I returned to |
| 21 | | Southern Union Company as Manager of Pricing and Economic Analysis, |
| 22 | | managing rate cases primarily for the Company's Southern Union Gas ("SUG") |
| 23 | | division. In September 2001, I became SUG's Director of Financial and Regulatory |
| 24 | | Analysis. Upon the sale of Southern Union's Texas assets to ONEOK, Inc. |

| 1 | | ("ONEOK") in January 2003, I joined ONEOK's TGS division and maintained my |
|----|----|--|
| 2 | | position. Upon the separation of ONE Gas from ONEOK in January 2014, I |
| 3 | | continued as Rates and Regulatory Director. |
| 4 | Q. | WAS THIS TESTIMONY PREPARED BY YOU OR UNDER YOUR |
| 5 | | DIRECT SUPERVISION? |
| 6 | A. | Yes, it was. |
| 7 | Q. | HAVE YOU PREPARED ANY EXHIBITS IN CONNECTION WITH YOUR |
| 8 | | TESTIMONY? |
| 9 | A. | Yes. I have prepared and sponsor the exhibits listed in the table of contents. |
| 10 | Q. | WERE THESE EXHIBITS PREPARED BY YOU OR UNDER YOUR |
| 11 | | DIRECTION? |
| 12 | A. | Yes, they were. |
| 13 | Q. | WHAT IS THE PURPOSE OF YOUR TESTIMONY? |
| 14 | A. | The purpose of my testimony is to address the following issues in this case: |
| 15 | | 1. Consolidation of the existing Central Texas and Gulf Coast Service Areas |
| 16 | | ("CTSA" and "GCSA," respectively), as well as the City of Beaumont, |
| 17 | | Texas; |
| 18 | | 2. Request for a finding that ONE Gas' acquisition of the former ONEOK |
| 19 | | Transmission Company ("OTC") assets in June 2019, now held by ONE |
| 20 | | Gas Pipeline Company ("OPC"), is consistent with the public interest; |
| 21 | | 3. Transfer of the OPC assets into TGS's existing system; |
| 22 | | 4. The Company's compliance with certain regulatory and statutory |
| 23 | | requirements; |

1 5. Affiliate cost recovery issues related to Utility Insurance Company ("UIC") 2 and OPC; 3 6. The Company's compliance with the Accounting Order issued by the 4 Commission in Gas Utilities Docket ("GUD") No. 10695 related to the 5 federal Tax Cut and Jobs Act of 2017 (the "Act"); 7. 6 The Company's proposed EDIT Rider to return excess deferred income 7 taxes ("EDIT") to customers; 8 8. Treatment of cloud-based computing costs in future filings; 9 9. TGS's recovery of costs associated with the Company's response to 10 Hurricane Harvey; 11 10. The Company's recovery of pipeline integrity testing costs; 12 11. A proposed Natural Events Response Rider; and 13 12. The Company's recovery of rate case expenses. 14 Q. ARE YOU SPONSORING ANY COST OF SERVICE SCHEDULES? 15 No, I am not. A. 16 HAVE YOU PREVIOUSLY TESTIFIED BEFORE ANY REGULATORY Q. 17 **COMMISSIONS?** 18 Yes. I have filed testimony on behalf of TGS in numerous proceedings, including A. GUD Nos. 9770, 9790, 9839, 9988, 10094, 10453, 10488, 10506, 10526, 10656, 19 20 10739 and 10766.

| 1 | | II. CONSOLIDATION REQUEST |
|----|----|---|
| 2 | Q. | WHAT IS THE COMPANY'S PROPOSAL REGARDING |
| 3 | | CONSOLIDATION OF SERVICE AREAS? |
| 4 | A. | TGS proposes to consolidate two of its existing service areas, the CTSA and the |
| 5 | | GCSA, to form a new, combined service area called the Central-Gulf Service Area |
| 6 | | ("CGSA"). The Company also provides service to a few customers within the City |
| 7 | | of Beaumont and is seeking to include Beaumont in the proposed CGSA as well. |
| 8 | | As explained by Company witness Shantel Norman, this consolidation reflects |
| 9 | | operational realities already in place under the Company's functional operating |
| 10 | | model. Should the Company's request for consolidation not be approved, TGS |
| 11 | | requests at a minimum that the City of Beaumont be consolidated into the existing |
| 12 | | GCSA. |
| 13 | Q. | IS THE COMPANY'S CONSOLIDATION PROPOSAL IN THIS FILING |
| 14 | | CONSISTENT WITH PRIOR COMMISSION APPROVALS OF |
| 15 | | CONSOLIDATION FOR TGS? |
| 16 | A. | Yes, it is. Consolidation in this case is a natural continuation of the consolidation |
| 17 | | requests that the Commission has approved in recent cases for the Company and |
| 18 | | will result in system-wide rates for all customers in the proposed CGSA, which will |
| 19 | | avoid unreasonable rate differences between localities or between classes of |
| 20 | | service. In 2016, the Commission approved TGS's requests to consolidate service |
| 21 | | areas, which reduced the number of TGS service areas from ten to six. In GUD |
| 22 | | No. 10488, the Commission approved a unanimous settlement that included |
| 23 | | establishing the Company's existing GCSA, which was formerly the Galveston and |

24

South Jefferson County Service Areas. In GUD No. 10506, the Commission issued

a Final Order approving a new West Texas Service Area, which was formerly three separate areas: El Paso, Dell City and Permian. In analyzing the request for consolidation in that case, the Administrative Law Judge noted in the Proposal for Decision that the proposed consolidation would result in system-wide rates for all customers in the proposed combined service area, which would avoid unreasonable rate differences between localities or between classes of service. Finally, in GUD No. 10526, the Commission approved a unanimous settlement agreement in which the then-existing Central Texas and South Texas Service Areas were combined to establish the current Central Texas Service Area.

Q. WILL THERE BE ADMINISTRATIVE BENEFITS DERIVED FROM CONSOLIDATION?

Yes. Consolidation will lead to administrative efficiencies related to rate filings and tariffs. Specifically, consolidation will streamline and economize the Company's regulatory filings by reducing the number of cost-of-service analyses and rate cases the Company must file when it seeks to implement a change in rates within its service areas. The preparation of a rate filing package is a time- and resource-intensive effort. For example, prior to recent consolidations, the Company had to separately prepare rate filings for each of its ten service areas. By consolidating the service areas at issue in this case, the Company can prepare a single cost of service filing for regulatory review. This allows rate changes to be implemented uniformly and consistently, which is more economical and efficient

Α.

¹ Statement of Intent of Texas Gas Service Company, a Division of ONE Gas, Inc., to Increase Gas Utility Rates Within the Unincorporated Areas of the El Paso Service Area (EPSA), Permian Service Area (PSA), and Dell City Service Area (DCSA), GUD No. 10506, consol., First Amended Proposal for Decision at 12 (Sept. 16, 2016).

| 1 | | for the Company, customers and its regulators. In addition, by simplifying its rate |
|----|----|--|
| 2 | | filings, the Company may be able to reduce rate case expenses and allow cities |
| 3 | | within the separate service areas to pool their resources in order to reduce each |
| 4 | | municipality's individual expense to review each future filing. Finally, |
| 5 | | consolidation will reduce the number of tariffs administered by both the Company |
| 6 | | and the Company's regulators. |
| 7 | | III. ONE GAS PIPELINE COMPANY |
| 8 | Q. | WHAT ARE THE OPC-RELATED ISSUES TGS IS PRESENTING IN THIS |
| 9 | | FILING? |
| 10 | A. | The Company requests that the Commission issue a finding that ONE Gas' |
| 11 | | purchase of OTC and its assets on June 30, 2019 is consistent with the public |
| 12 | | interest. The Company also seeks a finding that it is not necessary to include in |
| 13 | | rate base the negative acquisition adjustment associated with the purchase. Finally, |
| 14 | | the Company demonstrates that the known and measurable adjustments to TGS's |
| 15 | | test year cost of service for OPC-related costs comply with the standard in the Gas |
| 16 | | Utility Regulatory Act ("GURA") for affiliate costs, to the extent the standard |
| 17 | | applies. |
| 18 | Q. | WAS THE COMMISSION NOTIFIED OF ONE GAS' ACQUISITION OF |
| 19 | | THE OTC PIPELINE AS REQUIRED BY TEXAS UTILITIES CODE |
| 20 | | SECTION 102.051? |
| 21 | A. | Yes. On July 19, 2019, ONE Gas filed a notification letter with the Commission, |
| 22 | | which was docketed as GUD No. 10877 to report the acquisition in compliance |
| 23 | | with Section 102.051. In the letter, ONE Gas informed the Commission that under |
| 24 | | ONE Gas ownership, the acquired pipeline system is now ONE Gas Pipeline |

Company, L.L.C.. On October 9, 2019, TGS received a letter from the Commission indicating its review of the transaction was complete and the related public interest issues would be addressed in this next rate case. A copy of the Company's notification letter to the Commission, as well as the Commission's acknowledgment of its review of the transaction is attached as Exhibit SLM-1. I also provide the Company's responses to Commission-issued discovery in that docket in my direct testimony workpapers.

8 Q. PLEASE DESCRIBE THE OPC ASSETS.

A. The OPC assets consist of a natural gas pipeline system extending from Kyle, Texas to Cuero, Texas, and connect TGS's distribution system in the area to transmission pipelines. The OPC line and the TGS distribution lines in the area form a closed system. That is, all gas consumed by TGS customers in the area is first shipped on the OPC line, and all gas shipped on the OPC line is consumed by TGS customers. No gas shipped on the OPC line leaves TGS's system.

Q. WHO OPERATES THE OPC LINE?

A. Previously, under OTC ownership, TGS operated the line pursuant to an operating agreement between TGS and OTC. Currently, under OPC ownership, TGS continues to operate the line under the operating agreement that existed with OTC. TGS has no dedicated employees for this purpose. Instead, the line is operated by TGS distribution employees as part of TGS's overall operations in the area. Employees charge labor and materials associated with the operation of the line to a specified OPC cost center in order to track expenses associated with the line. OPC pays TGS monthly for the operation of the line, and TGS records the payment as an offset to the expenses. In this way, TGS is reimbursed for the expenses to

operate the line, and no costs associated with the line are currently included in the CTSA cost of service or in CTSA base rates.

3 O. PLEASE DESCRIBE THE SERVICE PROVIDED ON THE PIPELINE.

A. OPC transports gas for TGS on behalf of TGS's gas sales customers from transmission pipeline interconnects to a number of TGS town border stations. TGS pays OPC for this transportation service and includes the cost in the monthly cost of gas charged to TGS gas sales customers through the Cost of Gas Clause. In addition, OPC transports gas from transmission pipeline interconnects to ten end users, all located on the TGS system. The ten end users pay OPC to transport gas to the TGS town border stations and pay TGS to transport the gas from the town border stations to the end user's location. Seven of the end users pay TGS's standard tariff transportation rates, and three of the end-users pay negotiated rates under GURA § 104.003(b). OPC has no end-use customers outside the TGS town border stations.

Q. WHAT WERE THE CHARGES FOR TRANSPORTATION SERVICE ON THE OPC LINE DURING THE TEST YEAR?

A. During the test year, TGS paid \$676,658 for transportation on behalf of its gas sales customers. ONEOK retains OTC's billing records for the ten end-users during the test year. However, TGS reviewed OTC's annual income statement and determined that the ten end-users paid an average of \$481,090 annually for transportation on the line. During the test year, these fees were paid to OTC pursuant to contracts between OTC and the shippers. After June 30, 2019, when ONE Gas acquired OTC, the contracts were assigned to OPC, and OPC has continued to charge shippers the same rates under the same contracts the shippers had with OTC.

Exhibit SLM-2 shows monthly payments to OTC/OPC from TGS and annual payments from all end-use shippers for the test year and the months subsequent to the test year.

4 Q. IS THE PURCHASE OF THE ASSETS CONSISTENT WITH THE PUBLIC

INTEREST?

17

18

19

20

21

22

A.

Yes, ONE Gas' purchase of the assets is consistent with the public interest because the operation of the pipeline and the customers' service and rates were unaffected. In addition, operation and maintenance of the pipeline will be streamlined by having the same entity operate and own the line, once the line is fully incorporated into TGS's existing system at the conclusion of this rate case. The transfer of assets and operations has been seamless. There has been no change in personnel operating the system, no change in service to the customers, and no change in rates to the customers. The assets were recorded on TGS's books at the original cost and accumulated depreciation amount on the seller's books. Further, the acquisition has had no impact on TGS's or OPC's existing obligations, and both companies continue to meet all statutory and regulatory obligations and to comply with applicable Commission rules regarding their books and records and other regulatory requirements. Finally, as a result of this transaction, the OPC assets, which have long been operated by TGS are now under ONE Gas' management. Consequently, the Company is better positioned to ensure the continued safe and reliable operation of the assets and continued access to gas supply for TGS's gas sales customers.

| 1 | Q. | DOES ONE GAS INTEND FOR OPC TO CONTINUE TO OWN THE |
|----|----|--|
| 2 | | PIPELINE? |
| 3 | A. | No, at the conclusion of this case, ONE Gas intends to transfer the OPC assets to |
| 4 | | TGS for incorporation into TGS's existing distribution system ("the transfer of |
| 5 | | assets" or "the transfer"). |
| 6 | Q. | WHAT IS EXPECTED TO HAPPEN REGARDING THE OPC |
| 7 | | TRANSPORTATION CONTRACTS WITH TGS AND THE TEN END-USE |
| 8 | | SHIPPERS ("OPC CONTRACTS") AFTER THE TRANSFER OF ASSETS? |
| 9 | A. | After the transfer, OPC will be dissolved and the contracts will be assigned to TGS. |
| 10 | | The Company is recommending that these contracts be terminated in the best |
| 11 | | interest of the customers. As explained previously, all OPC end-use customers are |
| 12 | | also TGS customers. The ten end-users have existing contracts to transport gas on |
| 13 | | TGS's system ("TGS Contracts"). When the OPC assets are incorporated into the |
| 14 | | existing TGS distribution system, transportation on the OPC line will be covered |
| 15 | | under the TGS contracts, and the OPC Contracts will become redundant. The end |
| 16 | | users will likely recognize the redundancy and seek to terminate the unnecessary |
| 17 | | OPC Contracts. The Company recommends termination of these contracts whether |
| 18 | | or not the end users request termination. Finally, the OPC Contract with TGS to |
| 19 | | transport gas on behalf of TGS sales customers is recommended to be terminated, |
| 20 | | because it does not make sense for TGS to charge itself for the transportation of |
| 21 | | gas. |
| | | |

| 1 | Q. | IF ALL CONTRACTS ASSOCIATED WITH THE OPC LINE ARE |
|----|----|--|
| 2 | | TERMINATED, WHAT REVENUE WILL SUPPORT THE CAPITAL AND |
| 3 | | EXPENSES ASSOCIATED WITH THE OPC LINE THAT WILL BECOME |
| 4 | | PART OF TGS'S EXISTING SYSTEM? |
| 5 | A. | After transfer of the assets at the conclusion of this case, the OPC assets will be |
| 6 | | included in TGS's rate base. The operations and maintenance ("O&M") expense |
| 7 | | associated with the assets will be a TGS expense. The rate base and expense will |
| 8 | | be part of TGS's cost of service and will be allocated among TGS's classes of |
| 9 | | customers as part of the class cost of service study, ultimately becoming part of |
| 10 | | TGS's base rates. Right now, the TGS gas sales customers pay for transportation |
| 11 | | on the OPC line through the monthly cost of gas charge. Once the OPC assets are |
| 12 | | transferred to the TGS distribution system, the cost of gas charge will be eliminated, |
| 13 | | and TGS base sales rates will increase due to the inclusion of OPC assets and |
| 14 | | expenses in TGS's cost of service. Similarly, the end-use transportation customers |
| 15 | | currently pay a fee to OPC for transportation on the OPC line and a fee to TGS for |
| 16 | | transportation on TGS lines. Subsequent to the transfer, the fee to OPC will be |
| 17 | | eliminated and the TGS base transportation rates will increase due to the inclusion |
| 18 | | of OPC assets and expenses in TGS's cost of service. |
| 19 | Q. | HAS TGS INCLUDED THE OPC ASSETS AND EXPENSES IN ITS COST |
| 20 | | OF SERVICE IN THIS FILING? |
| 21 | A. | Yes, amounts for OPC assets and expenses are included as known and measurable |
| 22 | | adjustments to TGS's test year costs. Company witness Gracie Guerra sponsors |
| 23 | | the inclusion of the assets in rate base, and Company witness Marie J. Michels |
| 24 | | sponsors the inclusion of OPC expenses in O&M expense. Because ONE Gas |

| 1 | | intends to transfer the OPC assets to TGS at the conclusion of this case, TGS has |
|----|----|--|
| 2 | | designed the cost of service to reflect that intention by including the OPC assets |
| 3 | | and expenses in its cost of service in this case, and therefore it is important that the |
| 4 | | transfer of assets and the implementation of new base rates occur simultaneously. |
| 5 | | At the conclusion of the case, the assets will be transferred, the OPC Contracts are |
| 6 | | recommended to be terminated, and TGS will begin charging the newly approved |
| 7 | | base sales and transportation rates. |
| 8 | Q. | WHAT AMOUNT OF EXPENSES ASSOCIATED WITH OPC HAS TGS |
| 9 | | INCLUDED IN ITS COST OF SERVICE IN THIS FILING? |
| 10 | A. | As discussed by Ms. Michels, TGS has included \$283,146 in O&M expense as |
| 11 | | shown on Workpaper G.a.2. This is equal to the amount of expenses incurred by |
| 12 | | TGS as the operator of the line during the test year. In addition, TGS has included |
| 13 | | \$148,277 in annual depreciation expense as shown on Workpaper G-15.a. Finally, |
| 14 | | the OPC assets are included in the calculation of ad valorem taxes shown on |
| 15 | | Schedule G-16, resulting in \$43,434 of ad valorem tax associated with the OPC |
| 16 | | assets. |
| 17 | Q. | WHAT AMOUNT OF CAPITAL ASSOCIATED WITH OPC HAS TGS |
| 18 | | INCLUDED IN ITS COST OF SERVICE IN THIS FILING? |
| 19 | A. | As discussed in the testimony of Ms. Guerra, TGS included the OPC assets in rate |
| 20 | | base at their original cost less accumulated depreciation on the books of the seller. |
| 21 | | The original cost of the assets on OTC's books at June 30, 2019 was \$8,024,125. |
| 22 | | The accumulated depreciation on OTC's books at June 30, 2019 was \$2,973,659. |
| 23 | | The resulting net plant included in rate base is \$5,050,466. |

| 1 | Q. | HAS TGS INCLUDED ANY REVENUE ADJUSTMENTS ASSOCIATED |
|----|----|---|
| 2 | | WITH THE OPC ASSETS IN ITS COST OF SERVICE IN THIS FILING? |
| 3 | A. | Yes. While TGS did not include any actual OPC revenues in this filing because the |
| 4 | | OPC contracts will be terminated upon the transfer of the assets to TGS, a proforma |
| 5 | | adjustment was made to TGS transportation revenues to reflect the application of |
| 6 | | standard transportation rates to test year billing determinants for the end-use |
| 7 | | transportation customers. Company witness Janet L. Buchanan addresses this |
| 8 | | adjustment in her direct testimony. |
| 9 | Q. | WHAT IS THE OVERALL IMPACT TO CUSTOMERS AS A RESULT OF |
| 10 | | THE INCLUSION OF THE OPC ASSETS AND EXPENSES IN THE COST |
| 11 | | OF SERVICE? |
| 12 | A. | As shown on Exhibit SLM-3, the TGS cost of service is increased by \$958,692 as |
| 13 | | a result of the inclusion of the OPC assets and expenses. As shown on Exhibit |
| 14 | | SLM-2, adding the revenues TGS paid to OTC during the Test Year and the annual |
| 15 | | average revenues other customers paid to OTC, the total revenues paid to OTC were |
| 16 | | approximately \$1,157,800. This amount is \$199,056 more than the cost customers |
| 17 | | will experience as a result of including the OPC assets and expenses in TGS's cost |
| 18 | | of service in this case. In other words, the acquisition of OTC assets and subsequent |
| 19 | | transfer of the assets to TGS results in a reduction in cost to gas sales and end-use |
| 20 | | transportation customers. This also supports the request for a finding that ONE |
| 21 | | Gas' acquisition of the OTC assets is consistent with the public interest. |

| 1 | Q. | HAS TGS INCLUDED ANY REVENUE ADJUSTMENTS ASSOCIATED |
|----|----|---|
| 2 | | WITH THE OPC ASSETS IN ITS COST OF SERVICE IN THIS FILING? |
| 3 | A. | Yes. While TGS did not include any OPC revenues in this filing because the OPC |
| 4 | | contracts will be terminated upon the transfer of the assets to TGS, a proforma |
| 5 | | adjustment was made to TGS transportation revenues to reflect the application of |
| 6 | | standard transportation rates to test year billing determinants for the end-use |
| 7 | | transportation customers. Ms. Buchanan addresses this adjustment in her direct |
| 8 | | testimony. |
| 9 | Q. | WHAT PRICE DID ONE GAS PAY FOR THE OTC ASSETS? |
| 10 | A. | The purchase price of the OTC assets was \$2,568,952, giving rise to a \$2,531,514 |
| 11 | | negative acquisition adjustment. |
| 12 | Q. | HAS TGS INCLUDED THE NEGATIVE ACQUISITION ADJUSTMENT IN |
| 13 | | ITS RATE BASE IN THIS FILING? |
| 14 | A. | No. TGS has included the OPC plant in rate base at its original cost less |
| 15 | | accumulated depreciation and has not reflected the negative acquisition adjustment |
| 16 | | in either the plant balances or rate base. |
| 17 | Q. | WHY IS TGS'S PROPOSED TREATMENT OF THE NEGATIVE |
| 18 | | ACQUISITION ADJUSTMENT APPROPRIATE? |
| 19 | A. | It is appropriate to exclude the negative acquisition adjustment from rate base |
| 20 | | because this treatment is consistent with the treatment typically afforded positive |
| 21 | | acquisition adjustments. In the event of an acquisition, the Commission's practice |
| 22 | | has been to require the acquiring utility to include the plant in rate base at its original |
| 23 | | cost at the time the plant was placed into utility service less accumulated |
| 24 | | depreciation. The Commission has typically not allowed an acquisition premium |

| 1 | | to be included in rate base. For example, TGS carries a \$106 million acquisition |
|----|----|---|
| 2 | | premium on its books, dating to 2003, arising from TGS's acquisition of the Texas |
| 3 | | assets of Southern Union Gas Company. TGS has never been authorized to include |
| 4 | | this acquisition premium in rate base or to earn a return on the acquisition premium. |
| 5 | | The exclusion of the negative acquisition adjustment from rate base in this case |
| 6 | | would simply provide a small offset to the larger acquisition premium that is also |
| 7 | | excluded from rate base. In addition, as previously explained, the inclusion of the |
| 8 | | OPC assets in the cost of service without the negative acquisition adjustment |
| 9 | | increases the cost of service by \$958,692 which is \$199,056 less than the revenues |
| 10 | | paid by OTC customers during the test year. Even without the reduction to rate |
| 11 | | base of the negative acquisition adjustment, the customers will be paying less than |
| 12 | | they did prior to the acquisition. Furthermore, ONE Gas's financial ability and |
| 13 | | expertise in operating distribution systems combined with the integration of this |
| 14 | | system into existing TGS systems make the acquisition a natural fit and will result |
| 15 | | in more efficient operation of the system. Last, the acquisition results in in-state |
| 16 | | ownership of the pipeline, and results in no negative impacts to service standards |
| 17 | | or regulatory jurisdiction. |
| 18 | Q. | HAS TGS PROPOSED THE EXCLUSION OF A NEGATIVE |
| 19 | | ACQUISITION ADJUSTMENT FROM RATE BASE IN ANY PRIOR |
| 20 | | PROCEEDINGS? |
| 21 | A. | Yes. On November 7, 2003, TGS Rio, LLC reported the acquisition of pipeline |
| | | |

systems from GulfTerra Pipeline, L.P. to the Commission.² The pipeline assets had

 $^{^2}$ Application of TGS Rio, LLC for Review of the Purchase of Certain Pipeline Systems from GulfTerra Texas Pipeline, L.P, GUD No. 9466.

| 1 | | a net book value of \$4.4 million with a purchase price of \$3.6 million, giving rise |
|----------|-----------|---|
| 2 | | to a \$830,576 negative acquisition adjustment. On March 30, 2006, TGS filed a |
| 3 | | rate case with the Rio Grande Valley cities in which TGS proposed to include the |
| 4 | | acquired Rio Pipeline assets in rate base at original cost less accumulated |
| 5 | | depreciation, and not include the negative acquisition adjustment in rate base. The |
| 6 | | cities argued in favor of recognizing the negative acquisition adjustment in rate |
| 7 | | base, but the case was ultimately settled by the parties. The settlement agreement |
| 8 | | did not specifically address the treatment of the negative acquisition adjustment. |
| 9 | | On November 17, 2006, TGS filed a statement of intent at the Commission to |
| 10 | | implement the settled incorporated rates in the environs. In GUD No. 9708, the |
| 11 | | Commission approved the requested rates for environs customers. ³ |
| 12 13 | | IV. <u>COMPLIANCE WITH COMMISSION RULES AND AFFILIATE</u> <u>STANDARD</u> |
| 14 | A. | Commission Rules §§ 7.310 and 7.503 |
| 15 | Q. | PLEASE SUMMARIZE HOW THE BOOKS AND RECORDS OF TGS ARE |
| 16 | | MAINTAINED AND UTILIZED IN THE REGULAR COURSE OF |
| 17 | | BUSINESS. |
| 18 | A. | TGS maintains its books and records in accordance with Commission Rule § 7.310, |
| 19 | | which requires that the Company keep its books in accordance with the Federal |
| 20 | | Energy Regulatory Commission ("FERC") Uniform System of Accounts |
| 21 | | ("USOA"), as supplemented by Commission order or State law. The FERC USOA |

is prescribed by the FERC for public utilities and licensees subject to the provisions

³ Statement of Intent Filed by Texas Gas Service Company to Change Rates in the Environs of the Rio Grande Valley Service Area, GUD No. 9708, Final Order at 5 (Apr. 11, 2007).

| 1 | | of the Federal Power Act. FERC prescribes accounting classifications and |
|----------------------------|----|---|
| 2 | | guidance by which public utilities achieve uniform accounting records for use in |
| 3 | | financial reporting, ratemaking, and other regulatory needs. These regulations are |
| 4 | | found and defined in the Code of Federal Regulations 18 - Conservation of Power |
| 5 | | and Water Resources, Subchapter F - Accounts, Natural Gas Accounts, Part 201 - |
| 6 | | Uniform System of Accounts. |
| 7 | Q. | HOW DOES THE COMPANY ENSURE THAT TRANSACTIONS ARE |
| 8 | | PROPERLY RECORDED? |
| 9 | A. | To provide reasonable assurance regarding the reliability of financial reporting and |
| 10 | | the preparation of financial statements for external purposes, ONE Gas and TGS |
| 11 | | maintain a system of internal controls. The internal control process includes those |
| 12 | | policies and procedures that: |
| 13 14 | | • Pertain to the maintenance of records that in reasonable detail accurately and fairly reflect the transactions and dispositions of our assets; |
| 15 16 17 18 19 | | Provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles and the FERC USOA, as modified, and that our receipts and expenditures are being made only in accordance with authorizations of management and our board of directors; and |
| 20 21 22 | | • Provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of our assets that could have a material effect on the financial statements. |
| 23 | | Subsequent to the filing of the ONE Gas Form 10-K, ONE Gas reported in |
| 24 | | its Quarterly reports on Form 10-Q in 2019 that its Chief Executive Officer and |
| 25 | | Chief Financial Officer have concluded that ONE Gas' disclosure controls and |
| 26 | | procedures were effective as of the end of the periods covered by these reports |
| 27 | | based on the evaluation of the controls and procedures required by Rules 13(a)- |

15(b) of the Securities Exchange Act of 1934, as amended. In addition, ONE Gas has disclosed that in the three months ended March 31, 2019, it implemented new internal controls over lease accounting related to the adoption of the Financial Accounting Standards Board's ("FASB") Accounting Standard's Codification Topic 842, "Leases." The implementation of these new controls is part of ONE Gas' continuing efforts to ensure compliance with the new FASB requirements. ONE Gas disclosed that it does not believe the implementation of the new controls materially affected, or is reasonably likely to materially affect, its internal control over financial reporting and that other than the new lease accounting controls, there have been no changes in ONE Gas' internal control over financial reporting during the three months ended March 31, 2019, that have materially affected, or are reasonably likely to materially affect, its internal control over financial reporting.

Α.

Q. ARE THE ONE GAS BOOKS AND RECORDS SUBJECT TO AUDIT?

Yes, as a publicly traded company, ONE Gas is responsible for the fair presentation of its consolidated financial statements and is required to establish and maintain disclosure controls and procedures and internal controls over financial reporting. In connection with these requirements, ONE Gas must evaluate the effectiveness of its disclosure controls and procedures and internal controls over financial reporting and present a report in its Form 10-K filed with the Securities and Exchange Commission ("SEC") on its conclusions about the effectiveness of these controls, as of the end of the period covered by the financial statements. ONE Gas' evaluation of the effectiveness of our internal control over financial reporting is based on the framework in Internal Control-Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission. In

connection with the evaluation, ONE Gas' Internal Audit Department annually reviews the design and operating effectiveness of the Company's internal controls over financial reporting. The Company's most recent report is included as part of ONE Gas' Annual Report on Form 10-K filed with the SEC on February 20, 2019. The report concluded that our disclosure controls and procedures and our internal control over financial reporting were effective at December 31, 2018. In addition to the evaluation of the Company's internal controls over financial reporting, ONE Gas' Internal Audit Department regularly performs audits of the control systems, processes, and procedures utilized by the Company throughout its operations and business processes.

A.

The independent public accounting firm of PricewaterhouseCoopers LLP ("PWC") performs an integrated audit of the books and records of ONE Gas and ONE Gas' internal controls over financial reporting. The objective of these audits is to express an opinion as to whether the financial statements are free of material misstatements and whether effective internal control over financial reporting was maintained in all material respects. The most recent audit report is included with the ONE Gas financial statements filed with the SEC as part of ONE Gas' Annual Report on Form 10-K on February 20, 2019. In addition, the Company's Distribution Annual Report is reviewed by the Commission, annually.

Q. WHAT WERE THE RESULTS OF THE PWC REPORT INCLUDED AS PART OF ONE GAS' ANNUAL REPORT ON FORM 10-K?

The report expressed an opinion that the ONE Gas financial statements were fairly presented, in all material respects, in conformity with accounting principles generally accepted in the United States of America and that ONE Gas maintained,

| 1 | | in all material respects, effective internal control over financial reporting at |
|----|----|---|
| 2 | | December 31, 2018, based on criteria established in Internal Control - Integrated |
| 3 | | Framework (2013) issued by the Committee of Sponsoring Organizations of the |
| 4 | | Treadway Commission. |
| 5 | Q. | IN YOUR OPINION, DOES THE INFORMATION CONTAINED WITHIN |
| 6 | | THE COMPANY'S BOOKS AND RECORDS, AS WELL AS THE |
| 7 | | SUMMARIES AND EXCERPTS THEREFROM, QUALIFY FOR THE |
| 8 | | PRESUMPTION SET FORTH IN COMMISSION RULE § 7.503? |
| 9 | A. | Yes, it does. As I have testified, the Company's system of internal controls and its |
| 10 | | adherence to the FERC USOA, as modified, fully comply with Commission Rule |
| 11 | | § 7.503. Accordingly, the Company is entitled to the presumption that costs |
| 12 | | contained within the books and records have been reasonably and necessarily |
| 13 | | incurred. |
| 14 | В. | Commission Rule § 7.501 |
| 15 | Q. | ARE YOU FAMILIAR WITH THE REQUIREMENTS OF COMMISSION |
| 16 | | RULE § 7.501? |
| 17 | A. | Yes, I am. Commission Rule § 7.501 requires the separate presentation in a rate |
| 18 | | proceeding of evidence related to certain types of financial transactions, and in |
| 19 | | some cases, exclusion of these costs from rates. These types of transactions include |
| 20 | | lobbying and legislative advocacy expenses, business gifts, entertainment, |
| 21 | | charitable or civic contributions, and certain advertising expenses. They also |
| 22 | | include any profits or losses resulting from the sale or lease of appliances, fixtures, |
| 23 | | equipment, or other merchandise. |
| 23 | | |

| 1 | Q. | DO THE OPERATING EXPENSES REPORTED IN THE SCHEDULES |
|----|----|--|
| 2 | | ATTACHED TO THIS FILING INCLUDE ANY OF THESE EXPENSES? |
| 3 | A. | No, they do not. To the extent that expense accounts relate to items that must be |
| 4 | | excluded from the cost of service, those accounts have been excluded in their |
| 5 | | entirety from the test year expense shown on Schedule G, column (a). To the extent |
| 6 | | disallowable items were included in the test year data in other accounts that are |
| 7 | | included on Schedule G, column (a), an adjustment has been made to Schedule G- |
| 8 | | 9 to remove these items from the cost of service. |
| 9 | Q. | PLEASE STATE THE AMOUNT OF PROFITS OR LOSSES FROM |
| 10 | | MERCHANDISING ACTIVITIES, AS REQUIRED BY COMMISSION |
| 11 | | RULE § 7.501(1). |
| 12 | A. | The Company has not incurred profits or losses from merchandising activities in |
| 13 | | the proposed CGSA, and no such profits or losses are included in the Company's |
| 14 | | cost of service. |
| 15 | Q. | PLEASE STATE THE AMOUNT OF INCOME TAX SAVINGS OR |
| 16 | | DEFERRALS, AS REQUIRED BY COMMISSION RULE § 7.501(2). |
| 17 | A. | The amount of accumulated deferred income taxes ("ADIT") applicable to the |
| 18 | | proposed CGSA is a negative \$(80,421,556) as shown on Schedule B-8 and |
| 19 | | discussed in the testimony of Company witness Janet M. Simpson. |
| 20 | Q. | PLEASE STATE THE AMOUNT OF INVESTMENT TAX CREDIT |
| 21 | | AMORTIZATION, AS REQUIRED BY COMMISSION RULE § 7.501(3). |
| 22 | A. | The amount of investment tax credit amortization applicable to the proposed CGSA |
| 23 | | is \$0. |

| 1 | Q. | PLEASE STATE THE AMOUNT OF LOBBYING AND LEGISLATIVE |
|----|----|--|
| 2 | | ADVOCACY EXPENSE, AS REQUIRED BY COMMISSION RULE § |
| 3 | | 7.501(4) AND § 7.501(5). |
| 4 | A. | No lobbying, legislative advocacy, or related advertising expenses are included in |
| 5 | | the Company's cost of service. |
| 6 | Q. | PLEASE STATE THE AMOUNT OF BUSINESS GIFT, |
| 7 | | ENTERTAINMENT, AND CHARITABLE OR CIVIC CONTRIBUTIONS, |
| 8 | | AS REQUIRED BY COMMISSION RULE § 7.501(6). |
| 9 | A. | No business gift, entertainment, charitable or civic contributions are included in the |
| 10 | | Company's cost of service. |
| 11 | C. | Commission Rule § 7.5414 |
| 12 | Q. | WHAT LEVEL OF EXPENSE FOR ADVERTISING IS INCLUDED IN THE |
| 13 | | REQUESTED COST OF SERVICE? |
| 14 | A. | Schedule G-14 shows that the Company's cost of service for the proposed CGSA |
| 15 | | includes \$37,109 for advertising expenses during the test year. |
| 16 | Q. | DOES THE LEVEL OF ADVERTISING EXPENSE INCLUDED IN THE |
| 17 | | ATTACHED SCHEDULES COMPLY WITH COMMISSION RULE § |
| 18 | | 7.5414? |
| 19 | A. | Yes, it does. Rule § 7.5414 states that actual expenditures for advertising will be |
| 20 | | allowed as a cost of service item for ratemaking purposes, provided that the total |
| 21 | | sum of such expenditures shall not exceed one-half of 1% of the gross receipts of |
| 22 | | the utility for utility services rendered to the public. Actual advertising expense |
| 23 | | represents only 0.02% of gross receipts. Accordingly, the advertising expense |
| | | |

included in the Company's cost of service is within the permissible limit.

24

- D. Statutory Affiliate Standard
- 2 O. PLEASE DESCRIBE THE COMMISSION'S TREATMENT OF THE
- 3 ALLOCATED ONE GAS COSTS INCLUDED IN TGS'S COST OF
- 4 SERVICE PRIOR TO THE CREATION OF UTILITY INSURANCE
- 5 **COMPANY IN 2017.**

19

21

22

23

24

6 A. In addition to approving the Company's request to recover allocated corporate costs 7 in multiple cases, the Commission has also stated that TGS is not an affiliate of 8 ONE Gas, did not incur any affiliate expenses during the test year, and that the 9 Commission does not need to address whether the statutory standard for affiliate 10 costs has been met. In 2017, ONE Gas created UIC, which is a captive insurance 11 company. Therefore, TGS now has affiliate costs subject to review under the 12 statutory affiliate standard. The testimony of Company witness Mark W. Smith 13 provides a detailed explanation of UIC, and Company witnesses Mindy R. Edwards 14 and Anthony Brown support the schedules that reflect TGS's test year UIC costs. 15 In addition, upon the closing of the transaction through which ONE Gas acquired 16 the assets of OTC, ONE Gas created an affiliate, OPC, to own the asset. There are 17 no test year per book costs related to OPC, but TGS has made known and 18 measurable changes to adjusted test year costs for OPC-related capital investment

20 Q. PLEASE DESCRIBE THE COMMISSION'S AFFILIATE STANDARD.

and expenses, which are addressed by Ms. Guerra and Ms. Michels.

A. Under Texas Utilities Code § 104.055(b), the Commission "may not allow a gas utility's payment to an affiliate for the cost of a service, property, right, or other item or for an interest expense to be included as capital cost or as expense related to gas utility service except to the extent that the regulatory authority finds the

payment is reasonable and necessary for each item or class of items as determined by the regulatory authority." Accordingly, the Commission must make "(1) a specific finding of the reasonableness and necessity of each item or class of items allowed; and (2) a finding that the price to the gas utility is not higher than the prices charged by the supplying affiliate to its other affiliates or divisions or to a nonaffiliated person for the same item or class of items."

A.

7 Q. HAS THE COMPANY MET THE AFFILIATE STANDARD FOR THE 8 COSTS PAID TO UIC?

Yes. The costs included in the cost of service for insurance provided to TGS by UIC are reasonable and necessary. As described by Mr. Smith, it is necessary for TGS and ONE Gas to maintain insurance coverage, and the premiums charged by UIC are developed according to a risk-based methodology common to the insurance industry that results in a reasonable amount of insurance costs. As Mr. Smith's testimony indicates, the rates charged by UIC to the Divisions of ONE Gas are developed according to the same methodology for each Division. Thus, adjusted for risk, the price charged to TGS is not higher than that charged to other affiliates or divisions. UIC does not provide insurance to any non-affiliated parties. In addition, TGS requested recovery of UIC affiliate costs in GUD Nos. 10739 and 10766, which were resolved through settlement agreements approved by the Commission.

| 1 | Q. | DID ANY AFFILIATE TRANSACTIONS OCCUR DURING THE TEST |
|----|----|--|
| 2 | | YEAR BETWEEN OPC AND TGS? |
| 3 | A. | No affiliate transactions occurred during the test year, because OPC did not become |
| 4 | | an affiliate until June 30, 2019, which is the end of the test year. |
| 5 | Q. | DID ANY AFFILIATE TRANSACTIONS OCCUR DURING THE TEST |
| 6 | | YEAR BETWEEN OPC AND ANY OTHER ONE GAS ENTITY? |
| 7 | A. | No. OPC does not provide service to any ONE Gas entity other than TGS. It does, |
| 8 | | however, provide service to non-affiliated entities under negotiated arms-length |
| 9 | | contracts. When ONE Gas acquired OTC, neither TGS's existing contract nor the |
| 10 | | existing contracts with non-affiliated entities changed. They were simply assigned |
| 11 | | from OTC to OPC. Costs for these transactions are not included in the costs TGS |
| 12 | | seeks to recover through new rates for the proposed CGSA. Instead, TGS plans to |
| 13 | | incorporate the OPC line into TGS's existing system, where it is currently used to |
| 14 | | provide service between Kyle and Cuero, Texas. |
| 15 | Q. | DID ANY AFFILIATE TRANSACTIONS OCCUR AFTER THE TEST |
| 16 | | YEAR BETWEEN OPC AND TGS? |
| 17 | A. | Subsequent to the end of the test year, two affiliate transactions exist. First, OPC |
| 18 | | reimburses TGS for the expenses that TGS incurs to operate and maintain the |
| 19 | | pipeline based on a negotiated arms-length contract with the prior owner of the |
| 20 | | OPC assets. TGS utilizes existing TGS employees to operate the line and records |
| 21 | | the costs without mark up. Thus, TGS operates and maintains the OPC assets at |
| 22 | | the same cost level as it operates and maintains its own assets. Second, during the |
| 23 | | test year, TGS paid OTC \$676,658 for transportation of gas for TGS system sales |
| 24 | | customers. These reasonable and necessary gas transportation costs are the result |

| 1 | | of an arms-length negotiation with the prior owner of the OPC assets. These costs |
|----|----|--|
| 2 | | are not reflected in the cost of service schedules because gas transportation costs |
| 3 | | are recovered under the Company's cost of gas clause and are not included in base |
| 4 | | rates. |
| 5 | Q. | PLEASE DESCRIBE THE OPC-RELATED COSTS THAT ARE BEING |
| 6 | | USED TO DETERMINE KNOWN AND MEASURABLE ADJUSTMENTS |
| 7 | | TO TEST YEAR COSTS. |
| 8 | A. | As an initial matter, TGS is not requesting to recover any costs paid to OPC through |
| 9 | | rates. Therefore, it appears that the affiliate standard does not apply to OPC-related |
| 10 | | costs. Instead, TGS is using post-test year costs related to OPC to determine |
| 11 | | adjustments to the Company's test year capital, expense and revenue amounts. |
| 12 | | Because TGS is relying on affiliate costs to determine these adjustments, out of an |
| 13 | | abundance of caution, it is presenting evidence related to compliance with the |
| 14 | | affiliate standard. |
| 15 | | As previously discussed, to properly reflect the costs of incorporating the |
| 16 | | OPC line into TGS's system, the Company made the following known and |
| 17 | | measurable adjustments to test year costs: |
| 18 | | • an adjustment to expense to include costs for TGS's operation and |
| 19 | | maintenance of the OPC assets; the adjustment is based on costs TGS billed |
| 20 | | to OTC before ONE Gas acquired the assets. Ms. Michels sponsors the |
| 21 | | schedule that reflects this adjustment. |
| 22 | | • an adjustment to rate base to include capital costs for the OPC line; the |
| 23 | | adjustment is based on the net book value of the OPC assets. Ms. Guerra |

| 1 | | sponsors the schedule that reflects this adjustment. Ms. Michels sponsors |
|----|----|---|
| 2 | | the schedules that reflect the associated depreciation and ad valorem taxes. |
| 3 | | • an adjustment to revenues based on imputing revenue based on TGS |
| 4 | | standard tariff transportation rates to three TGS customers currently paying |
| 5 | | negotiated rates. This adjustment is not based on OPC revenues, but occurs |
| 6 | | as a result of the OPC acquisition. Ms. Buchanan sponsors the schedule |
| 7 | | that reflects this adjustment. |
| 8 | Q. | IF THE AFFILIATE STANDARD WERE APPLIED, DO THE OPC- |
| 9 | | RELATED ADJUSTMENTS TO TEST YEAR COSTS COMPLY WITH |
| 10 | | THE AFFILIATE STANDARD IN GURA? |
| 11 | A. | Yes. First, the costs charged by OPC to TGS are reasonable and necessary and not |
| 12 | | higher than the price charged by OPC to unaffiliated entities for the same item or |
| 13 | | service. Second, the OPC-related adjustments reflect costs that comply with the |
| 14 | | affiliate requirements because all of the adjustments are based on transactions |
| 15 | | between TGS and OTCthe prior entity that was not owned by an affiliate. In |
| 16 | | addition, as I noted above, the contracts between TGS and OTC were assigned to |
| 17 | | OPC as part of the acquisition. So, the costs of the transactions between TGS and |
| 18 | | OTC were the result of arms-length negotiated agreements. |
| 19 | | V. FEDERAL TAX CUT AND JOBS ACT OF 2017 |
| 20 | Q. | PLEASE EXPLAIN THE CHANGES TO THE FEDERAL CORPORATE |
| 21 | | INCOME TAX RATE THAT BECAME EFFECTIVE IN 2018. |
| 22 | A. | Effective January 1, 2018, the Act lowered the federal corporate income tax rate to |
| 23 | | 21% from 35%. In response, the Commission issued an Accounting Order in GUD |
| 24 | | No. 10695 on February 27, 2018, that reflects the Commission's directives |

- regarding changes to utility rates to account for the change in the federal corporate income tax rate.⁴
- 3 Q. PLEASE DESCRIBE YOUR UNDERSTANDING OF THE
 4 COMMISSION'S DIRECTIVES IN THE ACCOUNTING ORDER.
- I understand the Commission's Accounting Order to require gas utilities to reduce
 base rates and existing GRIP rates to reflect rates that would be set using a 21%
 federal tax rate; to refund amounts collected from customers through base rates and
 GRIP rates that were set using the 35% tax rate; and to present the issue of EDIT
 for consideration in a statement of intent or other proceeding.
- 10 Q. HAS THE COMPANY COMPLIED WITH THE DIRECTIVE TO
 11 REFLECT THE LOWER FEDERAL CORPORATE INCOME TAX RATE
 12 IN BASE RATES AND GRIP RATES FOR THE CTSA AND GCSA?
 - A. Yes. Consistent with the requirements in the Accounting Order, the Company filed administrative Notices of Intent to Reduce Gas Utility Rates pursuant to Section 104.111 in the incorporated and environs areas of the CTSA and the environs area of the GCSA that addressed the requirements in the Accounting Order to (1) decrease then-existing base rates and then-existing GRIP rates to reflect the difference between the current approved cost of service and the cost of service that would have resulted had base rates or GRIP rates been based on the 21% federal tax rate (Ordering Paragraph 2); and (2) refund to customers the amount the utility collected through base rates and GRIP rates for revenues collected from January 1, 2018, through the effective date of new base rates or new GRIP rates that reflect

14

15

16

17

18

19

20

22

⁴ On March 20, 2018, the Commission issued an Order Nunc Pro Tunc in GUD No. 10695, correcting a clerical error in the original Accounting Order.

| 1 | | the 21% federal tax rate (Ordering Paragraph 3). TGS was required to file either a |
|----|----|---|
| 2 | | Statement of Intent or a filing under GURA § 104.111 by September 1, 2018, to |
| 3 | | lower existing rates and issue a refund to customers (Ordering Paragraph 4), which |
| 4 | | it did. |
| 5 | Q. | HOW DID THE COMPANY REDUCE EXISTING BASE RATES AND |
| 6 | | GRIP RATES FOR THE CTSA INCORPORATED CUSTOMERS? |
| 7 | A. | On March 26, 2018, the Company made a filing with the CTSA cities under GURA |
| 8 | | § 104.111 to lower rates that were set in a rate case based on a 2015 test year and |
| 9 | | in a test-year 2016 GRIP filing and to issue a refund to customers within the CTSA |
| 10 | | cities. Effective June 26, 2018, TGS reduced rates by \$4,365,407. In addition, |
| 11 | | TGS refunded \$9.66 per customer, totaling \$2,248,798, to account for the tax rate |
| 12 | | reduction from January 1, 2018 through June 26, 2018. |
| 13 | Q. | HOW DID THE COMPANY REDUCE EXISTING BASE RATES AND |
| 14 | | GRIP RATES FOR THE CTSA ENVIRONS CUSTOMERS? |
| 15 | A. | On March 28, 2018, the Company made a filing with the Commission under GURA |
| 16 | | § 104.111 to lower existing rates set in GUD No. 10526 and in GUD No. 10610 |
| 17 | | and to issue a refund to customers within the CTSA environs, which the |
| 18 | | Commission docketed as GUD No. 10714. Effective June 26, 2018, TGS reduced |
| 19 | | rates by \$537,293. In addition, TGS refunded \$9.66 per customer, totaling |
| 20 | | \$202,552, to account for the tax rate reduction from January 1, 2018 through June |
| 21 | | 26, 2018. |

| 1 | Q. | HOW DID THE COMPANY REDUCE EXISTING BASE RATES FOR THE |
|----|----|---|
| 2 | | GCSA ENVIRONS? |
| 3 | A. | On April 27, 2018, the Company made a filing with the Commission under GURA |
| 4 | | § 104.111 to lower existing rates set in GUD No. 10488 and to issue a refund to |
| 5 | | customers within the GCSA environs, which the Commission docketed as GUD |
| 6 | | No. 10730. Effective May 25, 2018, TGS reduced rates by \$21,989. In addition, |
| 7 | | TGS refunded \$8.75 per customer, totaling \$10,590, to account for the tax rate |
| 8 | | reduction from January 1, 2018 through May 25, 2018. |
| 9 | Q. | HOW DID THE COMPANY REDUCE BASE RATES IN THE GCSA |
| 10 | | INCORPORATED AREA TO ACCOUNT FOR THE CHANGE IN THE |
| 11 | | FEDERAL TAX RATE? |
| 12 | A. | On April 27, 2018, the Company made an annual filing with the GCSA cities under |
| 13 | | its existing GCSA Cost of Service Adjustment tariff to reflect changes in capital |
| 14 | | investment and operating and maintenance expenses and incorporating the 21% tax |
| 15 | | rate. The filing resulted in a reduction in rates of \$797,127 for customers within |
| 16 | | the GCSA cities, effective July 26, 2018. In addition, TGS refunded \$12.72 per |
| 17 | | customer, totaling \$555,995, to account for the tax rate reduction from January 1, |
| 18 | | 2018 through July 26, 2018. |
| 19 | Q. | HAS THE COMPANY COMPLETED THE REQUIRED REFUNDS TO |
| 20 | | CUSTOMERS IN THE CTSA AND GCSA? |
| 21 | A. | Yes. All required refunds were completed in 2018, consistent with the requirements |
| 22 | | of the Accounting Order. |

| 1 | Q. | DID TGS MAKE A FILING WITH THE CITY OF BEAUMONT TO |
|----|----|--|
| 2 | | CHANGE RATES FOR THE LOWER FEDERAL INCOME TAX RATE? |
| 3 | A. | No. TGS made an initial rate filing with the City of Beaumont on May 22, 2019 |
| 4 | | with rates that already reflected a 21% federal income tax rate. Customers within |
| 5 | | the City of Beaumont did receive a refund in the same amount per customer as |
| 6 | | customers in incorporated areas of the GCSA. |
| 7 | Q. | PLEASE DESCRIBE MORE SPECIFICALLY THE REQUIREMENTS IN |
| 8 | | THE ACCOUNTING ORDER REGARDING EXCESS DEFERRED TAXES. |
| 9 | A. | Utilities subject to the Commission's original jurisdiction must accrue regulatory |
| 10 | | liabilities on their books as of the date of the Commission's Accounting Order to |
| 11 | | reflect the excess deferred tax reserve, including any associated gross up in taxes, |
| 12 | | caused by the reduction to 21% for the federal corporate income tax rate. (Ordering |
| 13 | | Paragraph 1(C)). |
| 14 | | For EDIT, the utility shall present that issue "for consideration in setting the |
| 15 | | cost of service rates of the gas utility during the next statement of intent or other |
| 16 | | rate proceeding." In addition, the amortization of the entire regulatory liability for |
| 17 | | EDIT shall be consistently calculated using a methodology set forth under the Act |
| 18 | | (Ordering Paragraph 7). |
| 19 | Q. | PLEASE DESCRIBE HOW ADIT IS INCLUDED IN THE STATEMENT OF |
| 20 | | INTENT, INCLUDING HOW TGS IS PRESENTING EDIT FOR |
| 21 | | CONSIDERATION IN SETTING NEW RATES. |
| 22 | A. | The statement of intent reflects the impact of the change in the corporate tax rate |
| 23 | | on ADIT, reducing the balance of ADIT and giving rise to EDIT. Both the new |

1 balance of ADIT and the balance of EDIT are deducted from rate base as sources 2 of cost-free capital. Ms. Simpson addresses the ADIT calculations in her testimony. 3 For EDIT, the Company proposes to flow the EDIT back to customers 4 through a separate tariff rider, Rate Schedule EDIT-Rider, calculated according to 5 the Average Rate Assumption Method ("ARAM"). Company witness Jeffrey J. 6 Husen explains in his direct testimony that using ARAM is a methodology set forth 7 under the Act, as required by Ordering Paragraph 7 in the Commission's 8 Accounting Order. 9 0. WHY DOES THE COMPANY PROPOSE TO FLOW THE EDIT BACK TO 10 **CUSTOMERS THROUGH A RIDER?** 11 A. The Company proposes to flow the EDIT back to customers through a separate 12 rider instead of through base rates because, under ARAM, the amount of the 13 amortization will vary from year to year. Because base rates are typically set for a 14 number of years, it would be difficult to determine the amount of EDIT flow back 15 to include in base rates. Including the flow back in a separate rider provides the 16 ability to flow back a different amount each year and to track the flow back of EDIT 17 to ensure that customers are credited the correct amount in full. WHAT IS THE AMOUNT OF THE AMORTIZATION TO BE FLOWED 18 Q. 19 BACK THROUGH THE EDIT RIDER DURING THE FIRST YEAR? 20 A. The first year's EDIT amortization is \$1,286,160. If approved, the Company will 21 apply the credit to customer bills in 2020.

| 1 | Ų. | HOW WILL THE EDIT FLOW BACK BE ADDRESSED AFTER THE |
|----|----|--|
| 2 | | FIRST YEAR? |
| 3 | A. | In late 2020, the Company will true up the first year's EDIT amortization credits. |
| 4 | | The resulting true-up amount will be added to the second year's EDIT amortization |
| 5 | | to calculate the second year's credit per customer, which will be applied to |
| 6 | | customer bills in 2021. The Company will continue making annual calculations |
| 7 | | and annual true-ups in the same fashion until the full amount of the EDIT is |
| 8 | | amortized and credited back to customers. |
| 9 | Q. | IS TGS REQUESTING A FINDING FROM THE COMMISSION THAT IT |
| 10 | | HAS COMPLIED WITH THE COMMISSION'S ACCOUNTING ORDER? |
| 11 | A. | Yes. TGS requests a finding that its GCSA and CTSA Section 104.111 environs |
| 12 | | filings were reasonable and accurate. |
| 13 | | VI. CLOUD COMPUTING SERVICE COSTS |
| 14 | Q. | WHAT IS THE COMPANY'S REQUEST REGARDING CLOUD |
| 15 | | COMPUTING IMPLEMENTATION COSTS? |
| 16 | A. | The Company requests to recover capitalized cloud computing implementation |
| 17 | | costs, including setup and other upfront costs recorded on the Company's books, |
| 18 | | as reasonable and necessary investment in this case. In addition, due to a change |
| 19 | | in accounting standards, the Company is requesting authorization to include |
| 20 | | capitalized cloud computing implementation costs as investment in future rate |
| 21 | | filings, including Gas Reliability Infrastructure Program ("GRIP") filings. The |
| 22 | | Company also seeks authorization to amortize cloud computing implementation |
| 23 | | costs over the same depreciable life as on-premise software in order to maintain |

1 consistency in regulatory treatment and not increase annual expenses that are 2 ultimately paid by the customer.

O. WHAT IS CLOUD COMPUTING?

3

16

4 Cloud computing is a third-party subscription that provides software and hardware A. 5 resources that are accessed over the Internet. ONE Gas does not take possession of 6 the software or hardware because it is owned, hosted, and maintained by a third-7 party provider. ONE Gas pays an annual fee for the use of the software, the hosting 8 services and necessary maintenance. Cloud computing software and hardware 9 enhancements are generally included in the subscription, resulting in faster 10 innovation and flexible demand-based resources. Examples of ONE Gas' cloud 11 computing subscriptions include customer relationship management (CRM), 12 customer service surveys, data analytics, leak survey data collection, emergency 13 callout systems, business continuity services, collaboration service, and ticket 14 management solutions. These programs are essential for TGS's ability to provide 15 safe and reliable service to customers.

Q. WHAT ARE THE BENEFITS OF CLOUD COMPUTING?

- 17 A. Some of the benefits of cloud computing are:
- 18 1. Switching from on-premise software to cloud-based software provides more frequent enhancements, and ONE Gas inherits these enhancements without having to implement upgrades, which reduces costs.
- 2. For the majority of applications, the need to maintain hardware within a data center is reduced or eliminated, thereby reducing costs.
- 23 3. Simplifies recovery in the event of a major problem with ONE Gas' IT environment.
- Improves scalability when applications need more resources without having to buy additional hardware.

| 1 2 | | 5. Improved accessibility, which allows employees access to information on a variety of devices. |
|----------|----|--|
| 3 | Q. | HOW ARE CLOUD COMPUTING COSTS RECORDED ON THE |
| 4 | | COMPANY'S BOOKS AND RECORDS? |
| 5 | A. | The Company currently includes cloud computing implementation costs as |
| 6 | | Corporate capital investment, in Account 391.6 for Purchased Software, and that |
| 7 | | balance is amortized over 13 years. In contrast, the annual cloud computing license |
| 8 | | or subscription costs are recorded as a prepayment in Account 165, and the cloud |
| 9 | | computing implementation costs are expensed over the life of the service |
| 10 | | agreement. |
| 11 | Q. | WHAT AMOUNTS OF CLOUD COMPUTING IMPLEMENTATION |
| 12 | | COSTS HAVE THE COMPANY RECORDED AS CORPORATE |
| 13 | | INVESTMENTS? |
| 14 | A. | The amounts of cloud computing implementation costs included in the Corporate |
| 15 | | asset Account 391.6 Purchased Software are summarized in the table below, which |
| 16 | | also shows the amount of costs that are currently in construction work in progress |
| 17 | | ("CWIP"). |
| 18 19 | | 2016 2017 2018 2019 Current CWIP \$45,406 \$0 \$466,953 \$222,769 \$3,519,279 |
| 20 | | These costs are allocated using the Corporate Allocation methodology, which |
| 21 | | Mr. Brown discusses in his testimony. Also, Ms. Mindy Edwards supports |
| 22 | | Corporate rate base adjustments and depreciation expense, using the cost allocation |
| 23 | | methodology and calculations that are discussed in Mr. Brown's testimony. |
| | | |

1 Q. PLEASE DESCRIBE THE PROJECTS THAT ARE CURRENTLY IN CWIP.

A.

A.

The large investment that is currently included in Corporate CWIP is primarily made up of two projects, SharePoint O365 Online ("SPO") and Next Generation Payroll. The SPO platform is necessary to support the new company intranet (ONEGas Hub) and other customized SharePoint team sites that ONE Gas and TGS regularly use to manage work product and processes in an efficient manner given that employees work in different locations throughout ONE Gas. The new SPO will provide users with a more intuitive SharePoint experience, and improve efficiency and productivity. Next Generation Payroll is the implementation of a time entry and payroll solution for ONE Gas. The primary goals of this project include: (1) elimination of manual processes in the back office and avoiding penalties, (2) validating existing payroll requirements to ensure that the current or new system can accommodate those requirements, (3) implementing a time entry system that interfaces with existing electronic systems, and (4) providing flexible options for employees to enter time (e.g., time clocks and smart phone interfaces).

17 Q. DOES THE COMPANY EXPECT INVESTMENTS IN CLOUD 18 COMPUTING TO CONTINUE IN THE FUTURE?

Yes, it does. As shown in the above table, the Company has \$3.5 million of cloud computing implementation costs in CWIP. As another example, the Company's Enterprise Resource Planning ("ERP") and customer service applications are two of the largest and most expensive on-premise software applications. These applications are between 15 and 20 years old and will need to be replaced in the

- future. Currently, leading ERP software vendors are transitioning to cloud-only offerings.
- 3 Q. ARE THERE ANY RECENT ACCOUNTING CHANGES TO CLOUD
 4 COMPUTING THAT IMPACT RECOVERY IN RATES?
- Yes. Accounting Standards Update 2018-15⁵ ("ASU") published by FASB in 2018 requires that after December 15, 2019, cloud computing implementation costs be capitalized and recorded as "Other Assets" and amortized over the term of the hosting agreement with the cloud computing service, which is typically 3 to 5 years.

9 Q. DO THE CHANGES IN THE ACCOUNTING STANDARD IMPACT 10 FUTURE FILINGS?

Yes. The impact to future filings is prospective because ASU 2018-15 does not take effect until calendar year 2020. There are two different impacts from ASU 2018-15. First, cloud computing implementation costs are currently included in Account 391.6 Purchased Software. The new standard requires these capitalized implementation costs to be recorded as an "Other Asset," Account 186, and the change in this account is not generally included in GRIP filings. TGS is requesting authorization for regulatory purposes to continue to include cloud computing implementation investment in future rate filings, including annual GRIP filings, as an intangible asset. Second, this investment is currently amortized over the same life as on-premise software, which is 13 years. The new standard requires these capitalized implementation costs to be amortized over the term of the hosting arrangement, including renewal periods. This change results in amortizing these

.

⁵ https://asc.fasb.org/imageRoot/22/118236022.pdf.

costs over a period of 3 to 5 years as opposed to amortizing over a 13-year life, which increases annual expenses. TGS is requesting authorization for regulatory purposes to continue to amortize cloud computing implementation costs over the same 13-year life as on-premise software to maintain consistency in regulatory treatment and not increase expenses that are ultimately paid by the customer.

ARE CAPITALIZED CLOUD COMPUTING IMPLEMENTATION COSTS

APPROPRIATE TO INCLUDE IN THIS FILING AND FUTURE FILINGS?

Yes. These costs are reasonable and necessary amounts to include in rate base in this case. It is also reasonable for TGS to include the change in investment in future GRIP filings and rate cases because the nature of these investments have not changed, and, for regulatory purposes, the costs continue to be capital investment necessary to provide service to customers. Similar to on-premise software, ONE Gas continues to invest capital to implement software solutions. Cloud computing implementation costs support Information Technology efforts, which provide critical services employees use in their efforts to provide service safely and reliably to customers, including those in the proposed CGSA. Additionally, the National Association of Regulated Utility Commissioners ("NARUC") issued a November 2016 resolution ⁶ that recognizes the benefits of cloud computing and urges commissions to utilize treatment for cloud computing costs that is similar to that of the software that cloud computing is replacing.

A.

| 1 | | VIII. HUKKICANE HAKVEI |
|----|----|--|
| 2 | Q. | PLEASE EXPLAIN WHY TGS IS REQUESTING RECOVERY OF |
| 3 | | HURRICANE HARVEY RESPONSE COSTS IN THIS FILING. |
| 4 | A. | In 2017, Hurricane Harvey struck the southern coast of Texas and caused flooding |
| 5 | | and physical damage to the Company's facilities in its GCSA. The Company |
| 6 | | undertook restoration efforts after Hurricane Harvey caused damage, particularly |
| 7 | | flood damage, to facilities in the Company's GCSA. On April 16, 2019, the |
| 8 | | Company made filings with the municipalities of Galveston, Jamaica Beach, Bayou |
| 9 | | Vista, Groves, Nederland, Port Arthur and Port Neches, Texas (collectively "GCSA |
| 10 | | Cities") and the Commission to recover the costs associated with the Company's |
| 11 | | response to Hurricane Harvey through a proposed rider, Rate Schedule HARV- |
| 12 | | Rider. The Commission docketed the filing as GUD No. 10844. |
| 13 | Q. | PLEASE DESCRIBE THE FINAL RESOLUTION OF GUD NO. 10844. |
| 14 | A. | All parties reached a settlement agreement that did not address TGS's recovery of |
| 15 | | Hurricane Harvey costs at that time. Instead, TGS was authorized to record and |
| 16 | | defer the \$714,389 in Hurricane Harvey restoration costs as a regulatory asset and |
| 17 | | is required to address the asset in its next full rate case. The Commission approved |
| 18 | | the settlement agreement in the Final Order for GUD No. 10844. |
| 19 | Q. | PLEASE DESCRIBE THE ACTIONS TAKEN BY THE GCSA CITIES |
| 20 | | RELATED TO THE TGS REQUEST TO RECOVER HURRICANE |
| 21 | | HARVEY RESTORATION COSTS. |
| 22 | A. | The cities of Galveston and Bayou Vista approved the settlement agreement. The |
| 23 | | Cities of Groves, Nederland, Port Arthur and Port Neches denied the Company's |
| 24 | | request. The Company appealed the denial, and the Commission consolidated the |

| 1 | | appeal into GUD No. 10844. These cities then participated in the settlemen |
|----|----|--|
| 2 | | agreement as a party to GUD No. 10844. The City of Jamaica Beach took no action |
| 3 | | and the Company elected to treat customers within Jamaica Beach similarly to those |
| 4 | | in the other cities. That is, the Company did not implement the proposed rider for |
| 5 | | those customers. |
| 6 | Q. | WHAT STEPS DID TGS TAKE TO PREPARE FOR HURRICANE |
| 7 | | HARVEY MAKING LANDFALL AND IN THE AFTERMATH OF THE |
| 8 | | STORM? |
| 9 | A. | In May 2017, personnel in the Company's GCSA completed the annual Hurricane |
| 10 | | Plan review with their teams, and Company personnel began monitoring all |
| 11 | | potential storm activity. In August 2017, TGS implemented the sequential phases |
| 12 | | of the Hurricane Plan acting to secure assets, ensure supplies and establish a |
| 13 | | communication plan, as described in the ONE Gas Emergency Response Plan |
| 14 | | Following landfall, Company personnel first assessed and documented the damage. |
| 15 | | followed by a restoration phase in which approximately 3,100 regulators and 1,100 |
| 16 | | meters were replaced. In addition, the Company turned off over 600 accounts at |
| 17 | | the request of customers. All of these efforts were undertaken to ensure the safe |
| 18 | | and reliable operation of the Company's system. |
| 19 | Q. | WHAT TYPES OF COSTS DID TGS INCUR RELATED TO RESTORING |
| 20 | | SERVICE AFTER THE HURRICANE? |
| 21 | A. | The Company incurred costs associated with regular labor, overtime labor, travel- |
| 22 | | related expenses such as meals and hotels, vehicle expenses and materials and |
| 23 | | supplies. |

| 1 | Q. | WHAT ARE THE COSTS ASSOCIATED WITH THE COMPANY'S |
|----|----|---|
| 2 | | HURRICANE RESPONSE EFFORTS? |
| 3 | A. | As shown Exhibit SLM-4, expenses associated with the response to Hurricane |
| 4 | | Harvey total \$988,890. The Company is not seeking recovery of any capital costs |
| 5 | | through the proposed Rate Schedule HARV-Rider. |
| 6 | Q. | DID THE COMPANY RECEIVE ANY INSURANCE PROCEEDS |
| 7 | | RELATED TO THE HURRICANE? |
| 8 | A. | Yes. The Company was covered by insurance for this event, but the total costs |
| 9 | | were less than the Company's \$2 million deductible (insurance deductible level in |
| 10 | | 2017). However, certain travel and overtime costs were covered under a different, |
| 11 | | time-based deductible in the policy. For these expenses, the Company received |
| 12 | | insurance reimbursement for expenses incurred after the first twenty-one days, |
| 13 | | totaling \$242,400. In addition, the Company received \$61,878 under business |
| 14 | | interruption coverage to reimburse the Company for some of the lost revenue due |
| 15 | | to interruption of service. Exhibit SLM-5 (Confidential) contains a copy of the |
| 16 | | insurance settlement. |
| 17 | Q. | ARE THE COSTS THE COMPANY PROPOSES TO RECOVER NET OF |
| 18 | | ANY INSURANCE PROCEEDS? |
| 19 | A. | The expense reimbursement of \$242,400 for labor and direct costs has been credited |
| 20 | | against the costs for which the Company seeks recovery in this filing. The business |
| 21 | | interruption reimbursement was not credited against the costs for which the |
| 22 | | Company seeks recovery, because the Company is not seeking recovery from |
| 23 | | customers of lost revenues |

| 1 | Ų. | WERE ANT OTHER ADJUSTMENTS MADE TO THE COSTS THE |
|----|----|---|
| 2 | | COMPANY PROPOSES TO RECOVER? |
| 3 | A. | Yes. The expenses were reduced by amounts for meals in excess of \$25 per person |
| 4 | | per meal and nightly lodging costs over \$150 per night. |
| 5 | Q. | WHAT ARE THE TOTAL RESTORATION COSTS, NET OF THE |
| 6 | | INSURANCE PROCEEDS AND ANY OTHER ADJUSTMENTS, THE |
| 7 | | COMPANY SEEKS TO RECOVER? |
| 8 | A. | As shown on Schedule G-25, the Company requests recovery of \$714,389 in total, |
| 9 | | levelized over six years, which is the maximum number of years between rate cases |
| 10 | | if the Company makes annual interim rate adjustment filings. |
| 11 | Q. | HOW DOES TGS PROPOSE TO RECOVER THE COSTS ASSOCIATED |
| 12 | | WITH THE HURRICANE RESPONSE? |
| 13 | A. | The Company proposes to recover the costs from proposed CGSA customers via a |
| 14 | | rider with a volumetric surcharge. Exhibit SLM-6 shows the calculation of the |
| 15 | | surcharge. The total costs to be recovered on line 22 are divided by two years, and |
| 16 | | the resulting annual recovery is divided by annual volumes for the proposed CGSA |
| 17 | | to derive a surcharge rate of \$0.00182 per Ccf, shown on line 26. If the proposed |
| 18 | | rider is approved, the costs shown on Schedule G-25 should be removed from the |
| 19 | | base rate revenue requirement. Alternatively, if the proposed rider is not approved, |
| 20 | | the Company proposes to recover the costs from proposed CGSA customers via |
| 21 | | base rates. |
| 22 | Q. | PLEASE DESCRIBE PROPOSED RATE SCHEDULE HARV-RIDER. |
| 23 | A. | The proposed Rate Schedule HARV-Rider, Hurricane Harvey Surcharge Rider, |
| 24 | | provides for a surcharge rate of \$0.00182 per Ccf to be charged to all gas sales and |

| 1 | | standard transportation customers in the proposed CGSA until all approved |
|----|----|--|
| 2 | | Hurricane Harvey costs and associated rate case expenses have been recovered. |
| 3 | | The Rate Schedule also provides for an annual reporting mechanism until the full |
| 4 | | amount is recovered. |
| 5 | Q. | DOES TGS PROPOSE TO RECOVER ANY RATE CASE EXPENSES |
| 6 | | ASSOCIATED WITH THE INITIAL HURRICANE HARVEY FILINGS? |
| 7 | A. | Yes. Pursuant to the settlement agreement, TGS seeks to include all rate case |
| 8 | | expenses incurred in connection with the initial Hurricane Harvey filings, to be |
| 9 | | reviewed for reasonableness and recovered along with any rate case expenses |
| 10 | | incurred in connection with this filing. This includes expenses TGS incurred as |
| 11 | | well as expenses for the Cities of Galveston, Port Neches, Groves, Port Arthur and |
| 12 | | Nederland. |
| 13 | Q. | WHAT OTHER INFORMATION IS TGS PROVIDING IN THIS RATE |
| 14 | | CASE RELATED TO THE HURRICANE HARVEY COSTS IT SEEKS TO |
| 15 | | RECOVER? |
| 16 | A. | Attached as Exhibit SLM-7, is a copy of the Company's original Statement of Intent |
| 17 | | filing in which it requested recovery of Hurricane Harvey costs. This includes a |
| 18 | | cover pleading, my direct testimony and schedules supporting the amounts and |
| 19 | | calculations for the proposed surcharge. I have also included in my workpapers |
| 20 | | TGS's responses to discovery in GUD No. 10844, which reflect parties' review of |
| 21 | | the costs TGS seeks to recover. Parties may continue that review in this case. |
| | | |

VIII. COST RECOVERY RIDERS

2 A. Pipeline Integrity Testing

1

- 3 Q. PLEASE DESCRIBE THE COMPANY'S PROPOSAL FOR THE
- 4 RECOVERY OF PIPELINE INTEGRITY TESTING EXPENSES.
- In GUD No. 10526, the Commission ordered that pipeline integrity testing expense 5 A. 6 be recovered via a rider rather than in base rates in the CTSA. To continue the 7 treatment afforded by the Commission in GUD No. 10526, the Company requests 8 implementation of revised Rate Schedules PIT and PIT-Rider, applicable to all gas 9 sales and standard transportation customers in the proposed CGSA, to recover 10 pipeline integrity testing costs incurred in a given calendar year through a 11 volumetric rate to be applied to customer bills during the following April through 12 March. Rate Schedule PIT sets forth the calculation and requirements, while Rate 13 Schedule PIT-Rider contains the rate currently in effect.

Q. IS IT REASONABLE TO RECOVER PIPELINE INTEGRITY TESTING COSTS THROUGH A RIDER?

Yes. In GUD No. 9988, the Commission ordered that PIT expense in the Company's then El Paso service area be recovered via a rider rather than in base rates, finding that a rider is the "best mechanism for recovery of these expenses and is reasonable." It is reasonable and appropriate to recover pipeline integrity testing costs via an annual rider because the annual amount of pipeline integrity testing costs varies greatly from year to year depending upon the testing schedule, making it challenging to determine an appropriate amount of expense to be included in base

16

17

18

19

20

21

22

A.

⁷ GUD No. 9988, Final Order at Finding of Fact 22 (Dec. 14, 2010).

| 1 | | rates. Finally, a PIT rider has operated successfully and effectively in the CTSA |
|----|----|--|
| 2 | | since the last rate case in 2016. Nevertheless, if the proposed Rate Schedule PIT is |
| 3 | | not approved, pipeline integrity testing expenses should be included in the |
| 4 | | calculation of base rates, as discussed in the testimony of Ms. Michels. |
| 5 | В. | Natural Event Response Rider |
| 6 | Q. | PLEASE DESCRIBE THE COMPANY'S PROPOSED RIDER TO |
| 7 | | ADDRESS DEFINED NATURAL EVENTS. |
| 8 | A. | The Company is proposing a tariff, Rate Schedule NER, that authorizes TGS to |
| 9 | | defer expenses associated with the response to storms and other natural disasters or |
| 10 | | events and to later seek recovery of those costs, less any insurance reimbursement, |
| 11 | | from customers via a surcharge. The framework of the tariff is consistent with |
| 12 | | recent approvals issued by the city of Galveston and the Commission in GUD No. |
| 13 | | 10844 for TGS to defer costs and create a regulatory asset for the Company's |
| 14 | | Hurricane Harvey response costs. |
| 15 | Q. | TO WHAT NATURAL EVENTS WOULD RATE SCHEDULE NER |
| 16 | | APPLY? |
| 17 | A. | The provisions of the tariff would apply to expenses TGS incurs responding to a |
| 18 | | hurricane, tropical storm, tornado, earthquake, ice storm, flood or other wind or |
| 19 | | water-related events. |
| 20 | Q. | WHAT EXPENSES WOULD RATE SCHEDULE NER AUTHORIZE TGS |
| 21 | | TO DEFER? |
| 22 | A. | Under the proposed Rate Schedule NER, TGS would be authorized to defer |
| 23 | | contractor costs, Company overtime labor, travel, meals, hotels, vehicle expenses, |
| 24 | | communication expenses, tools, materials and supplies, and any other operating and |

| 1 | | maintenance expenses reasonably necessary to safely and effectively respond to an |
|----|----|--|
| 2 | | event and restore natural gas service. Capital expenditures by the Company, and |
| 3 | | the regular labor cost of TGS employees would not be deferred for recovery through |
| 4 | | the proposed rate schedule. |
| 5 | Q. | DOES RATE SCHEDULE NER ADDRESS INSURANCE |
| 6 | | REIMBURSEMENTS RELATED TO NATURAL EVENTS? |
| 7 | A. | Yes, Rate Schedule NER states that insurance reimbursements for expenses |
| 8 | | associated with responding to a natural event must be netted against those expenses. |
| 9 | | However, insurance reimbursements for capital losses or for lost revenue due to a |
| 10 | | natural event are not to be netted against expense, because the capital losses and |
| 11 | | lost revenues would not be recoverable from customers under Rate Schedule NER. |
| 12 | Q. | WHY IS IT APPROPRIATE TO DEFER THE EXPENSES ASSOCIATED |
| 13 | | WITH RESPONDING TO A NATURAL EVENT AND LATER RECOVER |
| 14 | | THOSE COSTS THROUGH A SURCHARGE? |
| 15 | A. | Events of this type occur at irregular and unpredictable intervals and give rise to |
| 16 | | costs outside of ordinary system operations. Consequently, recovery of the |
| 17 | | associated expenses via base rates may present timing challenges. Additionally, |
| 18 | | deferral of the expenses allows time for the related insurance reimbursements to be |
| 19 | | matched up with the expenses, ensuring recovery of the appropriate amount from |
| 20 | | customers. |
| | | |

| 1 Q. DOES RATE SCHEDULE NER GUARANTEE THE COMPA |
|---|
|---|

2 RECOVERY OF ANY CLAIMED NATURAL EVENT RESPONSE

3 EXPENSES?

A. No. Rate Schedule NER simply authorizes TGS to defer the costs and to request recovery at a future date, subject to regulatory review and approval. The regulatory authority will determine the reasonableness and necessity of the costs and the appropriate surcharge, if any, when the Company makes the specific request for recovery. If a surcharge is requested and approved for a specific natural event, that surcharge will be reflected on Rate Schedule NER-RIDER⁸ and will be charged until the authorized expenses for that event have been recovered.

IX. RATE CASE EXPENSES

Q. IS THE COMPANY REQUESTING RATE CASE EXPENSE RECOVERY

IN THIS CASE?

14 A. Yes. Pursuant to GURA § 104.051 and Commission Substantive Rule 7.5530, the 15 Company seeks reimbursement of all rate case expenses determined by the 16 Commission to be reasonable. These expenses include fees and expenses for 17 outside attorneys and consultants and other reasonable expenses the Company 18 incurs associated with this proceeding. As it has in prior rate cases, TGS has 19 retained outside attorneys and consultants to perform necessary tasks related to the 20 rate case filing. The work of these outside attorneys and consultants is supervised, 21 directed and performed in consultation with the Company's Rates and Regulatory 22 and Legal groups. To ensure that TGS incurs only reasonable and necessary rate

.

11

12

13

⁸ Rate Schedule NER sets forth the calculation and requirements for costs related to a natural event, while Rate Schedule NER-Rider contains the rate currently in effect for a specific event.

- 1 case expenses, all outside attorney and consultant invoices are reviewed by
- 2 Company personnel to ensure they are consistent with the rates and scope of work
- agreed to by the Company and the outside vendor.
- 4 Q. WHAT RATE CASE EXPENSE RECOVERY TARIFFS IS THE
- 5 **COMPANY REQUESTING?**
- 6 A. The Company is requesting approval of rate case expense riders Rate Schedule
- RCE and Rate Schedule RCE-ENV to enable the Company to recover all rate case
- 8 expenses determined to be reasonable.
- 9 Q. DOES THIS CONCLUDE YOUR DIRECT TESTIMONY?
- 10 A. Yes, it does.

Texas Gas Service Company, a Division of ONE Gas, Inc. CGSA ISOS RTCS TYE June 30, 2019
Updated for Known and Measurable Changes Through September 30, 2019

July 19, 2019

Via Hand Delivery

Ms. Kari French Director, Oversight & Safety Division Railroad Commission of Texas 1701 N. Congress Ave., 9th Floor Austin, Texas 78701

RE: ONE Gas, Inc.'s Texas Utilities Code Section 102.051 Notification

Dear Ms. French,

In accordance with the provisions of Section 102.051 of the Texas Utilities Code, ONE Gas, Inc. provides the following Notification: effective June 30, 2019, ONE Gas, Inc. purchased ONEOK Transmission Company L.L.C. ("ONEOK"), a natural gas pipeline system extending from Kyle, Texas to Cuero, Texas, at a price in excess of \$1 million. Under ONE Gas, Inc. ownership, the pipeline system is now ONE Gas Pipeline Company, L.L.C. ("Company"). The Company is an affiliate of Texas Gas Service Company, a division of ONE Gas, Inc. ("TGS"), which is a local distribution company that provides natural gas service throughout the state and is subject to regulation by the Railroad Commission of Texas ("Commission").

Previously, the pipeline was operated by TGS under an operating agreement with ONEOK. TGS will remain the operator of the Company under the P-5 currently on file with the Commission under operator number 845951. Consequently, no workforce changes or reductions were contemplated or experienced as a result of this transaction. To date, the transaction has been seamless with respect to services being provided to customers. The facilities ONE Gas, Inc. acquired that are owned by the Company are used to provide transportation service in TGS's Central Texas Service Area.

ONE Gas, Inc. believes this transaction is in the public interest and will enhance TGS's ability to continue to provide safe, reliable service to its customers. If you have any questions regarding the transaction, please feel free to contact Stacey McTaggart at (512) 370-8354 or Stacey.McTaggart@onegas.com.

Best regards,

David Scalf

Vice President of Rates & Regulatory

RE: Gas Utilities Docket No. 10877: Application filed by ONE Gas, Inc. to report an acquisition from ONEOK Transmission Company L.L.C.

EXAMINER'S LETTER NO. 4 Receipt of Report of Acquisition of Assets

Dear Ms. McTaggart:

On July 18, 2019, the Railroad Commission of Texas (Commission) received the above referenced report the transaction between ONE Gas, Inc. (ONE Gas) and ONEOK Transmission Company, LLC (ONEOK) providing notice of this acquisition of assets. This letter is to acknowledge receipt of the notice of the acquisition pursuant to Texas Utilities Code § 102.051.

In consideration of the transaction as reported, no additional supporting information will be needed at the present time. However, Tex. UTIL. Code § 102.051 (b) states "...the railroad commission shall investigate the transaction...to determine whether the action is consistent with the public interest. In reaching its determination, the railroad commission shall consider the reasonable value of the property, facilities, or securities to be acquired, disposed of, merged, or consolidated." In determining reasonable value, the Commission's practice has been to consider original cost. As a general regulatory principle, the term 'original cost,' when used in the context of utility property, is the cost of such property to the person first devoting it to public service.

With limited and specific exceptions, each Texas gas utility shall utilize the Federal Energy Regulatory Commission's Uniform System of Accounts for all operating and reporting purposes. (16 Tex. ADMIN. CODE § 7.310)

If the value of the acquired assets becomes the subject of a future cost of service rate proceeding, the Commission's determination as to whether this transaction was in the public interest and the appropriate accounting treatment for the transaction will be determined in such a proceeding based on original cost information. In that circumstance, the Company will be required to provide original cost information for the subject assets in addition to any other supporting information deemed to be material to a public interest review. Tex. Util. Code § 102.051(c) emphasizes "If the railroad commission finds that a transaction is not in the public interest, the railroad commission shall take the effect of the transaction into consideration in ratemaking proceedings and disallow the effect of the transaction if the transaction will unreasonably affect rates or service."

Thank you for your cooperation in this matter. Please contact the undersigned should you have any questions or for further assistance regarding the review of this transaction at <u>Sarah.Montoya-Foglesong@rrc.texas.gov</u> or (512) 475-1958.

Sincerely,

Sarah Montoya-Foglesong

Ms. Kari French Director, Oversight & Safety Division Railroad Commission of Texas 1701 N. Congress Ave., 9th Floor Austin, Texas 78701

Re: GUD No. _____; Statement of Intent of Texas Gas Service Company, a Division of ONE Gas, Inc., to Increase Rates to Recover Hurricane Harvey Response Costs Within the Gulf Coast Service Area

Dear Ms. French:

Enclosed for filing are an original and eleven copies of Texas Gas Service Company, a Division of ONE Gas, Inc.'s ("TGS" or the "Company") Statement of Intent to increase rates within the unincorporated areas of the Gulf Coast Service Area ("GCSA"), including supporting exhibits and a flash drive that contains the electronic files.

Thank you for your attention to this matter. Please do not hesitate to contact me if you have any questions.

Best regards,

Late Norman

Kate Norman

Attorney for Texas Gas Service Company

TEXAS GAS SERVICE COMPANY'S STATEMENT OF INTENT TO INCREASE RATES TO RECOVER HURRICANE HARVEY RESPONSE COSTS WITHIN THE GULF COAST SERVICE AREA

Texas Gas Service Company ("TGS" or "the Company"), a division of ONE Gas, Inc. ("ONE Gas") and a "gas utility" under Texas Utilities Code § 101.003(7), respectfully files this Statement of Intent, pursuant to Subchapter C of Chapter 104 of the Texas Utilities Code and the rules of the Gas Services Department of the Railroad Commission of Texas ("Commission"), to recover Hurricane Harvey response costs within the Gulf Coast Service Area ("GCSA"). Contemporaneously with this filing, TGS is filing a Statement of Intent to Increase Rates with the municipalities retaining original jurisdiction in the GCSA.

The Company requests that the proposed rate schedules and tariffs for the GCSA, **Exhibit A** to this Statement of Intent and incorporated herein by reference, become effective on May 21, 2019, which is 35 days from the date of this filing. In support of its request, the Company respectfully shows as follows:

I. INTRODUCTION AND SUMMARY OF THE RATE REQUEST

By this filing, the Company proposes implementation of a Hurricane Harvey Surcharge ("Rate Schedule HARV-RIDER") to recover over a two-year period the Company's costs related to restoration of its system following the impact of Hurricane Harvey. Recovery through a two-year surcharge rather than adjusting base rates for the increase in expenses will lessen the monthly impact on TGS's GCSA customers. Although the Company was covered by insurance for this

Page 3 of 52

event, the total costs were less than the Company's \$2 million deductible. Certain travel and overtime costs were applied to a different, time-based deductible in the policy. For these expenses, the Company received insurance reimbursement for expenses incurred after the first twenty-one days. That insurance reimbursement of \$242,399.50 has been credited against the costs for which the Company seeks recovery in this filing.

The costs for which the Company seeks recovery primarily include travel and labor to assess the damage Hurricane Harvey caused and labor and materials costs to repair or replace thousands of meters and regulators. TGS proposes to collect this amount from all customers in the GCSA, which includes residential, commercial, commercial transportation, industrial, industrial transportation, public authority and public authority transportation customers, as a surcharge on the volumetric rate shown in the attached proposed Rate Schedule HARV-RIDER. In addition, TGS has revised the Cost of Service section of the gas sales rate schedules to reference Rate Schedule HARV-RIDER. The rate schedules and tariffs, attached hereto as **Exhibit A** to the Rate Filing Package and made a part hereof, evidence the rate change proposed by the Company.

If approved by the Commission, the proposed surcharge of \$0.01406 per Ccf will increase TGS's revenues in the GSCA by \$714,389. The Company seeks to recover this amount over a two-year period, which is an annual increase of \$357,194 or 1.22% annually including gas costs, or 1.98% annually excluding gas costs. Because the proposed changes will not increase TGS's total aggregate revenues on an annual basis within the GCSA by more than 2.5%, the proposed rate increase does not constitute a "major change" in rates as that term is defined by Texas Utilities Code § 104.101. If the surcharge is approved, the residential and commercial rates within the original jurisdiction of the Commission will not exceed 115% of the average of all rates for similar services of all municipalities served by the same utility within the same county.

Finally, as provided by law, TGS is requesting that the Commission approve the recovery of the reasonable rate case expenses associated with this filing through an addition to the approved surcharge amount. The exact amount will not be known until the case is complete.

II. JURISDICTION

TGS is a gas utility as that term is defined in § 101.003(7) of the Texas Utilities Code. Pursuant to Texas Utilities Code § 102.001(a), the Commission has exclusive original jurisdiction to set the rates TGS requests for customers in the unincorporated areas of the GCSA. Consistent with such jurisdiction, the proposed rate identified in **Exhibit A** is applicable to the Company's natural gas service within the unincorporated areas of the GCSA.

III. DETAILS OF PROPOSED CHANGES

A. Rate Filing Package

In addition to this Statement of Intent, the Rate Filing Package consists of the following:

| • | SOI Exhibit A | Proposed Rate Schedules and Tariffs |
|---|---------------|-------------------------------------|
| • | SOI Exhibit B | Proposed Revenue Increase by Class |
| • | SOI Exhibit C | Average Bill Impact by Class |
| • | SOI Exhibit D | Direct Testimony |
| • | SOI Exhibit E | Proposed Notice |
| • | SOI Exhibit F | Proposed Protective Order |
| • | SOI Exhibit G | Schedules |
| | | |

B. Effective Date

SOI Exhibit H

The Company requests that the Commission order the proposed rates to be effective for bills rendered on and after May 21, 2019.

Workpapers

C. Class and Number of Customers Affected

The proposed changes to the Company's rate schedules will affect all customers in the GCSA environs. The table below shows the approximate number of environs customers by class, who will be affected by the proposed rate changes:

| | # of Customers |
|---------------------------------|----------------|
| GCSA Customer Classes | |
| Residential | 1,151 |
| Commercial | 29 |
| Commercial Transportation | 0 |
| Industrial | 0 |
| Industrial Transportation | 0 |
| Public Authority | 4 |
| Public Authority Transportation | 0 |

Exhibits B and **C**, attached, show the amount of the proposed increase and the effect of the proposed increase on an average bill for each class of customers.

D. Witness Testimony

Attached as **Exhibit D** to the Statement of Intent is the direct testimony of Stacey McTaggart supporting the Company's requested recovery of costs it incurred to perform restoration efforts following Hurricane Harvey.

IV. RATE CASE EXPENSES

Pursuant to Texas Utilities Code § 104.051 and Commission Substantive Rule 7.5530, TGS requests recovery of all reasonable and necessary Company and any applicable City rate case expenses from affected customers through an addition to the final approved surcharge.

V. PUBLIC NOTICE AND REQUEST FOR APPROVAL OF FORM OF NOTICE

The Company will promptly undertake to notify the public of the proposed changes in its gas rates consistent with the requirements of Texas Utilities Code § 104.103 and Commission Substantive Rules §§ 7.230 and 7.235. The public notice that TGS proposes to provide regarding the proposed increase in rates for the GCSA environs is attached as **Exhibit E** to the Statement of

Intent. TGS asks that the Commission approve its form of notice prior to publication, and the Company will submit proof of notice to the Commission promptly upon completion thereof.

VI. COMPANY REPRESENTATIVES FOR NOTIFICATION

TGS's authorized representatives are:

Stephanie Houle Stacey L. McTaggart Texas Gas Service Company Barton Skyway IV 1301 S. Mopac, Suite 400 Austin, Texas 78746 512-370-8354 512-370-8440 (fax)

and

512-879-0912 (fax)
kate.norman@crtxlaw.com
glenn.adkins@crtxlaw.com

Please serve all pleadings, motions, orders, and other documents filed in this proceeding upon TGS's authorized representatives at the above-stated addresses.

VII. REQUEST FOR APPROVAL OF PROTECTIVE ORDER

The Company's Rate Filing Package includes certain confidential materials. In addition, the scope of discovery in this case may require the production of additional confidential material. Accordingly, TGS attaches as **Exhibit F** to this Statement of Intent a proposed Protective Order and respectfully requests that the Commission issue an order approving the Protective Order. TGS will provide confidential material upon execution of Exhibit A attached to the Protective Order.

VIII. CONCLUSION

TGS requests that the Commission: (1) establish rates for the GCSA consistent with the proposed Rate Schedule HARV-RIDER to become effective for bills rendered on and after May 21, 2019; (2) authorize the Company to recover all reasonable rate case expenses incurred in connection with this Statement of Intent filing; and (3) for such further relief to which the Company may be entitled.

Respectfully submitted,

Stephanie G. Houle

ATTORNEYS FOR TEXAS GAS SERVICE COMPANY

HURRICANE HARVEY SURCHARGE

A. APPLICABILITY

The Hurricane Harvey Surcharge rate as set forth in Section (B) below is for the recovery of losses incurred by the Company as a direct result of Hurricane Harvey and not recoverable from any other source. The rate shall apply to the following gas sales and standard transportation rate schedules of Texas Gas Service Company, a Division of ONE Gas, Inc. currently in force in the Company's Gulf Coast service area within the incorporated and unincorporated areas of Bayou Vista, Galveston, Groves, Jamaica Beach, Nederland, Port Arthur, and Port Neches, Texas: 10, 20, 30, 40, 1Z, 2Z, 3Z, 4Z, T-1, and T-1-ENV.

B. SURCHARGE RATE

All Ccf during each billing period: \$0.01406 per Ccf

This rate will be in effect until all approved and expended Hurricane Harvey costs and associated rate case expenses are recovered under the applicable rate schedules.

C. OTHER ADJUSTMENTS

Taxes: Plus applicable taxes and fees related to above.

D. CONDITIONS

Subject to all applicable laws and orders, and the Company's rules and regulations on file with the regulatory authority.

E. COMPLIANCE

TGS shall file a reconciliation report annually on or before December 31st, commencing in 2019. TGS shall file the report with the Commission, addressed to the Director of the Oversight and Safety Division and referencing Gas Utilities Docket No. ______, Hurricane Harvey Surcharge Recovery Report. The report shall include:

- The volumes used by month by customer class during the applicable period,
- The amount of surcharge recovered, by month
- The outstanding balance, by month

RESIDENTIAL SERVICE RATE

APPLICABILITY

Applicable to a residential customer in a single dwelling, or in a dwelling unit of a multiple dwelling or residential apartment, for domestic purposes. A residential consumer includes an individually-metered residential unit or dwelling that is operated by a public housing agency acting as an administrator of public housing programs under the direction of the U.S. Department of Housing and Urban Development. This rate is only available to full requirements customers of Texas Gas Service Company, a Division of ONE Gas, Inc.

TERRITORY

Incorporated areas served in Galveston, Bayou Vista, Jamaica Beach, Port Arthur, Nederland, Groves and Port Neches, Texas.

COST OF SERVICE RATE

During each monthly billing period:

A customer charge per meter per month of \$12.10 plus

All Ccf per monthly billing period @ \$0.45616 per Ccf

OTHER ADJUSTMENTS

<u>Cost of Gas Component</u>: The basic rates for cost of service set forth above shall be increased by the amount of the Cost of Gas Component for the billing month computed in accordance with the provisions of Rate Schedule 1-INC.

<u>Weather Normalization Adjustment:</u> The billing shall reflect adjustments in accordance with the provisions of the Weather Normalization Adjustment Clause, Rate Schedule WNA.

Rate Schedule RCE: Adjustments in accordance with provisions of the Rate Case Expense Surcharge Rider.

Rate Schedule HARV-RIDER: Adjustments in accordance with provisions of the Hurricane Harvey Surcharge Rider.

Taxes: Plus applicable taxes and fees (including franchise fees) related to above.

CONDITIONS

Subject to all applicable laws and orders, and the Company's rules and regulations on file with the regulatory authority.

COMMERCIAL SERVICE RATE

<u>APPLICABILITY</u>

Applicable to commercial consumers for all purposes and all other consumers not otherwise specifically provided for.

TERRITORY

Incorporated areas served in Galveston, Bayou Vista, Jamaica Beach, Port Arthur, Nederland, Groves and Port Neches, Texas.

COST OF SERVICE RATE

During each monthly billing period:

A customer charge per meter per month of \$49.49 plus

All Ccf per monthly billing period @

The First 250 Ccf @ \$0.22140 per Ccf
All Over 250 Ccf @ \$0.19380 per Ccf

OTHER ADJUSTMENTS

<u>Cost of Gas Component</u>: The basic rates for cost of service set forth above shall be increased by the amount of the Cost of Gas Component for the billing month computed in accordance with the provisions of Rate Schedule 1-INC.

<u>Weather Normalization Adjustment:</u> The billing shall reflect adjustments in accordance with the provisions of the Weather Normalization Adjustment Clause, Rate Schedule WNA.

Rate Schedule RCE: Adjustments in accordance with provisions of the Rate Case Expense Surcharge Rider.

<u>Rate Schedule HARV-RIDER:</u> Adjustments in accordance with provisions of the Hurricane Harvey Surcharge Rider.

Taxes: Plus applicable taxes and fees (including franchise fees) related to above.

CONDITIONS

Subject to all applicable laws and orders, and the Company's rules and regulations on file with the regulatory authority.

The rate schedule may be used for special unmetered service such as gas street lights. The total hourly rated consumption of all gas burning appliances included, expressed in Ccf, at the location, shall be multiplied by 731 to determine the average monthly consumption of the service. The result, rounded to the next highest Ccf shall then be billed the rates provided in this rate.

INDUSTRIAL SERVICE RATE

APPLICABILITY

Applicable to any qualifying customer whose primary business activity at the location served is included in one of the following classifications of the Standard Industrial Classification Manual of the U.S. Government.

Division B - Mining - all Major Groups

Division D - Manufacturing - all Major Groups

Divisions E and J - Utility and Government - facilities generating power for resale only

TERRITORY

Incorporated areas served in Galveston, Bayou Vista, Jamaica Beach, Port Arthur, Nederland, Groves and Port Neches, Texas.

COST OF SERVICE RATE

During each monthly billing period:

A customer charge per meter per month of \$153.41 plus

All Ccf per monthly billing period @

The First 250 Ccf @ \$0.40060 per Ccf
All Over 250 Ccf @ \$0.37480 per Ccf

OTHER ADJUSTMENTS

<u>Cost of Gas Component</u>: The basic rates for cost of service set forth above shall be increased by the amount of the Cost of Gas Component for the billing month computed in accordance with the provisions of Rate Schedule 1-INC.

Rate Schedule RCE: Adjustments in accordance with provisions of the Rate Case Expense Surcharge Rider.

<u>Rate Schedule HARV-RIDER:</u> Adjustments in accordance with provisions of the Hurricane Harvey Surcharge Rider.

Taxes: Plus applicable taxes and fees (including franchise fees) related to above.

CONDITIONS

Subject to all applicable laws and orders, and the Company's rules and regulations on file with the regulatory authority.

Delivery of gas hereunder may be interrupted or curtailed at the discretion of Texas Gas Service Company, a Division of ONE Gas, Inc., in case of shortage or threatened shortage of gas supply from any cause whatsoever, to conserve gas for residential and other customers served.

PUBLIC AUTHORITY SERVICE RATE

APPLICABILITY

Applicable to all public and parochial schools and colleges, and to all facilities operated by Governmental agencies not specifically provided for in other rate schedules or special contracts. This rate is only available to full requirements customers of Texas Gas Service Company, a Division of ONE Gas, Inc.

TERRITORY

Incorporated areas served in Galveston, Bayou Vista, Jamaica Beach, Port Arthur, Nederland, Groves and Port Neches, Texas.

COST OF SERVICE RATE

During each monthly billing period:

A customer charge per meter per month of \$103.95 plus

All Ccf per monthly billing period @

The First 250 Ccf @ \$0.15672 per Ccf
All Over 250 Ccf @ \$0.13092 per Ccf

OTHER ADJUSTMENTS

<u>Cost of Gas Component</u>: The basic rates for cost of service set forth above shall be increased by the amount of the Cost of Gas Component for the billing month computed in accordance with the provisions of Rate Schedule 1-INC.

<u>Weather Normalization Adjustment:</u> The billing shall reflect adjustments in accordance with the provisions of the Weather Normalization Adjustment Clause, Rate Schedule WNA.

Rate Schedule RCE: Adjustments in accordance with provisions of the Rate Case Expense Surcharge Rider.

<u>Rate Schedule HARV-RIDER:</u> Adjustments in accordance with provisions of the Hurricane Harvey Surcharge Rider.

<u>Taxes</u>: Plus applicable taxes and fees (including franchise fees) related to above.

CONDITIONS

Subject to all applicable laws and orders, and the Company's rules and regulations on file with the regulatory authority.

The rate schedule may be used for special unmetered service such as gas street lights. The total hourly rated consumption of all gas burning appliances included, expressed in Ccf, at the location, shall be multiplied by 731 to determine the average monthly consumption of the service. Total Customer Charge \$225.52 per month

All Ccf per monthly billing period @

The First 250 Ccf @ \$0.37808 per Ccf (Footnote 2)
All Over 250 Ccf @ \$0.35228 per Ccf (Footnote 3)

OTHER ADJUSTMENTS

<u>Cost of Gas Component</u>: The basic rates for cost of service set forth above shall be increased by the amount of the Cost of Gas Component for the billing month computed in accordance with the provisions of Rate Schedule 1-ENV.

Rate Schedule RCE: Adjustments in accordance with provisions of the Rate Case Expense Surcharge Rider.

Rate Schedule HARV-RIDER: Adjustments in accordance with provisions of the Hurricane Harvey Surcharge Rider.

Taxes: Plus applicable taxes and fees related to above.

CONDITIONS

- 1. Subject to all applicable laws and orders, and the Company's rules and regulations on file with the regulatory authority.
- 2. Delivery of gas hereunder may be interrupted or curtailed at the discretion of the Company, in case of shortage or threatened shortage of gas supply from any cause whatsoever, to conserve gas for residential and other customers served.

Footnote 1: 2016 IRA - \$85.98 (GUD No. 10666); 2017 IRA - \$29.54 (GUD No. 10781)

Footnote 2: \$0.40060 (GUD No. 10488) revised to \$0.37808 (GUD No. 10730) Footnote 3: \$0.37480 (GUD No. 10488) revised to \$0.35228 (GUD No. 10730)

PUBLIC AUTHORITY SERVICE RATE

APPLICABILITY

Applicable to all public and parochial schools and colleges, and to all facilities operated by Governmental agencies not specifically provided for in other rate schedules or special contracts. This rate is only available to full requirements customers of Texas Gas Service Company, a Division of ONE Gas, Inc.

TERRITORY

Unincorporated areas served in the vicinity of Galveston, Bayou Vista, Jamaica Beach, Port Arthur, Port Neches, Nederland and Groves, Texas.

COST OF SERVICE RATES

During each monthly billing period:

A customer charge per meter per month of \$110.00 plus

Interim Rate Adjustment (IRA) \$ 6.63 per month (Footnote 1)

Total Customer Charge \$116.63 per month

All Ccf per monthly billing period @

The First 250 Ccf @ \$0.13587 per Ccf (Footnote 2)
All Over 250 Ccf @ \$0.11007 per Ccf (Footnote 3)

OTHER ADJUSTMENTS

<u>Cost of Gas Component</u>: The basic rates for cost of service set forth above shall be increased by the amount of the Cost of Gas Component for the billing month computed in accordance with the provisions of Rate Schedule 1-ENV.

<u>Weather Normalization Adjustment:</u> The billing shall reflect adjustments in accordance with the provisions of the Weather Normalization Adjustment Clause, Rate Schedule WNA.

Rate Schedule RCE: Adjustments in accordance with provisions of the Rate Case Expense Surcharge Rider.

Rate Schedule HARV-RIDER: Adjustments in accordance with provisions of the Hurricane Harvey Surcharge Rider.

<u>Taxes:</u> Plus applicable taxes and fees related to above.

CONDITIONS

- 1. Subject to all applicable laws and orders, and the Company's rules and regulations on file with the regulatory authority.
- 2. The rate schedule may be used for special unmetered service such as gas street lights. The total hourly rated consumption of all gas burning appliances included, expressed in Ccf, at the location, shall be multiplied by 731 to determine the average monthly consumption of the service. The result, rounded to the next highest Ccf shall then be billed the rates provided in this rate.

Footnote 1: 2016 IRA - \$4.66 (GUD No. 10666); 2017 IRA - \$1.97 (GUD No. 10781) Footnote 2: \$0.15672 (GUD No. 10488) revised to \$0.13587 (GUD No. 10730)

Footnote 3: \$0.13092 (GUD No. 10488) revised to \$0.11007 (GUD No. 10730)

TRANSPORTATION SERVICE RATE

Applicability

Applicable to customers who have elected Transportation Service not otherwise specifically provided for under any other rate schedule.

Service under this rate schedule is available for the transportation of customer-owned natural gas through the Company's distribution system. The customer must arrange with its gas supplier to have the customer's gas delivered to one of the Company's existing delivery receipt points for transportation by the Company to the customer's facilities at the customer's delivery point. The receipt points shall be specified by the Company at its reasonable discretion, taking into consideration available capacity, operational constraints, and integrity of the distribution system.

Availability

Natural gas service under this rate schedule is available to any individually metered, non-residential customer for the transportation of customer owned natural gas through the Company's unincorporated areas of the Gulf Coast Service Area distribution system which includes the environs of Galveston, Bayou Vista, Jamaica Beach, Port Arthur, Port Neches, Groves and Nederland, Texas. Such service shall be provided at any point on the Company's System where adequate capacity and gas supply exists, or where such capacity and gas supply can be provided in accordance with the applicable rules and regulations and at a reasonable cost as determined by the Company in its sole opinion.

Cost of Service Rate

During each monthly billing period, a customer charge per meter per month listed by customer class as follows:

| Comm | nercial | \$ 300 | 0.00 per month | | |
|---------|---------------------------|--------|-----------------------|------------|----------|
| | plus Interim Rate Adjustn | nents | \$5.05 (Footnote 1) | Total Rate | \$305.05 |
| | | | | | |
| Industr | rial | \$ 300 | 0.00 per month | | |
| | plus Interim Rate Adjustn | nents | \$115.52 (Footnote 2) | Total Rate | \$415.52 |
| Public | Authority | \$ 300 | 0.00 per month | | |
| | plus Interim Rate Adjustn | nents | \$6.63 (Footnote 3) | Total Rate | \$306.63 |

Plus – All Ccf per monthly billing period listed by customer class as follows:

| Commercial | The First 250 Ccf@ All Over 250 Ccf @ | \$ 0.20185 per Ccf (Footnote 4) \$ 0.17425 per Ccf (Footnote 5) |
|------------------|--|--|
| Industrial | The First 250 Ccf@ All Over 250 Ccf @ | \$ 0.37808 per Ccf (Footnote 6) \$ 0.35228 per Ccf (Footnote 7) |
| Public Authority | The First 250 Ccf@ All Over 250 Ccf @ | \$ 0.13587 per Ccf (Footnote 8) \$ 0.11007 per Ccf (Footnote 9) |

Additional Charges:

- 1) A charge will be made each month to recover the cost of taxes paid to the State of Texas pursuant to Texas Utilities Code, Chapter 122 as such may be amended from time to time which are attributable to the transportation service performed hereunder.
- 2) In the event the Company incurs a demand or reservation charge from its gas supplier(s) or transportation providers in the unincorporated areas of the Gulf Coast Service Area, the customer may be charged its proportionate share of the demand or reservation charge based on benefit received by the customer.
- 3) <u>Rate Schedule RCE:</u> Adjustments in accordance with provisions of the Rate Case Expense Surcharge Rider.
- 4) <u>Rate Schedule HARV-RIDER:</u> Adjustments in accordance with provisions of the Hurricane Harvey Surcharge Rider.

Subject To

- 1) Tariff T-TERMS, General Terms and Conditions for Transportation
- 2) Transportation of natural gas hereunder may be interrupted or curtailed at the discretion of the Company in case of shortage or threatened shortage of gas supply from any cause whatsoever, to conserve gas for residential and other higher priority customers served. The curtailment priority of any customer served under this schedule shall be the same as the curtailment priority established for other customers served pursuant to the Company's rate schedule which would otherwise be available to such customer.
- 3) Subject to all applicable laws and orders, and the Company's rules and regulations on file with the regulatory authority.

TRANSPORTATION SERVICE RATE

Applicability

Applicable to customers who have elected Transportation Service not otherwise specifically provided for under any other rate schedule.

Service under this rate schedule is available for the transportation of customer-owned natural gas through Texas Gas Service's distribution system. The customer must arrange with its gas supplier to have the customer's gas delivered to one of Texas Gas Service's existing delivery receipt points for transportation by Texas Gas Service to the customer's facilities at the customer's delivery point. The receipt points shall be specified by Texas Gas Service at its reasonable discretion, taking into consideration available capacity, operational constraints, and integrity of the distribution system.

Availability

Natural gas service under this rate schedule is available to any individually metered, non-residential customer for the transportation of customer owned natural gas through Texas Gas Service's Gulf Coast Service Area distribution system which includes the incorporated areas of Galveston, Bayou Vista, Jamaica Beach, Port Arthur, Port Neches, Groves and Nederland, Texas. Such service shall be provided at any point on Texas Gas Service's System where adequate capacity and gas supply exists, or where such capacity and gas supply can be provided in accordance with the applicable rules and regulations and at a reasonable cost as determined by Texas Gas Service in its sole opinion.

Cost of Service Rate

During each monthly billing period, a customer charge per meter per month listed by customer class as follows:

| Commercial | \$295.49 | per month |
|------------------|----------|-----------|
| Industrial | \$217.42 | per month |
| Public Authority | \$302.36 | per month |

Plus – All Ccf per monthly billing period listed by customer class as follows:

| Commercial | The First 250 Ccf@ All Over 250 Ccf @ | \$0.22140 per Ccf \$0.19380 per Ccf |
|------------------|--|--|
| Industrial | The First 250 Ccf@ All Over 250 Ccf @ | \$0.40060 per Ccf \$0.37480 per Ccf |
| Public Authority | The First 250 Ccf@ All Over 250 Ccf @ | \$0.15672 per Ccf \$0.13092 per Ccf |

Additional Charges:

- 1) A charge will be made each month to recover the cost of taxes paid to the State of Texas pursuant to Texas Utilities Code, Chapter 122 as such may be amended from time to time which are attributable to the transportation service performed hereunder.
- 2) A charge will be made each month to recover the cost of any applicable franchise fees paid to the cities.
- 3) In the event Texas Gas Service incurs a demand or reservation charge from its gas supplier(s) or transportation providers in the incorporated areas of the Gulf Coast Service Area, the customer may be charged its proportionate share of the demand or reservation charge based on benefit received by the customer.
- 4) <u>Rate Schedule RCE:</u> Adjustments in accordance with provisions of the Rate Case Expense Surcharge Rider.
- 5) <u>Rate Schedule HARV-RIDER:</u> Adjustments in accordance with provisions of the Hurricane Harvey Surcharge Rider.

Subject To

- 1) Tariff T-TERMS, General Terms and Conditions for Transportation

DIRECT TESTIMONY OF STACEY L. MCTAGGART

2 I. <u>INTRODUCTION AND QUALIFICATIONS</u>

3 Q. PLEASE STATE YOUR NAME AND BUSINESS ADDRESS.

- 4 A. My name is Stacey L. McTaggart, and my business address is 1301 South MoPac
- 5 Expressway, Suite 400, Austin, Texas 78746.

6 Q. BY WHOM ARE YOU EMPLOYED AND IN WHAT CAPACITY?

- 7 A. I am the Rates and Regulatory Director for Texas Gas Service Company ("TGS"
- 8 or the "Company"), which is a division of ONE Gas, Inc. ("ONE Gas"). I am
- 9 responsible for managing the regulatory matters for TGS.

10 Q. PLEASE DESCRIBE YOUR EDUCATIONAL BACKGROUND AND

11 **PROFESSIONAL EXPERIENCE.**

12 A. I received a Bachelor of Business Administration degree in finance and accounting

from St. Edward's University in August 1988. From 1983 to 1990, I worked for

NCNB Texas, now Bank of America. In April 1990, I joined Southern Union

15 Company as a Rate Analyst. In that capacity, I was responsible for the preparation

of rate schedules and testimony in connection with rate requests in the various

17 regulatory jurisdictions in which Southern Union Company operated. From April

18 1993 to January 1997, I served as a Utility Specialist at the Railroad Commission

19 of Texas ("Commission"). At the Commission, I participated in numerous cases as

either a Staff witness or a technical examiner. In January 1997, I returned to

Southern Union Company as Manager of Pricing and Economic Analysis,

managing rate cases primarily for the Company's Southern Union Gas ("SUG")

division. In September 2001, I became SUG's Director of Financial and Regulatory

Analysis. Upon the sale of Southern Union's Texas assets to ONEOK in January

| 1 | | 2003, I joined ONEOK's Texas Gas Service Company division and maintained my |
|----|----|--|
| 2 | | position. Upon the separation of ONE Gas from ONEOK in January 2014, I |
| 3 | | continued as Director of Rates and Regulatory. |
| 4 | Q. | WAS THIS TESTIMONY PREPARED BY YOU OR UNDER YOUR |
| 5 | | DIRECT SUPERVISION? |
| 6 | A. | Yes, it was. |
| 7 | Q. | HAVE YOU PREPARED ANY EXHIBITS IN CONNECTION WITH YOUR |
| 8 | | TESTIMONY? |
| 9 | A. | Yes. I have prepared and sponsor the exhibits listed in the table of contents. |
| 10 | Q. | WERE THESE EXHIBITS PREPARED BY YOU OR UNDER YOUR |
| 11 | | DIRECTION? |
| 12 | A. | Yes, they were. |
| 13 | Q. | WHAT IS THE PURPOSE OF YOUR TESTIMONY? |
| 14 | A. | In 2017, Hurricane Harvey struck the southern coast of Texas and caused flooding |
| 15 | | and physical damage to the Company's facilities in its Gulf Coast Service Area |
| 16 | | ("GCSA"). The purpose of my testimony is to describe the Company's restoration |
| 17 | | efforts after Hurricane Harvey caused damage, particularly flood damage, to |
| 18 | | facilities in the Company's GCSA. Specifically, I describe the Company's: |
| 19 | | 1. emergency preparedness and response plan; |
| 20 | | 2. response to Hurricane Harvey to maintain the safety and reliability of |
| 21 | | its system; and |
| 22 | | 3. proposed recovery of Hurricane Harvey-related expenses via a proposed |
| 23 | | rider, Rate Schedule HARV-Rider. |

1 Q. ARE YOU SPONSORING ANY RATE SCHEDULES?

2 A. Yes, I am sponsoring proposed Rate Schedule HARV-Rider.

3 Q. HAVE YOU PREVIOUSLY TESTIFIED BEFORE ANY REGULATORY

4 **COMMISSIONS?**

- 5 A. Yes. I have filed testimony on behalf of TGS in numerous proceedings, including
- 6 GUD Nos. 9770, 9790, 9839, 9988, 10094, 10453, 10488, 10506, 10526, 10656,
- 7 10739 and 10766.

II. TGS EMERGENCY RESPONSE PLANS

Q. PLEASE DESCRIBE TGS'S EMERGENCY RESPONSE PLANS.

ONE Gas maintains an Emergency Response Plan (Exhibit SLM-1 Confidential), which provides guidance for all ONE Gas operating divisions, including TGS, for a variety of emergency situations including planning objectives, response objectives, response mobilization and demobilization, and communication and documentation requirements. In 2017, TGS maintained a separate Gulf Coast Hurricane Plan ("Hurricane Plan") that set forth annual hurricane preparedness activities as well as the Company's response plan for a hurricane event. That plan is now included as a section in the Emergency Response Plan contained in Exhibit SLM-1. At the beginning of each hurricane season, local management reviews the Hurricane Plan and completes a thorough checklist of equipment and supplies to ensure readiness well before any event is imminent.

22

appropriate personnel;

1 Q. PLEASE DESCRIBE TGS'S HURRICANE PREPAREDNESS ACTIVITIES IN 2017. 2 3 A. In May 2017, personnel in the Company's GCSA completed the annual Hurricane 4 Plan review with their teams, and Company personnel began monitoring all 5 potential storm activity. On August 22, the Company began to monitor the path 6 and development of then Tropical Storm Harvey. The storm moved across the 7 Yucatan Peninsula and reports indicated it would move into the Gulf of Mexico and 8 strengthen, with landfall predicted within a week. At that time, TGS implemented 9 Phase I of the Hurricane Plan for tropical storms or hurricanes moving in the 10 direction of a Company service area. 11 III. TGS RESPONSE TO HURRICANE HARVEY 12 Q. PLEASE DESCRIBE TGS'S PHASE I RESPONSE TO HURRICANE HARVEY. 13 14 A. Phase I response activities included: 15 Establishing an evacuation timeline; 16 Making lodging arrangements in locations where the storm was predicted to 17 make landfall; 18 Contacting local government emergency personnel for evacuation plans and 19 timelines; 20 Monitoring news reports and information for wind and tidal surge predictions;

Reviewing the hurricane preparedness checklist and assigning tasks to

1 Selecting appropriate staging areas for personnel and vehicles to optimize 2 response time; 3 Preparing a list of all employees who would act as emergency responders; 4 Assigning vehicles to personnel and documenting locations; 5 Instructing personnel to keep all vehicles fueled; 6 Placing all essential pipeline records and other documents in a fire- and water-7 proof container; 8 Securing valve isolation books and providing multiple electronic and hard 9 copies to appropriate personnel; 10 Ensuring that bulk gasoline, diesel, oil and other fuels were at adequate 11 emergency levels; 12 Noting the location of portable lighting equipment; 13 Keeping batteries charged for all leak detection and communication equipment; 14 Ensuring the availability of wireless internet cards; and 15 Reviewing the storm predictions and assigned tasks at area staff meetings. 16 Q. PLEASE DESCRIBE ADDITIONAL STEPS TAKEN BY TGS PERSONNEL 17 AS HURRICANE HARVEY APPROACHED. 18 A. On August 23 and August 24, TGS personnel completed additional hurricane 19 preparedness steps including: 20 Securing information technology ("IT") equipment and local Engineering 21 records; 22 Boarding up buildings;

Moving large equipment to sites beyond the flood zone;

14

15

16

17

18

19

20

21

22

23

A.

- Checking and adjusting system pressures;
- Checking food and water supplies, and filling all available water containers;
- Assigning responsibilities to the first responders;
- Assigning radios and/or phones to emergency personnel and first responders;
- Confirming vehicle assignments and locations;
 - Evacuating non-essential employees; and
- Verifying remaining employees understood work assignments and reporting
 requirements.
- As landfall became imminent, TGS personnel shut down and unplugged all possible equipment; relocated to assigned staging/evacuation areas; established communications with local and state leadership; and resumed monitoring weather and evacuation reports. Hurricane Harvey made landfall on August 25 as a Category 4 hurricane.

Q. FOLLOWING LANDFALL, HOW DID TGS PERSONNEL RESPOND?

In the hours after landfall, some emergencies occurred due to trees and other objects falling and damaging meters. The Company was able to respond to these situations and maintain the safety and integrity of the system. Subsequently, the storm stalled for several days, dropping record-breaking rainfall. On August 30, unprecedented additional rainfall totaling approximately 27 inches created wide-spread flooding, including that of the Company's Port Arthur service center and service yard. Many TGS employees were stranded in their homes or at their designated command posts or evacuation points for several days. In all, twenty-one TGS employees sustained some level of water damage to their homes or vehicles and a few had to be rescued

A.

by boat. During this time, the Company's ability to respond was limited by the wide-spread flooding of streets and homes, but the situation gradually improved as personnel gained access to the previously flooded areas.

Q. PLEASE DESCRIBE TGS'S RESPONSE FOLLOWING THE FLOODING.

TGS began a process to efficiently assess each of the approximately 30,000 active meter settings and to document the associated findings. Documentation and materials were gathered even while the water was still receding, allowing local personnel to begin assessment immediately, while others across the state were staged and ready to respond as soon as roads cleared. In addition to the local employees, almost 100 other employees from across ONE Gas provided "on the ground" assistance for the storm response effort.

Five supervisors from the Gulf Coast and North Texas Service Areas each led a team on the ground, all of whom reported to the TGS Director of Operations, Tony Van Schuyver. Every active meter and regulator were initially assessed on a first pass, and any immediate emergency situation was taken care of on this initial assessment. In non-emergency situations, meters were marked with white paint and their condition was documented. Meters or regulators needing replacement due to being under water or other issues were painted with a white "X;" a white "dot" was painted on meters that did not need further action. Documentation was completed and provided to the command post at the end of each day. The meter assessment activities took a total of approximately fourteen days to complete.

Logistics were also a vital and full-time job. Keeping people fed; distributing water and Gatorade; providing dry socks and clean clothes; ensuring

A.

adequate lodging, among other things, were key to supporting the ONE Gas and TGS personnel on the ground who were performing necessary tasks to ensure safety and to identify facilities that needed to be repaired. Teamwork and collaboration were critical components to the successful response.

Daily meetings were held for the first few weeks with the local operations and the support teams in other locations to ensure all needs were met. Safety was stressed at these daily briefings and throughout the event, especially due to hazards in the field that would not normally be encountered – even alligators! The team implemented temporary vehicle safety protocols due to the increased traffic at the service center. Everyone involved was and is very proud that there were zero injuries or accidents during the entire operation.

TGS's Vice-President of Operations, Jim Jarrett, led calls at least daily with the field leadership and offsite functional teams to review status, assess needs, and make tactical decisions. Mr. Jarrett also led recurring meetings with senior management who were actively engaged and providing guidance and direction throughout the event. The Commission and Texas Energy Reliability Council were kept informed throughout the event with thorough, consistent, and timely communication.

Q. PLEASE DESCRIBE THE FINAL OUTCOME OF THE TGS HURRICANE RESPONSE EFFORTS.

The TGS team completed the assessment phase in about 2 weeks. The restoration phase began with a pilot team on September 10, ramped up considerably with the personnel coming off the assessment phase, and wrapped up by September 30.

A.

During the restoration phase, the team replaced each of the regulators that had been under water. They changed the meter if it was compromised in any way or if the index was damaged. In all, approximately 3,100 regulators and 1,100 meters were replaced. In addition, the Company turned off over 600 accounts at the request of customers. All of these efforts were undertaken to ensure the safe and reliable operation of the Company's system.

IV. PROPOSED RECOVERY OF HURRICANE HARVEY EXPENSES

8 Q. WHAT ARE THE COSTS ASSOCIATED WITH THE COMPANY'S

HURRICANE RESPONSE EFFORTS?

10 A. As shown in SOI Exhibit G, Schedule 2, expenses associated with the response to
11 Hurricane Harvey total \$988,890. These costs include labor, travel-related
12 expenses, vehicle expenses and materials and supplies. The Company is not
13 seeking recovery of any capital costs through this filing.

14 Q. DID THE COMPANY RECEIVE ANY INSURANCE PROCEEDS

RELATED TO THE HURRICANE?

Yes. The Company was covered by insurance for this event, but the total costs were less than the Company's \$2 million deductible. However, certain travel and overtime costs fell under a different, time-based deductible in the policy. For these expenses, the Company received insurance reimbursement for expenses incurred after the first twenty-one days. In addition, the Company received \$61,878 under business interruption coverage to reimburse the Company for some of the lost revenue due to interruption of service. Exhibit SLM-2 (Confidential) contains a copy of the insurance settlement.

1 Q. ARE THE COSTS THE COMPANY PROPOSES TO RECOVER NET OF 2 ANY INSURANCE PROCEEDS? 3 A. The expense reimbursement of \$242,399.50 for labor and direct costs has been 4 credited against the costs for which the Company seeks recovery in this filing. The 5 business interruption reimbursement was not credited against the costs for which 6 the Company seeks recovery, because the Company is not seeking recovery from 7 customers of lost revenues. WERE ANY OTHER ADJUSTMENTS MADE TO THE COSTS THE 8 Q. 9 **COMPANY PROPOSES TO RECOVER?** 10 A. Yes. The expenses were reduced by amounts for meals in excess of \$25 per person 11 per meal and nightly lodging costs over \$150 per night in compliance with typical 12 Commission practice. WHAT ARE THE TOTAL RESTORATION COSTS, NET OF THE 13 Q. 14 INSURANCE PROCEEDS AND ANY OTHER ADJUSTMENTS, THE 15 **COMPANY SEEKS TO RECOVER?** 16 A. As shown on Exhibit G, Schedule 1, the Company requests recovery of \$714,389 17 in total over a two-year period. That amounts to \$357,194 per year for the two-year 18 period. 19 HOW DOES TGS PROPOSE TO RECOVER THE COSTS ASSOCIATED Q. 20 WITH THE HURRICANE RESPONSE? 21 A. The Company proposes to recover the costs from GCSA customers over a two-year 22 period via a volumetric surcharge. Schedule 1 of SOI Exhibit G shows the 23 calculation of the two-year surcharge. The total costs to be recovered on line 22

- are divided by two and further divided by annual volumes for the GCSA to derive
- a surcharge rate of \$0.01406 per Ccf, shown on line 26.

3 Q. PLEASE DESCRIBE PROPOSED RATE SCHEDULE HARV-RIDER.

- 4 A. The proposed Rate Schedule HARV-Rider, Hurricane Harvey Surcharge Rider, is
- 5 shown in SOI Exhibit A. Rate Schedule HARV-Rider provides for a surcharge rate
- of \$0.01406 per Ccf to be charged to all gas sales and standard transportation
- 7 customers in the GCSA until all approved Hurricane Harvey costs and associated
- 8 rate case expenses have been recovered. The Rate Schedule also provides for an
- 9 annual reporting mechanism until the full amount is recovered.

10 Q. HOW DOES TGS PROPOSE TO RECOVER ANY RATE CASE EXPENSES

11 **ASSOCIATED WITH THIS FILING?**

- 12 A. To the extent that rate case expenses are incurred by any parties to this filing, the
- 13 Company proposes to add the approved amount of rate case expenses to the total
- Hurricane Harvey costs to be recovered under Rate Schedule HARV-Rider.

15 Q. DOES THIS CONCLUDE YOUR DIRECT TESTIMONY?

16 A. Yes, it does.

Exhibits SLM-1 and SLM-2 are CONFIDENTIAL and will be provided pursuant to the terms of the Protective Order.

STATE OF TEXAS §

COUNTY OF TRAVIS §

AFFIDAVIT OF STACEY L. McTAGGART

BEFORE ME, the undersigned authority, on this day personally appeared Stacey L.

McTaggart who having been placed under oath by me did depose as follows:

- 1. "My name is Stacey L. McTaggart. I am over the age of eighteen (18) and fully competent to make this affidavit. I am employed as Director Rates and Regulatory Affairs for Texas Gas Service, a division of ONE Gas, Inc. The facts stated herein are true and correct based upon my personal knowledge.
- I have prepared the foregoing Direct Testimony and the information contained in this document is true and correct to the best of my knowledge."
 Further affiant sayeth not.

Stacev L. McTaggart

SUBSCRIBED AND SWORN TO BEFORE ME by the said Stacey L. McTaggart on this UM day of April 2019.

Notary Public in and for the State of Texas

PUBLIC NOTICE OF PROPOSED RATE INCREASE NATURAL GAS UTILITY RATES

On April 10, 2019, Texas Gas Service Company ("TGS" or the "Company"), filed a Statement of Intent to Increase Rates ("Statement of Intent") with the Railroad Commission of Texas and with the cities of Bayou Vista, Galveston, Groves, Jamaica Beach, Nederland, Port Arthur, and Port Neches, Texas, for the gas utility rates charged by the Company to customers within the Gulf Coast Service Area ("GCSA"). The proposed increase in rates will affect all customers within the incorporated municipalities and unincorporated areas of the GCSA. The proposed effective date of the requested rate changes is May 21, 2019.

The proposed rates and tariffs are expected to increase the Company's annual revenues for the GCSA by approximately \$714,389 in total. The Company seeks to recover this amount over a two-year period, which is an annual increase of \$357,194 or 1.22% annually including gas costs, or 1.98% annually excluding gas costs. The proposed change in rates does not constitute a "major change" as that term is defined by Section 104.101 of the Texas Utilities Code because the proposed changes will not increase the total aggregate revenues of the Company by more than two and one-half percent. The proposed change in rates will not become effective until similar changes have become effective within the nearest incorporated city within the GCSA.

There is no current storm surcharge in effect. The Company proposes to implement the surcharge included in Table 1 below:

TABLE 1 - Proposed Rate Changes for all Incorporated and Unincorporated Customers

| Customer Class | Number of | Proposed |
|------------------------|--------------------|---------------------|
| | Customers Affected | Volumetric |
| | | Surcharge (per Ccf) |
| Residential (Env) | 1,151 | 0.01406 |
| Residential (Inc) | 41,353 | 0.01406 |

| 1 / | | | | | |
| (N/A) | | | | | |

The above calculations in Table 1 and Table 2 are based on a \$0.5170/Ccf cost of gas.

^{*} Transportation customers secure their own gas, so there is no cost of gas reflected in their bills.

^{**} TGS currently has no customers in these classes.

TGS seeks to add a new tariff, RATE SCHEDULE HARV-RIDER, in order to implement a twoyear surcharge to recover costs related to the restoration of its system following the impact of Hurricane Harvey. The surcharge will be discontinued after the Company fully recovers the costs that are approved for recovery as part of this Statement of Intent filing.

Persons with specific questions or desiring additional information about this filing may contact TGS at 1-800-700-2442. Complete copies of the filed Statement of Intent, including all proposed rates and schedule changes, are available for inspection at TGS offices, located at 4201 39th Street, Port Arthur, Texas 77642 or 402 33rd Street, Galveston, Texas 77550 or on the Company's website at https://www.texasgasservice.com/newsletters-and-notices/rate-notices. Any affected person within the environs may file written comments or a protest concerning the proposed rate change with the Docket Services Section of the Office of the Hearings Division, Railroad Commission of Texas, P.O. Box 12967, Austin, Texas 78711-2967, at any time within 30 days following the date on which this change would or has become effective. Any affected person within an incorporated area may contact his or her city council. Please reference Gas Utilities Docket No.

Cualquier persona que tenga una pregunta específica o desee obtener información adicional acerca de este asunto, puede contactar a TGS al teléfono 1-800-700-2442. Si desea revisar la Declaración de Intención presentada, incluyendo todos los cambios de tarifas y de clases de tarifas, puede encontrar una copia completa en horas hábiles en las oficinas corporativas de TGS, localizadas en 4201 39th Street, Port Arthur, Texas 77642 or 402 33rd Street, Galveston, Texas 77550, o visitando la página de internet de la Compañía en https://www.texasgasservice.com/newsletters-and-notices/rate-notices. Cualquier persona dentro de la periferia que se vea afectada por los cambios de tarifas propuestos, puede presentar sus comentarios o reclamos por escrito a Docket Services Section, Office of the Hearings Division, Railroad Commission of Texas, P.O. Box 12967, Austin, Texas 78711-2967, en cualquier momento dentro de los siguientes 30 días después de la fecha en que los cambios entrarían o entraron en vigencia. Cualquier persona que se vea afectada dentro de las áreas incorporadas puede contactar a su consejo municipal. Por favor refiérase al Expediente de Servicios de Gas (GUD, por sus siglas en inglés) No.

PROTECTIVE ORDER

This Protective Order shall govern the use of all information deemed confidential or highly sensitive confidential information by a party providing information to the Railroad Commission of Texas ("Commission") or responding to discovery requests, including information whose confidentiality may be under dispute in this docket and all dockets consolidated herewith. This order may be modified by the Examiner *sua sponte*, or on advice of the Open Records Coordinator, Office of General Counsel, and the Railroad Commission of Texas.

1. Designation of Protected Materials

Any party or person producing or filing a document, including, but not limited to, records stored or encoded on a computer disk or other similar electronic storage medium, in this proceeding may designate that document, or any portion of it, as confidential by typing or stamping on its face "PROTECTED MATERIALS PROVIDED PURSUANT TO PROTECTIVE ORDER " (hereinafter referred to as "protected materials"). The documents ISSUED IN GUD NO. shall be consecutively Bates Stamped when necessary. On or before the date the protected materials or highly sensitive materials (as this term is defined in Paragraph 6 herein) are provided to the Commission or parties, the producing party shall file and deliver to each party to the proceeding a written statement, which may be in the form of an objection, indicating: (1) any and all exemptions to the Public Information Act, TEX. GOV'T CODE ANN. Chapter 552, claimed to be applicable to the alleged protected materials; (2) the reasons supporting the providing party's claim that the responsive information is exempt from the public disclosure under the Public Information Act and subject to treatment as protected materials; and (3) that counsel for the providing party has reviewed the information sufficiently to state in good faith that the information is exempt from public disclosure under the Public Information Act and merits protected materials designation.

2. Materials Excluded from Protected Materials Designation

Protected materials shall not include any information or document contained in the public files of the Commission or any other federal or state agency, court, or local government authority subject to the Public Information Act or under the Federal Freedom of Information Act provided however, that any party or person may assert any privilege or exception available under these Acts. Protected materials also shall not include materials that at the time of or prior to disclosure in these proceedings, is or was publicly disclosed, on a non-confidential basis. The disclosure of materials to a party, its customers, or their respective employees, agents, consultants, or counsel in the

normal course of business shall not preclude a claim that such materials are protected materials hereunder. Protected materials disclosed by someone other than an employee, agent, or consultant of the originating party in violation of this Protective Order shall not lose their status as protected material as a result of such disclosure.

3. Definition of "reviewing party."

A "reviewing party" is defined for purposes of this Protective Order as a party expressly admitted or that has had a Motion to Intervene granted in GUD No.

4. Definition of "producing party."

A "producing party" is defined for purposes of this Protective Order as a party expressly admitted or that has had a Motion to Intervene granted in GUD No. _____, which has had discovery propounded upon it in any form as provided by applicable law.

5. Access to Protected Materials

A reviewing party shall be permitted access to protected materials only through its authorized representatives. "Authorized representatives" of a party include its counsel of record in this proceeding and associated attorneys, paralegals, economists, statisticians, accountants, consultants, or other persons employed or retained by the party and directly engaged in these proceedings, provided that such person has signed the certification required by Paragraph 8.

6. Designation of Highly Sensitive Protected Materials

The term "highly sensitive protected materials" is a subset of "protected materials." The term refers to, but is not limited to, documents and information the provision of which to the reviewing party or its authorized representatives would: (1) expose the producing party or any of its affiliates to an unreasonable risk of harm, or (2) would result in disclosure of information that would be subject to a privilege against disclosure, a contractual confidentiality agreement or other Protective Agreement or agreement. Highly sensitive protected materials further include, but are not limited to, business operations or financial information that is commercially sensitive. Documents so classified by a producing party shall bear the designation "HIGHLY SENSITIVE PROTECTED MATERIALS PROVIDED PURSUANT TO THE PROTECTIVE ORDER ISSUED IN GUD NO. _____."

7. Restrictions on Copies and Inspection of Highly Sensitive Protected Materials

Highly sensitive protected materials shall be made available for inspection only at the address specified pursuant to Paragraph 9. Additionally, only one copy of highly sensitive protected materials shall be provided to counsel of any party to GUD No. ____ upon written request following completion of the certifications required by Paragraph 8 herein. A party may make one additional copy of reproduced highly sensitive protected materials for use in this proceeding pursuant to this Protective Order. No additional copies of such highly sensitive protected materials may be made, except that additional copies may be made in order to have

sufficient copies for introduction of the material into the evidentiary record if the material is to be offered for admission into the record. A record of any copies that are made of highly sensitive protected material shall be kept and a copy of the record shall be sent to the producing party upon request. The record shall include information on the location and the person in possession of the copy. The authorized representatives for the purpose of access to highly sensitive protected materials must be persons who are: (1) counsel for the reviewing party, (2) consultants for the reviewing party working under the direction of the reviewing party's counsel, (3) permanent nonelected employees of municipalities that are parties in GUD No. _____, who have primary responsibility for utility regulation. The authorized representatives for the Commission's Director of Gas Services or the State of Texas for the purpose of access to these materials shall consist of its respective counsel of record in this docket and associated attorneys, paralegals, economists, statisticians, accountants, consultants, or other persons employed or retained by those agencies and directly engaged in this docket. Limited notes may be made of highly sensitive protected materials, and such notes shall themselves be treated as highly sensitive protected material unless such notes are restricted to a description of the document and a general characterization of its subject matter in a manner that does not include any substantive information contained in such highly sensitive protected materials.

8. Required Certification

Each person who inspects the protected materials shall, before such inspection, agree in writing to follow certification set forth in Exhibit A to this Order:

I certify my understanding that the protected materials are provided to me pursuant to the terms and restrictions of the Protective Order in GUD No. _____, and that I have been given a copy of it and have read the Protective Order and agree to be bound by it. I understand that the contents of the protected materials, any notes, memoranda, or any other form of information regarding or derived from the protected materials shall not be disclosed to anyone other than in accordance with the Protective Order and shall be used only for the purpose of the proceeding in GUD No. _____. I acknowledge that the obligations imposed by this certification are pursuant to a ruling issued by the Examiners in this docket. However, if the information contained in the protected materials is obtained from independent sources that did not obtain such information from documents obtained in this docket, the understanding stated herein shall not apply.

In addition, reviewing parties who are permitted access to highly sensitive protected material under the terms of this ruling shall, before inspection of such materials, agree in writing to the following certification set forth in Exhibit A to this Protective Order:

| I certify that I | l am eligible to ha | ve access to | highly | sensitive | protected | materials |
|------------------|---------------------|--------------|--------|-----------|-----------|-----------|
| under the term | s of the Protective | Order in GU | D No. | · | | |

A copy of each signed certification shall be provided to counsel for the party asserting confidentiality. Except for highly sensitive protected materials, any authorized representative may disclose protected materials to any other person who is an authorized representative, provided that,

if the person to whom disclosure is to be made has not executed and provided for delivery of a signed certification to the party asserting confidentiality, that certification shall be executed prior to any disclosure. An authorized representative may disclose highly sensitive protected material to other reviewing representatives who are permitted access to such materials and have executed the additional certification required for persons who receive access to highly sensitive protected material. In the event that any authorized representative to whom protected materials are disclosed ceases to be engaged in these proceedings, access to protected materials by that person shall be terminated and all notes or memoranda or other information derived from the protected material shall be returned to the party on whose behalf that person was acting. Any person who has agreed to either or both of the foregoing certifications shall continue to be bound by the provisions of this Protective Order, even if no longer engaged in these proceedings. Parties who assert confidentiality shall maintain a list of persons who sign a certification pursuant to this Paragraph.

9. Voluminous Materials

- (a) Voluminous protected materials which exceed eight linear feet shall be made available for inspections in its normal repository between the hours of 9:30 a.m. and 5:00 p.m., Monday through Friday (except holidays) in accordance with the Texas Rules of Civil Procedure. A party shall notify the other parties of the address at which the voluminous data will be produced simultaneously with the production of such data. For purposes of this Protective Order voluminous materials or data shall mean responses to a particular question or subpart that consist of one hundred pages or more in the aggregate.
- (b) Except for highly sensitive protected materials as provided for in Paragraph 7, and for protected materials that are voluminous, the party asserting confidentiality shall provide a party one copy of the protected materials upon receipt of the signed certifications described in Paragraph 8. Except as provided above for highly sensitive protected materials, parties may take notes regarding the information contained in protected materials made available for inspection pursuant to Paragraph 9(a). Only one copy of such protected materials shall be reproduced for each party. Parties shall make a diligent, good-faith effort to limit the amount of copying requested to only that which is appropriate for purposes of this proceeding. Notwithstanding the foregoing provisions of this Paragraph 9(b), a party may make further copies of reproduced protected materials for use in this proceeding pursuant to this Protective Order, but a record shall be maintained as to the documents produced and the number of copies made, and upon request, the party shall provide the party asserting confidentiality with a copy of that record.

10. Availability for Purposes of this Filing

All protected materials shall be made available to the parties solely for the purposes of this proceeding. Protected materials, as well as a party's notes, memoranda, or other information regarding, or derived from the protected materials are to be treated confidentially by the parties and shall not be disclosed or used by the party except as permitted and provided in this Protective Order. Information derived from or describing the protected materials shall be maintained in a secure place and shall not be placed in the public or general files of the party except in accordance with the provisions of this Protective Order. A party must take all reasonable precautions to ensure

that the protected materials, including notes and analysis made from protected materials, are not viewed or taken by any person other than an authorized representative of the party.

All non-voluminous protected materials may be reviewed only during the "reviewing period," which period shall commence upon issuance of this Protective Order and continue until conclusion of the plenary jurisdiction of the Commission in this proceeding. The "reviewing period" shall reopen if the Commission regains jurisdiction due to a remand as provided by law. Protected materials that are admitted into the evidentiary record or accompanying the evidentiary record as offers of proof, may be reviewed while this proceeding or any appeals hereof are pending.

11. Treatment of Protected Materials

- (a) If a party tenders for filing any written testimony, exhibit, brief, or other submission that quotes from protected materials or discloses the confidential content of protected materials, the confidential portion of such testimony, exhibit, brief, or other submission shall be sealed and shall be filed and served in accordance with the appropriate procedures utilized by the Commission. The Examiners may subsequently, on their own motion or on motion of a party, issue a ruling respecting whether or not the inclusion, incorporation, or reference to protected materials is such that the written testimony, exhibit, brief, or other submission should remain under seal.
- (b) Any party or person giving testimony in this proceeding may designate those portions of his or her testimony deemed to be confidential materials in accordance with Paragraph 1 of this Protective Order by advising the Examiner of such fact. In that event, the Examiner shall, on a case-by-case basis, devise procedures which are fair to all parties without unduly burdening the record in this docket.
- (c) All protected materials filed with the Commission, the Examiner, any other judicial or administrative body in support of or as part of a motion, other pleading, brief, or other document, shall be filed and served in sealed envelopes or other appropriate containers.

12. Changes to Protective Order

Nothing herein restricts the party seeking protected material and the party producing the protected material from agreeing to other procedures/methods for handling of protected material, including highly sensitive protected material. In addition, each party shall have the right to seek changes in this Protective Order as appropriate from the Examiners, the Commission, or the courts. Nothing herein shall prevent any party from opposing efforts to seek changes to this ruling.

13. Judicial Findings

In the event that the Examiner at any time in the course of this proceeding finds that all or part of the protected materials are not confidential, by finding, for example, that such materials have entered the public domain, those materials shall nevertheless be subject to the protection afforded by this ruling for three full working days, unless otherwise ordered, from the latest of (i) the date of receipt by the party asserting confidentiality of the Examiner's order, or (ii) the date of a final and appealable Commission order denying an appeal filed within the three full working day

period from the Examiner's order; or (iii) approval of such order by operation of law following the filing of such an appeal. Neither the party asserting confidentiality nor any reviewing party waives its right to seek additional administrative or judicial remedies after the Commission's denial of any appeal.

14. Disclosure of Protected Materials

- (a) During the pendency of GUD No. at the Commission, in the event that a party wishes to disclose protected materials to any person to whom disclosure is not authorized by this Protective Order, or wishes to have changed the designation of certain information or material as protected materials by alleging, for example, that such information or material has entered the public domain, such party shall first file and serve on all parties written notice of such proposed disclosure or request for change in designation, identifying with particularity each of such protected materials. In the event that the party asserting confidentiality wishes to contest such proposed disclosure or request for change in designation, that party shall file with the Commission its objection to such proposal, with supporting sworn affidavits, if any, within five working days after receiving such notice of proposed disclosure or request for change in designation. Failure of that party to file such an objection within this period shall be deemed a waiver of objection to the proposed disclosure or request for change in designation. Upon the request of either the producing party or reviewing party or upon the Examiner's own initiative, the Examiner may conduct a prehearing conference. If either the producing or reviewing party wishes to submit materials in question for an in camera inspection, it shall do so at the time of filing its written notice or objection to disclosure. Responses to such an objection, with supporting affidavits, if any, shall be filed within five working days after receipt of the objection. The Examiner will determine whether the proposed disclosure or change in designation is appropriate. The burden is on the party asserting confidentiality to show that such proposed disclosure or change in designation should not be made. If the Examiner determines that such proposed disclosure or change in designation should be made, disclosure shall not take place earlier than three full working days after such determination unless otherwise ordered. No party waives any right to seek additional administrative or judicial remedies concerning such Examiner's ruling. As long as the periods set out in this Protective Order for filing the pleadings described above for consideration by the Examiner and for challenging the determination of the Examiner or the Commission have not expired and while a challenge is pending, the protected materials shall maintain the confidential treatment and status provided for in this Protective Order.
- (b) All protected materials shall be afforded the confidential treatment and status provided for in this Protective Order during the period an appeal on an Examiner's ruling is pending before the Commission and during the periods for challenging the various orders.
- (c) All notices, applications, responses, or other correspondence shall be made in a manner that protects protected materials from unauthorized disclosure.

15. Objection to Protected Materials

Nothing in this ruling shall be construed as precluding any party from objecting to the use of protected materials on grounds other than confidentiality, including the lack of required

relevance. Nothing in this ruling shall be construed as an agreement by any party that the protected materials are entitled to confidential classification.

16. Acts upon Conclusion of Proceeding

Following the conclusion of these proceedings, each party must, no later than thirty days following receipt of the notice described below, destroy or return to the party asserting confidentiality all copies of the protected materials provided by that party pursuant to this Protective Order and all copies reproduced by a reviewing party, and counsel for each party must provide to the party asserting confidentiality a verified certification that, to the best of his or her knowledge, information, and belief, all copies of notes, memorandum, and other documents regarding or derived from the protected materials (including copies of protected materials) that have not been so returned, if any, have been destroyed, other than notes, memoranda, or other documents which contain information in a form which, if made public, would not cause disclosure of protected materials. Promptly following the conclusion of this proceeding, counsel for the party asserting confidentiality will send a written notice to all parties, reminding them of their obligations under this Paragraph. Nothing in this Paragraph shall prohibit counsel for each party from retaining two copies of any filed testimony, exhibit, brief, application for rehearing, or other pleading which refers to protected materials provided that any such protected materials retained by counsel shall remain subject to the provisions of this ruling. As used in this Paragraph, "conclusion of this proceeding" refers to the exhaustion of available appeals, or the running of the time for making of such appeals, as provided by applicable law. If, following any appeal, the Commission conducts a remand proceeding, then "the conclusion of these proceedings" is extended by the remand to the exhaustion of available appeals, or the running of the time for the making of such appeals, as provided by applicable law. If, following any appeal, the Commission conducts a remand proceeding, then the "conclusion of this proceeding" is extended by the remand to the exhaustion of available appeals of the remand or the running of time for making such appeals of the remand, as provided by applicable law.

17. Compliance with Legal Requirements

This Protective Order is subject to the requirements of the Public Information Act, the Open Meetings Act, and any other applicable law, provided that parties subject to those acts will give the party asserting confidentiality notice, if possible under those acts, prior to disclosure pursuant to those acts.

18. Effect of Court Order

If required by order of a government or judicial body, the party may release to such body the confidential information required by such order, provided, however, the party agrees that prior to such disclosure, it shall promptly notify the party asserting confidentiality of the order and allow such party sufficient time to contest release of the confidential information; provided, further, the party shall use its best efforts to prevent such confidential information from being disclosed.

The term "best efforts" as used in the preceding paragraph requires that the party's attempt to ensure that disclosure is not made by its employees or authorized representatives unless such

disclosure is pursuant to a final order of a governmental or judicial body or written opinion of the Attorney General which was sought in compliance with V.T.C.A., Government Code §552.301 (Public Information). The party is not required to delay compliance with a lawful order to disclose such information but is simply required to timely notify the party asserting confidentiality, or its counsel, that it has received a challenge to the confidentiality of the information and that the reviewing party will either proceed under the provisions of §552.301 of the Texas Government Code or intends to comply with the final governmental or court order.

19. Effect of Violation of Court Order

In the event of a breach of the provisions contained in Paragraph 18, the party asserting confidentiality may not have an adequate remedy in money or damages, and accordingly, may in addition to any other available legal or equitable remedies, be entitled to an injunction against such breach. The producing party shall not be relieved of proof of any element required to establish the right to injunctive relief.

AFFIDAVIT OF STACEY MCTAGGART

BEFORE ME, the undersigned authority, on this day personally appeared Stacey McTaggart who having been placed under oath by me did depose as follows:

- 1. "My name is Stacey McTaggart. I am over the age of eighteen (18) and fully competent to make this affidavit. I am employed as Director of the Rates and Regulatory Compliance Department of Texas Gas Service Company, a division of ONE Gas, Inc. The facts stated herein are true and correct based upon my personal knowledge.
- 2. I have prepared the foregoing Direct Testimony and the information contained in this document is true and correct to the best of my knowledge."

Further affiant sayeth not.

DIRECT TESTIMONY OF JANET L. BUCHANAN

2 I. <u>INTRODUCTION AND QUALIFICATIONS</u>

- 3 Q. PLEASE STATE YOUR NAME AND BUSINESS ADDRESS.
- 4 A. My name is Janet L. Buchanan and my business address is 7421 W. 129th Street,
- 5 Overland Park, Kansas 66213.

1

- 6 O. BY WHOM ARE YOU EMPLOYED?
- 7 A. I am employed by Kansas Gas Service, a Division of ONE Gas, Inc., ("ONE Gas")
- 8 as a Director of Rates and Regulatory Reporting.
- 9 Q. PLEASE DESCRIBE YOUR EDUCATIONAL BACKGROUND AND
- 10 **PROFESSIONAL EXPERIENCE.**

11 Α. I earned a Bachelor of Arts degree and Master of Arts degree in economics from 12 the University of Kansas. From June 1993 through August 1998 and from May 13 1999 through August 2011, I worked for the Kansas Corporation Commission in 14 various positions with varying levels of responsibility for examining rates for 15 natural gas, electric and telecommunications utilities, researching current policy issues within the industries, and managing projects. Positions held include: Utility 16 17 Rates Analyst, Senior Research Economist, Managing Research Economist, 18 Telecommunications Economist, Senior Telecommunications Analyst, Senior 19 Managing Research Analyst, Chief of Telecommunications and Chief of Energy

Efficiency and Telecommunications. In September 2011, I joined Texas Gas

Service Company, a Division of ONE Gas, Inc. ("TGS" or the "Company"), as a

.

20

21

¹ I worked for the Kansas Department of Revenue as a Policy and Program Analyst providing the fiscal impact of proposed changes in the mineral severance tax and the motor fuel tax from September 1998 through April 1999.

| 1 | | Manager of Rates and Regulatory Analysis. I was promoted to my current position |
|----|----|--|
| 2 | | in October 2017. |
| 3 | Q. | WAS THIS TESTIMONY PREPARED BY YOU OR UNDER YOUR |
| 4 | | DIRECT SUPERVISION? |
| 5 | A. | Yes, it was. |
| 6 | Q. | WHAT IS THE PURPOSE OF YOUR TESTIMONY? |
| 7 | A. | I explain and support the revenue adjustments used to develop the requested |
| 8 | | system-wide revenue requirement for TGS's proposed Central-Gulf Service Area |
| 9 | | ("CGSA"), which is the proposed consolidation of the existing Central Texas |
| 10 | | Service Area ("CTSA) and Gulf Coast Service Area ("GCSA") and the City of |
| 11 | | Beaumont, Texas. |
| 12 | Q. | ARE YOU SPONSORING ANY SCHEDULES? |
| 13 | A. | I am sponsoring Schedules G-1 through G-3 for the proposed CGSA. In addition |
| 14 | | to schedules that reflect the Company's requested consolidation for the proposed |
| 15 | | CGSA, TGS is also providing stand-alone schedules for the CTSA and GCSA. The |
| 16 | | cost of service for customers in the City of Beaumont, Texas is included in and part |
| 17 | | of the GCSA. |
| 18 | Q. | WERE THESE SCHEDULES PREPARED BY YOU OR UNDER YOUR |
| 19 | | SUPERVISION? |
| 20 | A. | Yes, they were. |
| 21 | | II. REVENUE ADJUSTMENTS |
| 22 | Q. | WHAT ADJUSTMENTS TO REVENUE ARE YOU SPONSORING? |
| 23 | A. | I am sponsoring the adjustments to Gas Sales and Transportation Revenue listed on |
| 24 | | Schedules G-1, G-2 and G-3. Schedule G-1 presents the cost of gas expense and |

the cost of gas revenues that are removed from the Company's per books test year expenses and revenues. These adjustments are necessary because gas costs are recovered via the Cost of Gas Clause ("CGC") rather than through base rates. Schedule G-2 shows the derivation of the test year base sales revenue through the removal of the cost of gas revenue from total per book revenues. Schedule G-2 also contains the various adjustments to test year base revenue attributable to Gas Sales customers that are necessary to make test year revenues representative for the purpose of setting rates in this proceeding. Finally, Schedule G-3 contains adjustments to base revenue attributable to transportation customers and other utility revenue that are required to normalize test year revenue in this statement of intent.

Q. PLEASE EXPLAIN THE ADJUSTMENTS ON SCHEDULE G-1.

A.

Gas costs are recovered through the Company's CGC instead of through base rates because: (1) the Company does not make a profit on gas costs and (2) fluctuations in the cost of gas are outside the control of the Company. Therefore, it is necessary to remove gas costs and revenues from the test year cost of service. Line 1 of Schedule G-1 is the cost of gas revenue collected via the CGC, which is removed from Base Sales Revenue on Schedule G-2. Line 2 is the test year cost of gas expense that is removed from this filing as shown on Schedule G, which is sponsored by Company witness Marie J. Michels.

Q. WHAT INFORMATION IS SHOWN ON LINES 1-3 OF SCHEDULE G-2?

A. The per book Gas Sales Revenue for the twelve months ending June 30, 2019, is reported on line 1 of Schedule G-2. This total includes revenue derived from: (1) charges for the cost of gas and (2) charges for sales service. Line 2 is the total per

book revenue attributable to recovery of the cost of gas. The revenue on line 2 is subtracted from the revenue on line 1 to remove all revenue associated with gas costs from the total per book revenues to yield Base Sales Revenue as recorded on line 3.

5 Q. PLEASE EXPLAIN THE WEATHER NORMALIZATION ADJUSTMENT 6 ON LINE 4 OF SCHEDULE G-2.

TGS currently has weather normalization adjustment ("WNA") clauses in effect for the existing CTSA, the existing GCSA, and for the City of Beaumont. In this statement of intent, TGS proposes a WNA clause that will be applicable to the proposed CGSA. Revenue collected or refunded through the WNA clause is adjusted each month to offset the impacts of abnormal weather on customers' bills and Company revenues. The Company's test year cost of service calculation includes an adjustment for the proposed CGSA to reflect revenues that would have been expected if weather had been normal. In effect, this causes the WNA to be counted twice in the calculation of the Company's revenue requirement. To avoid this redundancy, it is necessary to remove the revenue recognized through the WNA clause during the test year. This is accomplished through the adjustment of \$376,216 on line 4 of Schedule G-2.

Q. PLEASE EXPLAIN A HEATING DEGREE DAY.

7

14

15

16

17

18

19

20

21

22

23

24

A.

A.

A heating degree day ("HDD") is defined as the number of degrees that a day's average temperature is below 65 degrees Fahrenheit. It is calculated by comparing the average of the high and low temperature on a given day with 65 degrees, the outside temperature above which a building needs no heating. If the average for that day is less than 65 degrees, the resulting HDD for the given day is the

on Day X was 70 and the low temperature was 56, then the average temperature would be 63 ((70+56)/2) and would result in two HDDs on Day X. If the average was equal to or greater than 65, there would be no HDDs for that day. HDDs are used in determining the demand for gas that is based on the weather and to adjust actual gas usage to normal weather.

7 Q. HOW IS "NORMAL" WEATHER DEFINED?

A.

A.

Weather varies seasonally and daily. Seasonal weather patterns generally result in an expected temperature range. Within each season, there are daily variations within the expected, or "normal," range. The goal of normalizing weather is to capture the average of these variations in a way that reflects the most relevant weather experienced over a period that is sufficiently long to smooth out variations caused by extreme or unusual weather in a year. Consistent with the practice in its other service areas, TGS uses an average of daily weather calculated over a tenyear period to derive normal HDDs. In this case, "normal" weather is calculated by averaging daily HDDs over a ten-year period ending June 30, 2019.

17 Q. WHY WAS A PERIOD OF TEN YEARS SELECTED?

A ten-year period is consistent with what has been approved in the Company's other service areas pursuant to Railroad Commission of Texas ("Commission") orders issued in Gas Utilities Docket ("GUD") No. 10506, which was fully litigated, and GUD Nos. 9988, 10488, 10526, 10656, 10739 and 10766, pursuant to settlement. It is also consistent with the practice of other Texas gas utilities and Commission

decisions² and has been found reasonable and precluded from further litigation in prior proceedings.³

Q. PLEASE EXPLAIN HOW THE WNA SHOWN ON LINE 5 OF SCHEDULE G-2 WAS DEVELOPED.

The adjustment on line 5 of Schedule G-2 is required to weather normalize revenues. The analysis for the proposed CGSA was developed based on data from four weather stations: (1) Austin Camp Mabry ("KATT"); (2) San Antonio International Airport ("KSAT"); (3) Galveston, Scholes Field ("KGLS"); and (4) Beaumont/Port Arthur Southeast Texas Regional Airport ("KBPT"). A separate analysis is conducted for each customer class in the proposed CGSA to reflect usage patterns and to price adjustments at the appropriate tariffed rates. By analyzing the relationship between monthly average usage per customer for a class and actual HDDs for the month using regression analysis, an estimated usage per customer per HDD was developed for each class. This value was then used to develop the weather adjustment for each billing cycle by multiplying the estimated usage per customer per HDD by the difference between normal HDDs and actual HDDs. The result was then multiplied by the number of customers in the billing cycle to yield the total adjustment volumes. The resulting volumes were used to normalize usage in each billing cycle of the test year. This analysis is consistent with that used by

14

15

16

17

18

19

A.

² See, e.g., Statement of Intent filed by Atmos Energy Corp., to Increase Gas Utility Rates Within the Unincorporated Areas Served by the Atmos Energy Corp., Mid-Tex Division, GUD No. 10170 (Dec. 4, 2012).
³ Statement of Intent filed by CenterPoint Energy Resources Corp., d/b/a CenterPoint Energy Entex and CenterPoint Energy Texas Gas to Increase Rates on a Division Wide Basis in the Beaumont/East Texas Division, GUD No. 10182, Examiners' Letter 18 (Sept. 17, 2012) ("The company's use of the last 10 years to establish normal weather for purposes of normalizing revenues and billing determinants [sic] not be relitigated in this proceeding.").

TGS in prior rate cases.⁴ This volume adjustment was then priced at the test year tariff rates to yield the revenue adjustment, a \$(745,492) decrease to test year base sales revenues, as shown on line 5 of Schedule G-2. This adjustment decreases base sales revenues in recognition of the fact that the volumes and resulting revenues for weather stations KATT and KSAT were abnormally high because temperatures in the test year period were 13 percent colder than normal, partially offset by lower than normal volumes and revenues for weather stations KGLS and KBPT due to temperatures which were 6 percent warmer than normal. On a volume weighted basis among the four weather stations, weather was approximately 11 percent colder than normal during the test year. By adjusting sales volumes downward to reflect normal weather conditions in the proposed combined service area and applying these volumes to existing rates, the resulting adjusted revenue reflects the level of revenues reasonably anticipated to be collected under normal weather conditions. The weather normalized sales volumes are also used by Company witness Paul H. Raab to develop proposed rates that are reasonably anticipated to collect the proposed revenue requirement.

17 Q. PLEASE EXPLAIN THE REVENUE ADJUSTMENT SHOWN ON LINE 6 18 OF SCHEDULE G-2.

19 A. The adjustment on line 6 of Schedule G-2 increases base sales revenue by \$4,688 20 to account for the net effect of revenues gained or lost from commercial, industrial, 21 and public authority customers in the proposed CGSA that switched between gas

Area in GUD No. 10766.

| 1 | | sales and transportation service during the test year. Because the customers' switch |

Q. PLEASE EXPLAIN THE CUSTOMER GROWTH (LOSS) ADJUSTMENT ON LINE 7 OF SCHEDULE G-2.

A.

To account for customer growth or loss, the Company includes an adjustment to quantify customer growth/loss patterns and adjusts customer counts accordingly. For each customer class within the proposed CGSA, this adjustment annualizes the growth (or loss) in customers that occurred during the twelve months ended June 30, 2019 by adjusting bill counts and volumes in each month of the test year to reflect the levels observed at the end of the test year. This adjustment is necessary to ensure that test year revenues accurately reflect the number of customers served when new rates take effect.

The adjustment is calculated by multiplying the change in customer bill counts by the normal monthly per customer usage for each class to yield the adjustment volumes. This volume adjustment and the changes to bill counts were then priced at the test year tariff rates for each customer class to yield the revenue adjustment. The change in customers as of June 30, 2019, was calculated by comparing the number of active customers at June 30, 2018, to the number of active customers at June 30, 2019. The adjustment shown on line 7 on Schedule G-2 annualizes the growth in the proposed CGSA in the amount of \$369,076.

| 1 | Q. | PLEASE EXPLAIN THE POST-TEST-YEAR CUSTOMER GROWTH |
|----|----|--|
| 2 | | REVENUE ADJUSTMENT ON LINE 8 OF SCHEDULE G-2. |
| 3 | A. | This adjustment calculates post-test-year growth through September 30, 2019, for |
| 4 | | the proposed CGSA assuming a growth rate equal to that experienced during the |
| 5 | | test year. This adjustment was made to be consistent with the Company's proposed |
| 6 | | known and measurable adjustment to plant to include capital expenditures for |
| 7 | | projects that were placed into service by September 30, 2019. The overall increase |
| 8 | | to base sales revenue is \$92,591 as shown on line 8 of Schedule G-2. |
| 9 | Q. | PLEASE EXPLAIN THE REVENUE ADJUSTMENT ON LINE 9 OF |
| 10 | | SCHEDULE G-2. |
| 11 | A. | On June 3, 2019, TGS implemented an interim rate adjustment (also known as a |
| 12 | | "GRIP" adjustment) in the City of Austin, and on June 14, 2019, the GRIP |
| 13 | | adjustment was implemented for the remaining incorporated areas and environs of |
| 14 | | the CTSA. The annualization of this revenue impact over the entire test year results |
| 15 | | in a \$5,074,960 increase to base sales revenues. Additionally, on September 26, |
| 16 | | 2019, TGS implemented a GRIP adjustment for the environs areas of the GCSA, |
| 17 | | which when annualized for the test year results in a \$5,346 increase to base sales |
| 18 | | revenues. The combined impact for the proposed CGSA is a \$5,080,306 increase |
| 19 | | to base sales revenues. |
| 20 | Q. | PLEASE EXPLAIN THE REVENUE ADJUSTMENT ON LINE 10 OF |
| 21 | | SCHEDULE G-2. |
| 22 | A. | On July 29, 2019, TGS implemented a Cost of Service Adjustment ("COSA") for |
| 23 | | the incorporated areas of the GCSA. The annualization of this revenue impact over |
| 24 | | the entire test year results in a \$138.315 increase to base sales revenues. |

| 1 | Q. | PLEASE EXPLAIN THE REVENUE ADJUSTMENT ON LINE 11 OF |
|----|----|---|
| 2 | | SCHEDULE G-2. |
| 3 | A. | This adjustment addresses revenue associated with unmetered gas service for public |
| 4 | | street lighting. As noted by Company witness Christy M. Bell, TGS is proposing |
| 5 | | a tariff for unmetered street lighting in the proposed CGSA. If the proposed tariff |
| 6 | | is approved, the test year revenue will be increased by \$2,655 as shown on line 11 |
| 7 | | of Schedule G-2 to account for 66 existing unmetered gas street lamps in the City |
| 8 | | of Galveston. |
| 9 | Q. | WHAT IS THE NET IMPACT OF THE PREVIOUSLY DISCUSSED |
| 10 | | ADJUSTMENTS TO GAS SALES REVENUES? |
| 11 | A. | The total adjustment to base revenues attributable to Gas Sales revenues is an |
| 12 | | increase of \$5,318,354, as shown on line 12 of Schedule G-2. This results in a total |
| 13 | | Base Sales Revenue amount, as adjusted, of \$96,912,395 as shown on line 13 of |
| 14 | | Schedule G-2. |
| 15 | Q. | PLEASE EXPLAIN TRANSPORTATION REVENUE AS SHOWN ON |
| 16 | | LINE 1 OF SCHEDULE G-3. |
| 17 | A. | The revenue on line 1 reflects the per-books revenue collected from transportation |
| 18 | | customers during the test year. |
| 19 | Q. | PLEASE EXPLAIN THE ADJUSTMENT TO TRANSPORTATION |
| 20 | | REVENUE ON LINE 2 OF SCHEDULE G-3. |
| 21 | A. | Transportation customers are not billed until shortly after the billing system closes |
| 22 | | for the month. As a result, transportation revenue must be estimated each month |
| 23 | | and those estimates are reversed out in the following month when actual revenue is |
| 24 | | recorded on the Company's books. Removing these estimates restores |

| 1 | | transportation revenues to the actual amount billed during the test year, which |
|----|----|--|
| 2 | | increases transportation revenues by \$1,652. |
| 3 | Q. | PLEASE EXPLAIN THE ADJUSTMENT TO NORMAL WEATHER ON |
| 4 | | LINE 3 OF SCHEDULE G-3. |
| 5 | A. | As previously described, this adjustment decreases transportation revenue in |
| 6 | | recognition of the fact that the net volumes and resulting net revenues in the |
| 7 | | Company's proposed CGSA were abnormally high because temperatures during |
| 8 | | the test year were colder than normal. This adjustment decreases transportation |
| 9 | | revenue by \$(79,118). |
| 10 | Q. | PLEASE EXPLAIN THE ADJUSTMENT TO TRANSPORTATION |
| 11 | | REVENUE ON LINE 4 OF SCHEDULE G-3. |
| 12 | A. | Line 4 reflects a revenue adjustment of \$(6,650) to annualize the net effect of |
| 13 | | revenue lost or collected from transportation customers that switched to or from gas |
| 14 | | sales service during the test year. As noted above, the Company is making a similar |
| 15 | | adjustment to gas sales service revenues to reflect the movement of these customers |
| 16 | | to or from transportation service. Because the customers' switch between gas sales |
| 17 | | and transportation service has already occurred, normalizing test year revenues for |
| 18 | | this known and measurable adjustment is reasonable and appropriate. |
| 19 | Q. | PLEASE EXPLAIN THE ADJUSTMENT TO TRANSPORTATION |
| 20 | | REVENUE ON LINE 5 OF SCHEDULE G-3. |
| 21 | A. | The adjustment on line 5 of Schedule G-3 addresses potential changes to TGS |
| 22 | | transportation revenues as a result of the recent acquisition that created ONE Gas |
| 23 | | Pipeline Company. The adjustment increases transportation revenues by \$323,289 |

| 1 | Q. | PLEASE EXPLAIN THE ADJUSTMENT TO TRANSPORTATION |
|----|----|--|
| 2 | | REVENUE ON LINE 6 OF SCHEDULE G-3. |
| 3 | A. | The adjustment on line 6 of Schedule G-3 increases transportation revenue by |
| 4 | | \$4,062 to annualize the impact of a new public authority transportation customer |
| 5 | | that began service during the test year. |
| 6 | Q. | PLEASE EXPLAIN THE ADJUSTMENT TO TRANSPORTATION |
| 7 | | REVENUE ON LINE 7 OF SCHEDULE G-3. |
| 8 | A. | The adjustment on line 7 of Schedule G-3 decreases base transportation revenue by |
| 9 | | \$(14,342) and removes the revenue of commercial, public authority, and public |
| 10 | | school space heating transportation customers that terminated service during the |
| 11 | | test year. |
| 12 | Q. | PLEASE EXPLAIN THE ADJUSTMENT TO TRANSPORTATION |
| 13 | | REVENUE ON LINE 8 OF SCHEDULE G-3. |
| 14 | A. | As previously discussed, TGS implemented an interim GRIP adjustment in the |
| 15 | | incorporated and environs areas of the CTSA, as well as the environs areas of the |
| 16 | | GCSA during the test year. In order to recognize the annualized revenue impact of |
| 17 | | the implementation of these GRIP adjustments, \$127,541 has been added to |
| 18 | | transportation revenues. |
| 19 | Q. | PLEASE EXPLAIN THE ADJUSTMENT TO TRANSPORTATION |
| 20 | | REVENUE ON LINE 8 OF SCHEDULE G-3. |
| 21 | A. | As previously discussed, TGS implemented a COSA during the test year for the |
| 22 | | incorporated areas of the GCSA. In order to recognize the annualized impact of the |
| 23 | | implementation of the COSA, \$1,441 has been added to transportation revenues. |

| 1 | Q. | WHAT IS THE NET IMPACT OF THE ADJUSTMENTS TO |
|----|----|---|
| 2 | | TRANSPORTATION REVENUES ON SCHEDULE G-3? |
| 3 | A. | The total adjustment to transportation revenues is an increase of \$357,875, as |
| 4 | | shown on line 10 of Schedule G-3. |
| 5 | Q. | PLEASE EXPLAIN THE ADJUSTMENT TO SERVICE FEES ON LINE 13 |
| 6 | | OF SCHEDULE G-3. |
| 7 | A. | Line 13 of Schedule G-3 reflects the revenue impact of adding and changing service |
| 8 | | fees in the proposed CGSA. As described in the direct testimony of Ms. Bell, these |
| 9 | | changes will increase certain service fees and decrease other fees. These changes |
| 10 | | will have the effect of increasing the revenues the Company would otherwise |
| 11 | | recover under its existing service fees. To account for these changes, an increase |
| 12 | | of \$277,029 to test year revenues is included on line 13 of Schedule G-3. |
| 13 | Q. | WHAT IS INCLUDED ON LINE 15 OF SCHEDULE G-3? |
| 14 | A. | Line 15 presents Other Utility Revenue, which includes revenue accrued for interest |
| 15 | | on storage gas and insurance reimbursements related to the damage from Hurricane |
| 16 | | Harvey. |
| 17 | Q. | PLEASE EXPLAIN THE ADJUSTMENT ON LINE 16 OF SCHEDULE G-3. |
| 18 | A. | Interest on storage gas is recovered through a gas cost recovery mechanism rather |
| 19 | | than via base rates. Therefore, it is not part of the Company's revenue requirement |
| 20 | | and is removed from this filing. This results in a \$347,618 decrease to revenues. |
| 21 | Q. | PLEASE EXPLAIN THE ADJUSTMENT ON LINE 17 OF SCHEDULE G-3. |
| 22 | A. | Line 17 of Schedule G-3 reflects a decrease to test year revenues of \$61,878 to |
| 23 | | remove insurance reimbursements related to the loss of revenues as a result of |

- 1 Hurricane Harvey. Because this revenue is non-recurring in nature it has been
- excluded.
- 3 Q. WHAT IS THE TOTAL TRANSPORTATION, SERVICE FEES AND
- 4 OTHER UTILITY REVENUE AS ADJUSTED?
- 5 A. As shown on line 19 of Schedule G-3, the total amount as adjusted is \$12,091,812.
- 6 Q. DOES THIS CONCLUDE YOUR DIRECT TESTIMONY?
- 7 A. Yes, it does.

AFFIDAVIT OF JANET BUCHANAN

BEFORE ME, the undersigned authority, on this day personally appeared Stacey McTaggart who having been placed under oath by me did depose as follows:

- 1. "My name is Janet Buchanan. I am over the age of eighteen (18) and fully competent to make this affidavit. I am employed as Director of the Rates and Regulatory Reporting, Kansas Gas Service, a division of ONE Gas, Inc. The facts stated herein are true and correct based upon my personal knowledge.
- 2. I have prepared the foregoing Direct Testimony and the information contained in this document is true and correct to the best of my knowledge."

Further affiant sayeth not.

Janet Buchanan

SUBSCRIBED AND SWORN TO BEFORE ME by the said Janet Buchanan on this 24th day of December, 2019

Notary Public in and for the State of Kansas

| 1 | | DIRECT TESTIMONY OF GRACIE GUERRA |
|----|----|---|
| 2 | | I. <u>INTRODUCTION AND QUALIFICATIONS</u> |
| 3 | Q. | PLEASE STATE YOUR NAME AND BUSINESS ADDRESS. |
| 4 | A. | My name is Gracie Guerra and my business address is 1301 South MoPac |
| 5 | | Expressway, Suite 400, Austin, Texas 78746. |
| 6 | Q. | BY WHOM ARE YOU EMPLOYED? |
| 7 | A. | I am a Rate Analyst II for Texas Gas Service Company ("TGS" or the "Company"). |
| 8 | | which is a Division of ONE Gas, Inc. ("ONE Gas"). |
| 9 | Q. | PLEASE DESCRIBE YOUR EDUCATIONAL BACKGROUND AND |
| 10 | | PROFESSIONAL EXPERIENCE. |
| 11 | A. | I received a Bachelor of Business Administration with a major in Accounting from |
| 12 | | Texas A&M University-Kingsville in 2004. I began my career with TGS in |
| 13 | | September 2017 as a Rate Analyst I. Prior to my employment with TGS, I was a |
| 14 | | Staff Accountant for Cheryl Janner, CPA in Bryan, Texas from August 2006 to |
| 15 | | April 2010 and as a Shared Services Lead at Cabela's Inc., in December 2009 until |
| 16 | | September 2017. From August 2004 to August 2006, I worked as an Assistan |
| 17 | | Manager for Security Finance, Inc. |
| 18 | Q. | HAVE YOU PREVIOUSLY TESTIFIED BEFORE ANY REGULATORY |
| 19 | | COMMISSIONS? |
| 20 | A. | Yes, I provided written testimony in Gas Utilities Docket ("GUD") No. 10766 |
| 21 | | before the Railroad Commission of Texas ("Commission"). |
| 22 | Q. | WAS THIS TESTIMONY PREPARED BY YOU OR UNDER YOUR |
| 23 | | DIRECT SUPERVISION? |
| 24 | Α | Yes it was |

1 Q. WHAT IS THE PURPOSE OF YOUR TESTIMONY?

A. My testimony summarizes the Direct costs attributed to the proposed Central-Gulf

Service Area ("CGSA") in the Company's cost of service calculation that

demonstrate the Company's need for a rate change in the proposed CGSA. I also

describe the portion of the Company's requested rate base amounts related to

proposed CGSA Direct costs. Company witness Mindy R. Edwards supports TGS

Division and Corporate rate base adjustments in her direct testimony.

8 Q. WHAT SCHEDULES ARE YOU SPONSORING?

9 A. I am sponsoring or co-sponsoring the following schedules:

| RATE BASE: | |
|------------------------------------|---|
| Schedule A (Revenue Requirement) | Sponsoring |
| Schedule B (Rate Base) | Co-Sponsor with Ms. Mindy R. Edwards |
| Schedule B-1 M&S | Sponsoring |
| Schedule B-3 8.209 Reg Asset | Sponsoring |
| Schedule B-4 Pens-OPEB Reg Asset | Sponsoring |
| Schedule B-5 Prepaid Pension Asset | Co-Sponsor with Cyndi King |
| Schedule B-6 CWC | Co-Sponsor with Timothy S. Lyons |
| Schedule B-7 Deposits | Sponsoring |
| Schedule B-8 Advances | Sponsoring |
| Schedule B-9 ADIT | Co-Sponsor with Janet M. Simpson |
| Schedule C-1 (CCNC) | Co-Sponsor with Ms. Mindy R. Edwards |
| Schedule C (Plant) | Co-Sponsor with Ms. Mindy R. Edwards and Ms. Allison N. Edwards |
| Schedule D (Reserves) | Co-Sponsor with Ms. Mindy R. Edwards |
| Schedule F (Federal Income Tax) | Sponsoring |

Direct Testimony of Gracie Guerra Texas Gas Service Company, a Division of ONE Gas, Inc.

| 1 | The schedules that I address in my testimony are for the Company's proposed |
|---|--|
| 2 | CGSA. In addition to schedules that reflect the Company's requested consolidation |
| 3 | for the CGSA, TGS is also providing stand-alone schedules for the Central Texas |
| 4 | and Gulf Coast Service Areas ("CTSA" and "GCSA"). The cost of service |
| 5 | information for customers within the City of Beaumont is included in and a part of |
| 6 | the GCSA. |

7 Q. WERE THESE SCHEDULES PREPARED BY YOU OR UNDER YOUR 8 DIRECT SUPERVISION?

9 A. Yes, they were.

FOR THE PROPOSED CGSA?

20

21

A.

II. OVERVIEW OF COST OF SERVICE CALCULATION

Q. HOW DID THE COMPANY CALCULATE THE REQUESTED RATES

In calculating the requested rates, the Company used the cost of providing service to the entire proposed CGSA so that rates within each customer class in the incorporated and unincorporated areas will be consistent across the combined service area. Exhibit G to the Statement of Intent contains the cost of service schedules that, taken together, show the calculation of the Company's revenue requirement in the proposed CGSA. The Company's methodology in this Statement of Intent for determining the total cost of service, including the component parts I address below, and resulting rate recovery request is consistent with the methodology the Company has used in prior statements of intent.¹

¹ Statement of Intent of Texas Gas Service Company, a Division of ONE Gas, Inc., to Increase Gas Utility Rates Within the Unincorporated Areas of the Galveston Service Area (GSA) and South Jefferson County

| 1 | Q. | WHAT TEST YEAR DID TGS USE TO CALCULATE THE REVENUE |
|----|----|---|
| 2 | | REQUIREMENT FOR THIS STATEMENT OF INTENT? |
| 3 | A. | The Company calculated its revenue requirement based on the twelve-month period |
| 4 | | ending June 30, 2019, adjusted for certain known and measurable changes through |
| 5 | | September 30, 2019. |
| 6 | Q. | ARE THE COSTS REFLECTED IN SCHEDULE A AND INCLUDED IN |
| 7 | | THE COMPANY'S REVENUE REQUIREMENT REASONABLE AND |
| 8 | | NECESSARY? |
| 9 | A. | Yes, the proposed revenue requirement reflects costs that are reasonable and |
| 10 | | necessary to provide safe and reliable service and operation of the Company's |
| 11 | | system within the proposed CGSA as demonstrated by the schedules included with |
| 12 | | the Statement of Intent, the supporting testimony and workpapers. |
| 13 | Q. | PLEASE SUMMARIZE THE CALCULATION OF THE COMPANY'S |
| 14 | | REVENUE REQUIREMENT, AS SET FORTH IN SCHEDULE A. |
| 15 | A. | Schedule A summarizes the results of the calculations detailed in other schedules |
| 16 | | contained within this Statement of Intent. For example, adjusted rate base, as |
| 17 | | calculated in Schedule B, is multiplied by the rate of return, calculated in Schedule |
| | | |

Service Area (SJCSA), GUD No. 10488, Final Order (May 3, 2016); Statement of Intent of Texas Gas Service Company, a Division of ONE Gas, Inc., to Increase Gas Utility Rates Within the Unincorporated Areas of the El Paso Service Area (EPSA), Permian Service Area (PSA), and Dell City Service Area (DCSA), GUD No. 10506, consol., Final Order (Sept. 27, 2016); Statement of Intent of Texas Gas Service Company (TGS), a Division of ONE Gas, Inc., to Change Gas Utility Rates Within the Unincorporated Areas of the Central Texas Service Area (CTSA) and South Texas Service Area (STSA), GUD No. 10526, Final Order (Nov. 15, 2016); Statement of Intent of Texas Gas Service Company, a Division of ONE Gas, Inc., to Increase Gas Utility Rates Within the Unincorporated Areas of the Rio Grande Valley Service Area, GUD No. 10656, Final Order (March 20, 2018); Statement of Intent of Texas Gas Service, a Division of ONE Gas, Inc., to Increase Gas Utility Rates Within the Unincorporated Areas of the North Texas Service Area, GUD No. 10739, Final Order (June 20, 2018); Statement of Intent of Texas Gas Service, a Division of ONE Gas, Inc., to Increase Gas Utility Rates Within the Unincorporated Areas of the Borger Skellytown Service Area, GUD No. 10766 (Feb. 5, 2019).

E, to derive the required return of \$37,529,690. Likewise, when federal income taxes from Schedule F and adjusted expenses from Schedule G are added to the required return, the result is an overall revenue requirement, (before gross-up for additional uncollectible expense) of \$125,831,431. A comparison of this revenue requirement to adjusted revenues, from Schedule G, demonstrates that the Company's current rates in the proposed CGSA produce a level of revenues that is \$16,827,224 lower (before gross-up for additional uncollectible expense and Texas franchise tax) than the Company's cost of providing service in the proposed CGSA. After gross-up for additional uncollectible expense and Texas franchise tax, the revenue deficiency on a system-wide basis within the proposed CGSA is \$17,046,666.

III. RATE BASE

Q. WHAT IS RATE BASE?

- A. Rate base represents the Company's invested capital that is used and useful in providing safe and reliable gas utility service to its customers. Rate base is used to calculate the return component of the Company's cost of service. The Company's rate base is summarized on Schedule B and is classified into three components: (1) Net Plant in Service; (2) Other Rate Base Items; and (3) Non-Investor Supplied Funds.
- 20 A. Net Plant in Service

21 Q. WHAT IS NET PLANT IN SERVICE AND HOW IS IT CALCULATED?

A. Plant in Service refers to the Company's investment in the infrastructure necessary to provide safe and reliable service within the proposed CGSA. Gross Plant in Service includes the original cost of any intangible, transmission, distribution and

general plant. In addition to Gross Plant in Service, the Company has also included 2 utility plant assets that are functionally in service but the related costs have not yet 3 been transferred on the Company's books to the Plant in Service account (FERC Plant Account 101). Instead, this plant is shown as "construction completed not classified" and is often referred to as "CCNC." Net Plant in Service represents the 6 gross plant amount, plus CCNC, less accumulated depreciation.

7 PLEASE DESCRIBE CCNC IN GREATER DETAIL. 0.

1

4

5

8

9

10

11

12

13

14

15

16

17

18

19

20

21

22

23

A. CCNC represents utility plant that has been placed in service and is used and useful but, from an accounting perspective, the dollars associated with CCNC have not yet been transferred on the Company's books from the CCNC account (FERC Plant Account 106) to the Plant in Service account (FERC Plant Account 101). After a construction project is completed, there is typically an administrative delay in this accounting transfer. The Accounting Department must wait until all charges have been processed in order to transfer a project to FERC Account 101.

PLEASE DESCRIBE THE RELATIONSHIP BETWEEN CCNC AND Q. CONSTRUCTION WORK IN PROGRESS.

A. CCNC is different from Construction Work in Progress ("CWIP"). Title 16 Tex. Admin. Code 7.115(9) defines CWIP as funds expended by a gas utility which are irrevocably committed to construction projects not yet completed or placed into service. When funds are committed to a project, those funds are recorded in CWIP accounts. Once a project is placed in service, however, those funds will be classified as CCNC. Unlike CWIP dollars, which relate to projects that are not completed and are typically not included in rate base, the dollars in the CCNC

1 account relate to completed construction projects that are used and useful in the 2 provision of utility service.

3 Q. IS IT APPROPRIATE TO INCLUDE CCNC IN RATE BASE?

- 4 A. Yes. As I mentioned, CCNC represents utility plant that has been placed in service.

 5 From an accounting perspective, the dollars associated with the utility plant

 6 classified as CCNC have not yet been transferred to FERC Plant Account 101, the

 7 Plant in Service Account. As CCNC represents plant that is in service, it is

 8 appropriate for CCNC to be included in rate base. The Company's proposal for

 9 CCNC is consistent with the treatment of CCNC that has been approved in prior

 10 proceedings.²
- 11 Q. PLEASE EXPLAIN THE CALCULATION OF THE GROSS PLANT IN
 12 SERVICE AND CCNC BALANCES SHOWN ON SCHEDULE B.
 - A. The adjusted Gross Plant in Service balance of \$657,555,686 on Schedule B is the sum of the adjusted plant balances shown on Schedule C through the test year ended June 30, 2019, adjusted for certain known and measurable changes as of September 30, 2019 for: (1) Direct proposed CGSA plant; (2) the proposed CGSA's allocated portion of TGS Division plant balances, and (3) allocated ONE Gas corporate plant balances. The adjusted CCNC balance of \$80,305,627 on Schedule B is the sum of the adjusted CCNC balances shown on Schedule C-1 through the test year ended June 30, 2019, adjusted for certain known and measurable changes as of

Final Order; and GUD No. 10506, Final Order.

13

14

15

² Petition of the De Novo Review of the Denial of the Statements of Intent filed by Texas Gas Service Company by the Cities of El Paso, Anthony, Clint, Horizon City, Socorro, and Village of Vinton, Texas, GUD No. 9988, Final Order (Dec. 14, 2010); Statement of Intent of Texas Gas Service Company to Change Rates Within the Environs of the South Texas Service Area, GUD No. 10217, Final Order (Mar. 26, 2013); GUD No. 10488,

| 1 | | September 30, 2019 for: (1) Direct proposed CGSA balances; (2) the proposed | | | | | |
|----|----|--|--|--|--|--|--|
| 2 | | CGSA's allocated portion of TGS Division balances; and (3) allocated ONE Gas | | | | | |
| 3 | | Corporate CCNC balances. | | | | | |
| 4 | Q. | WILL CWIP BALANCES REMAIN IN THE COST OF SERVICE | | | | | |
| 5 | | CALCULATION? | | | | | |
| 6 | A. | No. The Company is not ultimately requesting the inclusion of CWIP in its cost of | | | | | |
| 7 | | service calculation. The Company included September 30, 2019 CWIP balances | | | | | |
| 8 | | as an adjustment to CCNC. TGS will true-up net plant to exclude any plant that is | | | | | |
| 9 | | not used and useful at December 31, 2019 and will provide the updated amounts of | | | | | |
| 10 | | plant in service, CCNC and accumulated reserves balances by February 14, 2020. | | | | | |
| 11 | Q. | PLEASE EXPLAIN HOW THE PER BOOK BALANCE OF PLANT IN | | | | | |
| 12 | | SERVICE WAS CALCULATED. | | | | | |
| 13 | A. | The Per Book Plant in Service balance as of June 30, 2019 of \$648,474,688 on | | | | | |
| 14 | | Schedule C (line 4) results from three component parts: (1) \$621,269,889, the per | | | | | |
| 15 | | book balance of proposed CGSA Direct Plant in Service; (2) \$2,231,250, the | | | | | |
| 16 | | proposed CGSA's allocated portion of TGS Division per book Plant in Service; and | | | | | |
| 17 | | (3) \$24,973,550, the proposed CGSA's allocated portion of ONE Gas Corporate | | | | | |
| 18 | | per book Plant in Service. Ms. Mindy Edwards sponsors the TGS Division and | | | | | |
| 19 | | ONE Gas Corporate amounts and the reasonableness of these amounts. | | | | | |
| 20 | Q. | DID THE COMPANY MAKE ANY ADJUSTMENTS TO THE PER BOOK | | | | | |
| 21 | | PLANT IN SERVICE BALANCES? | | | | | |
| 22 | A. | Yes, adjustments were made to the per book proposed CGSA Direct Plant in | | | | | |
| 23 | | Service balance to remove any plant additions, transfers or retirements mistakenly | | | | | |
| 24 | | coded to the proposed CGSA, and to remove plant that will retire once new | | | | | |

1 amortization rates are implemented. An adjustment to capitalized meal and hotel 2 costs was made as described in the testimony of Company witness Allison N. 3 Edwards. In addition, the Company included adjustments to add plant balances for ONE Gas Pipeline Company ("OPC") and post-test year plant through 4 5 September 30, 2019. The total amount of adjustments to the proposed CGSA 6 Direct per book Plant in Service balance equals \$11,586,707. The Company also 7 adjusted TGS Division and ONE Gas Corporate per book Plant in Service balances 8 as identified and sponsored by Ms. Mindy Edwards. 9 Q. PLEASE DESCRIBE THE ADDITION OF OPC PLANT BALANCES. 10 A. There are no test year per book costs related to OPC, but TGS has made known and measurable changes to adjusted test year costs for OPC related capital investment 11 12 which are reflected on Workpaper C.a. In addition, Company witnesses Shantel 13 Norman and Stacey L. McTaggart address issues related to OPC in their testimony. 14 Q. PLEASE EXPLAIN THE CALCULATION OF THE ADJUSTED TEST 15 YEAR PLANT IN SERVICE BALANCE AS SHOWN ON SCHEDULE C. 16 A. The adjusted Plant in Service balance of \$657,555,686 on Schedule C (line 4) 17 results from three components: (1) \$632,856,596, the adjusted proposed CGSA 18 Direct Plant in Service balance; (2) \$2,056,706, the proposed CGSA's allocated 19 portion of the adjusted TGS Division Plant in Service balance; and (3) \$22,642,384, 20 the proposed CGSA's allocated portion of the adjusted ONE Gas Corporate Plant

Corporate allocated amounts and their reasonableness.

in Service balance. Ms. Mindy Edwards sponsors the TGS Division and ONE Gas

21

| Q. | PLEASE EXPLAIN THE CALCULATION OF THE PER BOOK CCNC |
|----|--|
| | BALANCE ON SCHEDULE C-1. |
| A. | Similar to Plant in Service described above, the CCNC per book balance of |
| | \$60,337,698 on Schedule C-1 (line 4) results from two component parts at June 30, |
| | 2019: (1) \$59,925,068, the per book balance of proposed CGSA Direct CCNC; (2) |
| | \$13,102, the proposed CGSA's allocated portion of the adjusted TGS Division |
| | Plant in Service balance; and (3) \$399,529, the proposed CGSA's allocated portion |
| | of ONE Gas Corporate per book CCNC. Ms. Mindy Edwards sponsors and |
| | supports the reasonableness of the TGS Division and ONE Gas Corporate amounts. |
| Q. | WERE ANY ADJUSTMENTS MADE TO PER BOOK CCNC BALANCES? |
| A. | Yes, the Company removed capitalized meal and hotel expenses consistent with the |
| | adjustment discussed in Ms. Allison Edwards' testimony. In addition, as previously |
| | discussed, the Company included post-test year CCNC and CWIP at September 30, |
| | 2019. TGS will true-up net plant to exclude any plant that is not used and useful at |
| | December 31, 2019 and will provide updated amounts of plant in service, CCNC |
| | and accumulated reserves balances by February 14, 2020. The total adjustments to |
| | the proposed CGSA Direct per book CCNC balance equals \$14,842,596. |
| | Ms. Mindy Edwards explains and supports adjustments made to ONE Gas |
| | Corporate CCNC per book balances. |
| | A. Q. |

| 1 | Q. | HAS THE COMMISSION PREVIOUSLY APPROVED THE ADDITION OF | | | | |
|----|----|--|--|--|--|--|
| 2 | | KNOWN AND MEASURABLE PLANT PLACED IN SERVICE AFTER A | | | | |
| 3 | | TEST YEAR END? | | | | |
| 4 | A. | Yes, it has. The Commission approved the Company's inclusion of known and | | | | |
| 5 | | measurable additions to used and useful plant beyond the test year in GUD Nos. | | | | |
| 6 | | 9988, 10217, 10488, and 10506. | | | | |
| 7 | Q. | PLEASE EXPLAIN THE CALCULATION OF THE TEST YEAR | | | | |
| 8 | | ADJUSTED DEPRECIATION AND AMORTIZATION RESERVE | | | | |
| 9 | | BALANCE SHOWN ON SCHEDULE B. | | | | |
| 10 | A. | The calculation of the Test Year Adjusted Depreciation and Amortization Reserve | | | | |
| 11 | | balance that appears on Schedule B is summarized on Schedule D. The per book | | | | |
| 12 | | Accumulated Reserve balance as of June 30, 2019 of \$(187,235,275) on Schedule | | | | |
| 13 | | D contains: (1) \$(177,705,899), the per book proposed CGSA Direct Reserve | | | | |
| 14 | | balance; (2) \$(125,324), the proposed CGSA allocated portion of the TGS Division | | | | |
| 15 | | reserve balance; and (3) \$(9,404,053), the proposed CGSA allocated portion of the | | | | |
| 16 | | ONE Gas Corporate reserve balance. Adjustments were made to the per book | | | | |
| 17 | | proposed CGSA Direct Reserve balance to remove any plant additions, transfers or | | | | |
| 18 | | retirements mistakenly coded to the proposed CGSA, and to remove plant that will | | | | |
| 19 | | retire once new amortization rates are implemented. The Company also included | | | | |
| 20 | | an adjustment to add reserve balances for OPC through September 30, 2019. In | | | | |
| 21 | | addition, as previously discussed, the Company included post-test year reserves and | | | | |
| 22 | | Retirement Work in Progress (RWIP) at September 30, 2019. TGS will true-up net | | | | |
| 23 | | plant to exclude any plant that is not used and useful at December 31, 2019 and will | | | | |

24

provide updated amounts of plant in service, CCNC and accumulated reserves

1 balances by February 14, 2020. Finally, the Company has made two adjustments 2 to the Accumulated Reserve to account for the differences between the recorded 3 reserve and computed reserve calculated in Company witness Dr. Ronald E. White's 2015 and 2019 depreciation studies. The adjustment in relation to the 2015 4 5 depreciation study transferred reserve dollars from all TGS Direct depreciable 6 390.1 accounts to TGS Division amortizable accounts, so there is enough reserve 7 in the amortizable accounts for when those assets retire. A similar issue was 8 identified in Dr. White's 2019 depreciation study and a similar, proforma 9 adjustment has been made in this filing. Dr. White discusses the 2019 depreciation 10 study and 2019 reserve adjustment in his testimony and his Attachment REW-2. 11 Total adjustments to the proposed CGSA Direct per book reserves equal 12 \$4,778,322. Ms. Mindy Edwards explains and sponsors adjustments made to TGS 13 Division and ONE Gas Corporate per book reserve balances. 14 Q. REFERRING TO **SCHEDULE** В, **PLEASE** SUMMARIZE THE 15 COMPANY'S REQUEST REGARDING THE TEST YEAR ADJUSTED NET PLANT IN SERVICE BALANCE. 16 17 A. The total adjusted test year net Plant in Service balance shown on Schedule B is 18 \$555,678,548. This is the sum of the adjusted test year balances for Plant in Service 19 of \$657,555,686 plus CCNC of \$80,305,627 less Reserves of \$(182,182,765).

| 1 | Q. | IS ALL OF THE COMPANY'S ADJUSTED PLANT IN SERVICE | | | | |
|----|----|--|--|--|--|--|
| 2 | | INCLUDED IN THIS STATEMENT OF INTENT USED AND USEFUL IN | | | | |
| 3 | | PROVIDING SERVICE? | | | | |
| 4 | A. | Yes, all plant in service included in this Statement of Intent is used and useful in | | | | |
| 5 | | providing service as supported by my testimony and that of Ms. Mindy Edwards, | | | | |
| 6 | | Ms. Allison Edwards, Ms. McTaggart and Ms. Norman. | | | | |
| 7 | В. | Other Rate Base Items | | | | |
| 8 | Q. | WHAT ARE "OTHER RATE BASE ITEMS"? | | | | |
| 9 | A. | Other Rate Base Items are categories of investor-supplied funds that are necessary | | | | |
| 10 | | to fund the Company's day-to-day business. Because these funds come from the | | | | |
| 11 | | Company's shareholders, they are appropriately included in rate base. As reflected | | | | |
| 12 | | on Schedule B, "Other Rate Base Items" include: | | | | |
| 13 | | • Materials and Supplies Inventory; | | | | |
| 14 | | • Prepayments; | | | | |
| 15 | | Amounts deferred in accordance with Commission Rule 8.209; | | | | |
| 16 | | • Pension and Other Post Employment Benefits ("OPEB") Regulatory | | | | |
| 17 | | Asset; | | | | |
| 18 | | Prepaid Pension Asset; and | | | | |
| 19 | | • Cash Working Capital ("CWC"). | | | | |
| 20 | Q. | REFERRING TO SCHEDULE B, PLEASE EXPLAIN THE | | | | |
| 21 | | CALCULATION OF THE MATERIALS AND SUPPLIES INVENTORY | | | | |
| 22 | | BALANCE. | | | | |
| 23 | A. | The Materials and Supplies Inventory balance consists of the average monthly | | | | |
| 24 | | balances of proposed CGSA Direct Materials and Supplies Inventory and Stores | | | | |

| 1 | | Load. Consistent with: standard ratemaking practices; the methodology applied by | | | | | | |
|----|----|--|--|--|--|--|--|--|
| 2 | | the Company in GUD Nos. 10488, 10506, 10526, 10656, 10739 and 10766; and | | | | | | |
| 3 | | past Commission decisions, ³ a thirteen-month average was used and results in a | | | | | | |
| 4 | | \$4,272,141 balance to be included in rate base. ⁴ | | | | | | |
| 5 | Q. | WHY IS IT APPROPRIATE TO INCLUDE "STORES LOAD" AS PART OF | | | | | | |
| 6 | | THE "MATERIALS AND SUPPLIES INVENTORY" BALANCES | | | | | | |
| 7 | | INCORPORATED INTO RATE BASE? | | | | | | |
| 8 | A. | Overhead costs associated with materials management are accumulated in the | | | | | | |
| 9 | | Stores Load clearing account. When inventory dollars and Direct purchases are | | | | | | |
| 10 | | charged to expense accounts or to work orders, a portion of this accumulated | | | | | | |
| 11 | | materials management cost is charged to the same accounts. This additional cost | | | | | | |
| 12 | | relating to materials management overhead is referred to as "Stores Load." Because | | | | | | |
| 13 | | a portion of the Stores Load clearing account relates to the balance in the inventory | | | | | | |
| 14 | | account, it is appropriate to include an average of these amounts in rate base | | | | | | |
| 15 | | consistent with the inclusion of the average inventory balance. | | | | | | |
| 16 | Q. | WHAT AMOUNTS HAVE BEEN DEFERRED AND REFLECTED WITHIN | | | | | | |
| 17 | | RATE BASE IN ACCORDANCE WITH COMMISSION RULE 8.209? | | | | | | |
| 18 | A. | Schedule B, line 7, reflects the Company's deferred expenses associated with its | | | | | | |
| 19 | | Distribution Integrity Management Program ("DIMP") as of June 30, 2019. These | | | | | | |
| 20 | | amounts have been deferred in accordance with Commission Rule 8.209. Rule | | | | | | |

³ GUD No. 10488, Final Order; GUD No. 10506, Final Order; GUD No. 10526, Final Order; GUD No. 10656, Final Order; GUD No. 10739, Final Order; GUD No. 10766, Final Order; and *Statement of Intent Filed by Atmos Energy Corp.*, to Increase Gas Utility Rates Within the Unincorporated Areas Served by the Atmos Energy Corp., Mid-Tex Division, GUD No. 10170, Final Order at FoF 33 (Dec. 4, 2012) (stating that a 13-month average for materials and supplies was approved in GUD Nos. 9670, 9762, 9869, 10000, 10041,

10084, and 10085).

⁴ Please see Schedule B-1 for additional detail.

8.209(j) allows the operator of a gas distribution system to ". . . establish one or more regulatory asset accounts in which to record any expenses incurred by the operator in connection with the acquisition, installation or operation (including related depreciation) of facilities that are subject to the requirements of this section." Rule 8.209 sets out minimum requirements for development and implementation of a risk-based program for removal and replacement of distribution facilities. Rule 8.209(j) also allows each regulatory asset to include the ". . . interest on the balance in the designated distribution facility replacement accounts based on pretax cost of capital last approved for the utility by the Commission."

Pursuant to Rule 8.209, the Company began deferring these DIMP-related expenses on January 1, 2012. The amount associated with the Company's deferral for the proposed CGSA is \$528,827 ⁵ and includes monthly deferred DIMP expenses for the proposed CGSA from January 2019 through June 2019. Ms. Norman addresses the Company's DIMP-related activities in her direct testimony.

Q. HAVE THE COMPANY'S REGULATORS PREVIOUSLY AUTHORIZED TGS TO RECOVER DEFERRED AMOUNTS RELATED TO COMMISSION RULE 8.209?

20 A. Yes, the Commission has previously authorized TGS to recover deferred amounts 21 related to Rule 8.209 in multiple proceedings.⁶ In addition, the proposed CGSA

⁵ Please see Schedule B-3 for additional detail.

⁶ GUD No. 10488, Final Order; GUD No. 10506, Final Order; GUD No. 10526, Final Order; GUD No. 10656, Final Order; GUD No. 10739, Final Order; and GUD No. 10766, Final Order.

- cities, among other cities in other TGS service areas, have also approved the
 Company's request to recover deferred amounts related to Rule 8.209.⁷
- 3 Q. DID TGS FOLLOW THE SAME METHODOLOGY FOR CALCULATING
- 4 THE DEFERRED AMOUNTS ASSOCIATED WITH COMMISSION RULE
- 5 8.209 IN THIS STATEMENT OF INTENT AS IT HAS IN PRIOR FILINGS?
- 6 A. Yes, the Company has followed the same methodology.
- 7 Q. WHAT AMOUNT HAS BEEN INCLUDED IN RATE BASE FOR THE
 8 PENSION AND OPEB REGULATORY ASSET?
 - The Company has included \$1,704,879 for a Pension and OPEB regulatory asset. Texas Utilities Code \$104.059 states that if a gas utility establishes one or more reserve accounts for the purpose of tracking changes in the costs of pensions and OPEB, the gas utility shall periodically record in a reserve account any differences between the annual amount of pension and OPEB approved and included in the gas utility's then current rates and the annual amount of pension and OPEB costs as determined by actuarial studies. A shortage in a reserve account exists if the amount of pension and OPEB under Subsection (b)(1) is less than the amount determined under Subsection (b)(2). If the gas utility establishes reserve accounts for the costs of pensions and OPEB, the regulatory authority at a subsequent general rate proceeding shall add any shortage to the gas utility's rate base, with the shortage amortized over a reasonable time. In the most recent rate cases, in the GCSA and CTSA (GUD No. 10488 and GUD No. 10526, respectively), the

A.

⁷ In 2017, 2018 and 2019, the cities in the GCSA approved the recovery of Rule 8.209 amounts in the Company's Cost of Service Adjustment (COSA) filings.

⁸ Please see Schedule B-4 for additional detail.

| 1 | | Commission approved regulatory assets consistent with the statute, and ordered |
|----|----|--|
| 2 | | them to be amortized over six years. At the time the proposed rates go into effect, |
| 3 | | \$707,384 will remain unamortized from the regulatory assets in those two cases. |
| 4 | | In addition, since the rate cases mentioned above, consistent with the statute, the |
| 5 | | Company has recorded in a reserve account the difference between the annual |
| 6 | | amount of pension and OPEB approved and included in the Company's current |
| 7 | | rates and annual amount of costs of pension and OPEB as determined by actuarial |
| 8 | | or other similar studies. As of June 30, 2019, those deferrals total to \$997,496. The |
| 9 | | sum of these two equals the amount included in rate base. |
| 10 | Q. | WHAT AMOUNT HAS BEEN INCLUDED IN RATE BASE ASSOCIATED |
| 11 | | WITH A PREPAID PENSION ASSET? |
| 12 | A. | The Company has included a prepaid pension asset of \$23,340,745. This asset is |
| 13 | | included on Schedule B, line 9. Company witness Cyndi King addresses the |
| 14 | | prepaid pension asset in her direct testimony. |
| 15 | Q. | WHAT IS CASH WORKING CAPITAL? |
| 16 | A. | CWC is the cash flow required to finance the day-to-day operations of a business. |
| 17 | | Because business operations both generate and expend cash, CWC can be a net |
| 18 | | inflow or a net outflow to a company. Company witness Timothy S. Lyons |
| 19 | | calculated the CWC amount of a negative \$4,999,624 as shown on Schedule B, line |
| 20 | | 10 and supports the reasonableness of his calculation in his testimony. |
| 21 | C. | Non-Investor Supplied Capital |
| 22 | Q. | WHAT ARE NON-INVESTOR SUPPLIED FUNDS? |
| 23 | A. | Non-investor supplied funds represent capital available to the Company that does |
| 24 | | not originate from its shareholders. Because a rate of return is applied to the |

| | Company's rate base to determine the dollars needed to cover the Company's debt |
|-----------------|--|
| | service and provide an opportunity to earn a reasonable return, funds supplied on a |
| | cost-free basis by non-investors must be deducted in determining the Company's |
| | rate base. These amounts are shown on Schedule B. Specifically, Lines 11 and 12 |
| | are the balances at the test year end for customer deposits and customer advances, |
| | respectively. In addition, the Accumulated Deferred Income Taxes ("ADIT") |
| | balance shown on line 13 of Schedule B represents funds available to the Company |
| | as a result of lower current income tax expenses due to timing differences between |
| | book and taxable income. These funds are also deducted from the rate base |
| | calculation. Company witness Janet M. Simpson explains and sponsors the ADIT |
| | |
| | balance in her testimony. |
| Q. | balance in her testimony. PLEASE EXPLAIN THE AMOUNTS SHOWN ON SCHEDULE B FOR |
| Q. | |
| Q. | PLEASE EXPLAIN THE AMOUNTS SHOWN ON SCHEDULE B FOR |
| Q. A. | PLEASE EXPLAIN THE AMOUNTS SHOWN ON SCHEDULE B FOR THE BALANCES OF CUSTOMER DEPOSITS, CUSTOMER ADVANCES, |
| | PLEASE EXPLAIN THE AMOUNTS SHOWN ON SCHEDULE B FOR THE BALANCES OF CUSTOMER DEPOSITS, CUSTOMER ADVANCES, AND ADIT. |
| | PLEASE EXPLAIN THE AMOUNTS SHOWN ON SCHEDULE B FOR THE BALANCES OF CUSTOMER DEPOSITS, CUSTOMER ADVANCES, AND ADIT. The amounts reflected in Rate Base on Schedule B are equal to the proposed CGSA |
| | PLEASE EXPLAIN THE AMOUNTS SHOWN ON SCHEDULE B FOR THE BALANCES OF CUSTOMER DEPOSITS, CUSTOMER ADVANCES, AND ADIT. The amounts reflected in Rate Base on Schedule B are equal to the proposed CGSA per book balances of customer deposits and customer advances as of June 30, 2019, |
| | PLEASE EXPLAIN THE AMOUNTS SHOWN ON SCHEDULE B FOR THE BALANCES OF CUSTOMER DEPOSITS, CUSTOMER ADVANCES, AND ADIT. The amounts reflected in Rate Base on Schedule B are equal to the proposed CGSA per book balances of customer deposits and customer advances as of June 30, 2019, adjusted for certain known and measurable changes as of September 30, 2019. |
| | PLEASE EXPLAIN THE AMOUNTS SHOWN ON SCHEDULE B FOR THE BALANCES OF CUSTOMER DEPOSITS, CUSTOMER ADVANCES, AND ADIT. The amounts reflected in Rate Base on Schedule B are equal to the proposed CGSA per book balances of customer deposits and customer advances as of June 30, 2019, adjusted for certain known and measurable changes as of September 30, 2019. Customer Deposits (line 11) are \$(7,853,752). Customer Advances (line 12) are |

base.9

⁹ For additional support for customer deposits, customer advances and ADIT, please see Schedule B-7, Schedule B-8 and Schedule B-9, respectively.

| 1 | Q. | PLEASE SUMMARIZE THE COMPANY'S RATE BASE AS | | | | |
|----|---|---|--|--|--|--|
| 2 | | CALCULATED ON SCHEDULE B. | | | | |
| 3 | A. | The total rate base that is included in the cost of service calculation is \$473,468,036. | | | | |
| 4 | | This total amount includes all the component parts described above. Ms. Mindy | | | | |
| 5 | | Edwards' testimony provides details for Corporate and Division rate base items. | | | | |
| 6 | | IV. <u>FEDERAL INCOME TAX</u> | | | | |
| 7 | Q. | PLEASE EXPLAIN THE CALCULATION OF FEDERAL INCOME TAX | | | | |
| 8 | | EXPENSE AS SHOWN ON SCHEDULE F. | | | | |
| 9 | A. | Federal income tax expense is computed on Schedule F using the method outlined | | | | |
| 10 | | in the Commission's Natural Gas Rate Review Handbook. 10 This method | | | | |
| 11 | | calculates federal income tax expense by recognizing that the equity component of | | | | |
| 12 | | a total required return is comparable to after-tax net income, as reflected on the | | | | |
| 13 | | financial statements. This method first derives after-tax net income by subtracting | | | | |
| 14 | the interest expense on the long-term debt portion of return, from the total required | | | | | |
| 15 | | return. Because the resulting after-tax net income amount is, by definition, the | | | | |
| 16 | | amount that should result after the deduction of income taxes, it is necessary to | | | | |
| 17 | | "gross it up" by multiplying by a factor of 1/(1-tax rate). The resulting calculated | | | | |
| 18 | | before-tax net income number is then multiplied by the federal income tax rate to | | | | |
| 19 | | derive federal income tax expense. | | | | |
| 20 | | Before grossing up the "after tax income," however, it is necessary to | | | | |
| 21 | | eliminate the effect of items that represent Direct credits to federal income taxes | | | | |
| 22 | | and to eliminate the effect of items that may be appropriate for ratemaking purposes | | | | |

¹⁰ Commission Rate Review Handbook at 38-39 (Sept. 2017).

but are not allowable deductions on the Company's income tax return. The Company made an adjustment to the after tax income for the parking expense that is no longer tax deductible under the Tax Cuts and Jobs Act of 2017 (the "Act"). The specific mechanics of computing federal income tax expense using the Return Method are shown on Schedule F. The Company used a federal income tax rate of 21% to comply with the Act, which lowered the federal corporate tax rate from 35% to 21%. Ms. McTaggart, Ms. Simpson and Company witness Jeffrey J. Husen discuss issues related to the Act in their direct testimonies. The adjusted test year federal income tax expense included in the Company's revenue requirement is \$7,855,526.

Q. PLEASE DESCRIBE THE CHANGE TO THE DEDUCTIBILITY OF PARKING EXPENSES UNDER THE ACT.

As provided in IRS Notice 2018-99, ¹¹ the Act added Code Section 274(a)(4) precluding employers from deducting, for tax purposes, qualified transportation fringe benefits paid or incurred after December 31, 2017. Qualified transportation fringe benefits include van pools, transit passes, bicycle commuting and qualified parking. The test year expense attributable to the proposed CGSA associated with these transportation costs is \$140,742. This amount has been adjusted within the federal tax calculation on Schedule F-FIT, adding approximately \$38,000 to the revenue requirement.

.

A.

| 1 | Q. | ARE THE ADJUSTMENTS DISCUSSED IN YOUR TESTIMONY | | | | | | | |
|----|----|---|--|--|--|--|--|--|--|
| 2 | | NECESSARY TO CALCULATE A COST OF SERVICE THAT INCLUDES | | | | | | | |
| 3 | | ONLY THOSE AMOUNTS TO BE COLLECTED THROUGH BASE | | | | | | | |
| 4 | | RATES THAT ARE REASONABLE AND NECESSARY FOR PROVIDING | | | | | | | |
| 5 | | SERVICE TO CUSTOMERS IN THE PROPOSED CGSA? | | | | | | | |
| 6 | A. | Yes. These adjustments to the historical test year amounts are appropriate and | | | | | | | |
| 7 | | necessary to properly determine the Company's reasonable and necessary costs to | | | | | | | |
| 8 | | provide service to TGS's proposed CGSA customers, which are appropriately | | | | | | | |
| 9 | | recovered through base rates. | | | | | | | |
| 10 | Q. | HAS THE COMPANY CALCULATED THESE ADJUSTMENTS | | | | | | | |
| 11 | | CONSISTENT WITH PRIOR COMMISSION DECISIONS? | | | | | | | |
| 12 | A. | Yes. As I have indicated throughout my testimony, the Company has followed | | | | | | | |
| 13 | | applicable Commission decisions regarding the calculations of the adjustments | | | | | | | |
| 14 | | support in my testimony. | | | | | | | |
| 15 | Q. | DOES THIS CONCLUDE YOUR DIRECT TESTIMONY? | | | | | | | |
| 16 | Α | Yes it does | | | | | | | |

STATE OF TEXAS COUNTY OF TRAVIS

AFFIDAVIT OF GRACIE GUERRA

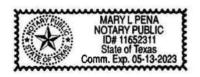

BEFORE ME, the undersigned authority, on this day personally appeared Gracie Guerra who having been placed under oath by me did depose as follows:

- 1. "My name is Gracie Guerra. I am over the age of eighteen (18) and fully competent to make this affidavit. I am employed as Rate Analyst II for Texas Gas Service Company, a division of ONE Gas, Inc. The facts stated herein are true and correct based upon my personal knowledge.
- 2. I have prepared the foregoing Direct Testimony and the information contained in this document is true and correct to the best of my knowledge."

Further affiant sayeth not.

Gracie Guerra

SUBSCRIBED AND SWORN TO BEFORE ME by the said Gracie Guerra on this 25th day of November, 2019.

| 1 | | DIRECT TESTIMONY OF MINDY R. EDWARDS |
|----|----|---|
| 2 | | I. <u>INTRODUCTION AND QUALIFICATIONS</u> |
| 3 | Q. | PLEASE STATE YOUR NAME AND BUSINESS ADDRESS. |
| 4 | A. | My name is Mindy R. Edwards, and my business address is 15 East Fifth Street, |
| 5 | | Tulsa, Oklahoma 74103. |
| 6 | Q. | BY WHOM ARE YOU EMPLOYED AND IN WHAT CAPACITY? |
| 7 | A. | I am employed by ONE Gas, Inc. ("ONE Gas") as a Rates Analyst. I am testifying |
| 8 | | on behalf of Texas Gas Service Company ("TGS" or the "Company"), which is a |
| 9 | | Division of ONE Gas. |
| 10 | Q. | PLEASE DESCRIBE YOUR EDUCATIONAL BACKGROUND AND |
| 11 | | PROFESSIONAL EXPERIENCE. |
| 12 | A. | I received a Bachelor of Science degree in Accounting with a minor in Economics |
| 13 | | from Oklahoma State University in 2013, and I am a licensed Certified Public |
| 14 | | Accountant in Oklahoma. I began my employment with ONE Gas on September |
| 15 | | 29, 2014 as an Accountant in the Financial Reporting Department. In February |
| 16 | | 2016, I began working in the Corporate Accounting Department while |
| 17 | | simultaneously fulfilling my duties in the Financial Reporting Department until |
| 18 | | July 2017. I began serving in my current position as a Rates Analyst in the Rates |
| 19 | | and Regulatory Department in August 2018. Prior to my employment at ONE Gas, |
| 20 | | I worked as an Audit Associate at BKD, LLP. from January to September 2014. |

| 1 | Q. | PLEASE DISCUSS YOUR DUTIES AND RESPONSIBILITIES AS A |
|----|----|---|
| 2 | | RATES ANALYST. |
| 3 | A. | My responsibilities include assisting the Divisions of ONE Gas, including TGS, |
| 4 | | with the review and analysis of company financial data and records and preparation |
| 5 | | of and participation in rate cases and other regulatory filings and related activities. |
| 6 | Q. | WAS THIS TESTIMONY PREPARED BY YOU OR UNDER YOUR |
| 7 | | DIRECT SUPERVISION? |
| 8 | A. | Yes, it was. |
| 9 | Q. | WHAT IS THE PURPOSE OF YOUR TESTIMONY? |
| 10 | A. | I support the reasonableness of certain rate base adjustments, including Corporate |
| 11 | | and Division capital investments and prepayments. I also support Corporate |
| 12 | | depreciation and amortization expense allocated to the proposed Central-Gulf |
| 13 | | Service Area ("CGSA"), which is a combination of the existing Central Texas and |
| 14 | | Gulf Coast Service Areas (CTSA and GCSA, respectively) and the City of |
| 15 | | Beaumont, Texas. |
| 16 | Q. | HOW DOES YOUR TESTIMONY RELATE TO OTHER COMPANY |
| 17 | | WITNESSES IN THE CASE? |
| 18 | A. | My testimony relates to Company witness Gracie Guerra as she supports the |
| 19 | | proposed CGSA Direct service area rate base adjustments whereas, I support |
| 20 | | allocated Corporate and TGS Division rate base adjustments and depreciation |
| 21 | | expense. Company witness Marie J. Michels supports the proposed CGSA Direct |
| 22 | | service area expense adjustments, and Company witnesses Anthony Brown and |
| 23 | | Allison N. Edwards address allocated expense adjustments. |

1 Q. WHAT SCHEDULES ARE YOU SPONSORING?

2 A. I am sponsoring or co-sponsoring the following schedules:

| RATE BASE: | |
|----------------------------|--|
| Schedule B (Rate Base) | Co-Sponsor with Ms. Guerra |
| Schedule B-2 (Prepays) | Sponsoring |
| Schedule C (Plant) | Co-Sponsor with Ms. Guerra and Ms. Allison Edwards |
| Schedule C-1 (CCNC) | Co-Sponsor with Ms. Guerra |
| Schedule D (Reserves) | Co-Sponsor with Ms. Guerra |
| OPERATING INCOME: | |
| Schedule G-15 (Depr Amort) | Co-Sponsor with Ms. Michels |

- The schedules I address in my testimony are for the Company's proposed CGSA.
- 4 In addition to schedules that reflect the Company's requested consolidation for the
- 5 CGSA, TGS is also providing stand-alone schedules for the CTSA and GCSA. The
- 6 cost of service for customers in the City of Beaumont, Texas is included in and a
- 7 part of the GCSA.
- 8 Q. WERE THESE SCHEDULES PREPARED BY YOU OR UNDER YOUR
- 9 **DIRECT SUPERVISION?**
- 10 A. Yes, they were.
- 11 Q. ARE YOU SPONSORING ANY EXHIBITS IN CONNECTION WITH
- 12 **YOUR TESTIMONY?**
- 13 A. Yes, I am sponsoring the exhibit listed under the table of contents.
- 14 O. ARE ANY OF THE COSTS THAT YOU SPONSOR ALLOCATED FROM
- 15 ONE GAS OR THE TGS DIVISION?
- 16 A. Yes. I support the Corporate and TGS Division capital investments, prepayments,
- and depreciation expenses relating to centralized services provided to ONE Gas'
- Operating Divisions or TGS service areas, including the proposed CGSA. These
- centralized services are provided more efficiently at the Corporate or Division level

1 and are considered "Shared Services" costs. Mr. Brown discusses in his testimony 2 the cost allocation methodology and supports the percentages used to allocate these 3 costs to the proposed CGSA.

II. RATE BASE ADJUSTMENTS

5 Q. WHAT IS RATE BASE?

4

7

11

14

15

16

17

18

19

20

21

A.

6 A. Rate base represents the Company's invested capital that is used and useful in providing safe and reliable gas utility service to its customers. The Company's rate 8 base is summarized on Schedule B and is classified into three components: (1) Net 9 Plant in Service; (2) Other Rate Base Items; and (3) Non-Investor Supplied Funds. 10 Ms. Guerra further discusses in her testimony Direct rate base and its three components.

12 WHY IS IT NECESSARY TO INCLUDE CORPORATE AND TGS 0. 13 **DIVISION INVESTMENTS IN RATE BASE?**

Corporate and TGS Division investment assets are necessary to the provision of utility service to TGS and the proposed CGSA but are not reflected in the proposed CGSA Direct costs; thus, an adjustment is necessary to include these investments in rate base to determine the revenue requirement. This is the same approach TGS has taken in prior statements of intent, which the Commission has previously approved in: Gas Utilities Docket ("GUD") Nos. 9770, 9988; TGS's last fully litigated rate case GUD No. 10506; and TGS's settled cases GUD Nos. 10488, 10526, 10656, 10739 and 10766.¹

¹ Appeal of Texas Gas Service Company from the Actions of the Cities of Lockhart, Luling, Cuero, Gonzales, Nixon, Shiner and Yoakum; and, Statement of Intent Filed to Increase Rates in the Unincorporated Areas of the South Texas Service Area, GUD No. 9770, Final Order at FoF 27 (Apr. 24, 2008); Petition of the De Novo Review of the Denial of the Statements of Intent Filed by Texas Gas Service Company by the Cities of

| 1 O . | WHICH | RATE BA | SE ITEMS 1 | DO YOU | ADDRESS? |
|--------------|-------|---------|------------|--------|-----------------|
|--------------|-------|---------|------------|--------|-----------------|

- A. I address the rate base items for capital costs that are allocated from ONE Gas or

 TGS Division to the proposed CGSA. These rate base items include prepayments,

 net plant in service, construction completed not classified ("CCNC"), and

 accumulated reserves for depreciation and amortization. Schedule B contains a

 summary of all Rate Base items.
- 7 Q. PLEASE DISCUSS THE RATE BASE ADJUSTMENTS ASSOCIATED
 8 WITH PREPAYMENTS.
 - A. Prepayments are a component of rate base and are defined as amounts paid for in advance of the goods or services being received in the future. ONE Gas and TGS Division prepayments allocated to the proposed CGSA represent advances for items such as: annual equipment and software maintenance agreement fees; software license fees; insurance policy premiums for general liability; automobile and workers' compensation; and other miscellaneous prepaid items. ONE Gas and TGS Division prepayments are: provided on Schedule B-2 and Workpapers B-2.a.1 and B-2.b.1; included in rate base because they reflect an investment ONE Gas and

at FoF 10 (Dec. 14, 2010); Statement of Intent of Texas Gas Service Company, a Division of ONE Gas, Inc., to Increase Gas Utility Rates Within the Unincorporated Areas of the Galveston Service Area (GSA) and South Jefferson County Service Area (SJCSA), GUD No. 10488, Final Order at FoF 46 (May 3, 2016); Statement of Intent of Texas Gas Service Company, a Division of ONE Gas, Inc., to Increase Gas Utility Rates Within the Unincorporated Areas of the El Paso Service Area (EPSA), Permian Service Area (PSA), and Dell City Service Area (DCSA), GUD No. 10506, consol., Final Order at FoF 110 (Sept. 27, 2016); Statement of Intent of Texas Gas Service Company (TGS), a Division of ONE Gas, Inc., to Change Gas Utility Rates Within the Unincorporated Areas of the Central Texas Service Area (CTSA) and South Texas Service Area (STSA), GUD No. 10526, Final Order at FoF 44 (Nov. 15, 2016); Statement of Intent of Texas Gas Service Company, a Division of ONE Gas, Inc., to Increase Gas Utility Rates Within the Unincorporated Areas of the Rio Grande Valley Service Area, GUD No. 10656, Final Order at FoF 39 (March 20, 2018); Statement of Intent of Texas Gas Service, a Division of ONE Gas, Inc., to Increase Gas Utility Rates Within the Unincorporated Areas of the North Texas Service Area, GUD No. 10739, Final Order at FoF 34 (Nov. 13, 2018); and Statement of Intent of Texas Gas Service, a Division of ONE Gas, Inc., to Change Gas Utility Rates Within the Unincorporated Areas of the Borger-Skellytown Service Area, GUD No. 10766, Final Order at FoF 33 (Feb. 5, 2019).

1 TGS made for the provision of utility service; and similar to the treatment of ONE 2 Gas and TGS Division capital investments. 3 Q. DO THE INVESTMENTS IN PREPAYMENTS DESCRIBED ABOVE 4 **INCLUDE ANY AFFILIATE COSTS?** 5 Α Yes. As discussed in the testimony of Company witness Mark W. Smith, ONE Gas 6 formed a wholly-owned captive insurance subsidiary, Utility Insurance Company 7 ("UIC"), in 2017 to provide insurance to ONE Gas and its Divisions. Some UIC 8 premiums are included in Corporate and TGS Division costs that are allocated to 9 the proposed CGSA. A complete list containing UIC premiums included in rate 10 base is attached to my testimony as Exhibit MRE-1. Company witness Stacey L. 11 McTaggart explains how these costs comply with the affiliate standard. 12 Q. HOW WERE THE PREPAYMENT AMOUNTS CALCULATED? 13 A. The prepayment balances were calculated by taking the average balance over 13 14 months, which allows TGS to normalize fluctuations in prepayment accounts 15 during the test year. The average 13-month balance was adjusted to: (1) remove 16 activity for which the Company is not seeking recovery; and (2) reflect 17 annualization of the cost allocation percentages for the third quarter of 2019. IS IT REASONABLE TO INCLUDE ONE GAS AND TGS PREPAYMENTS 18 Q. 19 AS PART OF THE CALCULATION OF THE COST OF SERVICE IN THIS 20 CASE? 21 Yes. Prepayments are required costs for services that are necessary for TGS to A. 22 operate safely, reliably, and efficiently. As such, prepayments are appropriately

1 included in rate base, and this is the same approach TGS has taken in prior 2 statements of intent, which the Commission has previously approved.² 3 NEXT, PLEASE EXPLAIN THE ONE GAS AND TGS DIVISION CAPITAL Q. 4 INVESTMENT, ALLOCATED TO THE PROPOSED CGSA, SHOWN ON 5 SCHEDULES C, C-1, AND D. 6 A. ONE Gas' net plant in service (gross plant less accumulated reserves), allocated 7 from Corporate to TGS, is \$40,234,170. The TGS Division net plant in service is 8 \$4,894,818. The proposed CGSA allocated share of these amounts is 46.4931%, 9 or \$20,981,866, based on the number of proposed CGSA customers relative to the 10 total number of TGS customers. Mr. Brown discusses in his testimony the cost 11 allocation methodology and supports the percentages used to allocate these 12 investments to the proposed CGSA. Net plant in service costs are shown on 13 Workpapers C.b, C.c, C-1.b, C-1.c, D.b, and D.c. 14 Q. DESCRIBE ANY SIGNIFICANT ONE GAS CAPITAL **PLEASE** 15 INVESTMENTS MADE DURING THE TEST YEAR AND REFLECTED ON SCHEDULES C AND C-1. 16 17 A. ONE Gas capital expenditures made during the test year and reflected on Schedules 18 C and C-1 primarily consist of investments in computer software and equipment and leasehold improvements. Examples of those investments include: 19 20 Replacement of existing routers, switches and wireless gear at company 21 work locations that have currently met end of life or do not meet the ONE 22 Gas standard to allow for proper support and manageability;

- 1 Carbon Black Endpoint Detection and Response ("EDR") was implemented 2 to allow ONE Gas to instantly disconnect ransomware or other malicious 3 threats from the computer systems on the corporate and Supervisory Control 4 and Data Acquisition network. EDR stops the spread of malware 5 throughout the network, while also mapping out what malicious services, files and communications were created and communicating with a 6 7 malicious Internet destination; 8 Skype for Business was implemented to reduce the cost of 9 telecommunication services across ONE Gas and its divisions by moving to 10 Voice Over Internet Protocol technology instead of using analog lines; 11 The Meter Management System upgrade will provide a method to track 12 meters and meter devices using bar codes and bar code readers which will 13 assist with the accuracy of meters and meter devices placed into inventory. 14 The upgrade will also allow ONE Gas to run reports containing information 15 about the meters and quality testing performed at the Meter Facility; 16 Consolidation of the ONE Gas leak survey practice in order to deploy a new integrated technology solution to unify ONE Gas leak survey business 17 functions from back-office planning to field survey completion. Integrated 18 19 technology solutions include: (1) LocusSurvey as the mobile application used in the field; (2) Android mobile phones as the mobile device used in 20 21 the field; (3) Necessary system integrations from the new mobile 22 application to the ONE Gas existing enterprise applications; and (4) 23 Compliance and operational reporting utilizing integrations between 24 Maximo, Geographical Information Systems, LocusSurvey, and Power 25 Business Intelligence ("BI"); 26 Utilization of predictive analytics to provide data science, data engineering, 27 and architect resources to demonstrate that a Machine Learning model can 28 accurately predict the cause of meter exceptions (e.g. misread, broken 29 meter, safety issue, etc.), and reduce the total number of exceptions that 30 must be manually processed each day; 31 Web and mobile enhancements that focus on design and development 32 activities for improving the customer experience while making online 33 payments and preparatory work to enable search and self-management of 34 website content. The primary goals of this project include system design 35 and application development for website and guest payment features and
 - Replacement of Data Center hardware with next generation units to ensure a secure, supportable and high-performing server infrastructure which will improve reliability and reduce downtime;

optimization of storage and retrieval of website content to prepare for future

search capabilities;

36

37

38

39

40

• Creation of a standardized rate change spreadsheet, rate comparison report,
and an automatic rate update application in order to mitigate human error
and incorrect customer billing. The intent of this project is to reduce the
complexity of the rate updating process relied on by ONE Gas Customer
Service business users, and to implement common processes and
applications, where possible, across all distribution segments;

A.

- LocusIQ implementation to document inspection activities and provide a statistical risk-based approach to managing the inspection program. This application is a cloud-based software with a mobile front-end; and
 - Enhancements to existing Customer Relationship Management ("CRM") business processes to support Information Technology ("IT") and Pipeline Safety Compliance departments. The changes include: preparation for the implementation of Enterprise Architecture integration efforts and preparation for integration of BI with CRM. These enhancements will provide common processes and applications across all distribution segments, while also treating each implementation individually when necessary.

18 Q. WERE THESE PROJECTS AND RELATED CAPITAL EXPENDITURES 19 PRUDENT, REASONABLE AND NECESSARILY INCURRED?

Yes, they were. IT provides critical services supporting all employees in their efforts to provide service safely and reliably to customers across ONE Gas' three states of operations, including the proposed CGSA. ONE Gas built these technology systems to provide the highest level of stability, reliability, and security. If a technology system becomes unavailable, operations may be impaired. Thus, it is necessary to provide reliable technology systems and infrastructure to minimize disruption to customers and employees, who provide either indirect support or direct service to customers, through leak detection, emergency response, customer billing, dispatching and scheduling of service calls, to protect sensitive customer information, enhance cybersecurity, and improve website functionality. Company witness Shantel Norman testifies regarding the overall reasonableness, necessity, and prudence of the capital investment costs TGS is requesting in this case.

1 Q. DID YOU MAKE ANY ADJUSTMENTS TO THE PLANT IN SERVICE, 2 CCNC OR ACCUMULATED RESERVE ALLOCATED TO TGS? 3 A. Yes. Capital investment costs not related to the provision of utility services were 4 removed. Costs for meals greater than \$25 per person, exclusive of taxes and tip 5 amount, and some hotel stays greater than \$150 per night, exclusive of taxes, were 6 removed, which Ms. Allison Edwards discusses in her testimony. The Company 7 has also made five adjustments to include costs for the following: (1) to CCNC for 8 the purchase of a building in Texas serving as a Customer Information Center; (2) 9 to plant in service, CCNC and Accumulated Reserves for post-test year plant that was in service as of September 30, 2019; (3) to CCNC for the proposed CGSA's 10 11 allocated portion of the Corporate balance of Construction Work in Progress 12 ("CWIP") at September 30, 2019; (4) to plant in service, CCNC and Accumulated 13 Reserves to reflect annualization of the cost allocation percentages as of third 14 quarter 2019; and (5) to Accumulated Reserves in relation to Company witness Dr.

Q. PLEASE FURTHER EXPLAIN THE POST-TEST YEAR CORPORATE
ADJUSTMENT TO PLANT IN SERVICE ON WORKPAPER C.C.1 AND
TO CCNC ON WORKPAPER C-1.C.1.

Workpapers C.b, C.c, C-1.b, C-1.c, D.b, and D.c.

Ronald E. White's 2019 depreciation study. These adjustments are reflected in

20 A. The Company has included a post-test year adjustment to Plant in Service and CCNC for corporate capital investment placed into service after the test-year end through September 30, 2019.³

15

16

³ As of September 30, 2019, post-test year plant has been placed in service and thus becoming used and useful in providing service to proposed CGSA customers.

| 1 | Q. | BRIEFLY DESCRIBE THE POST-TEST YEAR CORPORATE PLANT | |
|----------------------|----|--|--|
| 2 | | ADDITIONS INCLUDED AS AN ADJUSTMENT TO RATE BASE IN THIS | |
| 3 | | FILING. | |
| 4 | A. | The ONE Gas capital expenditures included in the post-test year adjustment to Plant | |
| 5 | | in Service and CCNC primarily consist of investments in computer software and | |
| 6 | | equipment. Examples of those investments include: | |
| 7 8 9 | | Replacement of laptop and desktop equipment that has exceeded warranty, thereby reducing unplanned repair expenses and providing a better end-user experience; | |
| 10 11 12 | | Renewal of Microsoft Enterprise Agreement licenses, which are used on premise and allow Company users to connect remotely to a variety of application services; | |
| 13 14 | | • Replacements of modems that are at the end of their useful life and will no longer be supported by Verizon at the end of 2019; | |
| 15 16 17 18 | | • Enhancements to the Banner billing system to support better functionality for Web customers, process efficiencies for Customer Service Representatives' and Service Order standardization across ONE Gas' Divisions; and | |
| 19 20 21 | | • Maximo systems were upgraded to a more recent version. As part of the upgrade, the underlying Oracle database and Websphere were upgraded to newer versions, and servers were migrated from Windows-based to Linux. | |
| 22 | Q. | PLEASE FURTHER EXPLAIN THE CORPORATE CWIP ADJUSTMENT | |
| 23 | | TO CCNC ON SCHEDULE C-1.C.1. | |
| 24 | A. | The Company included September 30, 2019 CWIP balances as an adjustment to | |
| 25 | | CCNC. However, the Company is not ultimately requesting the inclusion of CWIP | |
| 26 | | in its cost of service calculation. The Company will make a true-up adjustment to | |
| 27 | | CCNC to exclude any plant that is not used and useful as of December 31, 2019, | |
| 28 | | and will provide December 31, 2019 plant in service, CCNC, and Accumulated | |
| 29 | | Reserve balances by February 14, 2020. ONE Gas' CWIP allocated from | |

| 1 | | Corporate to TGS is \$5,250,217 and the proposed CGSA's allocated share is |

4 Q. WHY IS IT APPROPRIATE TO INCLUDE ALLOCATED CORPORATE

CCNC BALANCES IN RATE BASE?

A. The proposed CGSA allocated portion of the Corporate CCNC balance is a part of used and useful plant both during the test year and for the known and measurable changes beyond the test year. As such, allocated CCNC is appropriately included in rate base, and this is consistent with the treatment approved in GUD Nos. 9988, 10217, 10488, and 10506.⁴

11 Q. PLEASE EXPLAIN THE TGS DIVISION ADJUSTMENT TO 12 ACCUMULATED RESERVES ON WORKPAPER D.B.

The Company has made two adjustments to the Accumulated Reserve to account for the differences between the recorded reserve and computed reserve calculated in Dr. White's 2015 and 2019 Depreciation studies. The adjustment in relation to the 2015 Depreciation study transferred reserve dollars from all TGS Direct depreciable 390.2 accounts to TGS Division amortizable accounts, so there is enough reserve in the amortizable accounts for when those assets retire. As a result of Dr. White's 2019 Depreciation study, a similar issue was identified, and a similar, proforma adjustment has been made in this filing. Dr. White further discusses the 2019 Depreciation study and 2019 reserve adjustment in his

⁴ GUD No. 9988, Final Order; *Statement of Intent of Texas Gas Service Company to Change Rates Within the Environs of the South Texas Service Area, GUD No. 10217*, Final Order (Mar. 26, 2013); GUD No. 10488, Final Order; and GUD No. 10506, Final Order.

testimony. Ms. Guerra explains and sponsors the adjustments made to Direct per
 book reserve balances.

III. OPERATING EXPENSE ADJUSTMENTS

4 Q. PLEASE EXPLAIN HOW THE DEPRECIATION AND AMORTIZATION 5 EXPENSE ADJUSTMENT ON SCHEDULE G-15 IS CALCULATED.

Adjusted depreciation or amortization expense is calculated by multiplying proposed depreciation/amortization rates by depreciable plant in service. Test year depreciation expense is subtracted from total adjusted depreciation expense to calculate the adjustment to test year expense reflected on Schedule G-15. Most Corporate plant depreciation rates and amortization periods were developed in Dr. White's 2015 depreciation study and approved in TGS's last fully litigated rate case: GUD No. 10506, and TGS's settled cases; GUD Nos. 10488, 10526, 10656, 10739 and 10766. Corporate depreciation rates and amortization periods are consistent throughout ONE Gas and its Divisions. The Kansas Corporation Commission and Oklahoma Corporation Commission have also approved these depreciation rates. For certain new investments in accounts that were not considered in the 2015 depreciation study, initial depreciation rates were determined based on previous company experience and the judgment of those

⁶ In the Matter of the Application of Kansas Gas Service, a Division of ONE Gas, Inc. for Adjustment of its Natural Gas Rates in the State of Kansas, Docket No. 16-KGSG-491-RTS, Order Approving Unanimous Settlement Agreement at FoF 14 (Nov. 29, 2016).

⁷ Application of Oklahoma Natural Gas Company, a Division of ONE Gas, Inc., for Approval of its Performance Based Rate Change Plan Calculations for the Twelve Months Ending December 31, 2016, Energy Efficiency True-Up and Utility Incentive Adjustments for Program Year 2016, and Changes or Modifications to its Tariffs, Cause No. PUD 20170079 (March 15, 2017).

1 responsible for developing and managing these assets. The Company proposes to 2 continue the use of existing depreciation rates for ONE Gas plant.

> Dr. White conducted a 2019 depreciation study to determine the proposed depreciation rates for TGS Division plant. If approved, the Company will use the new depreciation rates for TGS Division plant going forward. Dr. White describes in his testimony the depreciation study and resulting depreciation rates requested in this case.

8 WHY IS IT APPROPRIATE TO USE EXISTING DEPRECIATION RATES Q. AND AMORTIZATION PERIODS APPROVED BY THE COMMISSION

CALCULATE THE DEPRECIATION AND AMORTIZATION

EXPENSE FOR CORPORATE ASSETS?

These depreciation rates were subject to a comprehensive review in six different Texas rate cases and are already being utilized in TGS statewide, including the Central Texas and Gulf Coast Service Areas. If the regulatory authority were to establish parameters for Corporate assets in the proposed CGSA that are different from those utilized in other Texas jurisdictions and ONE Gas Divisions, ONE Gas and TGS would have two sets of depreciation/amortization periods for the exact This difference would require ONE Gas to modify its current same assets. accounting system to track assets, accumulated reserve, and depreciation/amortization specifically for the proposed CGSA, which would be a complicated and costly process.

Q. DOES THIS CONCLUDE YOUR DIRECT TESTIMONY?

23 A. Yes, it does.

DIRECT TESTIMONY

OF

MARIE J. MICHELS

ON BEHALF OF

TEXAS GAS SERVICE COMPANY

TABLE OF CONTENTS

| | HIRIT MIM-1 | LIST OF EXHIBITS Existing Depreciation Rates for OPC |
|---------|--------------|---|
| II. | OPERATING RE | VENUE AND EXPENSES |
| | | |
| I. | INTRODUCTION | AND QUALIFICATIONS |

| 1 | | DIRECT TESTIMONY OF MARIE J. MICHELS |
|----|----|---|
| 2 | | I. <u>INTRODUCTION AND QUALIFICATIONS</u> |
| 3 | Q. | PLEASE STATE YOUR NAME AND BUSINESS ADDRESS. |
| 4 | A. | My name is Marie J. Michels, and my business address is 1301 South MoPac |
| 5 | | Expressway, Suite 400, Austin, Texas 78746. |
| 6 | Q. | BY WHOM ARE YOU EMPLOYED AND IN WHAT CAPACITY? |
| 7 | A. | I am a Manager of Rates and Regulatory Analysis for Texas Gas Service Company |
| 8 | | ("TGS" or the "Company"), which is a Division of ONE Gas, Inc. ("ONE Gas") |
| 9 | | My responsibilities include preparing rate schedules, filings, and analyses for |
| 10 | | various jurisdictions and rate classes. |
| 11 | Q. | PLEASE DESCRIBE YOUR EDUCATIONAL BACKGROUND AND |
| 12 | | PROFESSIONAL EXPERIENCE. |
| 13 | A. | I earned a Bachelor of Accounting degree in 2005 and a Masters of Business |
| 14 | | Administration degree in 2010 from Texas State University. I have been employed |
| 15 | | at the Company for 14 years in various accounting and financial analysis roles. My |
| 16 | | responsibilities included the preparation and analysis of monthly financial |
| 17 | | statements, annual financial plans and forecasts, as well as the preparation of the |
| 18 | | Railroad Commission of Texas ("Commission") Annual Report on behalf of the |
| 19 | | Company. |
| 20 | Q. | WAS THIS TESTIMONY PREPARED BY YOU OR UNDER YOUR |
| 21 | | DIRECT SUPERVISION? |
| 22 | A. | Yes, it was. |

1 Q. WHAT IS THE PURPOSE OF YOUR TESTIMONY?

- 2 A. I describe the portion of the Company's requested operating expenses related to
- 3 Direct expenses. As part of my testimony addressing operating expenses, I also
- 4 explain adjustments the Company made to test year expenses to calculate its cost
- 5 of service.

6 Q. HOW DOES YOUR TESTIMONY RELATE TO OTHER COMPANY

7 WITNESSES IN THE CASE?

- 8 A. Along with my testimony addressing Direct costs, other Company witnesses
- 9 address allocated amounts. Specifically, Company witness Mindy R. Edwards
- supports TGS Division and Corporate rate base adjustments and depreciation
- expense, while Company witness Anthony Brown supports Shared Services and
- Distrigas expense adjustments.

13 Q. ARE YOU SPONSORING ANY SCHEDULES?

14 A. I am sponsoring or co-sponsoring the following schedules:

| OPERATING INCOME: | |
|---|---|
| Schedule G (Summary of Operating Revenue & Expense Adj) | Co-Sponsor with Mr. Brown |
| Schedule G-7 (Pension OPEB) | Sponsoring |
| Schedule G-9 (Miscellaneous Adjustments) | Co-Sponsor with Mr. Brown & Ms. Allison Edwards |
| Schedule G-10 (Rents) | Co-Sponsor with Mr. Brown |
| Schedule G-11 (Interest on Customer Deposits) | Sponsoring |
| Schedule G-12 (Uncollectible Expense) | Sponsoring |
| Schedule G-14 (Advertising Expense) | Co-Sponsoring with Mr. Brown |
| Schedule G-15 (Depreciation & Amortization) | Co-Sponsor with Ms. Mindy Edwards |
| Schedule G-16 (Ad Valorem Tax Expense) | Sponsoring |
| Schedule G-17 (Texas Franchise Tax Expense) | Sponsoring |
| Schedule G-18 (Stores Load) | Sponsoring |
| Schedule G-20 (Regulatory Expense) | Sponsoring |
| Schedule G-19 (TWE Load) | Sponsoring |
| Schedule G-24 (PIT) | Sponsoring |
| Schedule G-25 (Hurricane Harvey) | Sponsoring |

The schedules that I address in my testimony are for the Company's proposed Central-Gulf Service Area ("CGSA"), which is a combination of the existing Central Texas and Gulf Coast Service Areas ("CTSA" and "GCSA") and the City of Beaumont, Texas. In addition to schedules that reflect the Company's requested consolidation for the CGSA, TGS is also providing stand-alone schedules for the CTSA and GCSA. The cost of service for customers in the City of Beaumont, Texas is included in and part of the GCSA.

II. OPERATING REVENUE AND EXPENSES

Q. PLEASE DESCRIBE SCHEDULE G.

23

24

A.

Schedule G presents a summary of all revenues and expenses, including ONE Gas Pipeline Company ("OPC"), other than federal income tax expense. Page 1 is a summary of the adjustments to revenues and expenses, which are identified in greater detail in Schedules G-1 through G-25. Pages 2 and 3 reflect the same information as Page 1, organized by Federal Energy Regulatory Commission account number. The total amounts on page 1, line 25 of Schedule G equal the total operating amounts shown on page 3, line 101 of Schedule G. Each page of Schedule G, column (a) identifies the test year amount recorded in the Company's books and records; column (b) shows the net adjustment to each test year amount, which is simply the difference between columns (a) and (c); and column (c) contains the adjusted amount. The adjustments to revenue and purchased gas expense on Schedules G-1 through G-3 are sponsored by Company witness Janet L. Buchanan. The expense adjustments detailed on Schedules G-4 through G-25 are discussed in the remainder of my testimony or in the testimony of Company witnesses Stacey R. Borgstadt and Mr. Brown.

| 1 | | OPC expenses are included in the Company's requested operating expenses |
|----|----|--|
| 2 | | because OPC will transfer the assets to TGS after a final order is issued in this case |
| 3 | | and the asset will become part of the TGS system in the proposed CGSA, as |
| 4 | | described by Company witnesses Shantel Norman and Stacey L. McTaggart. |
| 5 | Q. | HOW WAS THE AMOUNT OF THE OPERATIONS AND MAINTENANCE |
| 6 | | ("O&M") ADJUSTMENT RELATED TO OPC DETERMINED? |
| 7 | A. | Prior to ONE Gas' acquisition of ONEOK Transmission Company ("OTC"), TGS |
| 8 | | operated and maintained the pipeline for ONEOK. TGS billed or invoiced OTC |
| 9 | | monthly for the O&M expenses TGS incurred to operate and maintain the pipeline, |
| 10 | | and OTC reimbursed TGS for the O&M expenses. After the acquisition, TGS |
| 11 | | continued its operation and maintenance of the pipeline, now named OPC. The |
| 12 | | post-test year adjustment to reflect necessary O&M costs that TGS will incur when |
| 13 | | the pipeline becomes part of TGS's system is based on TGS's historical experience |
| 14 | | with actual O&M costs for the OPC line and excluding the historical |
| 15 | | reimbursement. Those historical O&M costs can be found on WKP G.a.2 column |
| 16 | | b; the exclusion of the reimbursement can be found on Schedule G-9. |
| 17 | Q. | DO THE ADJUSTED EXPENSES SHOWN ON SCHEDULE G, COLUMN |
| 18 | | (C) INCLUDE ALLOCATED EXPENSES? |
| 19 | A. | Yes. In addition to expenses that are directly charged to the proposed CGSA, the |
| 20 | | Company incurs "allocable" expenses for Shared Services provided to customers |
| 21 | | in the proposed CGSA from various TGS and ONE Gas departments. A portion of |
| 22 | | these reasonable and necessary expenses must be allocated to the proposed CGSA |
| 23 | | to determine the total cost TGS incurs to provide service to proposed CGSA |
| 24 | | customers. For example, during the test year, personnel from various departments |

provided management, accounting, human resources, customer service and engineering services to the proposed CGSA and generated a variety of expenses that are directly charged or causally allocated to the proposed CGSA. Lastly, there are ONE Gas Corporate level costs allocated through Distrigas for necessary business functions such as treasury, investor relations and executive management that support operations in the proposed CGSA. The proposed CGSA's portion of test year costs charged to the allocable cost centers described above are included in the proposed CGSA's per book costs on Schedule G, column (a). The Company's allocation methodologies are discussed by Mr. Brown.

A.

Q. DESCRIBE THE PENSION AND OTHER POST-EMPLOYMENT BENEFITS AMORTIZATION AMOUNT SHOWN ON SCHEDULE G-7.

Schedule G-7 shows the proforma annual amortization of the Pension and other post-employment employee benefits ("OPEB") Regulatory Asset included in rate base in accordance with Texas Utilities Code §104.059, as discussed in the direct testimony of Company witness Gracie Guerra. The amount includes amortization of: (1) the remaining portion of the pension and OPEB regulatory asset approved in Gas Utilities Docket ("GUD") No. 10526 that will not be fully amortized when proposed CGSA rates are implemented; and (2) the deferred annual Pension and OPEB expense that has occurred since GUD No. 10526 was filed. The proposed annual amortization period is based on a six-year time frame that would include five Gas Reliability Infrastructure Program ("GRIP") filings followed by a rate case filing. Schedule G-7 also shows an adjustment made to test-year expense. This adjustment is the difference between the proforma annual amortization amount and the test-year actuals.

1 Q. DESCRIBE THE MISCELLANEOUS ADJUSTMENTS SHOWN ON 2 **SCHEDULE G-9.**

19

20

21

22

23

24

A.

3 A. Schedule G-9 shows adjustments to remove expenses not permitted for regulatory recovery such as civic activities, charitable contributions, and legislative activities. 5 Additionally, meals over \$25 per person, exclusive of taxes and tip amount, some 6 hotel stays over \$150 per night, exclusive of taxes, and other miscellaneous adjustments were removed. Company witness Allison N. Edwards discusses the 8 proposed adjustment for meal and hotel costs. Mr. Brown sponsors the adjustments 9 related to Shared Services, which are directly assigned or causally allocated costs, 10 and Distrigas, which are allocated indirect costs.

DID THE COMPANY ADJUST FOR DUPLICATE SALES TAX? Q.

Yes. Test year expenses on WKP G-9.a were adjusted to remove duplicate sales tax entries inadvertently made by the Company's Vertex tax software. Since the Company became aware that its software system inadvertently assessed tax on a small percentage of invoices for which sales tax was already included, the Company has provided employees with additional training to address this issue with those who routinely process invoices. Specifically, the Company's accounts payable team has taken the following steps: (1) directed employees to be diligent in identifying tax on the invoice and proper tax coding, when applicable; (2) directed field locations to use labels for coding invoices and to specify the tax amount when applicable; (3) contacted vendors that do not clearly indicate tax amounts on their invoices and requesting identification of tax amounts on future invoices; and (4) continued to address the importance of this issue and discuss issues that require diligence for preventing errors. Additionally, the Company has upgraded the

| 1 | | Vertex software, which will mitigate the likelihood of duplicate sales tax being |
|----|----|---|
| 2 | | assessed in the future. |
| 3 | Q. | PLEASE DESCRIBE THE ADJUSTMENT FOR RENT EXPENSE SHOWN |
| 4 | | ON SCHEDULE G-10. |
| 5 | A. | On Schedule G-10, the Company adjusts its test year expense for rent to reflect |
| 6 | | known and measurable changes in rent expense. Mr. Brown sponsors the |
| 7 | | adjustments related to Shared Services and Distrigas. There are no adjustments for |
| 8 | | Direct costs. |
| 9 | Q. | PLEASE DESCRIBE THE ADJUSTMENT FOR INTEREST ON |
| 10 | | CUSTOMER DEPOSITS SHOWN ON SCHEDULE G-11. |
| 11 | A. | The proposed CGSA interest on customer deposits has been adjusted and calculated |
| 12 | | by applying the current Commission-required interest rate of 1.92% ¹ to the adjusted |
| 13 | | balance of proposed CGSA customer deposits as shown on Schedule B-7 and as |
| 14 | | discussed in Ms. Guerra's testimony. The difference between this amount and test |
| 15 | | year interest on customer deposits expense is the adjustment shown on Schedule G- |
| 16 | | 11. |
| 17 | Q. | PLEASE EXPLAIN THE ADJUSTMENT TO UNCOLLECTIBLE |
| 18 | | EXPENSE ON SCHEDULE G-12. |
| 19 | A. | Schedule G-12 presents the calculation of adjusted uncollectible expense relating |
| 20 | | to the proposed CGSA adjusted base revenues and other revenues. This adjusted |
| 21 | | expense level is calculated by multiplying the adjusted base revenues and other |
| 22 | | revenues by the three-year average of non-gas-cost-related Direct write-offs for the |

 $^{^{1}\} Railroad\ Commission\ of\ Texas,\ Bulletin\ No.\ 1118,\ Sec.\ 6(1)(B),\ October\ 31,\ 2019\ (citing\ to\ Historical\ PUC\ Interest\ Rates,\ https://www.puc.texas.gov/industry/electric/reports/HRates/HistRates.pdf).$

proposed CGSA divided by total proposed CGSA non-gas-cost revenue. The use of a three-year average is consistent with Commission decisions from prior TGS dockets, including GUD Nos. 9770, 9988, 10217, 10285, 10488, 10506, 10526, and 10656, as well as other gas utilities in Texas.² Test year uncollectible expense is then subtracted from the adjusted uncollectible expense level to obtain the adjustment to the test year amount. In addition, the uncollectible expense ratio is used on Schedule A to gross-up the revenue deficiency for the additional uncollectible expense associated with the requested increase in rates.

The adjusted expense on Schedule G-12 excludes uncollectible expense relating to gas cost revenues because the Company proposes to recover gas-cost-revenue-related bad debt expense through its cost of gas tariffs in the proposed CGSA incorporated areas.

Q. PLEASE DESCRIBE THE CALCULATIONS ASSOCIATED WITH ADVERTISING EXPENSE ON SCHEDULE G-14.

Commission Rule 7.5414 states that actual expenditures for advertising will be allowed as a cost of service item for rate-making purposes provided that the total sum of such expenditures shall not exceed one-half of 1% of the gross receipts of the utility for utility services rendered to the public. Schedule G-14 demonstrates that total adjusted advertising expense included in the proposed revenue requirement is \$37,109 and is less than the allowable amount of \$988,823.

² See e.g., Statement of Intent filed by Atmos Energy Corp., to Increase Gas Utility Rates Within the Unincorporated Areas Served by the Atmos Energy Corp., Mid-Tex Division, GUD No. 10170, Final Order at FoF 33 (Dec. 4, 2012) (stating that use of a three-year average for uncollectible expense was approved in GUD Nos. 9762 and 9869).

- 1 Ms. McTaggart addresses the disallowed expenses of civic and charitable expenses 2 and membership dues in her testimony.
- Q. PLEASE EXPLAIN HOW THE DEPRECIATION AND AMORTIZATION
 EXPENSE ADJUSTMENT ON SCHEDULE G-15 IS CALCULATED.
 - A. Adjusted depreciation expense is calculated by multiplying the Company's depreciation rates by depreciable plant in service. In addition, depreciation expense on the Company's December 31, 2018 Distribution Integrity Management Program deferral balance, pursuant to Commission Rule 8.209, is included and is calculated using the proposed CGSA depreciation rates for mains and services. The proposed CGSA Direct plant depreciation rates were developed in the 2019 depreciation study conducted by Company witness Dr. Ronald E. White, who describes the depreciation study and the resulting rates in his direct testimony.³ Test year depreciation expense is subtracted from total adjusted depreciation expense to calculate the adjustment to test year expense reflected on Schedule G-15. The balances of proposed CGSA transportation and major work equipment ("TWE") are excluded from depreciable plant for purposes of computing adjusted depreciation expense on Schedule G-15. Depreciation relating to these items is charged directly to the TWE clearing account rather than to the depreciation expense account on the Company's books. As a result, adjusted depreciation for TWE equipment is included as part of the TWE clearing adjustment on Schedule G-19.

5

9

10

11

12

13

14

15

16

17

18

19

20

21

³ The 2019 study was based on asset balances at December 31, 2018. The plant balances in the study will not exactly match the Company's calculated rate base in its cost of service, which was based on a test year ended June 30, 2019 updated for known and measurable changes through September 30, 2019.

| 1 | In addition to depreciation expense associated with the proposed CGSA |
|----|--|
| 2 | plant in service, Schedule G-15 includes depreciation expense associated with the |
| 3 | OPC acquisition, and the allocated Corporate and TGS Division office plant. Test |
| 4 | year depreciation expense for OPC was calculated primarily based on the rates |
| 5 | recommended by Dr. White for the Company's other assets in those same accounts. |
| 6 | Because TGS did not own OPC at the time of the 2019 depreciation study, the |
| 7 | specific OPC assets were not included in the study. However, the 2019 depreciation |
| 8 | study provides more current rates for the types of asset utilized by OPC; therefore, |
| 9 | the Company has adopted the 2019 depreciation study life parameters for those |
| 10 | accounts for purposes of calculating depreciation rates for OPC assets. For those |
| 11 | OPC asset accounts that were not addressed in the 2019 depreciation study, the |
| 12 | Company has retained existing rates. In the event that the Commission does not |
| 13 | adopt the proposed rates, the Company proposes to use the existing rates for the |
| 14 | OPC assets. Exhibit MJM-1 provides the existing depreciation rates for OPC assets |
| 15 | which are based on the depreciation rates of the asset at the time of purchase from |
| 16 | ONEOK. The OPC existing depreciation rates provided on Exhibit MJM-1 were |
| 17 | also provided in response to discovery issued in GUD No. 10877. |
| 18 | Ms. Mindy Edwards co-sponsors Schedule G-15 and supports the |
| 19 | depreciation expense related to the TGS Division and Corporate Plant. TGS will |
| 20 | update depreciation expense when it updates plant in service, construction |
| 21 | completed not classified and reserves to December 31, 2019 balances by February |

22

14, 2020.

1 Q. PLEASE EXPLAIN THE ADJUSTMENT TO AD VALOREM (PROPERTY)

2 TAXES SHOWN ON SCHEDULE G-16.

13

14

15

16

17

18

19

20

21

22

A.

3 A. Adjusted property tax expense is computed by multiplying net plant in service 4 included in rate base by an effective property tax rate. The effective tax rate is 5 computed by dividing the property taxes paid during the test year period by net 6 plant in service as of January 1, 2018. Net plant in service as of January 1, 2018 is 7 used for the denominator of the effective rate because that is the valuation 8 assessment date upon which the property taxes were computed. Test year property 9 tax expense is subtracted from adjusted property tax expense to calculate the 10 adjustment to test year expense.

11 Q. PLEASE EXPLAIN THE ADJUSTMENT FOR TEXAS FRANCHISE TAX 12 ON SCHEDULE G-17.

TGS's Texas franchise tax is recorded as a part of the federal income tax accrual on the Company's books and is excluded from the per book test year numbers for the proposed CGSA to calculate separate stand-alone proposed CGSA federal income tax and Texas franchise tax amounts in this filing. Schedule G-17 shows the adjustment to calculate the proposed CGSA stand-alone Texas franchise tax amount by multiplying TGS's franchise tax rate (for the 2018 return due in 2019) by the proposed CGSA's "As Adjusted Base (Non-Gas) Revenue" less "Taxes Other Than Federal Income Tax - Revenue Related" less "Bad Debt Expense, not included in Purchased Gas Costs." The Texas franchise tax is a necessary cost of providing utility service and is appropriately included in the proposed CGSA rates.

Q. PLEASE EXPLAIN THE STORES LOAD CLEARING ADJUSTMENT ON 2 **SCHEDULE G-18.**

17

18

19

20

21

22

23

A.

Schedule G-18 shows two categories of adjustments related to stores costs. The first adjustment is for proposed CGSA stores costs that were under-cleared relative to the proposed CGSA costs incurred during the test year. TGS accounts for stores costs through a clearing account. Costs are accumulated in the stores load clearing account on the balance sheet and then cleared to capital and expense accounts based on a percentage load applied to all requisitions for materials and supplies. Because the percentage load is based on estimated usage and costs, the amount cleared may be more or less than the costs incurred during any given twelve-month period. During the test year, the amounts cleared from the proposed CGSA stores clearing account were less than the proposed CGSA actual cost incurred during the test year. Thus, an adjustment to increase the test year amount cleared is necessary to include a portion of these actual costs in the Company's cost of service. This adjustment is shown on Schedule G-18, lines 1 through 3. The second category of adjustments relates to the level of costs that was charged into the proposed CGSA stores clearing account during the test year. As shown on lines 4 through 7, adjustments were made to reflect the difference between proposed CGSA adjusted and test year payroll and payroll-related costs applicable to the stores function. The combination of these two categories of adjustments is an increase to overall test year stores clearing as shown on line 8. This amount has been multiplied by the percentage of stores load charged to expense accounts in the proposed CGSA during the test year to determine the adjustment to test year expense and the distribution of that

| 1 | | adjustment to specific applicable expense accounts as shown on Schedule G-18, |
|----|----|--|
| 2 | | lines 12 through 23. |
| 3 | Q. | PLEASE EXPLAIN THE LOAD CLEARING ADJUSTMENT FOR TWE |
| 4 | | ON SCHEDULE G-19. |
| 5 | A. | Schedule G-19 presents an adjustment similar to the previously discussed stores |
| 6 | | load adjustment. As with stores load costs, TWE costs are accumulated in a balance |
| 7 | | sheet account and then cleared to capital and expense accounts based on usage. In |
| 8 | | this case, the amounts cleared for proposed CGSA TWE during the test year were |
| 9 | | less than the proposed CGSA actual costs incurred. Thus, an adjustment to increase |
| 10 | | the test year amount cleared is necessary to include a portion of these actual costs |
| 11 | | in the Company's cost of service. This adjustment is shown on Schedule G-19, |
| 12 | | lines 1 through 3. Lines 4 through 9 reflect any necessary adjustments relating to |
| 13 | | the dollars that were charged into the proposed CGSA TWE clearing account |
| 14 | | during the year. The primary costs associated with TWE are depreciation, gasoline |
| 15 | | and maintenance and repair costs. No adjustment was made to the test year level |
| 16 | | of gasoline or maintenance and repair costs. However, depreciation expense |
| 17 | | associated with vehicles and major work equipment is also charged to the TWE |
| 18 | | clearing cost. Line 4 reflects an adjustment to increase the amount of depreciation |
| 19 | | that was booked during the test year to reflect the depreciation rates recommended |
| 20 | | by Dr. White. |
| 21 | | The sum of these two categories of TWE adjustments is an increase to test |
| 22 | | year proposed CGSA TWE clearing amounts and is shown on line 10. This amount |
| 23 | | has been multiplied by the percentage of TWE load charged to expense accounts in |
| | | |

the proposed CGSA during the test year to determine the adjustment to test year

24

| 1 | | expense and the distribution of that adjustment to specific applicable expense |
|----|----|---|
| 2 | | accounts as shown on Schedule G-19, lines 14 through 35. |
| 3 | Q. | PLEASE EXPLAIN THE ADJUSTMENT FOR REGULATORY EXPENSE |
| 4 | | REFLECTED ON SCHEDULE G-20. |
| 5 | A. | Schedule G-20 reflects the adjusted regulatory expenses for the test year. In GUD |
| 6 | | No. 10526, the Commission approved the recovery of a regulatory asset of |
| 7 | | \$280,196.80 representing regulatory expenses incurred as part of prior GRIP and |
| 8 | | other regulatory proceedings, with a six year amortization period and an annual |
| 9 | | amortization expense of \$46,699. As of June 2019, the remaining balance was |
| 10 | | \$155,665. The Company is requesting that the remaining balance of this previously |
| 11 | | approved regulatory asset be recovered over a six-year period in base rates, and an |
| 12 | | adjustment was made to Test Year Expense in the amount of the difference between |
| 13 | | proforma Annual Regulatory Amortization Expense and Test Year Regulatory |
| 14 | | Amortization Expense. |
| 15 | | For the recovery of rate case expenses associated with the filing of the |
| 16 | | instant case, the Company requests recovery through a separate rider as described |
| 17 | | in the testimony of Ms. McTaggart. |
| 18 | Q. | PLEASE EXPLAIN THE PIT ADJUSTMENT REFLECTED ON |
| 19 | | SCHEDULE G-24. |
| 20 | A. | Schedule G-24 reflects the pipeline integrity testing expense to include in base rates |
| 21 | | if the Company's request for a rider is not approved. |
| 22 | | As explained in the direct testimony of Ms. McTaggart, the Company is |
| 23 | | requesting to recover certain pipeline integrity testing costs incurred during the test |
| 24 | | year and going forward through a rider. Ms. Norman explains and supports the |

- 1 reasonableness and necessity of the pipeline integrity testing costs, and 2 Ms. McTaggart addresses the appropriateness of recovering the pipeline integrity 3 testing expense through a rider. If the rider is approved, the adjustment shown on 4 Schedule G-24 should be removed from the Company's base revenue requirement. 5 PLEASE EXPLAIN THE HURRICANE HARVEY Q. **ADJUSTMENT** 6 **REFLECTED ON SCHEDULE G-25.** 7 A. Schedule G-25 reflects the expense related to Hurricane Harvey, net of insurance 8 reimbursement, to include in rate base if the Company's request for a rider is not 9 approved. Ms. McTaggart addresses recovering the Hurricane Harvey expense 10 through a rider. If the rider is approved, the adjustment shown on Schedule G-25 11 should be removed from the Company's base revenue requirement.
- 12 Q. DOES THIS CONCLUDE YOUR DIRECT TESTIMONY?
- 13 A. Yes, it does.

AFFIDAVIT OF MARIE MICHELS

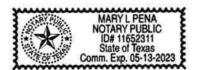

BEFORE ME, the undersigned authority, on this day personally appeared Marie Michels who having been placed under oath by me did depose as follows:

- 1. "My name is Marie Michels. I am over the age of eighteen (18) and fully competent to make this affidavit. I am employed as Manager of the Rates and Regulatory Compliance Department of Texas Gas Service Company, a division of ONE Gas, Inc. The facts stated herein are true and correct based upon my personal knowledge.
- 2. I have prepared the foregoing Direct Testimony and the information contained in this document is true and correct to the best of my knowledge."

Further affiant sayeth not.

| 1 | | DIRECT TESTIMONY OF ANTHONY BROWN |
|----|----|---|
| 2 | | I. <u>INTRODUCTION AND QUALIFICATIONS</u> |
| 3 | Q. | PLEASE STATE YOUR NAME AND BUSINESS ADDRESS. |
| 4 | A. | My name is Anthony Brown, and my business address is 1301 South MoPac |
| 5 | | Expressway, Suite 400, Austin, Texas 78746. |
| 6 | Q. | BY WHOM ARE YOU EMPLOYED AND IN WHAT CAPACITY? |
| 7 | A. | I am employed by Texas Gas Service Company ("TGS" or the "Company") as a |
| 8 | | Rate Specialist, which is a Division of ONE Gas, Inc. ("ONE Gas"). |
| 9 | Q. | PLEASE DESCRIBE YOUR EDUCATION AND PROFESSIONAL |
| 10 | | EXPERIENCE. |
| 11 | A. | I received a Bachelor of Business Administration with a major in Finance from |
| 12 | | Angelo State University in 2013 and Master's in Business Administration from |
| 13 | | Angelo State University in 2015. I began my career with TGS in September 2015 |
| 14 | | as a Rate Analyst I. In July 2019, I was promoted to Rate Specialist. |
| 15 | Q. | PLEASE DISCUSS YOUR DUTIES AND RESPONSIBILITIES AS A RATE |
| 16 | | SPECIALIST. |
| 17 | A. | My responsibilities include: the review and analysis of Company and ONE Gas |
| 18 | | financial data; preparation of and participation in rate cases and other regulatory |
| 19 | | filings; and related activities for TGS. |
| 20 | Q. | HAVE YOU PREVIOUSLY TESTIFIED BEFORE ANY REGULATORY |
| 21 | | COMMISSIONS? |
| 22 | A. | Yes, I have filed testimony in Gas Utilities Docket ("GUD") Nos. 10739 and 10766 |
| 23 | | before the Railroad Commission of Texas ("Commission"). |

- 1 Q. WAS THIS TESTIMONY PREPARED BY YOU OR UNDER YOUR
- 2 **DIRECT SUPERVISION?**
- 3 A. Yes, it was.
- 4 O. HAVE YOU PREPARED ANY EXHIBITS IN CONNECTION WITH YOUR
- 5 **TESTIMONY?**
- 6 A. Yes, I prepared and sponsor the exhibits listed in the table of contents.
- 7 Q. WERE THESE EXHIBITS PREPARED BY YOU OR UNDER YOUR
- 8 **DIRECTION?**
- 9 A. Yes, they were.

10 Q. WHAT IS THE PURPOSE OF YOUR TESTIMONY?

11 The purpose of my testimony is to address Shared Services costs TGS is requesting A. 12 to recover through rates for the proposed Central-Gulf Service Area ("CGSA"). Shared Services are functions or services provided by employees at the TGS 13 14 Division or ONE Gas levels that are necessary for the provision of natural gas 15 service. Shared Services costs can be assigned directly or allocated to a specific 16 service area. Specifically, I: (1) provide an overview of ONE Gas' organizational 17 structure, which includes Shared Services and Direct service areas; (2) explain and 18 support ONE Gas' cost allocation methodology, including the ONE Gas Distrigas¹ 19 formula ("Distrigas"); (3) explain and support the miscellaneous operating expense 20 adjustments for Shared Services; (4) explain the rent and lease operating expense 21 adjustments for Shared Services; (5) explain and support the injuries and damages

¹ Distrigas of Mass. Corp., Opinion No. 291, 41 FERC 61, 205 (1987).

- 1 adjustment; (6) explain the Distrigas allocation adjustment; and (7) identify the
- 2 Shared Services causal allocation.

3 Q. HOW DOES YOUR TESTIMONY RELATE TO OTHER COMPANY

4 WITNESSES IN THE CASE?

13

14

15

A. My testimony relates to Company witness Marie J. Michels as she supports the proposed CGSA Direct service area expense adjustments whereas, I support adjustments for allocated expenses. Also, Company witness Mindy R. Edwards supports TGS Division and Corporate rate base adjustments and depreciation expense, using the cost allocation methodology and calculations that I support in my testimony.

11 Q. ARE YOU SPONSORING ANY SCHEDULES?

12 A. Yes, I am sponsoring or co-sponsoring the following schedules:

| OPERATING INCOME: | |
|---|---|
| Schedule G (Summary of Operating Revenue & Expense Adj) | Co-Sponsor with Ms. Michels |
| | |
| Schedule G-9 (Miscellaneous Adjustments) | Co-Sponsor with Ms. Michels and Ms. Allison Edwards |
| | |
| Schedule G-10 (Rents and Leases) | Co-Sponsor with Ms. Michels |
| Schedule G-13 (Inj & Dam) | Sponsoring |
| | |
| Schedule G-14 (Advertising) | Co-Sponsor with Ms. Michels |
| Schedule G-21 (Distrigas Allocation) | Sponsoring |
| Schedule G-22 (Causal Allocation) | Sponsoring |

The schedules I address in my testimony are for the Company's proposed CGSA, which is a combination of the existing Central Texas and Gulf Coast Service Areas and the City of Beaumont, Texas. In addition to schedules that reflect the

- Company's requested consolidation for the CGSA, TGS is also providing standalone schedules for the Central Texas and Gulf Coast Service Areas. In the standalone schedules, the cost of service for customers in the City of Beaumont, Texas is included in and a part of the Gulf Coast Service Area cost of service.
- 5 Q. WERE THESE SCHEDULES PREPARED BY YOU OR UNDER YOUR
 6 SUPERVISION?
- 7 A. Yes, they were.

8

10

11

12

13

14

15

16

17

18

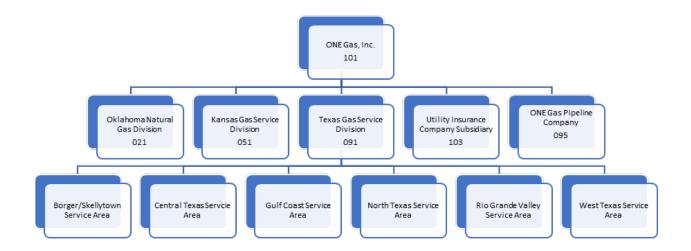

II. ORGANIZATIONAL STRUCTURE OVERVIEW

9 O. HOW IS ONE GAS ORGANIZED?

A. As visually depicted in the chart below, ONE Gas has three divisions, Oklahoma Natural Gas, Kansas Gas Service, and TGS that serve more than 2.2 million customers. ONE Gas currently has two affiliate companies, Utility Insurance Company ("UIC"), a wholly-owned captive insurance subsidiary and ONE Gas Pipeline Company ("OPC"), which was formed following the recent acquisition of assets from ONEOK, Inc. Company witness Mark W. Smith describes UIC and the services it provides in his testimony. Company witnesses Shantel Norman and Stacey McTaggart provide testimony regarding OPC, the acquisition and related assets.²

-

² The OPC assets will be incorporated into TGS's existing system following this case.

1 Q. ARE CERTAIN CENTRALIZED SERVICES PROVIDED TO TGS'S 2 DIRECT SERVICE AREAS?

3

4

5

6

7

8

9

10

11

12

A.

Yes, both ONE Gas and TGS Division provide certain necessary, centralized services for TGS's direct service areas. Providing certain consolidated or centralized services reduces operational redundancies and helps achieve economies of scale. These common centralized services are more efficiently provided at the TGS Division or Corporate level and are considered "Shared Services" costs because company personnel provide support to all ONE Gas Operating Divisions, including TGS's service areas. The activities performed through these cost centers are subject to cost assignment using the methodology set forth below.

Q. HAS THE COMPANY INCLUDED THE COSTS ASSOCIATED WITH SHARED SERVICES IN THE REQUESTED REVENUE REQUIREMENT?

13 A. Yes. The Company has included these costs in the filing. As described in my
14 testimony below, during the test year, services were provided to the proposed

| 1 | | CGSA by TGS Division and ONE Gas employees, and the costs associated with |
|----|----|---|
| 2 | | those services are included in the requested revenue requirement. |
| 3 | Q. | ARE THE UIC PREMIUMS FOR ONE GAS AND TGS INCLUDED IN THE |
| 4 | | COMPANY'S REQUESTED REVENUE REQUIREMENT? |
| 5 | A. | Yes, they are. UIC premiums to ONE Gas and TGS are included as allocated costs |
| 6 | | to the proposed CGSA. A complete list containing the UIC premiums included in |
| 7 | | operations and maintenance ("O&M") expense allocated to the proposed CGSA is |
| 8 | | attached to my testimony as Exhibit AQB-1. Ms. Mindy Edwards provides the UIC |
| 9 | | costs included in rate base allocated to the proposed CGSA. Mr. Smith provides |
| 10 | | testimony describing UIC and its services, and Ms. McTaggart discusses the |
| 11 | | Company's compliance with the associated affiliate standard. |
| 12 | Q. | ARE OPC COSTS ALLOCATED THROUGH THE COMPANY'S COST |
| 13 | | ALLOCATION METHODOLOGY? |
| 14 | A. | No, they are not. All OPC costs are attributable directly to the proposed CGSA. |
| 15 | | Ms. Michels and Company witness Gracie Guerra provide testimony about OPC |
| 16 | | expenses and rate base, respectively. |
| 17 | | III. COST ALLOCATION METHODOLOGY |
| 18 | Q. | WHAT IS THE PURPOSE OF COST ALLOCATIONS? |
| 19 | A. | The purpose of cost allocations is to determine and reasonably allocate each |
| 20 | | business entity's proportionate share of costs for certain support services it receives |
| 21 | | from TGS Division and ONE Gas. Because the costs to provide these services are |
| 22 | | "shared" by multiple business entities or service areas, cost responsibility for these |
| 23 | | services must be reasonably allocated among the various ONE Gas business entities |
| | | |

and TGS's service areas. These allocations are accomplished by applying ONE

Gas' cost allocation methodology.

Q. PLEASE DESCRIBE ONE GAS' COST ALLOCATION METHODOLOGY.

The costs incurred by ONE Gas or any of its business entities can be described as either direct or indirect. To the extent that responsibility for costs can be specifically attributed to a business entity or service area, those costs are directly assigned. Conversely, indirect costs are costs that cannot be specifically attributed to a business entity or service area and thus must be allocated in accordance with principles of cost causation. For instance, if costs cannot be directly assigned, but a specific unit of measurement can be identified, then these indirect costs are allocated using a specific causal relationship, such as customer count, and would be considered shared costs, which are discussed further below. Any remaining indirect costs are allocated according to a formula that has been previously approved in Texas, Kansas, Oklahoma and other jurisdictions. This formula is known as Distrigas.

16 Q. PLEASE EXPLAIN "DIRECT COSTS."

A.

A.

Direct costs are those costs that can be identified and directly assigned at the service area level, TGS Division level, or Corporate level. Costs are directly assigned for services such as meter reading, leak surveys, field customer service, fleet expenses, certain information technology services, line location services, facilities management, and labor and benefits costs for Property Accounting employees for each ONE Gas Division for which the employee has accounting responsibility.

1 Q. PLEASE EXPLAIN "INDIRECT COSTS" AND HOW THE INDIRECT 2 COSTS ARE ALLOCATED.

3

4

5

6

7

8

9

10

11

12

13

14

15

16

17

18

A. Indirect costs are those costs incurred to provide services that cannot be directly assigned to a business entity or service area; thus, these costs are considered shared costs. Indirect or shared costs are allocated to each business entity either on a causal basis or through Distrigas. Indirect costs allocated using causal relationships are based on specific measurements such as participation level, activity level, output level, or resource consumption. Indirect costs that cannot be charged directly or cannot be associated with an identifiable causal relationship are allocated through Distrigas. Examples of indirect costs include customer information center services, credit and collections, and TGS general accounting. Employee health and welfare benefits for active employees are examples of indirect costs allocated on a causal basis as measured by output level (allocated by employee headcount for each respective business entity). Other examples of causal allocation factors include a percentage of customer count for the Billing Control Group and invoice processing volume by business entity for Accounts Payable. Costs are then further allocated to the TGS service areas based on the ratio of customers in each service area to the total number of TGS customers in all TGS service areas.

Q. PLEASE DESCRIBE THE SERVICES AND COSTS ALLOCATED THROUGH DISTRIGAS.

A. ONE Gas provides many services that benefit all its business entities, including
TGS. Those Corporate service operating costs are recorded on ONE Gas' financial

| 1 | books and are then allocated to the various ONE Gas business entities using the |
|----------------------|---|
| 2 | Distrigas factor. |
| 3 | A general summary of Corporate services is provided below. A complete |
| 4 | list containing a more detailed explanation of each Corporate service and associated |
| 5 | allocation can be found in the Corporate Allocation Manual ("CAM") attached to |
| 6 | my testimony as Exhibit AQB-2. |
| 7 8 | • Human Resources - Provides professional development and training programs for active employees. |
| 9 10 1 | • Information Technology - Supports ONE Gas' business entities by developing and administering disaster recovery, data backup and recovery, cyber-security, data center and support of all ONE Gas and Company technology. |
| 2 3 4 5 | • Finance and Accounting - Supports ONE Gas' business entities by administering processes related to corporate accounting, financial reporting, tax, credit, risk and insurance, internal audit, financial planning and business development. |
| l 6 l 7 | • General Counsel - Supports ONE Gas' business entities by administering processes related to legal aspects of day-to-day business activities. |
| 18 19 20 | Corporate Communications - Supports ONE Gas' business entities by administering processes related to corporate communications efforts directed to employees and external stakeholders. |
| 21 22 23 24 | • Corporate Services - Supports ONE Gas' various business entities by developing and administering programs and processes that facilitate general day-to-day business activities such as purchasing, facilities, business continuity and environmental safety and health initiatives. |
| 25 | Finally, as noted in the CAM, certain miscellaneous costs such as rent and |
| 26 | utilities impacting all business entities are also allocated. All costs allocated to |
| 27 | TGS, including UIC premiums, are then further allocated to the TGS service areas |
| 28 | based on the ratio of customers in each service area to the total number of TGS |
| 29 | customers in all TGS service areas. |

1 Q. WOULD THE SAME TYPES OF SERVICES AS THOSE PROVIDED BY

2 TGS DIVISION AND ONE GAS BE REQUIRED IF THE PROPOSED CGSA

3 WERE A STAND-ALONE BUSINESS ENTITY?

4 A. Yes, these services would need to be provided even if the proposed CGSA was a 5 standalone entity. Having these services performed centrally is efficient and allows 6 for economies of scale and for the costs of those services to be spread across the 7 business entities and service areas for which the services are provided. These 8 services are necessary for the operation of any gas utility business, regardless of 9 whether the service is performed centrally or on a decentralized basis at the service area level. 10

Q. PLEASE DESCRIBE THE HISTORY OF THE DISTRIGAS ALLOCATION 12 METHODOLOGY.

The Distrigas method was first approved by the Federal Energy Regulatory Commission ("FERC") in a rate proceeding for a natural gas transmission company, Distrigas of Massachusetts Corporation.³ The formula used by Distrigas of Massachusetts Corporation was a slight modification of the old Massachusetts formula (a three-part formula consisting of gross plant, gross revenues and labor) which, prior to the acceptance of the Distrigas method, was widely accepted by numerous regulatory agencies across the country. In its opinion, FERC accepted the Modified Distrigas method (a three-part formula consisting of gross plant, net revenues and labor) as a reasonable and acceptable methodology for allocating costs for ratemaking purposes.

11

13

14

15

16

17

18

19

20

21

22

A.

³ Distrigas of Mass. Corp., Opinion No. 291, 41 FERC 61, 205 (1987).

Q. PLEASE EXPLAIN HOW COSTS ARE ALLOCATED USING THE DISTRIGAS METHOD. A. The Distrigas Method ensures that ONE Gas allocates Corporate costs to each

The Distrigas Method ensures that ONE Gas allocates Corporate costs to each business entity on a consistent basis applying the same cost-causation principles and methodology. This method uses a three-factor formula comprised of: (1) gross plant and investments; (2) operating income (income before interest expense and income taxes); and (3) labor expense. As with the Modified Distrigas method, the factors are individually calculated and then a simple average is calculated using the three component percentages.

Distrigas utilizes gross plant and investments rather than just gross plant in the event that ONE Gas invests in business(es) that are not directly operated by ONE Gas.⁴ These modifications further refine the Distrigas method to fairly and reasonably allocate the costs to the ONE Gas business entities, including TGS.

14 Q. HAS THE SAME COST ALLOCATION METHODOLOGY BEEN 15 APPLIED IN PRIOR ONE GAS PROCEEDINGS?

Yes, it has. This methodology has been used since 1994 to allocate Corporate costs. It is important to ONE Gas to have a common allocation methodology approved by the regulatory agencies in the states in which it operates to ensure that the method is fair to each of the ONE Gas business entities and their customers. This methodology was applied in the Company's Gulf Coast Service Area in GUD No. 10488; West Texas Service Area in GUD No. 10506; Central Texas Service Area in GUD No. 10526; Rio Grande Valley Service Area in GUD No. 10656;

A.

⁴ Currently, the Company has no investment in businesses that are not operated by ONE Gas. ONE Gas also uses operating income rather than net revenues as an allocator to eliminate the cost of gas component.

| 1 | | North Texas Service Area in GUD No. 10739; and the Borger-Skellytown Service |
|----|----|---|
| 2 | | Area in GUD No. 10766. |
| 3 | | Additionally, the Oklahoma Corporation Commission ("OCC") has also |
| 4 | | approved the use of the cost allocation method used by ONE Gas in prior rate cases. |
| 5 | | Importantly, both the Commission ⁵ and the OCC ⁶ have approved ONE Gas' |
| 6 | | refinement of the Modified Distrigas allocation method. This methodology is also |
| 7 | | currently used in Kansas. The Kansas Corporation Commission ("KCC") accepted |
| 8 | | ONEOK's allocation methodology in a settled 2005 Kansas Gas Service rate case ⁷ |
| 9 | | and ONE Gas' allocation methodology in the 2016 Kansas Gas Service rate case.8 |
| 10 | Q. | IS ONE GAS' COST ALLOCATION METHODOLOGY A REASONABLE |
| 11 | | METHODOLOGY TO ALLOCATE CORPORATE COSTS? |
| 12 | A. | Yes, it is. As mentioned above, ONE Gas' cost allocation methodology allows |
| 13 | | ONE Gas to allocate Corporate costs to each of its business entities on a consistent |
| 14 | | basis by applying the same cost-causation principles and methodologies. |
| 15 | | Furthermore, this methodology has been previously approved as a reasonable |
| | | |

Δ

⁵ Appeal of Texas Gas Service Company from the Actions of the Cities of Lockhart, Luling, Cuero, Gonzales, Nixon, Shiner and Yoakum; and, Statement of Intent Filed to Increase Rates in the Unincorporated Areas of the South Texas Service Area, GUD No. 9770, Final Order at FoF 36 (Apr. 24, 2008); Petition of the De Novo Review of the Denial of the Statements of Intent Filed by Texas Gas Service Company by the Cities of El Paso, Anthony, Clint, Horizon City, Socorro, and Village of Vinton, Texas, GUD No. 9988, Final Order at FoF 23-24 (Dec. 14, 2010).

⁶ In the Matter of the Application of Oklahoma Natural Gas Company, a Division of ONEOK, Inc., for Review and Change or Modification in its Rates, Charges, Tariffs and Terms and Conditions of Service, Cause No. PUD 200400610, Order No. 512287 at 113 of 134 (Oct. 4, 2005).

⁷ In the Matter of the Application of Kansas Gas Service, a Division of ONEOK, Inc., for Adjustments of Its Natural Gas Service in the State of Kansas, Docket No. 06-KGSG-1209-RTS, Order Granting Joint Motion and Approving Stipulated Settlement Agreement (Nov. 16, 2006).

⁸ In the Matter of the Application of Kansas Gas Service, a Division of ONE Gas, Inc., for Adjustment of its Natural Gas Rates in the State of Kansas, Docket No. 16-KGSG-491-RTS, Order Approving Unanimous Settlement Agreement (Nov. 29, 2016).

| 1 | | means of allocating Corporate costs by this Commission, the FERC, the KCC, and |
|----|----|---|
| 2 | | the OCC. |
| 3 | | IV. OPERATING EXPENSE ADJUSTMENTS |
| 4 | Q. | WHAT IS SHOWN ON WORKPAPER G.A.2.A? |
| 5 | A. | The Shared Services per book amount, including Distrigas, that I am supporting |
| 6 | | totals \$77,927,259, of which \$36,230,798 is allocated to the proposed CGSA. |
| 7 | | Workpaper G.a.2.a provides a summary showing the TGS allocated test year |
| 8 | | amount along with an O&M expense factor calculation applied to the adjustments. |
| 9 | Q. | DESCRIBE THE MISCELLANEOUS ADJUSTMENTS SHOWN ON |
| 10 | | SCHEDULE G-9. |
| 11 | A. | Schedule G-9 contains miscellaneous adjustments to remove expenses not currently |
| 12 | | allowed for regulatory recovery such as civic activities, sponsorships, charitable |
| 13 | | contributions, and legislative activities. Additional adjustments include the removal |
| 14 | | of royalty fees, inclusion of certain telecommunication activity, and an adjustment |
| 15 | | to account for the known and measurable change in insurance costs. |
| 16 | Q. | DESCRIBE THE RENT ADJUSTMENT SHOWN ON SCHEDULE G-10. |
| 17 | A. | Schedule G-10 annualizes test year expense for rent, common area maintenance, |
| 18 | | and parking costs to reflect known and measurable changes. These adjustments are |
| 19 | | consistent with the methodology used in prior statements of intent and with prior |
| 20 | | Commission decisions. |
| 21 | Q. | DESCRIBE THE ADJUSTMENT TO INJURIES AND DAMAGES |
| 22 | | EXPENSE SHOWN IN SCHEDULE G-13. |
| 23 | A. | The injuries and damages expense on Schedule G-13 consists of TGS's workers' |
| 24 | | compensation, auto liability, and general liability insurance paid claims. These |

| 1 | | costs fall within TGS's self-insurance limitation and therefore are not recovered |
|----|----|---|
| 2 | | from TGS's insurance provider. The adjusted expense on Schedule G-13 was first |
| 3 | | computed by averaging all claims paid for the period of July 2015 through June |
| 4 | | 2019 (4 years). Next, injuries and damages expense for the twelve months ended |
| 5 | | June 2019 was subtracted from the average claims paid (4-year average) to |
| 6 | | determine the additional adjustment to test year expense. Mr. Smith testifies |
| 7 | | regarding UIC and the self-insurance limitation. |
| 8 | Q. | HAS THE COMMISSION PREVIOUSLY APPROVED THE |
| 9 | | NORMALIZATION OF INJURIES AND DAMAGES EXPENSE OVER A |
| 10 | | FOUR-YEAR PERIOD? |
| 11 | A. | Yes, in GUD Nos. 9988 and 10506, the Commission found that it is reasonable to |
| 12 | | normalize this expense over a four-year period.9 This is the same treatment the |
| 13 | | Company followed in GUD Nos. 10488, 10526, 10656, 10739, and 10766. 10 |

.

⁹ GUD No. 9988, Final Order at FoF No. 26 (Dec. 14, 2010); Statement of Intent of Texas Gas Service Company, a Division of ONE Gas, Inc., to Increase Gas Utility Rates Within the Unincorporated Areas of the El Paso Service Area (EPSA), Permian Service Area (PSA), and Dell City Service Area (DCSA), GUD No. 10506, consol., Final Order at FoF Nos. 92 and 93 (Sept. 27, 2016).

¹⁰ Statement of Intent of Texas Gas Service Company, a Division of ONE Gas, Inc., to Increase Gas Utility Rates Within the Unincorporated Areas of the Galveston Service Area (GSA) and South Jefferson County Service Area (SJCSA), GUD No. 10488, Final Order (May 3, 2016); Statement of Intent of Texas Gas Service Company (TGS), a Division of ONE Gas, Inc., to Change Gas Utility Rates Within the Unincorporated Areas of the Central Texas Service Area (CTSA) and South Texas Service Area (STSA), GUD No. 10526, Final Order (Nov. 15, 2016); Statement of Intent of Texas Gas Service Company, a Division of ONE Gas, Inc., to Increase Gas Utility Rates Within the Unincorporated Areas of the Rio Grande Valley Service Area, GUD No. 10656, Final Order (March 20, 2018), Statement of Intent of Texas Gas Service, a Division of ONE Gas, Inc., to Increase Gas Utility Rates Within the Unincorporated Areas of the North Texas Service Area, GUD No. 10739, Final Order (Nov. 13, 2018); and Statement of Intent of Texas Gas Service, a Division of ONE Gas, Inc., to Change Gas Utility Rates Within the Unincorporated Areas of the Borger-Skellytown Service Area, GUD No. 10766, Final Order (Feb. 5, 2019).

| 1 | Q. | PLEASE EXPLAIN THE DISTRIGAS ALLOCATION ADJUSTMENT |
|----|----|---|
| 2 | | REFLECTED ON SCHEDULE G-21. |
| 3 | A. | Schedule G-21 and Workpaper G-21.a provide the monthly per book Distrigas |
| 4 | | allocation to TGS, along with the factors used to calculate the allocation |
| 5 | | percentages. An adjustment to reflect the known and measurable change in the |
| 6 | | Distrigas allocation factor as of the third quarter of 2019 is also included on |
| 7 | | Schedule G-21. This adjustment is consistent with the methodology used in prior |
| 8 | | statements of intent and with prior Commission decisions. |
| 9 | Q. | PLEASE IDENTIFY THE SHARED SERVICES CAUSAL ALLOCATION |

CORPORATE ALLOCATION MANUAL

Revised /December 1, 2019 Corporate Accounting Department

The Corporate Allocation Manual provides documentation for current practices used by ONE Gas, Inc. (ONE Gas) for allocation of corporate administrative costs to ONE Gas business entities. A business entity is defined as a division or subsidiary of ONE Gas. Corporate administrative costs that are incurred for the direct benefit of one specific business entity, known as direct costs, are not addressed in this manual because the objective and scope of this manual pertains to general charges that cannot be assigned to a single operating business entity.

ONE Gas maintains a fully distributed cost model that provides a reasonable and justifiable method of cost assignment, so that each business entity receives its proportionate share of corporate administrative costs and prevents subsidization.

Proper classification of costs is the responsibility of each employee and his or her supervisor when preparing, approving, and processing any accounting document (invoices, amortizations, journal entries, etc.). The classification of costs includes assigning the appropriate account coding string as defined in our Classification of Accounts Manual (which includes codes for company, cost center, natural account, expense indicator and RFU) when processing the transaction. The account coding string is the basis upon which costs are identified as costs to be allocated in our process.

Three-Step Allocation Process

The application of our fully distributed cost allocations occurs through a "three-step" allocation method. The first step begins with the premise that to the extent practical, direct costs specifically attributed to a business entity are charged directly to that business entity. In the second step, indirect costs that are significant in amount, but which cannot be charged directly are allocated to business entities on the basis of a causal relationship.

The causal relationships are specific measurements based on the type of cost, which can be a measure of participation level, activity level, output level, or resource consumption. In the third step, any remaining costs, which cannot be charged directly or associated with an identifiable causal relationship, are allocated to business entities using the ONE Gas's Modified Distrigas Allocation methodology (ONE Gas Distrigas).

ONE GAS Distrigas Methodology

The Distrigas Cost Allocation Methodology (Distrigas Method) was first approved by the Federal Energy Regulatory Commission (FERC) in a rate proceeding for a natural gas transmission company, Distrigas of Massachusetts, L.L.C. The Distrigas formula is a slight modification of the Massachusetts Allocation Method (a three part formula consisting of gross plant, gross revenues and payroll) which, prior to the acceptance of the Distrigas

Texas Gas Service Company, a Division of ONE Gas, Inc. CGSA ISOS RTCS TYE June 30, 2019
Updated for Known and Measurable Changes Through September 30, 2019

CORPORATE ALLOCATION MANUAL

Revised /December 1, 2019 Corporate Accounting Department

formula, was widely accepted by numerous regulatory agencies across the country as a just and reasonable method of allocating corporate overhead and other costs. In its preceding at the FERC, Distrigas of Massachusetts, L.L.C. argued that the Massachusetts formula was flawed in that the formula over-allocated costs to utilities due to its inclusion of the cost of fuel in gross revenues. This had the effect of inflating the allocation of costs to utility operations which benefitted non-utility operations. The FERC agreed and accepted the modified version of the formula, which is generally known as the Distrigas Method, as a reasonable and acceptable methodology for allocating costs for ratemaking purposes

ONE Gas, Inc. has used the Distrigas Method as the basis for its methodology to allocate corporate administrative costs since 1994. It is important to ONE Gas to have a common allocation methodology that is broadly accepted by our regulatory authorities and that results in a justifiable and reasonable allocation of corporate administrative costs to each of ONE Gas's business entities.

The ONE Gas Distrigas methodology uses a three factor formula comprised of the average of gross plant and investments, net operating income and labor expenses (excluding contract labor).

To calculate the overall allocation factor for each business entity, the three allocation factor amounts are determined for each business entity and calculated as a percentage of the consolidated total. In cases when a business entity has an operating loss, a factor of zero is used for the operating income allocation factor. The three component allocation factors for each business entity are then combined using a simple average to derive the overall allocation factor.

ONE Gas periodically reviews its existing allocation methodologies to ensure that costs are being appropriately allocated. ONE Gas's Distrigas allocation factors are updated quarterly or when significant changes to its corporate structure occur, such as acquisitions, divestitures, or corporate restructuring.

ONE Gas uses the following methodology to allocate costs when costs cannot be charged directly or allocated using a causal relationship to a business entity. The allocation methodology allows the allocation of costs to the business entities that receive the benefit of the administrative costs. The allocation methodology is described as follows:

CORPORATE ALLOCATION MANUAL

Revised /December 1, 2019 Corporate Accounting Department

| Methodology Name | Cost Center | Description |
|---------------------|----------------|---|
| OGS- | 1007 | Calculates allocation percentages using |
| Distrigas | | the respective allocation factors for the business entities of ONE Gas's business entities including Oklahoma Natural Gas, Kansas Gas Service, Texas Gas Service, and Utility Insurance Company |

Appendix A provides an example calculation of ONE Gas's Distrigas methodology.

Allocated Costs

Costs to be allocated can be aggregated in the following general categories:

- Executive
- Human Resources (HR)
- Information Technology (IT)
- Finance and Accounting
- General Counsel
- Corporate Communications
- Corporate Services (includes Environmental Health & Safety, Engineering, and Resource Management)
- Customer Service
- Other

The costs allocated in these general categories are allocated in accordance with our "three step allocation methodology" described above. The following sections provide a general description of the types of costs allocated in each general category and the method in which those costs are allocated.

Executive

The executive organization provides leadership and strategic direction for ONE Gas's business activities. Examples of costs incurred in this area are related to salaries and expenses of the President and Chief Executive Officer, his or her direct reports, and corporate officers with responsibility for corporate administrative functions that are not assigned to a specific business entity. These costs are primarily allocated through the OGS-Distrigas methodology.

CORPORATE ALLOCATION MANUAL

Revised /December 1, 2019 Corporate Accounting Department

Human Resources

The HR organization supports our various business entities and the employees of ONE Gas by developing and administering plans and processes related to compensation, employee benefits, employee development and payroll. Typical examples of costs incurred in this area are related to:

| Types of Costs | Allocation Methodology |
|--|---|
| Administrative fees for all defined plans, health & welfare and retirement plans | 1. These costs are allocated using the causal relationship of plan participant count or employee headcount for each respective business entity. 2. Cost allocated to corporate departments (Executive, HR, Accounting, IT, etc.) are allocated to the business entities through the OGS-Distrigas methodology. |
| Health and welfare benefits for active employees | 1. These costs are allocated using the causal relationship of employee headcount or plan participant count for each respective business entity. 2. Cost allocated to corporate departments (Executive, HR, Accounting, IT, etc.) are allocated to the business entities through the OGS-Distrigas methodology. |
| Retirement benefits for active and retired employees | These costs are allocated using the causal relationship |

CORPORATE ALLOCATION MANUAL

Revised /December 1, 2019 Corporate Accounting Department

| | of plan participant count for each respective business entity where the plan participant works at each measurement date or where the plan participant worked immediately prior to retirement. 2. Plan participant or retiree costs allocated to corporate departments (Executive, HR, Accounting, IT, etc.) are allocated to the business entities through the OGS-Distrigas methodology. |
|--|--|
| Workforce and professional development support and training programs for all active employees | These costs are allocated using the causal relationship of employee headcount Allocated through the OGS-Distrigas methodology. |
| HR administration and financial services support, including compensation, payroll and benefits accounting and IT support | These costs are allocated using the causal relationship of employee headcount for each respective business entity. Cost allocated to corporate departments (Executive, HR, Accounting, IT, etc.) are allocated to the business entities through the OGS-Distrigas methodology. |

Information Technology

The IT organization supports our various business entities by developing and administering plans and processes related to technology solutions and security to facilitate day to day business activities. Typical examples of costs incurred in this area are related to:

CORPORATE ALLOCATION MANUAL

| Types of Costs | Allocation Methodology |
|--|--|
| IT administrative functions such as | Allocated through the OGS-Distrigas |
| administration, financial planning, accounting and reporting | methodology |
| Disaster recovery, data backup and recovery, change management and problem management | Allocated through the OGS-Distrigas methodology. |
| Websites, intranet, business intelligence, legal applications, imaging and scanning, and document management technologies | Allocated through the OGS-Distrigas methodology. |
| ONE Gas customer billing system | Allocated using the causal relationship of customer count for each of the business entities. |
| Data center and support of all of the company technology | Allocated through the OGS- Distrigas methodology. |
| Cell phones, local and long-distance telephone service, pagers and internet expenses | Charged directly to the business entity receiving benefit of the service. Costs not attributable to a specific business entity or costs charged directly to corporate departments (Executive, HR, Accounting, IT, etc.) are allocated to the business entities through the OGS-Distrigas methodology. |
| Financial and HR systems and related systems such as fixed asset accounting, project estimation and accounting, financial reporting and HR reporting | Allocated through the OGS-Distrigas methodology. |
| Supporting the operational accounting systems and the measurement systems used for non-residential gas meters | Charged directly to the business entity that is providing service to the non- residential gas meter. Costs not attributable to a specific business entity are |

Finance and Accounting

The Finance and accounting organization supports our various business entities by administering processes related to corporate accounting, financial reporting, tax, credit, risk and insurance, internal audit, financial planning and business development. Typical examples of costs incurred in this area are related to payroll and business expenses associated with departments responsible for:

| Types of Costs | Allocation Methodology |
|---|---|
| Corporate general accounting and | Allocated through the OGS- |
| consolidations, corporate financial | Distrigas methodology. |
| planning and business development | |
| SEC and external reporting for ONE | Allocated through the OGS- Distrigas |
| Gas | methodology. |
| Accounts payable | Allocated using a causal relationship derived from an internally developed analysis of invoice processing volume by business entity. Costs not attributable to a specific business entity or costs charged directly to corporate departments (Executive, HR, Accounting, IT, etc.) are allocated to the business entities through the OGS-Distrigas methodology. |
| Investor relations | Allocated through the OGS-Distrigas methodology. |
| Treasury Services | Allocated through the OGS-Distrigas methodology. |
| Federal and state income tax, ad valorem, sales & use tax and franchise tax filings | Taxes incurred are charged directly to the business entity incurring the tax obligation. General administrative costs, including labor and benefits are charged directly to the business entity receiving benefit of the service. |

CORPORATE ALLOCATION MANUAL

| Maintaining long-term financing and short-term working capital | Costs not attributable to a specific business entity or costs charged directly to corporate departments (Executive, HR, Accounting, IT, etc.) are allocated to the business entities through the OGS-Distrigas methodology. General administrative costs associated with our finance department are allocated through the |
|--|--|
| Risk mitigation and insurance | OGS-Distrigas methodology. 1. Labor, benefits and administrative expenses associated with administration of our insurance programs are allocated to the business entities through the OGS- Distrigas methodology. 2. Costs associated with specific insurance programs are allocated as follows: a. Primary & Excess Workers' Compensation: Allocated using the causal relationship of employee headcount for each respective business entity. b. Vehicle: Allocated using the causal relationship of vehicle count for each respective business entity. c. Excess Liability: Allocated through the OGS-Distrigas methodology. d. Directors & Officers Liability: Allocated through the OGS-Distrigas. e. Property and Terrorism: Allocated using the causal relationship of property values for each respective business entity. |

CORPORATE ALLOCATION MANUAL

| Internal audit services (which includes our costs related to compliance with the Sarbanes-Oxley Act of 2002) | f. Various others (e.g. Fiduciary Liability, Blanket Crime, Mail and Transit, etc.): Allocated through the OGS- Distrigas methodology Costs are allocated to the business entities through the OGS-Distrigas methodology. |
|--|---|
| Independent auditor fees | Charged directly to the business entity being audited. Costs not attributable to a specific business entity or costs charged directly to corporate departments (Executive, HR, Accounting, IT, etc.) are allocated to the business entities through the OGS-Distrigas methodology. |
| Property Accounting - centralized accounting for the property, plant & equipment | Labor and benefits are charged directly to each business entity for which the employee has accounting responsibility. General and administrative supplies and expenses are allocated based on the causal relationship of gross property, plant, and equipment values. |
| Billing Control - centralized accounting for the customer billing process | Allocated to the business entity based on the causal relationship of customer count. |

General Counsel

The general counsel organization supports our various business entities by administering processes related to legal aspects of our day-to-day business activities. Typical examples of costs incurred in this area are related payroll and business expenses (including third party legal costs) associated with departments responsible for:

CORPORATE ALLOCATION MANUAL

| Types of Costs | Allocation Methodology |
|--|---|
| Third-party damages and workers' compensation claims | Charged directly to the business entity incurring the damages or workers' compensation claim. |
| | Costs not attributable to a specific business entity or costs charged directly to corporate departments (Executive, HR, Accounting, IT, etc.) |
| | are allocated to the business entities through the OGS-Distrigas methodology. |
| Commercial contracts | Charged directly to the business entity named in the commercial contract. |
| | Costs not attributable to a specific business entity or costs charged |
| | directly to corporate departments (Executive, HR, Accounting, IT, etc.) are allocated to the business entities |
| | through the OGS-Distrigas methodology. |
| Regulatory affairs | Costs are allocated to the business entities through the OGS-Distrigas methodology. |

AFFIDAVIT OF ANTHONY BROWN

BEFORE ME, the undersigned authority, on this day personally appeared Anthony Brown who having been placed under oath by me did depose as follows:

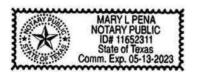

- 1. "My name is Anthony Brown. I am over the age of eighteen (18) and fully competent to make this affidavit. I am employed as Rates Specialist for Texas Gas Service Company, a division of ONE Gas, Inc. The facts stated herein are true and correct based upon my personal knowledge.
- 2. I have prepared the foregoing Direct Testimony and the information contained in this document is true and correct to the best of my knowledge."

Further affiant sayeth not.

Anthony Brown

SUBSCRIBED AND SWORN TO BEFORE ME by the said Anthony Brown on this

25th day of November, 2019.

| 1 | | DIRECT TESTIMONY OF ALLISON N. EDWARDS |
|----|----|---|
| 2 | | I. <u>INTRODUCTION AND QUALIFICATIONS</u> |
| 3 | Q. | PLEASE STATE YOUR NAME AND BUSINESS ADDRESS. |
| 4 | A. | My name is Allison N. Edwards, and my business address is 15 East Fifth Street, |
| 5 | | Tulsa, Oklahoma 74103. |
| 6 | Q. | BY WHOM ARE YOU EMPLOYED AND IN WHAT CAPACITY? |
| 7 | A. | I am employed by ONE Gas, Inc. ("ONE Gas") as a Manager of Rates and |
| 8 | | Regulatory Analysis. |
| 9 | Q. | PLEASE DESCRIBE YOUR EDUCATIONAL BACKGROUND AND |
| 10 | | PROFESSIONAL EXPERIENCE. |
| 11 | A. | I am a licensed Certified Public Accountant with a Bachelor of Science degree in |
| 12 | | Finance and a Master of Science degree in Accounting and Financial Analysis. I |
| 13 | | began my employment with ONEOK, Inc. ("ONEOK") in November 2011 as a |
| 14 | | Rates Analyst I and retained that position with ONE Gas after its separation from |
| 15 | | ONEOK. In September 2015, I was promoted to a Rates Analyst II. In September |
| 16 | | 2016, I accepted a position as a Tax Analyst II in the Tax Accounting Department. |
| 17 | | I began serving in my current position as a Manager of Rates and Regulatory |
| 18 | | Analysis in April 2018. Prior to my employment at ONEOK, I worked as a Cost |
| 19 | | Analyst at BOK Financial ("BOKF") from June 2009 to November 2011. From |
| 20 | | September 2005 to June 2009, I worked as a Senior Banker at Bank of Oklahoma |
| 21 | | (a subsidiary of BOKF). |

| 1 | Q. | PLEASE DISCUSS YOUR DUTIES AND RESPONSIBILITIES AS A |
|----|----|---|
| 2 | | MANAGER OF RATES AND REGULATORY ANALYSIS. |
| 3 | A. | My responsibilities include assisting the Divisions of ONE Gas, including Texas |
| 4 | | Gas Service Company ("TGS" or the "Company"), with the review and analysis of |
| 5 | | company financial data and records and preparation of and participation in rate |
| 6 | | cases and other regulatory filings and related activities. |
| 7 | Q. | HAVE YOU PREVIOUSLY TESTIFIED BEFORE ANY REGULATORY |
| 8 | | COMMISSIONS? |
| 9 | A. | Yes, I have filed testimony in proceedings before the Oklahoma Corporation |
| 10 | | Commission, Kansas Corporation Commission, and the Railroad Commission of |
| 11 | | Texas ("Commission") regarding the same general subject matters that I am |
| 12 | | testifying to in this case. A list of the dockets in which I have testified is provided |
| 13 | | as Exhibit ANE-1. |
| 14 | Q. | WAS THIS TESTIMONY PREPARED BY YOU OR UNDER YOUR |
| 15 | | DIRECT SUPERVISION? |
| 16 | A. | Yes, it was. |
| 17 | Q. | WHAT IS THE PURPOSE OF YOUR TESTIMONY? |
| 18 | A. | My testimony provides the analysis and calculations to support the Company's |
| 19 | | proposed adjustments to Schedule C Plant and Workpaper G-9.c to recover meal |
| 20 | | costs of \$25 or less, exclusive of taxes and the tip amount, and some hotel stays |
| 21 | | greater than \$150 per night, exclusive of taxes. |
| 22 | Q. | WHAT SCHEDULES ARE YOU SUPPORTING? |

I am supporting the following schedules:

23

A.

| Schedule C Plant | Co-Sponsor with Ms. Guerra and Ms. Mindy Edwards |
|--|--|
| Schedule G-9 Shared Services and Distrigas | Co-Sponsor with Mr. Brown and Ms. Michels |

1 Q. WERE THESE SCHEDULES PREPARED BY YOU OR UNDER YOUR

- 2 **SUPERVISION?**
- 3 A. Yes, they were.
- 4 Q. ARE YOU SPONSORING ANY EXHIBITS IN CONNECTION WITH
- 5 **YOUR TESTIMONY?**
- 6 A. Yes, I sponsor the exhibits listed in the table of contents.
- 7 Q. ARE ANY OF THE COSTS THAT YOU SPONSOR ALLOCATED FROM
- 8 ONE GAS OR THE TGS DIVISION?
- 9 A. Yes. The Corporate and TGS Division meal and hotel costs that I support in my
- testimony are all related to centralized services provided to ONE Gas' operating
- divisions or TGS service areas, including the proposed Central-Gulf Service Area
- 12 ("CGSA"). These centralized services are provided more efficiently at the
- 13 Corporate or Division level and are considered "shared service" costs because the
- services provide support to all ONE Gas' Operating Divisions or TGS service areas.
- 15 Company witness Anthony Brown discusses in his testimony the methodology and
- percentages used to allocate these costs to the proposed CGSA.
- 17 Q. DO YOU SPONSOR ANY DIRECT PROPOSED CGSA COSTS?
- 18 A. Yes. The meal and hotel costs are coded directly to the proposed CGSA.

1 II. MEAL AND HOTEL ADJUSTMENT

2 Q. WHERE ARE THE PROPOSED MEAL AND HOTEL ADJUSTMENTS

3 REFLECTED IN THIS STATEMENT OF INTENT?

4 A. The Company's proposed adjustments to meal and hotel costs are provided in Table

5 1 below:

| Table 1 | |
|-----------------------------------|------------------------------|
| Plant Workpapers | Expense Workpapers |
| Workpaper C.a. Direct Plant | Workpaper G-9.c Meal & Hotel |
| Workpaper C.b TGS Division Plant | |
| Workpaper C.c Corporate Plant | |
| Workpaper C-1.a Direct CCNC | |
| Workpaper C-1.b TGS Division CCNC | |
| Workpaper C-1.c Corporate CCNC | |

6 Q. PLEASE DESCRIBE THE ADJUSTMENTS IN THE PLANT

7 WORKPAPERS LISTED IN TABLE 1.

exclusive of taxes.¹

- A. In addition to the plant adjustments discussed in the direct testimony of Company witnesses Gracie Guerra and Mindy R. Edwards, the plant workpapers listed in Table 1 provide the plant-related amounts of meal, hotel, alcohol, and spouse costs removed from the filing. As discussed in more detail below, the Company included meals under \$25 per person, exclusive of taxes and tip amount, hotel stays under \$150 per night, exclusive of taxes, and some hotel stays greater than \$150 per night,
- 15 O. PLEASE DESCRIBE THE ADJUSTMENTS IN WORKPAPER G-9.C.
- 16 A. Workpaper G-9.c includes the expense amounts of meal, hotel, alcohol, and spouse 17 costs removed from the filing. For purposes of the adjustment proposed in this

٠

14

¹ The Company's Gas Reliability Infrastructure Program Filings have removed meal and hotel costs greater than \$25 per person, per meal and \$150 per night, exclusive of taxes.

filing, the Company has removed all alcohol and spouse costs and certain meal and hotel costs, as I describe further below.

Q. WHAT ADJUSTMENT IS PROPOSED FOR MEAL AND HOTEL COSTS

4 IN THE TEST YEAR?

3

5 A. Following a review of employee meal and hotel costs incurred during the test year, 6 the Company proposes an adjustment of \$(16,401) to the test year amount. Table 7 2, below, provides the amount of per book unadjusted meal and hotel costs, the 8 Company's proposed adjustment, and the adjusted meal and hotel costs incurred 9 during the test year and included in the revenue requirement calculation. The 10 proposed adjustments, excluding some hotel stays greater than \$150 per night, 11 exclusive of taxes, are detailed in the Plant Workpapers and Expense Workpaper 12 G-9.c described above.

| Table 2 | | | |
|--|---------------------|--------------------------------------|--|
| Meal and Hotel Costs Allocated to Proposed CGSA | Per Book Unadjusted | Proposed Adjustment for Test Year | Adjusted Amount Included in Revenue Requirement Calculation |
| Corporate Plant and CCNC | \$14,124 | \$(179) | \$13,945 |
| Shared Services Plant and CCNC | \$22,505 | \$(508) | \$21,997 |
| Direct Plant and CCNC | \$3,343 | \$(119) | \$3,224 |
| Plant Subtotal | \$39,972 | \$(806) | \$39,166 |
| Corporate Expense | \$136,867 | \$(12,072) | \$124,795 |
| Shared Services Expense | \$166,424 | \$(2,635) | \$163,789 |
| Direct Expense | \$243,191 | \$(888) | \$242,303 |
| Expense Subtotal | \$546,482 | \$(15,595) | \$530,887 |
| Grand Total | \$586,454 | \$(16,401) | \$570,053 |

13 Q. PLEASE DESCRIBE THE REVIEW OF MEAL AND HOTEL COSTS YOU

14 **MENTIONED ABOVE.**

15

16

A. In preparation for the adjustment proposed in this statement of intent, the Company began a review of test year meal and hotel costs ("Review") in January 2019. To

conduct its Review, the Company developed an Excel spreadsheet beginning with June 30, 2018 per book, unadjusted credit card charges downloaded from ONE Gas' accounts payable system. Each month, the spreadsheet was updated with current credit card charges from the accounts payable system after monthly accounting close until the spreadsheet contained data through the end of the test year period, or June 30, 2019. This manual process allowed the Company to organize and evaluate the reasonableness of all meal costs greater than \$25 per person, per meal, exclusive of taxes and tips, and hotel costs greater than \$150 per night, exclusive of taxes.

A.

10 Q. HOW DID THE COMPANY CALCULATE THE AMOUNT OF MEAL 11 COSTS INCLUDED IN THE REVENUE REQUIREMENT?

After analyzing the data from the Review, the Company concluded, as shown in Exhibit ANE-2, that approximately 90 percent of the Company's test year meal costs were below \$25 per person, per meal, exclusive of tax and tip amounts. The remaining approximately 10 percent of meal costs were evaluated for accuracy, compliance with the Business Travel and Expenditure Policy, and reasonableness. Consistent with the Company's request in this statement of intent related to meal costs and as described by Company witness David Scalf, meal costs greater than \$25 per person, per meal, exclusive of taxes and tip amounts were removed. The resulting amount the Company proposes for recovery in the revenue requirement includes meal costs \$25 or less, per person, per meal, exclusive of both taxes and the tip amount. This adjustment is provided in Plant Schedule C and Workpaper G-9.c.

1 Q. HOW DID THE COMPANY CALCULATE THE AMOUNT OF HOTEL 2 COSTS INCLUDED IN THE REVENUE REQUIREMENT?

3 A. Using the Review data, the Company first identified hotel transactions that were 4 under \$150 per night, exclusive of taxes, and determined that those transactions 5 represented approximately 73 percent of the test year hotel costs, as shown on 6 Exhibit ANE-2. The Company conducted a line-by-line review of the remaining 7 hotel stays to evaluate the hotel transactions for accuracy, reasonableness of the 8 business purpose, compliance with the Business Travel and Expenditure Policy, 9 and geographical location. In some cases, the Company requested additional 10 information from the employee responsible for the transaction. As the Company 11 evaluated hotel stays over \$150 per night, exclusive of taxes further, it determined 12 that geographical location was a recurring factor.

Q. WHAT AMOUNT OF HOTEL COSTS GREATER THAN \$150 PER NIGHT, EXCLUSIVE OF TAXES, ARE INCLUDED IN THE REVENUE REQUIREMENT?

16

17

18

19

20

21

22

23

24

A.

Approximately \$34,000 of hotel costs greater than \$150 per night, exclusive of taxes, are included in the revenue requirement calculation, as shown in Exhibit ANE-2. Over 27% of these costs are from hotel stays in Texas with the majority of the 27% incurred from hotels stays in Austin, Permian Basin, El Paso, Galveston, and Port Arthur, as shown in Exhibit ANE-2. Employee duties necessitating the travel range from line repair, installation and replacement to corporate and division support service and employee management activities. In fact, the analysis confirms that TGS employee job responsibilities are not necessarily restricted to one geographical area. Many employees, especially those in management or Corporate

| 1 | | and Division support service roles, have responsibilities that span the entire TGS |
|----|----|---|
| 2 | | or ONE Gas footprint. |
| 3 | Q. | ARE THERE ANY COST DRIVERS THE COMPANY IDENTIFIED FOR |
| 4 | | THOSE HIGHER COST HOTELS IN THE LOCATIONS MENTIONED |
| 5 | | ABOVE? |
| 6 | A. | Yes. Based on the Company's experience, certain market factors in Austin, the |
| 7 | | Permian Basin region, El Paso, Galveston and Port Arthur affect the nightly rate of |
| 8 | | hotels, resulting in hotel stays over \$150 per night, exclusive of taxes. |
| 9 | | In the Permian Basin, for instance, hotel rooms have become more difficult |
| 10 | | to obtain as oil and gas activity in the region has gradually increased over the past |
| 11 | | decade. The same is true in Port Arthur due to refinery expansions in the area. |
| 12 | | With respect to Austin, El Paso and Galveston, a primary driver of increased costs |
| 13 | | appears to be competing events driving tourism. For instance, when employees |
| 14 | | must travel to Austin and an event or major convention is on-going, obtaining a |
| 15 | | room for less than \$150 is often not possible. |
| 16 | Q. | IS THE MEAL AND HOTEL AMOUNT REFLECTED IN THE |
| 17 | | COMPANY'S FILING REASONABLE? |
| 18 | A. | Yes. The Company spent approximately nine months conducting a detailed, |
| 19 | | manual review of meal and hotel costs and evaluating their reasonableness to |
| 20 | | support the Company's request to recover these costs. Additionally, from a |
| 21 | | Company policy perspective, Mr. Scalf discusses revisions to the Business Travel |
| 22 | | and Expenditure Policy to ensure the overall reasonableness of meal and hotel costs. |
| 23 | Q. | DOES THIS CONCLUDE YOUR DIRECT TESTIMONY? |
| 24 | A | Yes it does |

1 DIRECT TESTIMONY OF STACEY R. BORGSTADT 2 I. INTRODUCTION AND QUALIFICATIONS 3 Q. PLEASE STATE YOUR NAME AND BUSINESS ADDRESS. 4 A. My name is Stacey R. Borgstadt. My business address is 15 East Fifth Street, Tulsa, 5 Oklahoma. 6 0. BY WHOM ARE YOU EMPLOYED AND IN WHAT CAPACITY? 7 A. I am employed by ONE Gas, Inc. ("ONE Gas") as a Manager of Rates and 8 Regulatory Analysis. 9 PLEASE DESCRIBE YOUR EDUCATION AND PROFESSIONAL 0. 10 EXPERIENCE. 11 A. I received a Master's Degree in Business Administration with a concentration in 12 information systems from Lindenwood University in 2001 and a Bachelor of 13 Science Degree in accounting from Missouri Valley College in 1996. I began my 14 employment with ONEOK, Inc. ("ONEOK") on November 21, 2005, as a project 15 leader in the Internal Audit Department. I began serving in my current position as 16 Manager of Rates and Regulatory Analysis in October 2007 while at ONEOK and 17 have retained that position with ONE Gas since its separation from ONEOK. Prior 18 to my employment at ONEOK, I worked as a Senior Audit Associate at KPMG 19 LLP from January 2004 to November 2005. From August 1998 to January 2004, I 20 served in the internal audit departments of Enterprise Rent-A-Car, Cornerstone 21 Propane and Dollar Rent-A-Car. From June 1996 to August 1998, I served as a 22 corporate accountant for Dollar Rent-A-Car.

| 1 | Q. | PLEASE DISCUSS YOUR DUTIES AND RESPONSIBILITIES AS |
|----|----|--|
| 2 | | MANAGER OF RATES AND REGULATORY ANALYSIS. |
| 3 | A. | My responsibilities include assisting the Divisions of ONE Gas, including Texas |
| 4 | | Gas Service Company ("TGS" or the "Company"), with the review and analysis of |
| 5 | | company financial data and records and preparation of and participation in rate |
| 6 | | cases and other regulatory filings and related activities. |
| 7 | Q. | HAVE YOU PREVIOUSLY TESTIFIED BEFORE ANY REGULATORY |
| 8 | | COMMISSIONS? |
| 9 | A. | Yes, I have filed testimony in proceedings before the Oklahoma Corporation |
| 10 | | Commission, the Kansas Corporation Commission and the Railroad Commission |
| 11 | | of Texas ("Commission") regarding the same general subject matter that I am |
| 12 | | testifying to in this case. I have also testified before the Public Utility Regulation |
| 13 | | Board of the City of El Paso. A list of the dockets in which I have testified is |
| 14 | | provided as Exhibit SRB-1. |
| 15 | Q. | WAS THIS TESTIMONY PREPARED BY YOU OR UNDER YOUR |
| 16 | | DIRECT SUPERVISION? |
| 17 | A. | Yes, it was. |
| 18 | Q. | ARE YOU SPONSORING ANY EXHIBITS IN CONNECTION WITH |
| 19 | | YOUR TESTIMONY? |
| 20 | A. | Yes, I am sponsoring the exhibit listed in the table of contents. |
| 21 | Q. | WHAT IS THE PURPOSE OF YOUR TESTIMONY? |
| 22 | A. | The purpose of my testimony is to explain and support the Company's Direct and |
| 23 | | Shared Service (TGS Division and Corporate) adjustments associated with: |
| 24 | | base and overtime payroll; |

1 benefits and payroll related taxes; and 2 incentive compensation. 3 0. ARE YOU SPONSORING ANY SCHEDULES? 4 A. Yes. I am sponsoring the following schedules: Schedule G-4 (Base Payroll) Schedule G-5 (Overtime Payroll) Schedule G-6 (Benefits & Payroll Related Taxes) Schedule G-8 (Incentive Compensation) 5 The schedules I address in my testimony are for the Company's proposed Central-6 Gulf Service Area ("CGSA"), which is a combination of the existing Central Texas 7 and Gulf Coast Service Areas, as well as the City of Beaumont, Texas. In addition 8 to schedules that reflect the Company's requested consolidation for the proposed 9 CGSA, TGS is also providing stand-alone schedules for the Central Texas and Gulf 10 Coast Service Areas. The stand-alone Gulf Coast Service Area schedules also 11 contain data for customers within the City of Beaumont, Texas. 12 Q. WERE THESE SCHEDULES PREPARED BY YOU OR UNDER YOUR 13 **SUPERVISION?** 14 A. Yes, they were. 15 Q. HOW DOES YOUR TESTIMONY RELATE TO OTHER COMPANY 16 WITNESSES IN THIS RATE FILING?

My testimony relates to Company witnesses Jeff D. Branz and David Scalf as they

support the Company's request to recover incentive compensation costs and they

address the new statute, GURA § 104.060. Additionally, the Cost Allocation

17

18

19

A.

methodology used in the calculation of these adjustments is supported by Company witness Anthony Brown. In addition, Company witness Shantel Norman supports the overall operations and maintenance ("O&M") expenses and Company witness Gracie Guerra supports the direct expense adjustments.

II. PAYROLL, OVERTIME, PAYROLL RELATED TAXES AND BENEFITS

6 O. WHAT IS BASE PAYROLL?

14

15

16

17

18

19

20

21

22

23

24

- 7 A. Base pay or base payroll represents an employee's base salary or hourly wages.
- 8 Through the Common Salary Review process, base pay is reviewed at least
- 9 annually for all employees resulting in pay increases, if applicable, in December.
- 10 Mr. Branz further discusses base pay and its components in his testimony.

11 Q. PLEASE EXPLAIN THE ADJUSTMENT TO BASE PAYROLL PROVIDED

12 ON SCHEDULE G-4.

A. Schedule G-4 contains adjustments to payroll expense to annualize the changes in salary or hourly wages for services employees provided to the proposed CGSA as well as employees whose costs are allocated through Shared Services during the test year. Adjusted base salaries were calculated by annualizing test year payroll at June 30, 2019. This adjustment annualizes the changes in the number of employees, promotions, and salary adjustments occurring during the test year. The Company then included an adjustment for the December 2019 Common Salary Review increase, which is the month ONE Gas conducts its annual review of the market-based compensation for each employee and provides any related increases, if applicable. Total test year payroll was then subtracted from the calculated annualized payroll level, including the December 2019 Common Salary Review increase, to determine the allocable base payroll adjustment that was multiplied by

allocation factors and by the payroll O&M expense ratio to determine the adjusted O&M expense amount applicable to the proposed CGSA. Mr. Brown discusses the cost allocation methodology and supports the percentages used to allocate these costs to the proposed CGSA. The allocable base payroll adjustment was then assigned to O&M expense accounts based on the accounts to which test year payroll expense was recorded.¹

7 Q. PLEASE DESCRIBE THE EXPENSE ADJUSTMENT SHOWN ON SCHEDULE G-5.

Schedule G-5 contains adjustments to overtime expense for hourly employees who are based in the proposed CGSA, as well as TGS Division and Corporate employees whose costs are allocated through Shared Services. The adjusted hourly base payroll calculated on Schedule G-4 was multiplied by the test year overtime percentage (which is test year overtime as a percentage of test year hourly base pay) to determine annualized overtime payroll. Total test year overtime payroll was then subtracted from the annualized overtime payroll to determine the allocable overtime payroll adjustment. This adjustment was multiplied by allocation factors and the payroll O&M expense ratio to determine the adjusted O&M overtime payroll expense amount applicable to the proposed CGSA. This amount was then assigned to O&M expense accounts based on the accounts to which test year payroll expense was recorded. Overtime pay is a reasonable and necessary component of employee compensation, and it is appropriate to include overtime pay in the annualized payroll amount to be recovered through rates.

¹ The Company will update the adjustment for December 2019 Common Salary Review increases contained on Schedule G-4 with actuals after December 31, 2019 and provide by February 14, 2020.

23

24

A.

Schedule G-6 contains the adjustment to recognize the change in benefits and payroll tax based on the annualization of the labor increases for employees performing work in the proposed CGSA as well as TGS Division and Corporate employees whose costs are allocated through Shared Services. The adjustment includes a cost per payroll dollar for payroll taxes and for those benefits that vary based on labor cost. Benefits that vary based on labor cost include pension, other post employment benefits, and medical reserve. The benefit cost per payroll dollar was calculated based on the most recently available data for payroll tax and benefits costs. These calculations are shown on Workpaper G-6b. Additional benefits that are not attributable to labor, such as profit sharing amounts, 401(k) company match, tuition reimbursement, and employee assistance programs, are reflected on Schedule G-6 and Workpaper G-6b and represent test year actual amounts. The proforma base and overtime payroll from Schedules G-4 and G-5, respectively, were then multiplied by the calculated benefit and payroll tax per payroll dollar ratios that were developed on Workpaper G-6b to determine the annualized benefits and payroll tax. The total test year benefits and payroll tax were then subtracted from the annualized benefits and payroll tax to determine the allocable benefits and payroll tax adjustment. This amount was then multiplied by allocation factors and the payroll O&M expense ratio to determine the adjusted O&M expense amount applicable to the proposed CGSA. This amount was then assigned to O&M expense accounts based on the accounts to which test year payroll expense was recorded as shown on Workpaper G-6a.

1 III. RECOVERY OF INCENTIVE COMPENSATION COSTS 2 0. HAS THE COMPANY INCLUDED INCENTIVE COMPENSATION 3 COSTS IN THIS FILING CONSISTENT WITH GURA § 104.060? 4 A. Yes. TGS is requesting recovery of its reasonable and necessary test year incentive 5 compensation costs. In accordance with GURA § 104.060, the Company has made 6 an adjustment to remove incentive compensation related to the financial metrics for 7 executive officers whose compensation is required to be disclosed under 17 C.F.R. Section 229.402(a).² These executive officers are known as the Named Executive 8 9 Officers in ONE Gas' Notice of Annual Meeting and Proxy Statement. Mr. Scalf 10 and Mr. Branz address GURA § 104.060, provide testimony in support of the 11 reasonableness and necessity of TGS's requested incentive compensation costs, and 12 describe the nature of the ONE Gas incentive compensation plans and the role these 13 plans have in the overall compensation philosophy. 14 DESCRIBE THE INCENTIVE COMPENSATION ADJUSTMENT SHOWN Q. 15 ON SCHEDULE G-8. 16 A. Schedule G-8 identifies the amount of incentive compensation costs included in the 17 statement of intent. TGS is seeking recovery of all test year short-term incentive 18 ("STI") and long-term incentive ("LTI") compensation costs for direct employees, 19 TGS Division employees and ONE Gas employees, excluding incentive

² https://www.sec.gov/divisions/corpfin/ecfr/17cfr229.402a.pdf.

20

compensation related to financial metrics for Named Executive Officers.

| 1 | Q. | DESCRIBE THE ADJUSTMENT MADE TO STI COMPENSATION. |
|----|----|--|
| 2 | A. | The total per book test year STI costs, including FICA, 401(k) company match, and |
| 3 | | profit sharing amounts associated with STI, allocated to the proposed CGSA is |
| 4 | | \$3,609,401 of which \$(188,962) was attributable to financial metrics for Named |
| 5 | | Executive Officers. The Company removed the \$(188,962) amount consistent with |
| 6 | | GURA § 104.060 resulting in TGS requesting recovery of \$3,420,439. Mr. Branz |
| 7 | | discusses the STI metrics in his direct testimony. |
| 8 | Q. | DESCRIBE THE ADJUSTMENT MADE TO LTI COMPENSATION FOR |
| 9 | | PERFORMANCE STOCK UNITS. |
| 10 | A. | The total Performance Stock Unit per book amount in the test year allocated to the |
| 11 | | proposed CGSA is \$902,593 of which \$(316,553) was attributable to financial |
| 12 | | metrics for Named Executive Officers, resulting in TGS requesting recovery of |
| 13 | | \$586,040. As discussed by Mr. Branz, Performance Stock Units are based upon |
| 14 | | ONE Gas' performance as measured by its three-year relative total shareholder |
| 15 | | return. Thus, the Company removed the LTI amount related to Performance Stock |
| 16 | | Units consistent with GURA § 104.060. |
| 17 | Q. | WAS AN ADJUSTMENT MADE TO LTI COMPENSATION FOR |
| 18 | | RESTRICTED STOCK UNITS? |
| 19 | A. | No. As discussed in Mr. Branz's direct testimony, Restricted Stock Units are not |
| 20 | | based on the financial performance of ONE Gas. Therefore, no adjustment was |
| 21 | | made for LTI costs related to Restricted Stock Units. |
| 22 | 0 | DOES THIS CONCLUDE VOUR DIRECT TESTIMONY? |

23

A.

Yes, it does.

| 1 | | DIRECT TESTIMONY OF TIMOTHY S. LYONS |
|----|----|---|
| 2 | | I. <u>INTRODUCTION AND QUALIFICATIONS</u> |
| 3 | Q. | PLEASE STATE YOUR NAME AND BUSINESS ADDRESS. |
| 4 | A. | My name is Timothy S. Lyons. My business address is 1900 West Park Drive, |
| 5 | | Suite 250, Westborough, Massachusetts 01581. |
| 6 | Q. | PLEASE DESCRIBE YOUR CURRENT POSITION. |
| 7 | A. | I am a Partner at ScottMadden, Inc. ("ScottMadden"). |
| 8 | Q. | PLEASE DESCRIBE YOUR PROFESSIONAL EXPERIENCE. |
| 9 | A. | I have more than 30 years of experience in the energy industry. I started my career |
| 10 | | in 1985 at Boston Gas Company, eventually becoming Director of Rates and |
| 11 | | Revenue Analysis. In 1993, I moved to Providence Gas Company, eventually |
| 12 | | becoming Vice President of Marketing and Regulatory Affairs. Starting in 2001, I |
| 13 | | held a number of management consulting positions in the energy industry first at |
| 14 | | KEMA and then at Quantec, LLC. In 2005, I became Vice President of Sales and |
| 15 | | Marketing at Vermont Gas Systems, Inc., before joining Sussex Economic |
| 16 | | Advisors, LLC ("Sussex") in 2013. Sussex was acquired by ScottMadden on |
| 17 | | June 1, 2016. |
| 18 | Q. | PLEASE DESCRIBE YOUR EDUCATIONAL EXPERIENCE. |
| 19 | A. | I hold a Bachelor's degree from St. Anselm College, a Master's degree in |
| 20 | | Economics from The Pennsylvania State University, and a Master's degree in |
| 21 | | Business Administration from Babson College. A summary of my professional and |
| | | |

testimony experience is included in Exhibit TSL-1.

22

| | | Page 2 of 12 |
|----|----|--|
| 1 | Q. | WAS THIS TESTIMONY PREPARED BY YOU OR UNDER YOUR |
| 2 | | DIRECT SUPERVISION? |
| 3 | A. | Yes, it was. |
| 4 | Q. | HAVE YOU PREPARED EXHIBITS SUPPORTING YOUR TESTIMONY? |
| 5 | A. | Yes. My testimony is supported by the exhibits in the List of Exhibits. The exhibits |
| 6 | | were prepared by me or under my direction. |
| 7 | | II. PURPOSE AND OVERVIEW OF TESTIMONY |
| 8 | Q. | WHAT IS THE PURPOSE OF YOUR TESTIMONY? |
| 9 | A. | I was retained by Texas Gas Service Company ("TGS" or the "Company") to |
| 10 | | develop a lead-lag study that determines the cash working capital ("CWC") |
| 11 | | requirement for the Company's proposed Central-Gulf Service Area ("CGSA"), |
| 12 | | which is a combination of the existing Central Texas and Gulf Coast Service Areas |
| 13 | | and the City of Beaumont, Texas. In addition to schedules that reflect the |
| 14 | | Company's requested consolidation for the proposed CGSA, TGS is also providing |

the Company's request for consolidation not be approved, the City of Beaumont

would be included in the stand-alone schedules for the Gulf Coast Service Area.

stand-alone schedules for the Central Texas and Gulf Coast Service Areas. Should

18 The lead-lag study summary and supporting calculations for the proposed CGSA

are included in Exhibits TSL-2 and TSL-3, respectively.

15

17

19

21

22

23

24

20 Q. PLEASE DEFINE THE TERM "CASH WORKING CAPITAL."

A. The term "cash working capital" refers to the net funds required by the Company to finance goods and services used to provide service to customers from the time those goods and services are paid for by the Company to the time that payment is received from customers. Goods and services considered in the lead-lag study

- include: operations and maintenance ("O&M") expenses, including labor and nonlabor expenses; income taxes; and taxes other than income taxes.
- 3 Q. HOW WAS THE COMPANY'S CWC REQUIREMENT DETERMINED?
- 4 A. The Company's CWC requirement was based on the results of a lead-lag study. 5 The lead-lag study compares differences between the Company's revenue lag and 6 expense leads. The revenue lag represents the number of days from the time 7 customers receive service to the time customers pay for service, i.e., when the funds 8 are available to the Company. The longer the revenue lag, the more cash the 9 Company needs to finance its day-to-day operations. The expense leads represent 10 the number of days from the time the Company receives goods and services used 11 to provide service to the time payments are made for those goods and services, i.e., 12 when the funds are no longer available to the Company. The longer the expense 13 leads, the less cash the Company needs to fund its day-to-day operations. Together, 14 the revenue lag and expense leads are used to measure lead-lag days. The lead-lag 15 days are then applied to the Company's adjusted test year expenses to derive the 16 CWC requirement, which is included in the Company's rate base.

| 1 | Q. | ARE THE METHODS USED TO DEVELOP THE LEAD-LAG STUDY IN |
|----|----|---|
| 2 | | THIS RATE PROCEEDING CONSISTENT WITH THE RAILROAD |
| 3 | | COMMISSION OF TEXAS ("COMMISSION") REQUIREMENTS? |
| 4 | A. | Yes, the methods used to develop the lead-lag study in this proceeding are |
| 5 | | consistent with those approved by the Commission in the Company's most recent |
| 6 | | fully-litigated rate proceeding in Gas Utilities Docket ("GUD") No. 10506. 1 |
| 7 | Q. | ARE THE RESULTS OF THE LEAD-LAG STUDY IN THIS PROCEEDING |
| 8 | | AN ACCURATE ASSESSMENT OF THE COMPANY'S CWC |
| 9 | | REQUIREMENT? |
| 10 | A. | Yes, this lead-lag study is based on the Company's current billing, collection, and |
| 11 | | payment practices, and thus provides an accurate assessment of the Company's |
| 12 | | CWC requirements. |
| 13 | | III. <u>LEAD-LAG STUDY APPROACH</u> |
| 14 | Q. | PLEASE SUMMARIZE THE RESULTS OF THE LEAD-LAG STUDY |
| 15 | | CONDUCTED FOR TGS. |
| 16 | A. | The Company's lead-lag study is summarized in Exhibit TSL-2 and shows a CWC |
| 17 | | requirement of negative \$5.0 million for the test year July 1, 2018 through June 30, |
| 18 | | 2019, adjusted to reflect known and measurable changes through September 30, |
| 19 | | 2019. |

¹ Statement of Intent of Texas Gas Service Company, a Division of ONE Gas, Inc., to Increase Gas Utility Rates Within the Unincorporated Areas of the El Paso Service Area (EPSA), Permian Service Area (PSA), and Dell City Service Area (DCSA), GUD No. 10506, consol., Final Order at FoF No. 58 (Sept. 27, 2016).

-

1 Q. WAS THE LEAD-LAG STUDY BASED ON ONE OR MORE OF THE 2 **COMPANY'S SERVICE AREAS?** 3 A. Yes, the lead-lag study was based on data for all of TGS's service areas in Texas, including the proposed CGSA. The data includes customer billing and revenue 4 5 data to determine the revenue lag, and payment and financial data to determine the 6 expense leads - as well as various other supporting documents. 7 The approach of developing a lead-lag study to be applicable to all of TGS's 8 service areas in Texas is consistent with the intent of the Commission's Final Order 9 in GUD No. 10285, which states, "TGS shall include a lead-lag study to establish 10 cash working capital with its next filed Statement of Intent proceeding involving 11 one or more of its El Paso, Rio Grande Valley or Austin Service Areas. The 12 resulting lead-lag study shall be designed to be applicable to all TGS Service Areas."2 13 DOES THE COMPANY INTEND TO USE THIS LEAD-LAG STUDY IN Q. 14 15 FUTURE RATE CASE PROCEEDINGS FOR THE COMPANY'S OTHER **SERVICE AREAS IN TEXAS?** 16 17 A. Yes, the Company intends to use this lead-lag study in future rate case proceedings 18 for the Company's other service areas in Texas in determining the CWC 19 requirement. This approach is consistent with the Company's approach in the most

² Statement of Intent filed by Texas Gas Service Company to Increase Gas Utility Rates Within the Unincorporated Areas of the Rio Grande Valley Service Area, GUD No. 10285, Final Order at FoF 28 (Nov. 26, 2013).

recent rate case proceedings for: Gulf Coast Service Area (GUD No. 10488)³; West

20

³ Statement of Intent of Texas Gas Service Company, a Division of ONE Gas, Inc., to Increase Gas Utility Rates Within the Unincorporated Areas of the Galveston Service Area (GSA) and South Jefferson County Service Area (SJCSA), GUD No. 10488, Final Order (May 3, 2016).

| 1 | | Texas Service Area (GUD No. 10506) ⁴ ; Central Texas Service Area (GUD No. |

| 2 | | 10526) ⁵ ; Rio Grande Valley Service Area (GUD No. 10656) ⁶ ; North Texas Service |
| 3 | | Area (GUD No. 10739) 7 ; and Borger-Skellytown Service Area (GUD No. 10766). 8 |
| 4 (| Q. | WHY DOES THE COMPANY INTEND TO USE THIS LEAD-LAG STUDY |
| 5 | | IN FUTURE RATE CASE PROCEEDINGS FOR THE COMPANY'S |
| 6 | | OTHER SERVICE AREAS IN TEXAS? |
| 7 A | A . | The Company intends to use this lead-lag study in future rate proceedings for the |
| 8 | | Company's other service areas in Texas for the following reasons: (1) the Company |
| 9 | | was previously directed by the Commission to develop a lead-lag study designed |
| 10 | | to be applicable to all TGS service areas in Texas; (2) the study is based on data for |
| 11 | | all of TGS's service areas in Texas; (3) the study is an accurate representation of |
| 12 | | the Company's CWC requirement over the next several years, provided there are |
| 13 | | no significant changes in the Company's billing, collection, and/or payment |
| 14 | | procedures that have a significant impact on the overall results; and (4) the study |
| 15 | | helps to minimize rate case expenses by developing a single lead-lag study for |
| 16 | | application to all of the Texas service areas rate case proceedings. |

⁵ Statement of Intent of Texas Gas Service Company (TGS), a Division of ONE Gas, Inc., to Change Gas Utility Rates Within the Unincorporated Areas of the Central Texas Service Area (CTSA) and South Texas Service Area (STSA), GUD No. 10526, Final Order (Nov. 15, 2016).

⁷ Statement of Intent of Texas Gas Service, a Division of ONE Gas, Inc., to Increase Gas Utility Rates Within the Unincorporated Areas of the North Texas Service Area, GUD No. 10739, Final Order (Nov. 13, 2018).

⁸ Statement of Intent of Texas Gas Service, a Division of ONE Gas, Inc., to Change Gas Utility Rates Within the Unincorporated Areas of the Borger-Skellytown Service Area, GUD No. 10766, Final Order (Feb. 5, 2019).

| 1 Q. | IS THE METHODOLOGY USED TO PREPARE THIS LEAD-LAG STUDY |
|-------------|--|
|-------------|--|

- 2 CONSISTENT WITH THE METHODOLOGY USED TO DEVELOP THE
- 3 **STUDY IN GUD NO. 10488?**
- 4 A. Yes, the methodology used to prepare this lead-lag study is consistent with the
- 5 methodology used to the develop the study in GUD No. 10488.
- 6 Q. PLEASE DESCRIBE THE APPROACH USED TO DEVELOP THE LEAD-
- 7 LAG STUDY.

8

A.

9 revenue lag measures from the time service is provided to customers until the time

The lead-lag study consists of two elements: revenue lag and expense leads. The

- customer payments are received by the Company. Expense leads measure from the
- time the Company receives goods and services used to provide service to the time
- the Company pays for those goods and services. The expense leads are measured
- in days, converted to dollar-days, and summarized for each cost element in the lead-
- lag study. The difference between the revenue lag and expense lead determines if
- there is a net revenue lag (revenue lag days are more than the expense lead days) or
- a net expense lead (revenue lag days are less than the expense lead days) for each
- 17 cost element in the lead-lag study. The net lead-lag days are applied to adjusted
- test year expenses since they reflect the Company's ongoing expenses and thus best
- represent the Company's ongoing CWC requirements.
- 20 Q. PLEASE DESCRIBE THE DATA USED IN THE LEAD-LAG STUDY.
- 21 A. The lead-lag study was based on the Company's customer and financial data from
- July 1, 2018 through June 30, 2019. The data included customer billing and
- collection data, and payment and expense financial data.

- 1 A. Revenue Lag
- 2 Q. PLEASE DESCRIBE THE COMPONENTS OF THE REVENUE LAG.
- 3 A. The revenue lag measures the number of days from the time service is provided to
- 4 customers to the time payment is received from customers. The revenue lag
- 5 consists of three components: (1) the service lag; (2) the billing lag; and (3) the
- 6 collection lag.
- 7 Q. WHAT IS THE SERVICE LAG?
- 8 A. The service lag measures the average number of days in the service period; i.e., the
- 9 number of days from the start of the billing month to the end of the billing month.
- Meters are read at the end of the billing month. The service lag in this lead-lag
- study was based on the midpoint of the service period, which reflects that natural
- gas is delivered evenly over the service period.
- 13 Q. WHAT IS THE BILLING LAG?
- 14 A. The billing lag measures the number of days from the time meters are read to the
- time bills are recorded and sent to customers. The billing lag includes time for
- review and validation of billed usage and dollars.
- 17 Q. HOW WAS THE BILLING LAG MEASURED?
- 18 A. The billing lag was based on a random sample of customer bills for each of the six
- 19 customer classifications (residential, commercial, industrial, public authority,
- transportation, and irrigation), as shown on Exhibit TSL-3.
- 21 Q. WHAT IS THE COLLECTION LAG?
- 22 A. The collection lag measures the number of days from the time bills are recorded
- and sent to customers to the time customer payments are received.

| 1 | Ο. | HOW | WAS | THE | COLI | ECTIO | ON L | AG | MEASU | JRED? |
|---|----|-----|-----|-----|-------------|-------|------|----|-------|-------|
|---|----|-----|-----|-----|-------------|-------|------|----|-------|-------|

- 2 A. The collection lag was based on the same sample of customer bills used to
- determine the billing lag.
- 4 Q. HOW WAS THE REVENUE LAG DETERMINED?
- 5 A. The revenue lag is the sum of the service lag, billing lag, and collection lag and
- 6 then dollar-weighted by the revenues associated with each rate class, as shown on
- 7 Exhibit TSL 3.
- 8 B. Expense Leads
- 9 **1. Operation and Maintenance Expenses**
- 10 Q. PLEASE DESCRIBE THE DEVELOPMENT OF O&M EXPENSE LEADS.
- 11 A. O&M expense leads were measured separately for the following groups: (1)
- purchased gas expenses; (2) regular payroll expenses; (3) short-term incentive
- compensation expenses; and (4) third-party O&M expenses.
- 14 Q. HOW WERE LEAD DAYS FOR PURCHASED GAS EXPENSES
- 15 **DETERMINED?**
- 16 A. Lead days for purchased gas expenses were based on the number of days from the
- midpoint of the service period (i.e., when gas was received and delivered to
- customers) to the payment date. The payment date occurs in the month after the
- gas was received and delivered to customers.
- 20 Q. HOW WERE LEAD DAYS FOR REGULAR PAYROLL EXPENSES
- 21 **DETERMINED?**
- 22 A. Lead days for regular payroll expenses were based on the Company's salary and
- wages payment process, which pays employees on a bi-weekly or semi-monthly

1 basis. Lead days for regular payroll expenses were based on the number of days 2 from the midpoint of the pay period to the payment date. 3 0. **DID THE STUDY ADJUST FOR VACATION PAY?** 4 Yes. The lead-lag study adjusts for vacation pay, reflecting that vacation pay is A. 5 generally earned before it is taken. The adjustment is based on the regular payroll 6 lead days and the midpoint of the year. 7 HOW WERE LEAD DAYS FOR THE ANNUAL PERFORMANCE BONUS 0. 8 **DETERMINED?** 9 A. Lead days for the Company's annual performance bonus were based on the number 10 of days from the midpoint of the performance period (i.e., twelve-months ending December 2018) to the payment date. The annual performance bonus is paid 11 12 annually in March for the preceding calendar year. HOW WERE LEAD DAYS FOR THIRD-PARTY O&M EXPENSES 13 Q. 14 **DETERMINED?** 15 Lead days for third-party O&M expenses were based on a random sample of A. 16 invoices paid during the test year. The sample was used to determine the number 17 of days from the time services were provided to the payment date. 2. 18 **Current Federal Income Tax Expense** 19 Q. HOW WERE LEAD DAYS FOR FEDERAL INCOME **TAXES** 20 **DETERMINED?** 21 A. Lead days for federal income taxes were based on the number of days from the 22 midpoint of the taxing period (i.e., the calendar year) to the payment date. The 23 payment date reflects scheduled payment dates on April 15, June 15, September 15,

| 1 | | and December 15. If the scheduled payment date falls on a Saturday, Sunday, or |
|----|----|---|
| 2 | | legal holiday, the payment is due on the next regular business day. |
| 3 | | 3. Taxes Other than Income Taxes |
| 4 | Q. | WHAT TAXES ARE INCLUDED IN THE TAXES OTHER THAN INCOME |
| 5 | | TAXES? |
| 6 | A. | Taxes other than income taxes consists of: (1) Payroll-related taxes (FICA, Federal |
| 7 | | Unemployment, and State Unemployment); (2) Revenue-related taxes (State Gross |
| 8 | | Receipts, Sales Tax, Local Franchise Tax, and State Franchise Tax); (3) Ad |
| 9 | | Valorem taxes; and (4) Railroad Commission Gas Utility Tax. |
| 10 | Q. | HOW WERE LEAD DAYS FOR EACH OF THE TAXES DETERMINED? |
| 11 | A. | Lead days for payroll-related taxes were based on the number of days from the tax |
| 12 | | liability date to the payment date. Lead days for non-payroll-related taxes were |
| 13 | | based on the number of days from the midpoint of the taxing period to the payment |
| 14 | | date. |
| 15 | | 4. Interest on Customer Deposits |
| 16 | Q. | HOW WERE LEAD DAYS FOR INTEREST ON CUSTOMER DEPOSITS |
| 17 | | DETERMINED? |
| 18 | A. | Lead days for interest on customer deposits were based on the accumulated interest |
| 19 | | expense on customer deposits and the subsequent interest payment to customers. |
| | | |

1

| I | | 5. Non-Cash Items |
|----|----|---|
| 2 | Q. | PLEASE EXPLAIN WHY YOU EXCLUDED NON-CASH ITEMS FROM |
| 3 | | YOUR LEAD-LAG STUDY. |
| 4 | A. | Consistent with Commission precedent, the lead-lag study excludes non-cash |
| 5 | | items, including depreciation, amortization, deferred income taxes, and return |
| 6 | | (including return on equity, and interest on long-term debt). |
| 7 | | IV. <u>CONCLUSION</u> |
| 8 | Q. | WHAT WERE THE RESULTS OF THE LEAD-LAG STUDY? |
| 9 | A. | The Company's lead-lag study is summarized in Exhibit TSL-2 and shows a CWC |
| 10 | | requirement of negative \$5.0 million for the test year July 1, 2018 through June 30, |
| 11 | | 2019, adjusted to reflect known and measurable changes through September 30, |
| 12 | | 2019. |
| 13 | Q. | ARE THE RESULTS OF THIS LEAD-LAG STUDY AN ACCURATE |
| 14 | | ASSESSMENT OF THE COMPANY'S CWC REQUIREMENT? |
| 15 | A. | Yes, this lead-lag study is based on the Company's current billing, collection and |
| 16 | | payment practices, and thus provides an accurate assessment of the Company's |
| 17 | | CWC requirements. |
| 18 | Q. | DOES THIS CONCLUDE YOUR DIRECT TESTIMONY? |
| 19 | A. | Yes, it does. |

Summary

Tim Lyons is a partner with ScottMadden with more than 30 years of experience in the energy industry. Tim has held senior positions at several gas utilities and energy consulting firms. His experience includes rate and regulatory support, sales and marketing, customer service and strategy development. Prior to joining ScottMadden, Tim was Vice President of Sales and Marketing for Vermont Gas. He has also served as Vice President of Marketing and Regulatory Affairs for Providence Gas Company, Director of Rates at Boston Gas Company, and Project Director at Quantec, LLC, an energy consulting firm.

Tim has sponsored testimony before 18 state regulatory commissions. Tim holds a B.A. from St. Anselm College, an M.A. in Economics from The Pennsylvania State University, and an M.B.A. from Babson College.

Areas of Specialization

- Regulation and Rates
- Retail Energy
- Utilities
- Natural Gas

Capabilities

- Regulatory Strategy and Rate Case Support
- Strategic and Business Planning
- Capital Project Planning
- Process Improvements

Articles and Speeches

- "Country Strong: Vermont Gas shares its comprehensive effort to expand natural gas service into rural communities." American Gas Association, June 2011 (with Don Gilbert).
- "Talking Safety With Vermont Gas." American Gas Association, February 2009 (with Dave Attig).
- "Consumers Say 'Act Now' To Stabilize Prices." Power & Gas Marketing, September/ October 2001 (with Jim DeMetro and Gerry Yurkevicz).
- "Rate Reclassification: Who Buys What and When." Public Utilities Fortnightly, October 15, 1991 (with John Martin).

Recent Assignments

- Sponsored cost of service/rate design testimony for a Mid-Atlantic gas utility. Testimony included a
 proposal for new residential and commercial rate classes and introduction of a block break rate
 design.
- Sponsored cost of service/rate design testimony for a Midwest gas utility. Testimony included a proposal for new commercial rate classes and a revenue decoupling mechanism.
- Sponsored cost of service/ rate design and lead-lag testimony for a Midwest gas utility. The testimony included proposals for Revenue Decoupling/ Weather Normalization Mechanism and Tracker Accounts for certain O&M expenses and capital costs.
- Sponsored rate design testimony for a Northeast gas utility. The testimony included: a proposal for zonal rates to promote expansion of natural gas service in the state; market analysis; and financial modeling.
- Led a study for the Massachusetts Department of Energy Resources to evaluate the benefits, costs and policies options associated with natural gas expansion by Massachusetts gas utilities. The study included: (a) research on state regulatory policies; (b) financial modeling and analysis of the economic and environmental impacts of pursuing various policy options; and (c) a survey of Massachusetts homeowners on their opinion of home heating fuels.
- Prepared a transmission and distribution (T&D) avoided cost study and report for a Midwest electric utility. The study was used to support the utility's energy efficiency programs.
- Prepared a review and evaluation of cost of service/ rate design studies for an electric utility. The assignment included review of proposed rate designs that address cost shifting concerns with serving residential distribution generation customers through introduction of higher customer charges, a demand charge and time-of-use energy charges.

Exhibit TSL-1
Page 2 of 6

- Assisted in the development of an electric portfolio of cost of service, rate design, and rate planning tools. The tools were used to evaluate the impact of future rate filings and resource portfolio decisions on individual rate classes.
- Prepared a market analysis for a utility to evaluate natural gas expansion into new areas, including: (a) survey of homes and businesses; (b) estimate of construction and operating costs; (c) analysis of alternative supply options (including pipeline, LNG and CNG); and (d) financial modeling.
- Directed a process review of natural gas expansion projects for a gas utility. The assignment included a review, evaluation and recommendations related to: (a) policies and procedures; (b) process steps and personnel; (c) financial models and analysis; (d) project decisions and schedules; and (e) post-construction review and evaluation.
- Sponsored lead-lag testimony for several electric and gas utilities.

AFFIDAVIT OF TIMOTHY S. LYONS

BEFORE ME, the undersigned authority, on this day personally appeared Timothy S. Lyons who having been placed under oath by me did depose as follows:

- 1. "My name is Timothy S. Lyons. I am over the age of eighteen (18) and fully competent to make this affidavit. I am a partner at ScottMadden, Inc. The facts stated herein are true and correct based upon my personal knowledge.
- 2. I have prepared the foregoing Direct Testimony and the information contained in this document is true and correct to the best of my knowledge."

Further affiant sayeth not.

Timothy S. Lyons

Notary Public in and for the State of Vermont

SUBSCRIBED AND SWORN TO BEFORE ME by the said Timothy S. Lyons on this

aday of <u>December</u>, 2019.

| 1 | | DIRECT TESTIMONY OF JEFF D. BRANZ |
|----|----|--|
| 2 | | I. <u>INTRODUCTION AND QUALIFICATIONS</u> |
| 3 | Q. | PLEASE STATE YOUR NAME AND BUSINESS ADDRESS. |
| 4 | A. | My name is Jeff D. Branz. My business address is 15 East 5th Street Tulsa, |
| 5 | | Oklahoma 74103. |
| 6 | Q. | BY WHOM ARE YOU EMPLOYED AND IN WHAT CAPACITY? |
| 7 | A. | I am employed by ONE Gas, Inc. ("ONE Gas") as the Director of Compensation |
| 8 | | and Benefits. Texas Gas Service Company ("TGS" or the "Company") is a |
| 9 | | Division of ONE Gas. |
| 10 | Q. | PLEASE DESCRIBE YOUR EDUCATIONAL BACKGROUND AND |
| 11 | | PROFESSIONAL EXPERIENCE. |
| 12 | A. | I received a Master of Arts Degree in Organizational Dynamics with an emphasis |
| 13 | | in Human Resources from the University of Oklahoma in 2006 and a Bachelor of |
| 14 | | Science Degree in Accounting from Oral Roberts University in 1988. I am a |
| 15 | | certified executive coach, and I practiced as a certified public accountant early in |
| 16 | | my career (although my license is now inactive due to my current role). I began |
| 17 | | my employment with ONE Gas in June 2016, as the Director of Compensation and |
| 18 | | Benefits. Prior to joining ONE Gas, I worked as a Director of Total Rewards at |
| 19 | | WPX Energy from January 2012 to June 2016. From April 1991 to December |
| 20 | | 2011, I served in various management roles including Director or Manager of |
| 21 | | Benefits, Benefits Accounting, Compensation, Payroll, Organizational |
| 22 | | Development, People Strategies, Human Resource Information Systems, Wellness |
| 23 | | and HR Business Partner Consulting for Williams Companies and MAPCO. From |
| 24 | | 1988 to 1991, I worked as a Senior Auditor for Deloitte and Touche. |

24

| 1 | Q. | HAVE YOU PREVIOUSLY TESTIFIED BEFORE ANY REGULATORY |
|----|----|---|
| 2 | | COMMISSIONS? |
| 3 | A. | Yes, I filed testimony in Gas Utilities Docket Nos. 10739 and 10766 before the |
| 4 | | Railroad Commission of Texas. |
| 5 | Q. | WAS THIS TESTIMONY PREPARED BY YOU OR UNDER YOUR |
| 6 | | DIRECTION? |
| 7 | A. | Yes, it was. |
| 8 | Q. | HAVE YOU PREPARED ANY EXHIBITS IN CONNECTION WITH YOUR |
| 9 | | TESTIMONY? |
| 10 | A. | Yes, I prepared and sponsor the exhibits listed in the table of contents. |
| 11 | Q. | WERE THESE EXHIBITS PREPARED BY YOU OR UNDER YOUR |
| 12 | | DIRECTION? |
| 13 | A. | Yes, they were. |
| 14 | Q. | WHAT IS THE PURPOSE OF YOUR TESTIMONY? |
| 15 | A. | My testimony describes the components of ONE Gas' overall market-based |
| 16 | | compensation program and supports the reasonableness and necessity of the |
| 17 | | compensation and benefits-related expenses that TGS seeks to recover in this case. |
| 18 | | My testimony will also address how TGS's requested compensation and benefits |
| 19 | | costs comply with a new Texas law that went into effect in June 2019 related to the |
| 20 | | reasonableness and necessity of employee compensation and benefit costs for gas |
| 21 | | utility employees. The new statute, Gas Utility Regulatory Act ("GURA") |

Stacey Borgstadt also address these issues in their direct testimonies.

22

23

24

§ 104.060 defines "employee compensation and benefits" to include base salaries,

wages, incentive compensation, and benefits. Company witnesses David Scalf and

II. ONE GAS COMPENSATION PHILOSOPHY

2 Q. PLEASE EXPLAIN ONE GAS' EMPLOYEE COMPENSATION

PROGRAM.

A.

A.

ONE Gas' employee compensation program is designed to attract, engage, motivate and retain employees. The compensation program includes a combination of a fixed component in the form of base pay and the variable components of incentive compensation, which are comprised of short-term incentives ("STI") and long-term incentives ("LTI"), if applicable. When determining, or setting compensation, ONE Gas' objective is to pay its employees on average at the 50th percentile of the market for total compensation compared to peer companies. As a result, individual pay is differentiated and may be below, at or above the 50th percentile depending on an employee's level of experience or knowledge. In this way, ONE Gas aims to pay its employees at a reasonable level that is not too high or too low compared to peer companies. The compensation program is reviewed at least annually through a Common Salary Review process to determine if changes or revisions are necessary for ONE Gas to remain competitive with the marketplace.

17 Q. WHY DOES ONE GAS SPLIT EMPLOYEE COMPENSATION INTO 18 FIXED AND VARIABLE COMPONENTS?

ONE Gas structures its compensation plan to be consistent with market demands, and most companies that ONE Gas competes with for employee talent have both fixed and variable components of compensation. Variable compensation requires that both individual employees and ONE Gas meet certain performance criteria to realize any incentive award. Variable pay plans provide ONE Gas with opportunities to motivate employee performance and attract, engage, reward and

| l | retain qualified workers in a safe environment. In this way, incentive compensation |
|---|---|
| 2 | plans are designed to encourage productive behavior from plan participants for the |
| 3 | benefit of the customers ONE Gas and TGS serve as well as employees and |
| 4 | shareholders. |

5 HOW DOES ONE GAS ENSURE THAT ITS COMPENSATION Q. 6 PROGRAMS ARE REASONABLE?

7

8

9

10

11

12

13

14

15

16

17

19

20

21

22

23

24

A.

A.

ONE Gas participates in national and industry-specific salary surveys to determine proper pay ranges and LTI and STI targets for each position. These surveys may be specific to the energy industry, targeted to certain business units within the energy industry or from a general industry perspective. Pay information is submitted and reviewed on at least an annual basis, allowing ONE Gas to maintain relevant and competitive pay ranges. Most positions are matched to multiple surveys that are conducted by independent third-party human resources or compensation consulting firms. ONE Gas relies on surveys to establish pay (or market) ranges that are competitive with its peers. This is the type of market-based approach that is specifically addressed in the new statute, GURA § 104.060.

Q. YOU PREVIOUSLY MENTIONED GURA §104.060. HOW DOES THE 18 COMPANY'S USE OF MARKET STUDIES RELATE TO THE NEW LAW?

The new law states that the regulatory authority shall presume that employee compensation and benefits expenses are reasonable and necessary if the expenses are consistent with market compensation studies issued not earlier than three years before the initiation of the proceeding to establish the rates. Section 104.060 defines "employee compensation and benefits" to include base salaries, wages, incentive compensation, and benefits while excluding pension or other post-

| 1 | | employment benefits, and financially-based incentive compensation related to |
|----------------------------|----|--|
| 2 | | Named Executive Officers. 1 As I explain below, ONE Gas relies on recent market |
| 3 | | studies to assess the reasonableness of the compensation it offers employees and |
| 4 | | the base pay, incentive, and benefits ONE Gas offers employees are consistent with |
| 5 | | those market studies. For those reasons, the costs TGS is requesting are presumed |
| 6 | | reasonable and necessary based on the new statute. |
| 7 | Q. | WOULD YOU PROVIDE SOME EXAMPLES OF THE SURVEYS USED |
| 8 | | TO MONITOR MARKET-BASED PAY RELATED TO ONE GAS |
| 9 | | EMPLOYEES? |
| 10 | A. | The surveys used to monitor market-based pay include: |
| 11 12 13 | | Willis Towers Watson General Industry; Willis Towers Watson Energy Executive Compensation; |
| 14 15 16 17 18 | | Willis Towers Watson American Gas Association Compensation; CompData Utilities; Mercer Energy Total Compensation; Mercer Benchmark; Southern Gas Association; and Willis Towers Watson Energy Services Mid-Management, Professional and Support |
| 14 15 16 17 | | CompData Utilities; Mercer Energy Total Compensation; Mercer Benchmark; Southern Gas Association; and |

¹ Named Executive Officers are officers whose compensation is required to be disclosed under 17 C.F.R. Section 229.402(a) and they are specifically referenced as Named Executive Officers in ONE Gas' Notice of Annual Meeting and Proxy Statement.

| 1 | Q. | DOES ONE GAS DETERMINE AND MONITOR EXECUTIVE |
|----|----|--|
| 2 | | COMPENSATION SIMILAR TO THE MANNER IN WHICH IT |
| 3 | | DETERMINES AND MONITORS OTHER EMPLOYEE |
| 4 | | COMPENSATION? |
| 5 | A. | Yes, ONE Gas uses a market-based pay process for both executives and other |
| 6 | | employees. The Executive Compensation Committee of ONE Gas' Board of |
| 7 | | Directors and its independent executive compensation consultant, Meridian |
| 8 | | Compensation Partners, LLC, review market data of ONE Gas' peers. The peers |
| 9 | | are selected because of their similarities to ONE Gas, including the size of their |
| 10 | | operations and the skills and experience required of their senior management. A |
| 11 | | list of peer companies included in the review is contained in ONE Gas's 2019 Proxy |
| 12 | | Statement on page 51, which is included as Exhibit JDB-1. As it does for all |
| 13 | | positions, ONE Gas strives to pay experienced executives at the median level of |
| 14 | | total compensation for peer companies. The Willis Towers Watson 2019 General |
| 15 | | Rate Case Total Compensation Study for TGS ("Compensation Study") provided |
| 16 | | as Confidential Exhibit JDB-2 on page 6 states, "[e]xecutive positions examined |
| 17 | | are, on average, within the same +/-10% competitive range of the market median |
| 18 | | as the other ONE Gas employee groups." |
| 19 | Q. | HOW SHOULD ONE GAS' COMPENSATION PACKAGE BE VIEWED? |
| 20 | A. | The compensation ONE Gas offers employees should be viewed as a |
| 21 | | comprehensive compensation package. On a combined basis, considering base |
| 22 | | salaries and incentive compensation, the Company is generally at or below |
| 23 | | comparable energy company industry levels. The Compensation Study provided |
| 24 | | in Confidential Exhibit JDB-2, demonstrate that ONE Gas and TGS salaries and |

| 1 | | incentives are generally below the median of market. Specifically, Willis Towers |
|----------------------------------|----|--|
| 2 | | Watson found "Texas Gas' overall compensation levels, short-term at-risk |
| 3 | | compensation design, and long-term at-risk compensation design to be reasonably |
| 4 | | competitive with market practices, based on multiple market perspectives we |
| 5 | | examined." Willis Towers Watson's assessment included the review of small and |
| 6 | | large utility peers as well as the general industry. |
| 7 | Q. | DOES ANY DATA DEMONSTRATE THAT ONE GAS MUST OFFER |
| 8 | | INCENTIVE COMPENSATION OPPORTUNITIES TO ATTRACT AND |
| 9 | | RETAIN EMPLOYEES? |
| 10 | A. | Yes. The utility industry has been providing incentive compensation to employees |
| 11 | | for many years. The points below indicate that almost all public utilities rely upon |
| 12 | | some form of incentive compensation as part of their overall compensation |
| 13 | | structure: |
| 14 15 16 17 18 19 | | • The 2018 American Gas Association Compensation Survey excerpt Bonuses and Other Variable Pay Programs reports that 63.6% of respondents in the survey that are distribution companies such as TGS offer STI to non-exempt employees, 75% to exempt employees, 76.9% to management, and 84.6% to executives (Confidential Exhibit JDB-3); |
| 20 21 22 | | • The 2018 American Gas Association Compensation Survey excerpt - Long-Term Incentives reports that 68.1% of the 47 respondents in their survey offer LTI (Confidential Exhibit JDB-4); |
| 23 24 25 26 27 | | The Willis Towers Watson 2019 Long-Term Incentives Policies and Practices Survey U.S. excerpt - LTI Prevalence found that 68.6% of the 102 energy companies responding granted restricted LTI and 92.2% granted performance-based LTI (Confidential Exhibit JDB-5); and |
| 28 29 | | Both CenterPoint and Atmos, gas utilities in the state of Texas and within ONE Gas' peer group, offer STI and LTI. |

| 1 | Q. | WHAT CONSEQUENCES WOULD ONE GAS EXPERIENCE IF IT DII |
|---|----|--|
| 2 | | NOT OFFER A COMPREHENSIVE COMPENSATION PACKAGE? |

3 A. If ONE Gas did not offer a comprehensive compensation package, ONE Gas and 4 TGS would expect to experience: (1) a departure of skilled employees; (2) reduced 5 levels of service and customer satisfaction; (3) lower quality work, and (4) 6 increased difficulty recruiting and retaining new employees. Without some form 7 of incentive compensation, highly motivated and high-performing employees will 8 seek employment opportunities where employees with their skill sets are provided 9 an opportunity to earn compensation beyond base pay. A comprehensive 10 compensation package, including incentive compensation, helps to create an engaged, skilled and safe workforce.

Q. WHAT CONSEQUENCES WOULD RESULT IF ONE GAS WERE TO ELIMINATE INCENTIVE COMPENSATION AND INCREASE BASE PAY

14 **ACCORDINGLY?**

11

12

13

15

16

17

18

19

20

21

22

23

A.

Compensating employees based solely on base pay would place ONE Gas and TGS at a competitive disadvantage. The Company's ability to attract, engage, motivate, and retain highly skilled employees has a very real and direct effect on the quality of the service provided to TGS customers. Not only are ONE Gas and TGS competing with other utilities for talented employees, ONE Gas and TGS also compete with non-regulated local firms and businesses that offer incentive Providing employees the opportunity to earn incentive compensation. compensation in addition to their base pay is an integral component of ONE Gas' ability to attract, engage, motivate and retain talented employees.

III. COMPENSATION COMPONENTS

2 O. WHAT ARE THE COMPENSATION COMPONENTS?

3 A. Compensation is comprised of several components, including base pay and 4 incentive programs commonly known as STI and LTI. STI and LTI are commonly 5 referred to as at-risk pay. STI is awarded to all employees based on meeting specific metrics and provides meaningful incentives for employees to operate with 6 7 an emphasis on safety and customer service along with ONE Gas' financial 8 performance. LTI is awarded to a select group of employees. ONE Gas also offers 9 benefits such as health and welfare and retirement plans, which are considered part 10 of the overall employee compensation package.

11 O. PLEASE EXPLAIN BASE PAY.

1

12

13

14

15

16

17

18

19

21

A.

Base pay is designed to compensate employees based on the skills and competencies required for their position, proficiency level, experience, consistent performance level and the overall value the employee brings to the position. Other components considered when determining base pay include workforce availability in the marketplace, employer needs, location, and cost of living and economic conditions. Base pay is reviewed at least annually for all employees resulting in pay increases, if applicable, by December to remain competitive with the marketplace. This process is known as the Common Salary Review.

20 Q. WHAT INCENTIVE COMPENSATION PROGRAMS DOES ONE GAS

OFFER TO ITS EMPLOYEES?

- A. ONE Gas has two incentive compensation programs: (1) the Annual Employee

 Incentive Plan, which is known as STI, and (2) the Equity Compensation Plan,
- which is identified as LTI.

1 Q. HOW ARE THE METRICS IN THE STI AND LTI PLANS DESIGNED?

A. ONE Gas relies on recent market studies to design the incentive plans. The metrics, explained in detail below, are designed specifically to encourage productive employee behavior that leads to positive safety, operational and financial results for the benefit of customers. In addition, ONE Gas is a 100% regulated natural gas utility, which means that all ONE Gas and TGS employees, from executive management in Tulsa, Oklahoma to front line employees in the proposed Central-Gulf Coast Service Area, are focused solely on providing service to customers.

IV. SHORT TERM INCENTIVE PLAN

Q. PLEASE EXPLAIN ONE GAS' STI PLAN.

A.

The Annual Employee Incentive Plan provides for an annual, lump-sum cash amount based on certain employee and ONE Gas performance criteria that are established each year by the ONE Gas Board of Directors' Executive Compensation Committee. All full-time employees of ONE Gas and its divisions, except for those employees affiliated with collective bargaining units, are eligible to participate in the STI Plan. STI awards are calculated using four variables: an employee's base wages earned times the ONE Gas performance modifier times the individual STI target (determined by position based on market studies) times the employee's individual performance modifier. For any of the four individual STI metrics to contribute toward an incentive payout, ONE Gas must achieve at least threshold performance for the metric. Provided a level at or above the threshold is attained, the determination of an individual's STI amount may be increased or decreased based on individual performance. Any metric for which the threshold is not achieved will not contribute toward an incentive payout.

| 1 | | STI provides employees with an incentive to provide high quality and safe |
|---------------------------------|-----|---|
| 2 | | delivery of service to our customers, which also affects ONE Gas' performance. It |
| 3 | | is designed to motivate employees to operate safely and efficiently in their day-to- |
| 4 | | day activities. The Compensation Study provided in Confidential Exhibit JDB-2, |
| 5 | | page 8, identifies that every company in the large and small utility peer groups has |
| 6 | | a short-term at-risk compensation program. The details of ONE Gas' STI Plan are |
| 7 | | set forth in Confidential Exhibits JDB-6a and JDB-6b. |
| 8 | Q. | WHAT PERFORMANCE METRICS ARE INCLUDED IN THE STI PLAN? |
| 9 | A. | ONE Gas performance metrics included in the STI Plan are total recordable |
| 10 | | incident rate ("TRIR"), preventable vehicle incident rate ("PVIR"), days away, |
| 11 | | restricted or transferred ("DART"), diluted earnings per share ("EPS"), and average |
| 12 | | emergency response time ("AERT"). |
| 13 | Q. | WHAT METRICS MUST ONE GAS AND EMPLOYEES MEET TO |
| 14 | | RECEIVE STI? |
| 15 | A. | An STI award is made if threshold levels for ONE Gas performance for TRIR, |
| | Λ. | All 511 award is made it uneshold levels for ONE das performance for TKIK, |
| 16 | 11. | PVIR, DART, AERT, or EPS are attained. Employee performance also affects |

As I have noted, ONE Gas designs its compensation plans to compensate employees at the median of the market and to do so in a way that is comparable to |

| 1 | | reason, offering employees payouts that range from 0% to 150% helps ONE Gas |
|--|-----------------|--|
| 2 | | maintain compensation that is competitive with the median of the market. In fact, |
| 3 | | some of the peer companies ONE Gas competes with for employees offer a |
| 4 | | maximum incentive payout at the 200% level. |
| 5 | Q. | WHAT CONSEQUENCES COULD RESULT IF THE ONE GAS STI PLAN |
| 6 | | DID NOT INCLUDE OPPORTUNITIES FOR EMPLOYEES TO BE |
| 7 | | AWARDED AT A LEVEL GREATER THAN THE 100% TARGET? |
| 8 | A. | If ONE Gas did not offer the opportunity for STI awards to exceed the 100% target, |
| 9 | | we would run the risk of losing a motivational element in the plan design. By |
| 10 | | structuring a STI plan that offers additional compensation for exceeding |
| 11 | | performance targets, ONE Gas is able to reward employees when their own efforts |
| 12 | | help ONE Gas exceed the target for the safety, operational, and financial goals in |
| 13 | | the plan. |
| | | |
| 14 | Q. | HOW IS THE INDIVIDUAL EMPLOYEE PERFORMANCE MEASURED? |
| 1415 | Q. A. | Employees are evaluated on job-related goals and objectives set at the beginning of |
| | | |

| 15 16 17 18 19 20 | | Employees are evaluated on job-related goals and objectives set at the beginning of each year. Operational employee goals may include, but are not limited to, safety, productivity, efficiency, leadership, quality and reliability of service and customer satisfaction. For example, related to the chart below, a customer service center representative's performance would be assessed based on various factors that impact how effectively and efficiently information is delivered to customers. |
| 15 16 17 18 19 20 21 | | Employees are evaluated on job-related goals and objectives set at the beginning of each year. Operational employee goals may include, but are not limited to, safety, productivity, efficiency, leadership, quality and reliability of service and customer satisfaction. For example, related to the chart below, a customer service center representative's performance would be assessed based on various factors that impact how effectively and efficiently information is delivered to customers. Each employee's performance is a key factor in calculating their STI |

expectations or needs improvement, their incentive compensation will be limited or not awarded at all. Conversely, there may be some employees who receive a larger incentive if they exceed performance expectations. This, of course, is reasonable as employees who excel should be recognized for the ways in which their actions contribute to the overall safety, operational efficiency, and quality of service delivered to our customers, as well as the financial health of ONE Gas.

A.

Q. CAN YOU PROVIDE PAYOUT EXAMPLES FOR EMPLOYEES IN THE 8 STI PLAN?

Below are actual examples of employee STI payouts for a Field Tech II and a Customer Service Representative II, which are employees who regularly interact with and serve customers. The Field Tech II in the example below had \$40,750 in base wages and a 4% incentive target. The Customer Service Representative II had \$29,126 in base wages and a 4% incentive target. The company performance resulted in a company modifier of 121.2%. Both employees earned an individual performance modifier of 95%. The individual modifiers are based on the employee's performance throughout the year. The calculations are as follows:

| Field Tech II - Pipeline/Field Support | | | | | | | | |
|--|----------|----------------------------|------|------------------------|------|---------------------|---|---------|
| Base Wages Earned | X | STI Incentive Target | X | Individual Modifier | X | Company Modifier | = | STI |
| \$40,750 | 750 x 4% | | X | 95% | X | 121.2% | = | \$1,877 |
| | | Customer | Serv | rice Rep II - In | forn | nation Center | | |
| Base Wages Earned | X | STI Incentive Target | X | Individual Modifier | X | Company Modifier | = | STI |
| \$29,126 | X | 4% | Х | 95% | X | 121.2% | = | \$1,341 |

As the examples demonstrate, the Field Technician II and the Customer Service Representative II must meet individual performance metrics and ONE Gas must (through the Company Modifier) have managed costs effectively in a given year for an employee to receive STI. These examples show that amounts of STI pay are reasonable and also a valuable component of an employee's total cash compensation.

5 Q. WHAT GOALS IS ONE GAS TRYING TO ACHIEVE THROUGH THE 6 COMBINATION OF METRICS IN THE STI PLAN?

A.

Achieving the metrics in the STI plan encourages employees to: (a) provide safe and reliable service; (b) practice safe driving and operating behaviors; and (c) be good stewards of expenses by encouraging decisions that help manage the Company's costs.

The combination of these criteria is key to safely providing reliable service to our customers at reasonable rates, as well as providing a balanced approach for attracting, engaging, motivating, and retaining a high-performing employee workforce appropriate for the needs and requirements of ONE Gas, TGS, and its customers. In this way, the metrics in the STI plan encourage employee actions and performance that come together to provide benefits to customers, employees and shareholders rather than creating a situation in which certain types of metrics benefit only one stakeholder group. In fact, utilizing safety metrics in the STI plan has moved the company into first quartile performance thus benefiting ONE Gas, TGS, and its customers, as discussed in the testimony of Company witness Shantel Norman.

V. LONG TERM INCENTIVE PLAN

| $\mathbf{\Lambda}$ | DI I | | | T TT DI | A TAT |

| () | PI.H.A | 35H. H.X PI | LAIN THE | 1.11 21 | AIN |
| | | | | | |

A.

ONE Gas has an LTI Plan in which two types of LTI equity awards (grants of ONE Gas stock), are available to executives and certain key employees. Of the 135 LTI participants who received a grant in February 2019, 84% were non-officers. In the payout that vested in February 2019, 81% of the employees were non-officers. ONE Gas' LTI plan is included as Confidential Exhibit JDB-7 to my testimony. LTIs are approved and granted on an annual cycle, typically in the first quarter of each fiscal year. The ONE Gas Board of Directors' Executive Compensation Committee oversees the Equity Compensation Plan, approves all executive LTI grants, and receives information on all non-executive LTI grants.

In 2019, ONE Gas granted two forms of LTI compensation: Restricted Stock Units and Performance Stock Units. A higher ratio of Performance Stock Units to Restricted Stock Units is granted to participants with more direct ability to impact the performance of ONE Gas. The grant values were based on position and base salary utilizing compensation survey data. In addition to position and base salary, employee performance, employee potential, long-term value to ONE Gas, criticality of the job and our desire to retain quality employees are considered in determining employee eligibility. LTI awards vest three years after the grant to encourage long-term improvements and financial awareness in key employees and to provide an incentive to remain employed with ONE Gas.

The Compensation Study provided in Confidential Exhibit JDB-2, at page 3, identifies that ONE Gas' long-term at-risk compensation is comparable to and

| 1 | competitive with plan designs of other similarly sized utilities. For that reason |
|---|---|
| 2 | these costs are presumed reasonable and necessary under GURA § 104.060. |

3 Q. PLEASE EXPLAIN THE DIFFERENCE BETWEEN RESTRICTED 4 STOCK UNITS AND PERFORMANCE STOCK UNITS.

A.

Restricted Stock Units are granted for a term of three years from the date of the grant, with the participant being vested and entitled to receive one share of ONE Gas common stock for each restricted stock unit granted after three years of employment following the grant date. Restricted Stock Units are time-based equity and are not based on the financial performance of ONE Gas; rather, it is a form of compensation that depends entirely on an employee's tenure with ONE Gas. Restricted Stock Units are designed to encourage the retention of key employees, reducing turnover and retaining experienced employees who contribute to the overall success and stability of the organization.

Performance Stock Units also vest three years from the date of the grant, at which time the employee is entitled to receive a percentage of the Performance Stock Units granted in shares of ONE Gas common stock. The number of shares of common stock awarded will range from 0% to 200% of the number of units granted based upon ONE Gas' performance as measured by its three-year total shareholder return ("TSR") compared with a designated peer group of 13 utility peer companies over the same three-year measurement period. If the ONE Gas TSR equals the 50th percentile of the TSR earned by the peer companies over the measurement period, participants will receive 100% of the Performance Stock Units granted. A performance scale calibrates the potential number of performance stock units earned, with a 25th percentile TSR performance compared to the peer

group equating to an award of 50% of the Performance Stock Units granted and a 90th percentile performance compared to the peer group equating to a payment of 200% of the Performance Stock Units granted. If the ONE Gas TSR falls below the 25th percentile TSR of the peer group, participants will not receive an award for any of the Performance Stock Units granted at the start of the measurement period. This measurement is commonly referred to as relative TSR. As I explain below, relative TSR is a common measure of long-term performance associated with utility performance plans such as the ONE Gas Performance Stock Units.

9 Q. WHAT IS THE PURPOSE OF OFFERING LTI?

A.

10 A. LTI grants, along with base pay and STI, are necessary for certain positions to allow
11 ONE Gas to compete with peers in the market. LTI is also necessary to attract,
12 engage, motivate, and retain key employees, including executives, and encourage
13 them to make operational decisions that create value for customers, employees and
14 other stakeholders. Generally, participants who receive LTI are those employees
15 who are in a position to contribute significantly to the operational and financial
16 stability of ONE Gas.

17 Q. IS IT APPROPRIATE FOR PERFORMANCE STOCK UNITS TO BE 18 LINKED TO FINANCIAL GOALS?

Yes, linking the awarding of ONE Gas Performance Stock Units to financial goals is a consistent standard across the marketplace. The most common financial metric used to evaluate company performance in an LTI plan is TSR, with 70.2% of energy companies using that metric according to the Willis Towers Watson 2019 Long-Term Incentives Policies and Practices Survey U.S. excerpt - LTI Prevalence provided in Confidential Exhibit JDB-5. Thus, the ONE Gas LTI plan design that

| 1 | | relies on TSR is the most common approach among the majority of peer companies |
|----|----|--|
| 2 | | and is evaluated annually to ensure that ONE Gas remains competitive with the |
| 3 | | market. |
| 4 | Q. | WHY DOES THE LTI PROGRAM OFFER PAYOUTS FOR |
| 5 | | PERFORMANCE STOCK UNITS IN EXCESS OF THE 100% TARGET |
| 6 | | FOR TSR PERFORMANCE? |
| 7 | A. | As mentioned previously, if ONE Gas did not offer the opportunity for payouts to |
| 8 | | exceed target when ONE Gas' performance exceeds the 100% target, we would run |
| 9 | | the risk of losing a motivational element in the plan design. All performance-based |
| 10 | | LTI programs within the market offer a range of opportunities, typically from 0% |
| 11 | | to 200% of target measured by relative TSR. When ONE Gas performs above its |
| 12 | | peers, a higher payout is competitive and motivates employees just like a lower or |
| 13 | | zero payout is competitive when the company performs below peers. |
| 14 | Q. | WHAT DOES ONE GAS HOPE TO ACHIEVE THROUGH THE LTI |
| 15 | | PLAN? |
| 16 | A. | The LTI plan enables ONE Gas to compete in the market in order to attract, engage, |
| 17 | | motivate, and retain quality executives and key employees. This encourages |
| 18 | | employees to continuously improve performance, which directly benefits |
| 19 | | customers through a focus on safe, reliable and efficient service at reasonable rates. |
| 20 | | Retaining key employees also improves system and operations knowledge and |
| 21 | | reduces the need (and cost) to recruit, hire and train employees to replace |
| 22 | | employees who might leave ONE Gas or the Company if we did not compensate |
| 23 | | them competitively in the market. |

1 VI. GENERAL BENEFITS

A.

| O. V | WHAT ARE THE | COMPONENTS | OF ONE | GAS' | ' BENEFIT PL | ANS? |
|------|--------------|------------|--------|------|--------------|------|
|------|--------------|------------|--------|------|--------------|------|

A. ONE Gas provides a range of benefits to its employees that include: (a) medical and dental insurance; (b) basic life insurance; (c) basic accidental death and dismemberment; (d) an Employee Assistance Program; (e) 401(k) plan; (f) Profit Sharing Plan or Retirement Plan; and (g) an Employee Stock Purchase Plan. See Confidential Exhibit JDB-8 and Confidential Exhibit JDB-9 for information related to ONE Gas benefits. These benefit programs are offered to employees, who may elect to participate in certain benefits at varying levels.

Q. HAS ONE GAS TAKEN ANY MEASURES TO HELP MANAGE ITS HEALTH BENEFIT COSTS?

Yes. ONE Gas' goal is to provide benefits that are competitive in the marketplace and allow ONE Gas to attract, engage, motivate, and retain a quality workforce. ONE Gas compares the benefits it offers employees with that of peer companies to ensure market competitiveness and the ability to attract, engage, motivate, and retain employees. Having a quality workforce is key to providing safe, reliable and efficient service to the Company's customers. ONE Gas contracts with high quality health care vendors to provide high quality service to our employees and their dependents while helping ONE Gas to control health care costs.

In addition, employees are required to identify whether they use tobacco products. Those who do pay a premium surcharge. ONE Gas contracts with health carriers to provide several programs to ensure early detection of potential health concerns to produce quality outcomes and help manage health care trends. ONE Gas also offers a tobacco cessation program for employees who wish to stop

smoking or using tobacco products. The tobacco surcharge, in turn, reduces ONE

Gas administration and claims costs.

WHY IS IT IMPORTANT THAT ONE GAS' BENEFIT PROGRAMS ARE

4 COMPARABLE WITH ITS INDUSTRY PEERS?

3

16

17

18

19

20

21

22

Q.

5 A. ONE Gas provides competitive benefits because it competes with other utilities and 6 local firms and businesses for talented employees to meet its goal of providing safe, 7 reliable service to customers at a reasonable cost. Additionally, most of our 8 employees have transferable skills, meaning they can go work in the broader energy 9 industry or a completely unrelated industry. We compete with the broader 10 marketplace to attract, engage, motivate, and retain employees that will support our 11 business of providing natural gas to our customers safely and reliably. Part of that 12 attraction, engagement, motivation, and retention is that ONE Gas' pay and benefits 13 must be competitive in the industry and local market.

Q. IN YOUR OPINION, DOES GURA § 104.060 SUPPORT THE COMPANY'S REQUEST TO RECOVER BENEFIT COSTS?

A. Yes. In addition to referring to base pay and wage issues, the statute also mentions employee benefits. ONE Gas relies on and appropriately uses market studies that are less than three years old to analyze and decide which benefits to offer. ONE Gas's benefits are consistent with those studies, which means the benefit costs TGS is requesting are presumed reasonable and necessary. See Confidential Exhibit JDB-10 for an independent study showing the value of ONE Gas' benefits is comparable to peer companies and slightly above the median value.

23 Q. DOES THIS CONCLUDE YOUR DIRECT TESTIMONY?

24 A. Yes, it does.

Annual Meeting of Shareholders Thursday, May 23, 2019

MISSION

We deliver natural gas for a better tomorrow.

VISION

To be a premier natural gas distribution company creating exceptional value for our stakeholders.

STRATEGY

Becoming ONE:

- ONE in Responsibility safety, reliability and compliance
- · ONE in Value employees, shareholders, customers and communities
- ONE in Industry recognized leader, processes and productivity

CORE VALUES

- * Safety: We are committed to operating safely and in an environmentally responsible manner.
- * Ethics: We are accountable to the highest ethical standards and are committed to compliance. Honesty, trust and integrity matter.
- Inclusion and Diversity: We embrace an inclusive and diverse culture that encourages collaboration. Every employee makes a
 difference and contributes to our success.
- Service: We provide exceptional service and make continuous improvements in our pursuit of excellence.
- Value: We create value for all stakeholders, including our customers, employees, investors and communities.

April 3, 2019

Dear Shareholder:

You are cordially invited to attend the Annual Meeting of Shareholders of ONE Gas, Inc., which will be held at 9:00 a.m. Central Daylight Time on Thursday, May 23, 2019, at our company headquarters at ONE Gas, Inc., First Place Tower, 15 E. Fifth Street, 2nd Floor, Tulsa, Oklahoma 74103.

The matters to be considered and voted on at the meeting are set forth in the attached Notice of Annual Meeting of Shareholders and are described in the attached proxy statement. A copy of our 2018 annual report to shareholders is also enclosed. A report on our 2018 performance will be presented at the meeting.

We look forward to greeting as many of our shareholders as possible at the annual meeting. We know, however, that most of our shareholders will be unable to attend. Therefore, proxies are being solicited so that each shareholder has an opportunity to vote by proxy. You can authorize a proxy over the internet or by telephone. Instructions for using these convenient services are included in the proxy statement and on the proxy card. Of course, if you prefer, you may vote by mail by signing, dating and returning the enclosed proxy card in the enclosed postage-paid envelope.

If your shares are held by a broker, bank or other holder of record, unless you provide your broker, bank or other holder of record with your instructions on how to vote your shares, your shares will not be voted in the election of directors or in certain other important proposals as described in the accompanying proxy statement. Consequently, please provide your voting instructions to your broker, bank or other holder of record in a timely manner in order to ensure that your shares will be voted.

YOUR VOTE IS IMPORTANT – Regardless of the number of shares you own, your vote is important. I urge you to submit your proxy as soon as possible so that you can be sure your shares will be voted.

Thank you for your investment in ONE Gas and for your continued support.

Sincerely,

JOHN W. GIBSON Chairman of the Board

Jh W. Frimon.

Record date:

ONE GAS, INC. NOTICE OF 2019 ANNUAL MEETING OF SHAREHOLDERS

Time and date: May 23, 2019, at 9:00 a.m. Central Daylight Time

Place: ONE Gas, Inc., First Place Tower, 15 E. Fifth Street, 2nd Floor, Tulsa, Oklahoma 74103

Items of business: (1) To consider and vote on the election of nine director nominees named in the accompanying proxy statement to serve on our Board of Directors;

(2) To consider and vote on the ratification of the selection of PricewaterhouseCoopers LLP as the independent registered public accounting firm of ONE Gas, Inc. for the year ending December 31, 2019;

(3) To consider and vote on our executive compensation on a non-binding, advisory basis; and

(4) To consider and vote on such other business as may come properly before the meeting, or any adjournment or postponement of the meeting.

These matters are described more fully in the accompanying proxy statement.

March 25, 2019. Only shareholders of record at the close of business on the record date are entitled

to receive notice of, and to vote at, the annual meeting.

Proxy voting: YOUR VOTE IS IMPORTANT

The vote of every shareholder is important. The Board appreciates the cooperation of shareholders in directing proxies to vote at the meeting. To make it easier for you to vote, internet and telephone voting are available. The instructions in the accompanying proxy statement and attached to your proxy card describe how to use these convenient voting methods. Of course, if you prefer, you may vote by mail by completing your proxy card and returning it in the enclosed postage-paid envelope. You may revoke your proxy at any time by following the procedures set forth in the accompanying proxy statement.

Whether or not you expect to attend the meeting in person, we urge you to vote your shares at your earliest convenience. This will ensure the presence of a quorum at the meeting. Voting your shares promptly, via the internet, by telephone, or by signing, dating and returning the enclosed proxy card will save the expense of additional solicitation. Submitting your proxy now will not prevent you from voting your shares at the meeting, if you desire to do so, as your proxy is revocable at your option.

Important Notice Regarding Internet Availability of Proxy Materials: This notice of annual meeting, proxy statement, form of proxy and our 2018 annual report to shareholders are available on our website at www.ONEGas.com. Additionally, and in accordance with the rules of the SEC, you may access this proxy statement and our 2018 annual report at http://shareholder.onegas.com, which does not infringe on the anonymity of a person accessing such website. The website does not employ "cookies" or other user-tracking features.

The approximate date of the mailing of this proxy statement and accompanying proxy card is April 3, 2019.

By order of the Board,

Brian K. Shore Corporate Secretary

Tulsa, Oklahoma April 3, 2019

TABLE OF CONTENTS

PROXY STATEMENT

This proxy statement describes important issues affecting our company and is furnished in connection with the solicitation of proxies by our Board for use at our 2019 Annual Meeting of Shareholders to be held at the time and place set forth in the accompanying notice.

Unless we otherwise indicate or unless the context indicates otherwise, all references in this proxy statement to "ONE Gas", "we," "our," "us," the "company" or similar references mean ONE Gas, Inc. and its subsidiaries, and references to the "Board" or "Board of Directors" mean the Board of Directors of ONE Gas, Inc.

SUMMARY PROXY INFORMATION

To assist you in reviewing the company's 2018 performance and voting your shares, we would like to call your attention to key elements of our 2019 proxy statement and our 2018 annual report to shareholders. The following is only a summary. For more complete information about these topics, please review the complete proxy statement and our 2018 annual report to shareholders.

PROXY STATEMENT SUMMARY

The following summary provides highlights contained in this proxy statement. You should carefully read and consider the information contained in the proxy statement as this summary does not contain all the information you should consider before voting.

INFORMATION ABOUT THE ANNUAL MEETING OF SHAREHOLDERS

- Date: Thursday, May 23, 2019
- Time: 9:00 a.m., Central Daylight Time
- Place: ONE Gas, Inc., First Place Tower, 15 E. Fifth Street, 2nd Floor, Tulsa, Oklahoma 74103

ITEMS OF BUSINESS

- Election of nine director nominees to serve a one-year term
- Ratification of the selection of PricewaterhouseCoopers LLP as our independent registered public accounting firm for 2019
- · Approval, on a non-binding, advisory basis, of our executive compensation
- Other business as may come properly before the meeting, or any adjournment or postponement of the meeting

RECORD DATE

March 25, 2019

INTERNET ACCESS TO PROXY MATERIALS

 Please visit http://shareholder.onegas.com for online access to our proxy materials including this proxy statement and the company's 2018 annual report.

HOW TO VOTE IF YOU ARE A SHAREHOLDER OF RECORD

Via the internet

- Go to the website at www.proxypush.com/ogs which is available 24 hours a day, 7 days a week, until 11:59 p.m. (Central Daylight Time) on May 22, 2019
- Enter the control number that appears on your proxy card. This process is designed to verify that you are a shareholder, and allows you to vote your shares and confirm that your instructions have been properly recorded.
- Follow the simple instructions.
- If you appoint a proxy via the internet, you do not have to return your proxy card.

By mail

- Mark your selections on the proxy card.
- Date and sign your name exactly as it appears on your proxy card.
- Mail the proxy card in the enclosed postage-paid envelope.
- If mailed, your completed and signed proxy card must be received prior to the commencement of voting at the annual meeting.

By telephone

- On a touch-tone telephone, call toll-free
 1.866.883.3382 3.24 hours a day, 7 days a week, until 11:59 p.m. (Central Daylight Time) on May 22, 2019.
- Enter the control number that appears on your proxy card. This process is designed to verify that you are a shareholder, and allows you to vote your shares and confirm that your instructions have been properly recorded.
- Follow the simple recorded instructions.
- If you appoint a proxy by telephone, you do not have to return your proxy card.

HOW TO VOTE IF YOUR SHARES ARE HELD BY A BROKER, BANK OR OTHER HOLDER OF RECORD

• This proxy statement and our 2018 annual report to shareholders should have been forwarded to you by your bank, broker or other holder of record, together with a voting instruction card. You have the right to direct your bank, broker or other holder of record how to vote your shares by using the voting instruction card you received from your bank, broker or other holder of record, or by following any instructions provided by your bank, broker or other holder of record for voting via the internet or telephone.

SHAREHOLDER ACTIONS – MATTERS TO BE VOTED UPON

- Election of Directors (Proposal 1). You will find in this proxy statement important information about the qualifications and experience of each of the nine director nominees, each of whom is a current director. The Corporate Governance Committee performs an annual assessment of the performance of the Board to ensure that our directors have the skills and experience to effectively oversee our company. All of our directors have proven leadership, sound judgment, integrity and a commitment to the success of our company, and our Board recommends that shareholders vote in favor of each nominee for election.
- Ratification of our Independent Registered Public Accounting Firm (Proposal 2). You will also find in this proxy statement important information about our independent registered public accounting firm, PricewaterhouseCoopers LLP. We believe PricewaterhouseCoopers LLP continues to provide high-quality service to our company, and our Board recommends that shareholders vote in favor of ratification.
- Advisory Vote on Executive Compensation (Proposal 3). Our shareholders have the opportunity to cast a non-binding, advisory vote on our executive compensation program. In evaluating this "say on pay" proposal, we recommend that you review our Compensation Discussion and Analysis in this proxy statement, which explains how and why the Executive Compensation Committee arrived at decisions with respect to our 2018 executive compensation. Our Board recommends that shareholders vote in favor of our executive compensation program.
- 2 ONE Gas, Inc. Notice of 2019 Annual Meeting of Shareholders and Proxy Statement

PROPOSALS, BOARD RECOMMENDATIONS, HOW YOU MAY VOTE, VOTES REQUIRED AND EFFECT OF ABSTENTIONS AND BROKER NON-VOTES

Each of the proposals, how the Board recommends that you vote, how you may vote, and votes required for each proposal, together with how abstentions and broker non-votes will be treated for each proposal, are set forth in the following table:

| P | roposal | How does the Board recommend that I vote? | How may I vote? | Votes required for approval when quorum is present | Abstentions | Broker non-votes |
|----|---|---|--|---|--|---|
| 1. | Election of Directors | The Board recommends that you vote FOR each of the nine director nominees. | You may vote FOR or AGAINST the approval of each of the nine director nominees, or you may indicate that you wish to ABSTAIN from voting on the matter. | Majority of the votes cast by shareholders present in person or by proxy and entitled to vote | Do not count as votes cast and have no effect on the vote | Do not count as votes cast and have no effect on the vote |
| 2. | Ratification of our Independent Auditor | The Board recommends that you vote FOR the ratification of PricewaterhouseCoopers LLP as our independent registered public accounting firm for 2019. | You may vote FOR or AGAINST the ratification of the selection of PricewaterhouseCoopers LLP as our independent registered public accounting firm for 2019, or you may indicate that you wish to ABSTAIN from voting on the matter. | Affirmative vote of a majority of the voting power of the shareholders present in person or by proxy and entitled to vote | Have the same effect as votes against this proposal | Voted at broker's discretion — shares not voted in the discretion of a brokerage firm, bank, trustee or other similar fiduciary have the same effect as votes against this proposal |
| 3. | Advisory vote on Executive Compensation | The Board recommends that you vote FOR the approval, on an advisory basis, of the company's executive compensation. | You may vote FOR or AGAINST the advisory vote on executive compensation, or you may indicate that you wish to ABSTAIN from voting on the matter. | Affirmative vote of a majority of the voting power of the shareholders present in person or by proxy and entitled to vote | Have the same effect as votes against this proposal | Do not count as votes cast and have no effect on the vote |

DIRECTOR NOMINEES

The following table summarizes information about the nine director nominees. As noted, seven of our nine directors have been determined to be independent in accordance with the NYSE independence standards and our director independence guidelines.

Director Nominees

| Name | Age | Director since | Occupation | Independent | Committee memberships/ positions |
|--------------------------|-----|----------------|---|-------------|--|
| Arcilia C. Acosta | 53 | 2018 | President and Chief Executive Officer, CARCON Industries and Construction | Yes | B, C, D |
| Robert B. Evans | 70 | 2014 | Retired, President and Chief Executive Officer of Duke Energy Americas | Yes | B**, C, D |
| John W. Gibson | 66 | 2014 | Retired, Chief Executive Officer of ONEOK | No | A* |
| Tracy E. Hart | 57 | 2018 | President, Tarlton Corporation | Yes | B, C, D |
| Michael G. Hutchinson | 63 | 2014 | Retired, partner at Deloitte & Touche | Yes | A, B*, C, D** |
| Pattye L. Moore | 61 | 2014 | Chairman, Red Robin Gourmet Burgers | Yes | A, B, C*, D |
| Pierce H. Norton II | 59 | 2014 | President and Chief Executive Officer of ONE Gas, Inc. | No | Α |
| Eduardo A. Rodriguez | 63 | 2014 | President of Strategic Communication Consulting Group | Yes | A, B, C, D* |
| Douglas H. Yaeger | 70 | 2014 | Retired, Chairman, President and Chief Executive Officer of The Laclede Group, Inc. (now known as Spire Inc.) | Yes | B, C**, D |

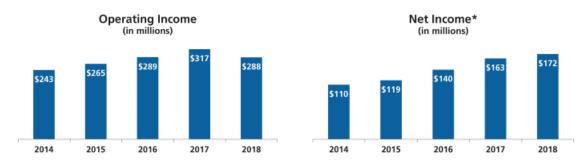

Committee memberships/positions key:

A Executive Committee B Audit Committee

- C Executive Compensation Committee D Corporate Governance Committee
- Committee chair
- ** Committee vice chair

BUSINESS HIGHLIGHTS

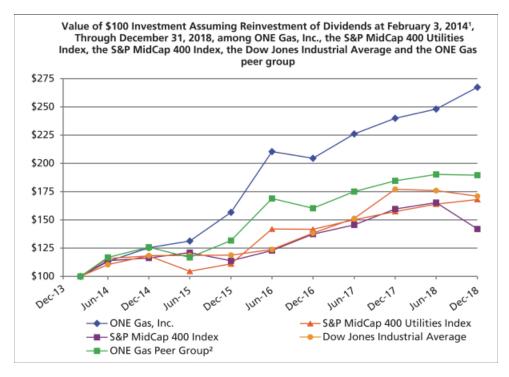

Financial Performance. 2018 operating income decreased to \$288.4 million, compared with \$316.7 million in 2017, which reflects primarily new rates in Texas and Kansas and residential customer growth in Oklahoma and Kansas, higher sales and transportation volumes due to colder than normal weather, offset by an increase in operating expenses and the effects of tax reform.

We were a business unit of ONEOK prior to January 31, 2014.

Dividend. During 2018, we paid cash dividends of \$1.84 per share. We paid total aggregate dividends to our shareholders of \$97 million in 2018. In January 2019, we declared a dividend of 50 cents per share (\$2.00 per share on an annualized basis), an increase of 4 cents per share compared with the previous cash dividend of 46 cents per share.

Total Shareholder Return. The market price of our common stock was \$79.60 per share at December 31, 2018, reflecting a TSR (stock price appreciation and dividends) of 11.40 percent and an increase of 8.7 percent from the closing price of \$73.26 on December 29, 2017.

- February 3, 2014 was the first day of "regular way" trading for ONE Gas, Inc. on the NYSE.
- 2 The ONE Gas peer group used in this graph is the same peer group that will be used in determining our level of performance under our 2018 performance units at the end of the three-year performance period and is comprised of the following companies: Alliant Energy Corporation; Atmos Energy Corporation; Avista Corporation; CenterPoint Energy Inc.; Chesapeake Utilities Corporation; Orporation; New Jersey Resources Corporation; Nisource Inc.; Northwest Natural Gas Company; NorthWestern Corporation; South Jersey Industries; Southwest Gas Corporation; and Spire Inc.

COMPENSATION HIGHLIGHTS

Compensation Philosophy. A principal feature of our compensation program is the determination of executive compensation by our Executive Compensation Committee (referred to as the "Executive Compensation Committee" or the "Committee") based on a comprehensive review of quantitative and qualitative factors designed to reward the accomplishment of long-term sustainable business goals. Our executive compensation program is designed to attract, engage, motivate, reward and retain highly effective key executives who drive our success and who are leaders in the industry, to pay for performance and to align the long-term interests of our executive officers with those of our stakeholders. We believe our program is designed effectively to meet or exceed our financial and operational performance goals, is well aligned with the interests of our stakeholders and is instrumental to achieving our business goals. Our compensation philosophy and related governance features are complemented by several specific elements that are designed to achieve these objectives, as summarized below.

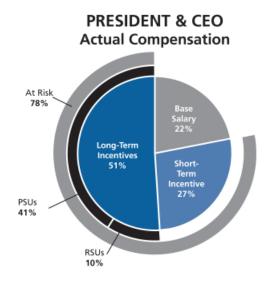

Program Design.

Our compensation program:

- provides a competitive total compensation opportunity;
- establishes a pay mix that balances short- and long-term performance specifically consisting of significant equity-based (at-risk) compensation;
- utilizes separate metrics under our STI and LTI award programs to incentivize performance;
- links a significant portion of total compensation to performance which we believe creates long-term stakeholder value;

- determines awards based on the executive officer's contributions performed the right way to achieve business performance;
- enhances retention by subjecting a significant portion of total compensation to multi-year vesting requirements;
- discourages unnecessary or excessive risk taking;
- rewards for accomplishing goals as well as for how those goals are accomplished; and
- restricts CIC cash benefits to double-trigger vesting.
- We provide the following primary elements of compensation for our NEOs (as listed in the Compensation Discussion and Analysis at page 40): base salary, annual STI awards and LTI awards.
- The Executive Compensation Committee references the median level of the market when determining all elements of compensation and targets the median level of total compensation.
- Our performance-based STI program provides for cash awards based on achievement of financial and operational goals established annually by our Executive Compensation Committee.
- We encourage alignment of our NEOs' interests with those of our stakeholders through the grant of LTI awards, of which
 approximately 80 percent are PSUs and approximately 20 percent are RSUs.
- · Our NEOs receive no significant perquisites or other personal benefits.
- · We do not provide any "golden parachute" excise tax gross-ups to our NEOs.
- The Executive Compensation Committee makes all compensation decisions regarding our NEOs and submits those decisions to the independent directors of the Board for ratification.
- The Executive Compensation Committee is composed solely of persons who qualify as independent directors under the listing standards of the NYSE.
- We have market-competitive stock ownership guidelines for our NEOs and our non-management directors which provides them with a significant stake in our long-term success and aligns their interest with stakeholder interests.
- We have adopted compensation recovery ("clawback") provisions that permit the Committee to use appropriate discretion to seek recoupment of grants of PSUs (including any shares earned and the proceeds from any sale of such shares) and STI awards paid to an employee in the event that fraud, negligence or individual misconduct by such employee is determined to be a contributing factor to having to restate all or a portion of our financial statements.
- Officers, members of our Board and certain employees designated as insiders under our Securities/Insider Trading Policy are prohibited from engaging in short sale and other derivative or speculative transactions in our securities, and/or from purchasing or using, directly or indirectly through family members or other persons or entities, financial instruments (including puts or calls, prepaid variable forward contracts, equity swaps, collars and exchange funds) that are designed to hedge or offset any decrease in the market value of our securities.
- Officers and directors are prohibited from holding our securities in a margin account or pledging our securities as collateral for a loan.
 The CEO may grant an exception against pledging securities on a limited case-by-case basis. There is no exception to the prohibition against pledging with respect to the CEO.
- The Executive Compensation Committee engages an executive compensation consultant who is independent under the SEC rules and NYSE listing standards to provide advice and expertise on our executive and director compensation program design and implementation and to lead discussions on trends within our industry.
- Our say-on-pay vote in 2018 was 96.7 percent in agreement with our compensation paid to our NEOs. In reviewing our compensation program during 2018, our Executive Compensation Committee determined to continue to apply the same principles as have been historically applied in determining the nature and amount of our executive compensation.
- 6 ONE Gas, Inc. Notice of 2019 Annual Meeting of Shareholders and Proxy Statement

Link between Executive Compensation and Performance. The Board awarded Pierce H. Norton II, our President and CEO, incentive compensation for 2018 that was commensurate with our business results and his position as our President and CEO, including annual base pay of \$775,000, an annual STI award of \$939,300, and a LTI award with a grant target value of \$1,750,000. Consistent with our executive compensation philosophy, a significant majority of Mr. Norton's total direct compensation of \$3,464,300 for 2018 was incentive-based and at-risk, as illustrated by the following chart:

The compensation of our other NEOs further reflects both our 2018 performance and our pay-for-performance compensation philosophy:

| Named Executive Officer | 2018 Base Salary | 2018 STI Award | 2018 LTI Award * | 2018 Total Direct Compensation |
|-------------------------|------------------|----------------|------------------|-----------------------------------|
| Pierce H. Norton | \$775,000 | \$939,300 | \$1,750,000 | \$3,464,300 |
| Curtis L. Dinan | \$435,000 | \$363,255 | \$425,040 | \$1,223,295 |
| Caron A. Lawhorn | \$365,000 | \$301,924 | \$400,022 | \$1,066,946 |
| Robert S. McAnnally | \$365,000 | \$301,924 | \$400,022 | \$1,066,946 |
| Joseph L. McCormick | \$340,000 | \$242,509 | \$375,003 | \$957,512 |

Represents the grant date value approved by the Committee. The values displayed in the Summary Compensation Table represent the accounting value of the PSUs.

| Name | 2018 Target STI Award as Percentage of Base Pay | 2018 Maximum STI Award as a Percentage of Base Pay | |
|---------------------|--|---|--|
| Pierce H. Norton II | 100% | 188% | |
| Curtis L. Dinan | 65% | 122% | |
| Caron A. Lawhorn | 65% | 122% | |
| Robert S. McAnnally | 65% | 122% | |
| Joseph L. McCormick | 55% | 103% | |

CORPORATE RESPONSIBILITY

For more than 100 years, our business has delivered natural gas to our customers. We will continue to focus on operating safely and responsibly, while creating shareholder value. For more information see our Corporate Responsibility report published on our website at www.ONEGas.com.

SAFETY AND HEALTH

The safety of our employees, our customers and the communities where we operate is at the forefront of each business decision we make. By monitoring the integrity of our assets and promoting the safety and health of our employees, customers and communities, we are investing in the long-term sustainability of our businesses.

A substantial part of our workforce is comprised of operations specialists who work regularly in the field. We continuously assess the risks our employees face in their jobs, and we work to mitigate those risks through training, appropriate engineering controls, work procedures and other preventive safety and health programs. Reducing incidents and improving our safety incident rates is important, but we are not focused only on statistics. Low incident rates alone cannot prevent a large-scale incident, which is why we continue to focus on enhancing our preventive safety programs, such as near-miss reporting, vehicle-safety monitoring, risk assessment and others.

2018 Safety and Health Performance Updates and Highlights

- Since 2013 we have experienced a 57% reduction in our TRIR.
- Since 2013 strains and sprains, our most prevalent type of injury, has declined by 85%.
- Since 2013 we have experienced a 75% reduction in our DART.
- Since 2013 we have experienced a 23% reduction in our PVIR.

ENVIRONMENTAL PERFORMANCE

2018 Environmental Updates and Highlights

- We retired or replaced approximately 430 miles of distribution and transmission facilities in 2018, including 21 miles of cast iron pipe, which will result in decreased emissions of methane. We have a total of four miles of cast iron pipe remaining to be replaced, which we have committed to replace by the end of 2019.
- In 2018, our Energy Efficiency Program in Oklahoma and the Austin and Rio Grande Valley Conservation Programs in Texas combined to issue more than 122,750 rebates totaling approximately \$17 million through energy-efficiency and conservation programs that offered customers rebates on natural gas appliances and energy-efficient home improvements.
- We continue to be a partner in the EPA's Natural Gas STAR Program and the EPA's Methane Challenge program to voluntarily reduce greenhouse gas emissions. We anticipate reporting in 2019 our 2018 performance to the EPA. We exceeded our goal by achieving an overall replacement rate between 6 and 7 percent in both 2017 and 2016.

COMMUNITY INVESTMENT

We are committed to being active members of the communities where we operate. Investing in the areas where we have operations and where our employees live and work is not only the right thing to do—it's smart business. By contributing financially and through volunteer work, we can help build stronger communities and create a better environment for our employees, our customers and the general public.

We accomplish this in a number of ways, including grants from the ONE Gas Foundation, corporate sponsorships to nonprofit organizations and community volunteer efforts. Primary focus areas for our community investments are education, health and human services, arts and culture, environmental stewardship and community enrichment. We give priority consideration to educational programs and to health and human services organizations, particularly those with programs that help people become self-sufficient.

2018 Community Investment Updates and Highlights

- In 2018, we contributed approximately \$2.1 million to nonprofit organizations through the ONE Gas Foundation and corporate sponsorships, and our employees volunteered more than 9,500 hours in our communities.
- 8 ONE Gas, Inc. Notice of 2019 Annual Meeting of Shareholders and Proxy Statement

POLITICAL ADVOCACY AND CONTRIBUTIONS

We actively participate in the political process through the lobbying efforts of our government relations department, involvement in multiple business and industry trade organizations, and through the ONE Gas PAC. In 2018, ONE Gas employees and members of the ONE Gas Board contributed approximately \$95,719 to the ONE Gas PAC. During 2018, the ONE Gas PAC contributed approximately \$121,250 to candidates for political office and other political action committees.

As a company, we do not contribute corporate funds to political candidates, political action committees or so-called 501(c)(4) social welfare organizations. Employee and director contributions to the ONE Gas PAC are used to support candidates seeking federal or state offices who support the interests of the energy industry and business. A steering committee made up of senior management representatives and a contributions committee made up of employees from across our operating areas oversee all ONE Gas PAC contributions to political candidates.

ONE Gas, Inc. Notice of 2019 Annual Meeting of Shareholders and Proxy Statement

9

OUTSTANDING STOCK AND VOTING

VOTING

Only shareholders of record at the close of business on March 25, 2019, are entitled to receive notice of and to vote at the annual meeting. As of that date, 52,686,558 shares of our common stock were outstanding. Each outstanding share entitles the holder to one vote on each matter submitted to a vote of shareholders at the meeting. No other class of our stock is entitled to vote on matters to come before the meeting.

Shareholders of record may vote in person or by proxy at the annual meeting. All properly submitted proxies received prior to the commencement of voting at the annual meeting will be voted in accordance with the voting instructions contained on the proxy. Shares for which signed proxies are properly submitted without voting instructions will be voted:

- (1) **FOR** the election of the nine director nominees named in this proxy statement to serve on our Board for a one-year term;
- FOR the ratification of the selection of PricewaterhouseCoopers LLP as our independent registered public accounting firm for the year ending December 31, 2019; and
- **FOR** the advisory proposal to approve our executive compensation.

While we know of no other matters that are likely to be brought before the meeting, in the event any other business properly comes before the meeting, proxies will be voted in the discretion of the persons named in the proxy. The persons named as proxies were designated by our Board.

To vote shares held "in street name" through a bank, broker or other holder of record, a shareholder must provide voting instructions to his or her bank, broker or other holder of record. Brokerage firms, banks and other holders of record are required to request voting instructions for shares they hold on behalf of their customers and others. We encourage you to provide instructions to your bank, broker or other holder of record on how to vote your shares. If your shares are held "in street name," to be able to vote those shares in person at the annual meeting, you must obtain a legal proxy, executed in your favor, from the holder of record of those shares as of the close of business on March 25, 2019.

The rules of the NYSE determine whether proposals presented at shareholder meetings are routine or non-routine. If a proposal is routine, a broker or other entity holding shares for an owner in street name may vote for the proposal without receiving voting instructions from the owner under certain circumstances. If a proposal is non-routine, the broker or other entity may vote on the proposal only if the owner has provided voting instructions. A "broker non-vote" occurs when the broker or other entity is unable to vote on a proposal because the proposal is non-routine and the owner does not provide any voting instructions. Under the rules of the NYSE, Proposals 1 and 3 are considered to be non-routine, and Proposal 2 is considered to be routine. Accordingly, if you do not provide voting instructions to your brokerage firm or other entity holding your shares, your brokerage firm or other entity holding your shares will not be permitted under the rules of the NYSE to vote your shares on Proposals 1 and 3 and will be permitted under the rules of the NYSE to vote your shares on Proposal 2 at its discretion.

Please provide your voting instructions to your broker, bank or other holder of record so that your shares may be voted.

Representatives of our stock transfer agent, EQ Shareholder Services, a division of Equiniti Trust Company, will be responsible for tabulating and certifying the votes cast at the annual meeting.

QUORUM

The holders of a majority of the shares entitled to vote at the annual meeting, present in person or by proxy, constitute a quorum for the transaction of business at the annual meeting. In determining whether we have a quorum, we count abstentions and broker non-votes as

If a quorum is not present at the scheduled time of the meeting, the shareholders who are present in person or by proxy may adjourn the meeting until a quorum is present. If the time and place of the adjourned meeting are announced at the time the adjournment is taken, no other notice will be given. However, if the adjournment is for more than 30 days, or if a new record date is set for the adjourned meeting, a notice will be given to each shareholder entitled to receive notice of, and to vote at, the meeting.

MATTERS TO BE VOTED UPON

At the annual meeting, the following matters will be voted upon:

- (1) the election of nine director nominees named in this proxy statement to serve a one-year term;
- the ratification of the selection of PricewaterhouseCoopers LLP as our independent registered public accounting firm for the year ending December 31, 2019;
- to consider and vote on our executive compensation on a non-binding, advisory basis; and
- such other business as may properly come before the meeting, or any adjournment or postponement of the meeting.
- 10 ONE Gas, Inc. Notice of 2019 Annual Meeting of Shareholders and Proxy Statement

VOTES REQUIRED

Proposal 1 — **Election of Directors.** Our bylaws provide for majority voting for directors in uncontested elections. We expect that the election of directors at our 2019 annual meeting will be uncontested. Under the majority voting standard, to be elected a nominee must receive a number of "For" votes that exceeds 50 percent of the votes cast with respect to that director's election. Abstentions and broker non-votes, if any, do not count as votes cast with respect to the election of directors.

Our corporate governance guidelines require that if an uncontested nominee for director does not receive more "For" than "Against" votes, he or she must promptly tender his or her resignation to our Board. The Board (excluding the director who tendered the resignation) will then evaluate the resignation in light of the best interests of our company and our shareholders in determining whether to accept or reject the resignation, or whether other action should be taken. The Board will announce publicly its decision regarding any tendered resignation.

Proposal 2 — Ratification of Selection of PricewaterhouseCoopers LLP as our Independent Registered Public Accounting Firm for the Year ending December 31, 2019. In accordance with our bylaws, approval of this proposal requires the affirmative vote of a majority of the voting power of the shareholders present in person or by proxy and entitled to vote on this proposal at the meeting. Abstentions will have the same effect as votes against this proposal.

Proposal 3 — **Advisory Vote on Executive Compensation.** In accordance with our bylaws, approval of the proposal to approve our executive compensation requires the affirmative vote of a majority of the voting power of the shareholders present in person or by proxy and entitled to vote on this proposal at the meeting. Abstentions will have the same effect as votes against this proposal and broker nonvotes do not count as entitled to vote for purposes of determining the outcome of the vote on this proposal. The vote on this proposal is advisory and non-binding on the company and our Board.

REVOKING A PROXY

Any shareholder may revoke his or her proxy at any time before it is voted at the meeting by (1) notifying our corporate secretary in writing (the mailing address of our corporate secretary is Corporate Secretary, ONE Gas, Inc., 15 East Fifth Street, Tulsa, Oklahoma 74103), (2) authorizing a later proxy via the internet or by telephone, (3) returning a later dated proxy card, or (4) voting at the meeting in person. A shareholder's presence without voting at the annual meeting will not automatically revoke a previously delivered proxy and any revocation during the meeting will not affect votes previously taken.

If your shares are held in a brokerage account or by a bank or other holder of record, you may revoke any voting instructions you may have previously provided in accordance with the revocation instructions provided by the broker, bank or other holder of record.

PROXY SOLICITATION

Solicitation of proxies will be primarily by mail and telephone. We have engaged Morrow Sodali LLC, 470 West Avenue, Stamford, Connecticut 06902, to solicit proxies for a fee of \$10,000 plus out-of-pocket expenses. In addition, certain of our officers, directors and employees may solicit proxies on our behalf in person or by mail, telephone, fax or email, for which such persons will receive no additional compensation. We will pay all costs of soliciting proxies. We will also reimburse brokerage firms, banks and other custodians, nominees and fiduciaries for their reasonable expenses for forwarding proxy materials to our shareholders.

GOVERNANCE OF THE COMPANY

Our Board and management are committed to maintaining strong corporate governance practices that allocate rights and responsibilities among our Board, management and our shareholders in a manner that benefits the long-term interests of our shareholders. Our corporate governance practices are designed not just to satisfy regulatory and stock exchange requirements but also to provide for effective oversight and management of our company.

Our Corporate Governance Committee engages in a regular process of reviewing our corporate governance practices, including comparing our practices with those recommended by various corporate governance authorities, the expectations of our shareholders and the practices of other leading public companies. Our Corporate Governance Committee also regularly reviews our corporate governance practices in light of proposed and adopted laws and regulations, including the rules of the SEC and the rules and listing standards of the NYSE.

CORPORATE GOVERNANCE GUIDELINES

Our Board has adopted corporate governance guidelines that address key areas of our corporate governance, including: director qualification standards, including the requirement that a majority of our directors be "independent" under the applicable independence requirements of the NYSE; director responsibilities; director access to management; director compensation; management succession; evaluation of the performance of our Board; and the structure and operation of our Board. Our Board periodically reviews our corporate governance guidelines and may revise the guidelines from time to time as conditions warrant. The full text of our corporate governance guidelines is published on and may be printed from our website at www.onegas.com and is also available from our corporate secretary upon request.

CODE OF BUSINESS CONDUCT AND ETHICS

Our Board has adopted a code of business conduct and ethics that applies to our directors, officers (including our principal executive and financial officers, controller and other persons performing similar functions) and all other employees. We require all directors, officers and employees to adhere to our code of business conduct and ethics in addressing the legal and ethical issues encountered in conducting their work for our company. Our code of business conduct and ethics requires that our directors, officers and employees avoid conflicts of interest, comply with all applicable laws and other legal requirements, conduct business in an honest and ethical manner and otherwise act with integrity and in our company's best interests. All directors, officers and employees are required to report any conduct that they believe to be an actual or apparent violation of our code of business conduct and ethics.

The full text of our code of business conduct and ethics is published on and may be printed from our website at www.ONEGas.com and is also available from our corporate secretary upon request. We intend to disclose on our website any future amendments to, or waivers of, our code of business conduct and ethics, as required by the rules of the SEC and the NYSE.

DIRECTOR INDEPENDENCE

Our corporate governance guidelines provide that a majority of our Board of Directors will be "independent" under the applicable independence requirements of the NYSE. These guidelines and the rules of the NYSE provide that, in qualifying a director as "independent," the Board must make an affirmative determination that the director has no material relationship with our company, either directly or as a partner, shareholder or officer of an organization that has a relationship with our company. In making this determination with respect to each director serving on the Executive Compensation Committee, under the rules of the NYSE, the Board is required to consider all factors specifically relevant to determine whether the director has a relationship to our company which is material to that director's ability to be independent from management in connection with the duties of a member of that committee.

Our Board of Directors has also adopted director independence guidelines that specify the types of relationships the Board has determined to be categorically immaterial. Directors who meet these standards are considered to be "independent." The full text of our director independence guidelines is published on and may be printed from our website at www.onegas.com and is also available from our corporate secretary upon request.

Our Board has determined affirmatively that members Arcilia C. Acosta, Robert E. Evans, Tracy E. Hart, Michael G. Hutchinson, Pattye L. Moore, Eduardo A. Rodriguez and Douglas H. Yaeger have no material relationship with our company, and each qualifies as "independent" under our corporate governance guidelines, our director independence guidelines and the rules of the NYSE. In determining whether certain of our directors qualify as "independent" under our director independence guidelines, our Board considered the receipt by certain directors or their immediate family members (or entities of which they are members, directors, partners, executive officers, or counsel) of natural gas service from us at regulated rates on terms generally available to all of our customers (and, in the case of an entity, in an amount that is less than the greater of \$1 million or 2 percent of the entity's gross revenue for its last fiscal year). In each case, the Board determined these relationships to be in the ordinary course of business at regulated rates or on substantially the same terms available to non-affiliated third parties and to be immaterial in amounts to both our company and the director.

BOARD LEADERSHIP STRUCTURE

During 2018, our Board was led by John W. Gibson, who was the Chairman of the Board, and Eduardo A. Rodriguez, who was both our lead independent director and the chair of the Corporate Governance Committee. In addition, our Audit Committee and Executive Compensation Committee are each led by a chair and vice chair, each of whom is an independent director.

Our corporate governance guidelines provide that our Board of Directors retains the right to exercise its discretion in combining or separating the offices of the Chairman of the Board and CEO. Our Board reviews the issue as a part of its succession planning process. The Board believes that it is advantageous for the Board to maintain flexibility to determine on a case-by-case basis and, if necessary, change the Board leadership structure in order to meet our needs at any time, based on the individuals then available and the circumstances then presented.

The Board believes that maintaining Mr. Gibson's continuing service as non-executive Chairman of the Board provides the most effective leadership model for our Board and our company at this time. In making this determination, the Board considered the advantages to our company of maintaining the continuity of Mr. Gibson's effective leadership as Chairman of the Board based on, among other factors, his strong leadership skills, his extensive knowledge and experience regarding operations and the industries and markets in which we compete, as well as his ability to promote communication and to synchronize strategic objectives and activities between our Board and our senior management. The Board also believes this leadership structure continues to ensure significant independent oversight of management, as Messrs. Gibson and Norton are the only members of the Board who are not independent directors. In addition, our Board has an ongoing practice of holding executive sessions of the independent members of the board as part of each regularly scheduled inperson Board meeting.

LEAD INDEPENDENT DIRECTOR

Our corporate governance guidelines vest the lead independent director who, under these guidelines, is also chair of our Corporate Governance Committee, with various key responsibilities, including but not limited to:

- · presiding as the chair at all meetings of the Board at which the Chairman of the Board is not present;
- presiding at all executive sessions of the independent directors;
- serving as liaison between the Chairman of the Board and the independent directors;
- · approving information sent to the Board;
- · approving meeting agendas for the Board; and
- approving meeting schedules to assure that there is sufficient time for discussion of all agenda items.

In addition, the lead independent director has the authority to call meetings of the independent directors and, if requested by major shareholders, will be reasonably available for consultation and direct communication with such shareholders. The Lead Independent Director may also perform duties otherwise assigned to the Chairman of the Board when the offices of the Chairman of the Board and the CEO are combined.

SUCCESSION PLANNING

A key responsibility of the CEO and the Board is ensuring that an effective process is in place to provide continuity of leadership over the long term at all levels in our company. Each year, succession-planning reviews are held at every significant organizational level of the company, culminating in a full review of senior leadership talent by our independent directors. During this review, the CEO, the Chairman of the Board and the independent directors discuss future candidates for senior leadership positions, succession timing for those positions and development plans for the highest-potential candidates. This process ensures continuity of leadership over the long term, and it forms the basis on which our company makes ongoing leadership assignments. It is a key success factor in managing the long-term planning and investment lead times of our business.

In addition, the CEO maintains in place at all times, and reviews with the non-management directors, a confidential plan for the timely and efficient transfer of responsibilities in the event of an emergency or sudden incapacitation or departure of the CEO.

OUR BOARD AND CORPORATE STRATEGY

Our Board is actively involved in overseeing, reviewing and guiding our corporate strategy. Our Board formally reviews our company's business strategy, including the risks and opportunities facing our company and its business, at an annual strategic planning session. Our Board regularly discusses corporate strategy throughout the year with management formally as well as informally and during executive sessions of the Board as appropriate. As discussed in "Risk Oversight" below, our Board views risk management and oversight as an integral part of our strategic planning process, including mapping key risks to our corporate strategy and seeking to manage and mitigate risk. Our Board also views its own composition as a critical component to effective strategic oversight. Accordingly, our Board and relevant Board committees consider our business strategy and the company's regulatory, geographic and market environments when assessing board composition, director succession, executive compensation and other matters of importance.

SHAREHOLDER ENGAGEMENT

Our Board believes that accountability to shareholders is a mark of good corporate governance and that regular shareholder engagement is important to our company's success. Our company frequently engages with shareholders on a variety of topics, with particular focus on matters relating to our company's publicly disclosed strategy and financial performance. Our company also engages with shareholders to discuss matters relating to governance, compensation, safety, environmental and other current and emerging issues that the Board and our management understand are important to our shareholders. In addition to this direct engagement, our company also maintains a number of complementary mechanisms that allow our shareholders to effectively communicate to our Board and management, including:

- maintaining an investor relations page on our website;
- regularly presenting at investor conferences;
- conducting an annual advisory vote to approve executive compensation;
- if requested by major shareholders, ensuring the lead independent director is available for consultation and direct communication;
- permitting shareholders to submit prospective candidates for nomination by our Board for election at the annual meeting of shareholders in accordance with our corporate governance guidelines and bylaws;
- · permitting shareholders to nominate candidates for election at the annual meeting of shareholders in accordance with our bylaws; and
- providing shareholders the ability to attend and voice opinions at the annual meeting of shareholders.

RISK OVERSIGHT

We have integrated a comprehensive Enterprise Risk Management ("ERM") process as part of strategy setting and driving performance throughout the organization, which includes identifying, aggregating, monitoring, measuring, assessing and managing risks that could affect our ability to fulfill our business objectives or execute our corporate strategy. These risks generally relate to strategic, operational, financial, regulatory compliance and human resources issues. Our ERM approach is overseen by our CFO and is designed to enable our Board to establish a mutual understanding with management of the effectiveness of our risk-management practices and capabilities, to review our risk exposure and to elevate certain key risks for discussion at the Board level. Management and our Board believe that risk management is an integral part of our annual strategic planning process, which addresses, among other things, the risks and opportunities facing our company.

Not all risks can be dealt with in the same way. Some risks may be easily perceived and controllable, and other risks are unknown; some risks can be avoided or mitigated by particular behavior, and some risks are unavoidable as a practical matter. For some risks, the potential adverse impact would be minor and, as a matter of business judgment, it may not be appropriate to allocate significant resources to avoid the adverse impact. In other cases, the adverse impact could be significant, and it is prudent to expend resources to seek to avoid or mitigate the potential adverse impact. In some cases, a higher degree of risk may be acceptable because of a greater perceived potential for reward. Management is responsible for identifying risks and controls related to our significant business activities; mapping the risks to our corporate strategy; and developing programs and recommendations to determine the sufficiency of risk identification, the balance of potential risk to potential reward and the appropriate manner in which to control and mitigate risk.

The Board implements its risk oversight responsibilities by having management provide periodic briefing and informational sessions on the significant voluntary and involuntary risks that our company faces and how our company is seeking to control and mitigate those risks. In some cases, as with risks relating to significant acquisitions, risk oversight is addressed as part of the full Board's engagement with the CEO and management.

The Board annually reviews a management assessment of the various operational and regulatory risks facing our company, their relative magnitude and management's plan for mitigating these risks. The Board also reviews risks related to our company's business strategy at its annual strategic planning meeting and at other meetings as appropriate.

In certain cases, a Board committee is responsible for oversight of specific risk topics. For example, the Audit Committee oversees risk issues associated with our overall financial reporting and disclosure process and legal compliance, as well as reviewing policies and procedures on risk-control assessment and accounting risk exposure, including our companywide risk control activities. The Audit Committee meets with our executive officers and meets with our Director–Audit Services, as well as with our independent registered public accounting firm, in separate executive sessions at each of its in-person meetings during the year, at which time risk issues are discussed regularly.

In addition, our Executive Compensation Committee oversees risks related to our compensation program, as discussed in greater detail elsewhere in this proxy statement, and our Corporate Governance Committee oversees risks related to our governance practices and policies.

BOARD AND COMMITTEE MEMBERSHIP

Our business, property and affairs are managed under the direction of our Board. Members of our Board are kept informed of our business through discussions with our CEO and other officers, by reviewing materials provided to them periodically and in connection with Board and committee meetings, and by participating in meetings of the Board and its committees.

During 2018, the Board held nine regular meetings (six in-person and three telephonic meetings) and no special meetings. All of our incumbent directors who served on the Board during 2018 attended more than 75 percent of the aggregate of the meetings of the Board and Board committees on which they served.

Our corporate governance guidelines provide that members of our Board are expected to attend our Annual Meeting of Shareholders. All then-current members of the Board attended the 2018 Annual Meeting of Shareholders.

The Board has four standing committees: the Audit Committee, the Executive Compensation Committee, the Corporate Governance Committee and the Executive Committee. The table below provides the current membership of our Board and each of our Board committees. Our Board has determined affirmatively that each member of our Audit Committee, Executive Compensation Committee and Corporate Governance Committee is "independent" under our corporate governance guidelines, our director independence guidelines and the rules of the NYSE.

| Director | Board | Audit | Executive Compensation | Corporate Governance | Executive |
|----------------------------|--------|------------|------------------------|-------------------------|-----------|
| Arcilia C. Acosta | Member | Member | Member | Member | |
| Robert B. Evans | Member | Vice Chair | Member | Member | |

ONE Gas, Inc. Notice of 2019 Annual Meeting of Shareholders and Proxy Statement

15

Our Board has adopted written charters for each of its Audit, Executive Compensation, Corporate Governance and Executive Committees. Copies of the charters of each of these committees are available on and may be printed from our website at www.ONEGas.com. Copies are also available from our corporate secretary upon request. The responsibilities of our Board committees are summarized below. From time to time the Board, in its discretion, may form other committees.

The Audit Committee represents and assists our Board with oversight of the integrity of our financial statements and internal controls, our compliance with legal and regulatory requirements, the independence, qualifications and performance of our independent registered public accounting firm and the performance of our internal audit function. The responsibilities of the Audit Committee include:

- · appointing, compensating and overseeing our independent auditor;
- reviewing the scope, plans and results relating to the external audits of our financial statements;
- · reviewing the scope, plans and results relating to internal audits;
- monitoring and evaluating our financial condition;

THE AUDIT COMMITTEE

- monitoring and evaluating the integrity of our financial reporting processes and procedures;
- assessing our significant financial risks and exposures and evaluating the adequacy of our internal controls in connection with such risks and exposures, including, but not limited to, internal controls over financial reporting and disclosure controls and procedures;
- reviewing policies and procedures on risk-control assessment and accounting risk exposure, including our companywide risk control activities; and
- · monitoring our compliance with our policies on ethical business conduct.

2018 Meetings: 6

Our independent registered public accounting firm reports directly to our Audit Committee. All members of our Audit Committee are "independent" under the independence requirements of the NYSE and the SEC applicable to audit committee members. The Board has determined that Arcilia C. Acosta, Robert E. Evans, Tracy E. Hart, Michael G. Hutchinson, Eduardo A. Rodriguez and Douglas H. Yaeger are each an audit committee financial expert under the applicable rules of the SEC and all members of the Audit Committee are financially literate and six of the seven committee members are audit committee financial experts. No member of our Audit Committee serves on the audit committees of more than three other public companies.

THE EXECUTIVE COMPENSATION COMMITTEE

Our Executive Compensation Committee is responsible for establishing and periodically reviewing our executive compensation policies and practices. This responsibility includes:

- evaluating, in consultation with our Corporate Governance Committee, the performance of our CEO, and recommending to our Board the compensation of our CEO and our other senior executive officers:
- reviewing and approving, in consultation with our Corporate Governance Committee, the annual objectives of our CEO;
- reviewing our executive compensation program to ensure the attraction, retention and appropriate compensation of executive officers in order to motivate their performance in the achievement of our business objectives and to align their interests with the long-term interests of our
- assessing the risks associated with our compensation program,
- approving, subject to ratification by the full Board, executive officer compensation and personnel policies, programs and plans; and
- reviewing and making recommendations to the full Board on director compensation.

Our Executive Compensation Committee meets periodically during the year to review our executive and director compensation policies and practices. Executive officer salaries and STI and LTI compensation are determined annually by the Committee. The scope of the authority of the Committee is not limited except as set forth in its charter and by applicable law. The Committee has the authority to delegate duties to subcommittees of the Committee, or to other standing committees of the Board, as it deems necessary or appropriate. The Committee may not delegate to a subcommittee any authority required by any law, regulation or listing standard to be exercised by the Committee as a whole. All members of our Executive Compensation Committee are "independent" under the independence requirements of the NYSE applicable to compensation committee members.

The compensation group in our corporate human resources department supports, in consultation with our CEO, the Executive Compensation Committee in its work.

During 2018, the Executive Compensation Committee engaged Meridian, as an independent executive compensation consultant to assist the Committee in its evaluation of the amount and form of compensation paid in 2018 to our CEO, our other executive officers and our directors. Meridian reported directly to the Executive Compensation Committee. For more information on executive compensation and the role of this consultant, see "Compensation Discussion and Analysis-How We Determine Pay—Role of the Independent Executive Compensation Consultant" at page 42.

THE CORPORATE **GOVERNANCE** COMMITTEE

Our Corporate Governance Committee is responsible for overseeing our company's governance, including the selection of directors and the Board's practices and effectiveness. These responsibilities include:

- identifying and recommending qualified director candidates, including qualified director candidates suggested by our shareholders in written submissions to our corporate secretary in accordance with our corporate governance guidelines and our bylaws or in accordance with the rules of the
- making recommendations to the Board with respect to electing directors and filling vacancies on
- adopting an effective process for director selection and tenure by making recommendations on the Board's organization and practices and by aiding in identifying and recruiting director
- reviewing and making recommendations to the Board with respect to the organization, structure, size, composition and operation of the Board and its committees;
- in consultation with our Chairman of the Board and CEO and the Executive Compensation Committee, overseeing management succession and development; and
- reviewing, assessing risk and making recommendations with respect to other corporate governance matters.

All members of the Corporate Governance Committee are "independent" under the independence requirements of the NYSE.

ONE Gas, Inc. Notice of 2019 Annual Meeting of Shareholders and Proxy Statement

17

2018 Meetings: 4

2018 Meetings: 4

THE EXECUTIVE COMMITTEE

2018 Meetings: 0

In the intervals between meetings of our Board, the Executive Committee may, except as otherwise provided in our bylaws and applicable law, exercise the powers and authority of the full Board in the management of our property, affairs and business. The function of this committee is to act on major matters where it deems action appropriate, providing a degree of flexibility and ability to respond to time-sensitive business and legal matters without calling a special meeting of our full Board. The Executive Committee reports to the Board at its next meeting on any actions taken by the committee.

DIRECTOR NOMINATIONS

Our corporate governance guidelines provide that the Board is responsible for nominating candidates for Board membership and for the delegation of the screening process to the Corporate Governance Committee of the Board. This committee, with recommendations and input from our Chairman of the Board, CEO and the directors, evaluates the qualifications of each director candidate and assesses the appropriate mix of skills, qualifications and characteristics required of Board members in the context of the perceived needs of the Board at a given point in time. The Corporate Governance Committee is responsible for recommending to the full Board candidates for nomination by the Board for election as members of our Board.

Our corporate governance guidelines provide that candidates for nomination by the Board must be committed to devote the time and effort necessary to be productive members of the Board and that, in nominating candidates, the Board will endeavor to establish director diversity in personal background, race, gender, age and nationality. The guidelines also provide that the Board will seek to maintain a mix that includes, but is not limited to, the following areas of core competency: accounting and finance; investment banking; business judgment; management; industry knowledge; crisis response; international business; leadership; strategic vision; law; and corporate

The Corporate Governance Committee's charter provides that it has the responsibility, in consultation with the Chairman of the Board and CEO, to search for, recruit, screen, interview and recommend to the Board candidates for the position of director as necessary to fill vacancies on the Board or the additional needs of the Board and to consider management and shareholder recommendations for candidates for nomination by the Board. In carrying out this responsibility, the Corporate Governance Committee evaluates the qualifications and performance of incumbent directors and determines whether to recommend them for re-election to the Board. In addition, this committee determines, as necessary, the portfolio of skills, experience, diversity, perspective and background required for the effective functioning of the Board considering our business strategy and our regulatory, geographic and market environments.

Our corporate governance guidelines contain a policy regarding the Corporate Governance Committee's consideration of prospective director candidates recommended by shareholders for nomination by our Board. Under this policy, and in accordance with our bylaws, any shareholder who wishes to recommend a prospective candidate for nomination by our Board for election at our 2020 annual meeting should send a letter of recommendation to our corporate secretary at our principal executive offices by no later than December 5, 2019. The letter should include the name, address and number of shares owned by the recommending shareholder (including, if the recommending shareholder is not a shareholder of record, proof of ownership of the type referred to in Rule 14a-8(b)(2) of the proxy rules of the SEC), the prospective candidate's name and address, a description of the prospective candidate's background, qualifications and relationships, if any, with our company and all other information necessary for our Board to determine whether the prospective candidate meets the independence standards under the rules of the NYSE and our director independence guidelines. A signed statement from the prospective candidate should accompany the letter of recommendation indicating that he or she consents to being considered as a nominee of the Board and that, if nominated by the Board and elected by the shareholders, he or she will serve as a director. The Corporate Governance Committee will evaluate prospective candidates recommended by shareholders for nomination by our Board in light of the various factors set forth above.

Neither the Corporate Governance Committee, the Board, nor our company itself discriminates in any way against prospective candidates for nomination by the Board on the basis of age, sex, race, religion, or other personal characteristics. There are no differences in the manner in which the Corporate Governance Committee or the Board evaluates prospective candidates based on whether the prospective candidate is recommended by a shareholder or by the Corporate Governance Committee, provided that the recommending shareholder furnishes to our company a letter of recommendation containing the information described above along with the signed statement of the prospective candidate referred to above.

In addition to having the ability to recommend prospective candidates for nomination by our Board, under our bylaws, shareholders may themselves nominate candidates for election at an annual meeting of shareholders. Any shareholder who desires to nominate candidates for election as directors at our 2020 annual meeting must follow the procedures set forth in our bylaws. Under these procedures, notice of a shareholder nomination for the election of a director must be received by our corporate secretary at our principal executive offices not less than 120 calendar days before the first anniversary of the date that our proxy statement was released to shareholders in connection with our 2019 Annual Meeting of Shareholders (i.e., notice must be received no later than December 5, 2019). If the date of the 2020 annual meeting is more than 30 days from the first anniversary date of the 2019 meeting, our corporate secretary must receive notice of a shareholder nomination by the close of business on the tenth day following the earlier of (i) the day on which notice of the date of the meeting is mailed to shareholders or (ii) the day on which public announcement of the meeting date is made. In accordance with our bylaws, a shareholder notice must contain certain information about the candidate the shareholder desires to nominate for election as a director, including: (a) the name, age, business address and residence address of such person; (b) the principal occupation or employment of such person; (c) the class or series and number of our shares that are owned beneficially or of record

by such person and any affiliates or associates of such person; (d) the name of each nominee holder of our shares owned beneficially but not of record by such person or any affiliates or associates of such person, and the number of our shares held by each such nominee holder; (e) whether and the extent to which any derivative instrument, swap, option, warrant, short interest, hedge or profit interest or other transaction has been entered into by or on behalf of such person, or any affiliates or associates of such person, with respect to our shares; (f) whether and the extent to which any other transaction, agreement, arrangement or understanding (including any short position or any borrowing or lending of our shares) has been made by or on behalf of such person, or any affiliates or associates of such person, the effect or intent of any of the foregoing being to mitigate loss to, or to manage risk or benefit of stock price changes for, such person, or any affiliates or associates of such person, or to increase or decrease the voting power or pecuniary or economic interest of such person, or any affiliates or associates of such person, with respect to our shares; (g) such person's written and executed representation and agreement (in the form provided by the corporate secretary upon written request) that such person (1) is not and will not become a party to any agreement, arrangement or understanding with, and has not given any commitment or assurance to, any person or entity as to how such person, if elected as a director of the company, will act or vote on any issue or question, (2) is not and will not become a party to any agreement, arrangement or understanding with any person or entity other than the company with respect to any direct or indirect compensation, reimbursement or indemnification in connection with service or action as a director of the company that has not been disclosed to the company in such representation and agreement and (3) in such person's individual capacity, would be in compliance, if elected as a director of the company, and, if elected as a director, will comply with, all applicable publicly disclosed confidentiality, corporate governance, conflict of interest, Regulation FD, code of conduct and ethics, and stock ownership and trading policies and guidelines of the company; (h) such person's completed written questionnaire with respect to the background and qualification of such individual and the background of any other person or entity on whose behalf, directly or indirectly, the nomination is being made (which form of questionnaire shall be promptly provided by the corporate secretary to the requesting shareholder upon written request) and (i) all other information relating to such person that would be required to be disclosed in connection with a solicitation of proxies for the election of such person as a director, or would be otherwise required to be disclosed in connection with such solicitation, in each case pursuant to Regulation 14A under the Exchange Act, including without limitation such person's written consent to being named in the proxy statement as a nominee and to serving as a director if elected).

In addition, as to the shareholder giving the notice and the beneficial owner, if any, on whose behalf the nomination is made, the notice must set forth: (a) the name and address, as they appear on the company's books, of such shareholder, and the name and address of such beneficial owner, if any, and any other shareholders known by such shareholder to be supporting such nominee(s); (b) the class and number of our shares that are owned beneficially and of record by such person and any affiliates or associates of such person; (c) the name of each nominee holder of our shares owned beneficially but not of record by such person or any affiliates or associates of such person, and the number of such shares held by each such nominee holder; (d) whether and the extent to which any derivative instrument, swap, option, warrant, short interest, hedge or profit interest or other transaction has been entered into by or on behalf of such person, or any affiliates or associates of such person, with respect to our shares; (e) whether and the extent to which any other transaction, agreement, arrangement or understanding (including any short position or any borrowing or lending of our shares) has been made by or on behalf of such person, or any affiliates or associates of such person, the effect or intent of any of the foregoing being to mitigate loss to, or to manage risk or benefit of stock price changes for, such person, or any affiliates or associates of such person, or to increase or decrease the voting power or pecuniary or economic interest of such person, or any affiliates or associates of such person, with respect to our shares; (f) a representation that the shareholder giving notice intends to appear in person or by proxy at the annual meeting or special meeting to nominate the persons named in its notice; (g) a description of all agreements, arrangements and understandings between such person or any affiliate or associate of such person, and any other person or persons (including their names) in connection with the nomination by such shareholder; and (h) all other information that would be required to be disclosed by such person as a participant in a solicitation of proxies for the election of directors in a contested election, or would be otherwise required to be disclosed in connection with such solicitation, in each case pursuant to Regulation 14A under the Exchange Act. This information must be supplemented by such shareholder and beneficial owner, if any, not later than ten (10) days after the record date for the meeting to disclose all such information as of the record date.

At the request of the company, each proposed nominee must submit to the corporate secretary such other information as the company may reasonably require, including such information as may be necessary or appropriate in determining the eligibility of such proposed nominee to serve as an independent director of the company or that could be material to a reasonable shareholder's understanding of the independence, or lack thereof, of such nominee.

DIRECTOR COMPENSATION

The Executive Compensation Committee's independent compensation consultant, Meridian, annually advises the Executive Compensation Committee on matters related to non-management director compensation including competitive market data for the company's peer group. The Executive Compensation Committee reviews and discusses the director compensation information provided by Meridian and makes a recommendation to the full Board with respect to non-management director compensation. The Executive Compensation Committee's philosophy with respect to non-management director compensation is to target at or below the market median. The components of non-management director compensation include an annual cash retainer, additional annual cash retainers for the Chairman of the Board, the chairs of the Audit, Executive Compensation and Corporate Governance Committees and an annual stock retainer. No separate per meeting fees are paid to the non-management directors.

Compensation for each of our non-management directors for their service on our Board is paid on an annual meeting date basis. Based on the market information provided by Meridian in December 2017 indicating that our non-management director compensation was significantly below

market median compared to our peers, coupled with the decision of the Executive Compensation Committee to consider non-management director compensation on a three-year basis, the Executive Compensation Committee recommended and the full Board approved nonmanagement director compensation on a three-year cycle. For the period of May 24, 2018, through May 22, 2019, non-management director compensation consists of \$85,000 in an annual cash retainer and a \$110,000 stock retainer. The chairs of our Audit and Executive Compensation Committees receive an additional annual cash retainer of \$15,000, and our lead independent director, who is also chair of our Corporate Governance Committee, receives an additional annual cash retainer of \$30,000. Our Chairman of the Board receives an additional annual cash retainer of \$85,000 for his service. Non-management director compensation will next be considered in 2020.

Upon their election in July 2018, Mesdames Acosta and Hart received pro-rata non-management director compensation for the period from July 23, 2018, through May 22, 2019.

All directors are reimbursed for reasonable expenses incurred in connection with attendance at Board and committee meetings.

The CEO, as the sole management director, receives no compensation for his service as a director.

Our Board has established minimum share ownership guidelines for members of our Board. The guidelines provide that within five years after joining the Board, each non-management director will own shares of the company's common stock having a value, at a minimum, of five times the annual cash retainer for service on the Board (excluding annual retainers for service as a chair of a Board committee or for service as Chairman of the Board) as established from time to time by the Board. Shares that count toward this ownership guideline include shares owned outright in the director's name, shares held in trust for the director's benefit or the benefit of the director's immediate family, and phantom shares held in the director's account under any company deferred compensation plan for non-employee directors or any similar plan or arrangement. Shares that do not count toward this ownership quideline include unexercised stock options and shares of restricted stock for which restrictions have not yet lapsed (unvested restricted stock). A non-management director will not be allowed to sell shares of the company's common stock (using established pre-clearance procedures) unless such director's holdings of the company's common stock meet the established minimum ownership guideline. Ms. Moore and Messrs. Evans, Gibson, Hutchinson. Rodriguez and Yaeger have each satisfied the minimum share ownership guidelines. Mesdames Acosta and Hart have until July 23, 2023, to satisfy the minimum share ownership guidelines.

The following table sets forth the compensation paid to our non-management directors in 2018:

Director Compensation for 2018

| Director | Fees Earned or Paid in Cash ⁽¹⁾ | Stock Awards (1)(2)(3) | Nonqualified Deferred Compensation Earnings ⁽⁴⁾ | All Other Compensation ⁽⁵⁾ | Total |
|-----------------------|---|------------------------------|---|--|-----------|
| Arcilia C. Acosta | \$ 70,950 | \$ 91,818 | \$ - | \$ - | \$162,768 |
| Robert B. Evans | \$ 85,000 | \$110,000 | \$ - | \$ - | \$195,000 |
| John W. Gibson | \$170,000 | \$110,000 | \$3,823 | \$20,000 | \$303,823 |
| Tracy E. Hart | \$ 70,950 | \$ 91,818 | \$ - | \$ - | \$162,768 |
| Michael G. Hutchinson | \$100,000 | \$110,000 | \$ - | \$ - | \$210,000 |
| Pattye L. Moore | \$100,000 | \$110,000 | \$ - | \$ 5,000 | \$215,000 |
| Eduardo A. Rodriguez | \$115,000 | \$110,000 | \$ - | \$ - | \$225,000 |
| Douglas H. Yaeger | \$ 85,000 | \$110,000 | \$ - | \$ - | \$195,000 |

⁽¹⁾ Non-management directors may defer all or a part of their annual cash and stock retainers under our Deferred Compensation Plan for Non-Employee Directors. During the year ended December 31, 2018, \$365,612 of the total amount payable for directors' fees were deferred under this plan at the election of five of our directors. Deferred amounts are treated, at the election of the participating director, either as phantom stock or as a cash deferral. Phantom stock deferrals are treated as though the deferred amount is invested in our common stock at the fair market value on the date the deferred amount was earned. Phantom stock earns the equivalent of dividends declared on our common stock, reinvested in phantom shares of our common stock based on the closing price of our common stock on the payment date of each common stock dividend. The shares of our common stock reflected in a non-management director's phantom stock account are issued to the director under our ECP on the last day of the director's service as a director or a later date selected by the director. Cash deferrals earn interest at a rate equal to Moody's Bond Indices Corporate AAA on the first business day of the plan year, plus 100 basis points, which, at January 2, 2018, was 4.52 percent. The following table sets forth, for each nonmanagement director, the amount of director compensation deferred during 2018 and cumulative deferred compensation as of December 31, 2018.

| Director | D | oard Fees eferred to Phantom Stock in 2018 (a) | P St Re | ividends arned on hantom tock and einvested 2018 (b) | D De | otal Board Fees eferred to Phantom Stock at cember 31, 2018 (a) | Total Shares of Phantom Stock Held at December 31, 2018 | Defe Ca | oard ees erred to ash in 18 (c) | D | otal Board Fees eferred to Cash at cember 31, 2018 (c) |
|-----------------------|----|--|---------------|---|---------|---|---|------------|---|----|---|
| Arcilia C. Acosta | \$ | 81,384 | \$ | 466 | \$ | 81,850 | 1,018 | \$ | - | \$ | - |
| Robert B. Evans | \$ | - | \$ | - | \$ | - | - | \$ | - | \$ | - |
| John W. Gibson | \$ | 110,000 | \$ | 17,413 | \$ | 540,307 | 10,362 | \$17 | 70,000 | \$ | 907,984 |
| Tracy E. Hart | \$ | 36,727 | \$ | 442 | \$ | 37,169 | 485 | \$ | - | \$ | - |
| Michael G. Hutchinson | \$ | - | \$ | - | \$ | - | - | \$ | - | \$ | - |
| Pattye L. Moore | \$ | 110,000 | \$ | 17,413 | \$ | 540,307 | 32,945 | \$ | - | \$ | - |
| Eduardo A. Rodriguez | \$ | 27,500 | \$ | 885 | \$ | 46,864 | 1,331 | \$ | - | \$ | - |
| Douglas H. Yaeger | \$ | - | \$ | - | \$ | - | - | \$ | - | \$ | - |

- (a) Reflects the value of the annual cash and stock retainers (based on the average of our high and low stock price on the NYSE on the grant date) deferred to phantom stock by a director under our Deferred Compensation Plan for Non-Employee Directors.
- (b) Dividend equivalents paid on phantom stock are reinvested in additional shares of phantom stock based on the closing price of our common stock on the NYSE on the date the dividend equivalent was paid.
- (c) Mr. Gibson deferred board fees in the amount of \$170,000 to cash in 2018. The total amount deferred to cash reflects the balance in Mr. Gibson's cash deferral account. Cash deferrals earn interest at a rate equal to Moody's Bond Indices Corporate AAA on the first business day of the plan year, plus 100 basis points which, at January 2, 2018, was 4.52 percent.
- (2) The amounts in this column reflect the aggregate grant date fair value, computed in accordance with Financial Accounting Standards Board's Accounting Standards Codification Topic 718, Compensation-Stock Compensation ("ASC Topic 718"), with respect to stock awards received by directors for service on our Board. Since the shares are issued free of any restrictions on the grant date, the grant date fair value of these awards is based on the average of our high and low stock price on the NYSE on the date of grant. The following table sets forth the number of shares and grant date fair value of such shares of our common stock issued to our non-management directors during 2018 for service on our Board.

| Shares Awarded in 2018 | Aggregate Grant Date Fair Value |
|------------------------------|--|
| 1,142 | \$ 91,818 |
| 1,512 | \$110,000 |
| 1,512 | \$110,000 |
| 1,198 | \$ 91,818 |
| 1,512 | \$110,000 |
| 1,512 | \$110,000 |
| 1,512 | \$110,000 |
| 1,512 | \$110,000 |
| | Awarded in 2018 1,142 1,512 1,512 1,198 1,512 1,512 1,512 1,512 |

- (3) For the aggregate number of shares of our common stock and phantom stock held by each member of our Board at March 1, 2019, see "Stock Ownership-Holdings of Officers and Directors" at page 38.
- (4) Reflects above-market earnings on Board of Directors fees deferred to cash under our Deferred Compensation Plan for Non-Employee Directors which provides for payment of interest on cash deferrals at a rate equal to Moody's Bond Indices Corporate AAA on the first business day of the plan year, plus 100 basis points, which, at January 2, 2018, was 4.52 percent.
- (5) Reflects charitable contributions made by our company or the ONE Gas Foundation, Inc., on behalf of members of our Board as follows: (a) matching contributions up to \$5,000 per year to non-profit organizations of his or her choice pursuant to our Matching Grants Program for Directors of ONE Gas through our Community Investment Program; and (b) matching contributions to the United Way pursuant to our annual United Way contribution program.

COMPENSATION COMMITTEE INTERLOCKS AND INSIDER PARTICIPATION

During 2018, Mesdames Acosta, Hart and Moore and Messrs. Evans, Hutchinson, Rodriguez and Yaeger served on our Executive Compensation Committee. No member of the Executive Compensation Committee was an officer or employee of the company or its subsidiary during 2018, and no member of this committee was formerly an officer of the company or its subsidiary. In addition, during 2018, none of our executive officers served as a member of a compensation committee or Board of any other entity of which any member of our Board was an executive officer.

Ms. Moore currently serves as the Chair of the ONEOK Executive Compensation Committee, and Mr. Rodriguez serves as Vice Chair of the ONEOK Executive Compensation Committee.

EXECUTIVE SESSIONS OF THE BOARD

The non-management members of our Board meet in regularly scheduled executive sessions without any members of management present. Our Chairman of the Board presides during the non-management executive sessions of the Board. During 2018, the non-management members of our Board met in executive session during each regularly scheduled in-person meeting of the Board held during the year. We intend to continue this practice of regularly scheduled meetings of the non-management members of our Board.

Our corporate governance guidelines provide that our lead independent director, who is the chair of our Corporate Governance Committee, presides as the chair at executive session meetings of the independent members of our Board. The independent members of the Board meet in regularly scheduled executive sessions without any members of management or non-independent directors present in connection with each regularly scheduled in-person meeting of the Board. During 2018, the independent members of our Board met in executive session during each regularly scheduled in-person meeting of the Board held during the year. We intend to continue this practice of regularly scheduled meetings of the independent members of our Board.

COMMUNICATIONS WITH DIRECTORS

Our Board believes that it is management's role to speak for our company. Directors refer all inquiries regarding our company from institutional investors, analysts, the news media, customers or suppliers to our CEO or his designee. Our Board also believes that any communications between members of the Board and interested parties, including shareholders, should be conducted with the knowledge of our CEO. Interested parties, including shareholders, may contact one or more members of our Board, including non-management directors and non-management directors as a group, by writing to the director or directors in care of our corporate secretary at our principal executive offices. A communication received from an interested party or shareholder will be forwarded promptly to the director or directors to whom the communication is addressed. A copy of the communication also will be provided to our CEO. We will not, however, forward sales or marketing materials, materials that are abusive, threatening or otherwise inappropriate, or correspondence not clearly identified as interested party or shareholder correspondence.

COMPLAINT PROCEDURES

22

Our Board has adopted procedures for the receipt, retention and treatment of complaints regarding accounting, internal accounting controls, or auditing matters and complaints or concerns under our code of business conduct and ethics. These procedures allow for the confidential and anonymous submission by employees of concerns regarding questionable accounting or auditing matters and matters arising under our code of business conduct and ethics. The full text of these procedures, known as our whistleblower policy, is published on and may be printed from our website at www.oncegas.com and is also available from our corporate secretary upon request.

PROPOSAL 1 – ELECTION OF DIRECTORS

ELECTION BY MAJORITY VOTE

In conjunction with the 2018 Annual Meeting of Shareholders, our shareholders approved our Amended and Restated Certificate of Incorporation, which among other things, declassified our Board such that all directors are elected annually for one-year terms. Therefore, all nine current directors are standing for election for one-year terms.

Recognizing the need to ensure an appropriate balance of experience, expertise and perspective on our Board, in July 2018 our Board, based on the recommendation of our Corporate Governance Committee, elected two new directors: Arcilia C. Acosta and Tracy E. Hart. Mesdames Acosta and Hart bring a wealth of experience in project management, construction, executive management, operations and strategic and financial planning to the Board. Your Board of Directors believes that its current membership reflects a balanced Board with deep experience and diverse expertise.

Our bylaws provide that, in the case of uncontested elections (i.e., elections where the number of nominees is the same as the number of directors to be elected), director nominees are elected by the vote of a majority of the votes cast with respect to that nominee. Abstentions and broker non-votes with respect to the election of a director do not count as votes cast. Our corporate governance guidelines provide that any uncontested nominee for director who fails to receive the requisite majority vote at an annual or special meeting held for the purpose of electing directors where the election is uncontested must, promptly following certification of the shareholder vote, tender his or her resignation to the Board. The Board (excluding the director who tendered the resignation) will evaluate any such resignation in light of the best interests of the company and our shareholders in determining whether to accept or reject the resignation, or whether other action should be taken. In reaching its decision, the Board may consider any factors it deems relevant, including the director's qualifications, the director's past and expected future contributions to the company, the overall composition of the Board and whether accepting the tendered resignation would cause the company to fail to comply with any applicable rule or regulation (including the NYSE listing requirements and the federal securities laws). The Board will act on the tendered resignation and publicly disclose its decision and rationale within 90 days following certification of the shareholder vote.

If no directors receive the requisite majority vote at an annual or special meeting held for the purpose of electing directors where the election is uncontested, then, pursuant to our corporate governance guidelines, the incumbent Board will, within 180 days after the certification of the shareholder vote, nominate a new slate of directors and hold a special meeting for the purpose of electing those nominees. In this circumstance, the incumbent Board will continue to serve until new directors are elected and qualified.

The persons named in the accompanying proxy card intend to vote such proxy in favor of the election of each of the nominees named below, who are all currently directors, unless the proxy provides for a vote against the director. Although the Board has no reason to believe that the nominees will be unable to serve as directors, if a nominee withdraws or otherwise becomes unavailable to serve, the persons named as proxies will vote for any substitute nominee designated by the Board, unless contrary instructions are given on the proxy. Except for these nominees, no other person has been recommended to our Board as a potential nominee or otherwise nominated for election as a director.

BOARD DIVERSITY

Our Board recognizes the importance of diversity on the Board. Diversity brings different perspectives to Board discussions and deliberations. During 2018, the Board appointed two highly qualified female directors, bringing the total females on the Board to three (33%). Our Board is also comprised of two Hispanic directors (Ms. Acosta and Mr. Rodriguez)(22%). The Board is also diverse in terms of age, with ages ranging from 53 to 70. Average director tenure is slightly over four years.

BOARD QUALIFICATIONS

Our corporate governance guidelines provide that our Corporate Governance Committee will evaluate the qualifications of each director candidate and assess the appropriate mix of skills and characteristics required of Board members in the context of the perceived needs of the Board at a given point in time. Each director also is expected to:

- · exhibit high standards of integrity, commitment and independence of thought and judgment;
- · use his or her skills and experiences to provide independent oversight to the business of our company;
- be willing to devote sufficient time to carrying out his or her duties and responsibilities effectively;
- · devote the time and effort necessary to learn the business of the company and the Board;
- · represent the long-term interests of all shareholders; and
- participate in a constructive and collegial manner.

In addition, our corporate governance guidelines provide that, in nominating candidates, the Board will endeavor to establish director diversity in personal background, race, gender, age and nationality, and to maintain a mix that includes, but is not limited to, the following areas of core

competency: accounting and finance; investment banking; business judgment; management; industry knowledge; crisis response; international business; leadership; strategic vision; law; and corporate relations.

Your Board believes that each member of our Board possesses the necessary integrity, skills and qualifications to serve on our Board and that their individual and collective skills and qualifications provide them with the ability to engage management and each other in a constructive and collaborative fashion and, when necessary and appropriate, challenge management in the execution of our business operations and strategy.

The following table summarizes the Board's skills and qualifications as an easy reference:

Certain information with respect to the nine nominees for election at the annual meeting, is set forth below. This information includes their names, ages, a brief description of their recent business experience, including present occupations and employment, certain directorships that each person holds and the year in which each person became a director of the company. All nine director nominees currently serve as directors of the company.

None of the director nominees are being proposed for election pursuant to any agreement or understanding between the nominees and the company or any other person(s).

There are no family relationships between or among any of the director nominees and executive officers.

YOUR BOARD UNANIMOUSLY RECOMMENDS A VOTE FOR EACH NOMINEE.

DIRECTOR NOMINEES

Set forth below is certain information with respect to each nominee for election as a director, each of whom is a current director.

ARCILIA C. ACOSTA

Age: 53 Director Since: 2018 Independent: Yes

Ms. Acosta currently serves as the President and Chief Executive Officer of CARCON Industries and Construction, a Dallas based firm specializing in commercial, industrial and transportation design and build construction, and has since 2000. She is also the founder and Chief Executive Officer of Southwestern Testing Laboratories, L.L.C., a geotechnical engineering and construction materials testing firm established in 2003.

Ms. Acosta is a director of Legacy Texas Financial Group, N.A., a bank holding company with an asset size of over \$7.5 billion and more than 50 retail branches in Texas, since 2013. Ms. Acosta was elected to the board of Magnolia Oil and Gas Corporation (previously known as TPG Pace Energy Holdings Corp.) in May 2017. In 2008, Ms. Acosta joined the Board of Directors of Energy Future Holdings Corporation and served for over ten years until 2018. She is also a member of the national Women Energy Directors Network.

An accomplished business leader, Ms. Acosta's qualifications to serve on our Board of Directors includes extensive experience providing executive leadership in engineering and construction projects, operations and safety matters. She is an experienced entrepreneur, nationally recognized speaker, philanthropist and top executive recognized by several publications and organizations. In 2014, Ms. Acosta was inducted into the National Women's Business Hall of Fame and Texas Diversity Council named her "Most Powerful and Influential Woman in Texas." In March 2016, the Governor of Texas appointed Ms. Acosta to the Texas Higher Education Coordinating Board.

Ms. Acosta's qualifications to serve on our Board of Directors includes her leadership positions and her experience in executive management, operations, safety, construction management and engineering management. In light of Ms. Acosta's extensive executive managerial experience and her operational skills, our Board of Directors has concluded that Ms. Acosta should continue as a member of our Board.

Committee Member: Audit, Corporate Governance, Executive Compensation

ONE Gas, Inc. Notice of 2019 Annual Meeting of Shareholders and Proxy Statement

25

ROBERT B. **EVANS**

Age: 70 **Director Since: 2014** Independent: Yes

26

Mr. Evans was elected to the board of Targa Resources Corp. on March 1, 2016, and appointed Chairman of the Risk Management Committee and as a member of its Compensation Committee. Mr. Evans has served as a director of Targa Resources GP LLC, a subsidiary of Targa Resources Corp. and the general partner of Targa Resources Partners, LP since 2007. Mr. Evans has been on the Board of Directors of New Jersey Resources Corp. since 2009 and currently serves as a member of its Audit Committee and Executive Committee. Mr. Evans was also a member of the Board of Directors of Sprague Resources, LP from 2013 until October 1, 2018.

Mr. Evans was President and Chief Executive Officer of Duke Energy Americas, a business unit of Duke Energy Corp., from January 2004 until his retirement in March 2006. He served as the transition executive for Energy Services, a business unit of Duke Energy, during 2003. Mr. Evans was president of Duke Energy Gas Transmission, a business unit of Duke Energy, beginning in 1998 until he was named President and Chief Executive Officer in 2002, a position in which he served until 2004. Prior to his employment at Duke Energy, Mr. Evans served as Vice President of Marketing and Regulatory Affairs for Texas Eastern Transmission and Algonquin Gas Transmission from 1996 to 1998.

Mr. Evans' extensive executive experience with the natural gas transmission business and wholesale natural gas trading business of Duke Energy and Targa Resources Partners provide him with valuable industry experience. Mr. Evans' service on board positions for other energy companies brings executive, corporate development, operations, finance, customer perspectives, safety, compliance, risk management and industry knowledge to the board. In light of Mr. Evans' extensive industry experience, and his numerous senior management positions where he gained extensive experience in corporate development, operations and financial matters, our Board has concluded that Mr. Evans should continue as a member of our Board.

JOHN W. GIBSON

Position: Chairman of the Board Age: 66 Director Since: 2014

Independent: No

Mr. Gibson is the non-executive Chairman of the Board of ONE Gas. Mr. Gibson is also the non-executive Chairman of the Board of ONEOK. Mr. Gibson served as Chairman of the Board of ONEOK Partners, L.P., until its acquisition by ONEOK in June 2017. Mr. Gibson was instrumental in the separation of ONE Gas from ONEOK into a stand-alone, 100 percent regulated, publicly traded natural gas distribution company. In connection with the separation, Mr. Gibson retired as Chief Executive Officer of ONEOK and of ONEOK Partners GP, L.L.C. effective January 31, 2014. In April 2016, Mr. Gibson joined the board of Matrix Service Company.

Mr. Gibson joined ONEOK in 2000 as President of Energy, responsible for the company's natural gas gathering and processing, and transportation and storage businesses. In 2006, he was named President and Chief Operating Officer of ONEOK Partners, the master limited partnership that owns midstream natural gas and natural gas liquids businesses. He was elected Chief Executive Officer of ONEOK and President and Chief Executive Officer of ONEOK Partners in January 2007, becoming Chairman of ONEOK Partners later that year. In January 2010, he became President of ONEOK, and in May 2011, he became Chairman.

His career began in the energy industry in 1974 as a refinery engineer with Exxon Company, USA. He spent 18 years with Phillips Petroleum Company in a variety of domestic and international positions in its natural gas, natural gas liquids and exploration and production businesses. Prior to joining ONEOK, Mr. Gibson was Executive Vice President of Koch Energy, Inc., a subsidiary of Koch Industries, responsible for its interstate natural gas pipelines and gathering and processing businesses.

Mr. Gibson had direct responsibility for and extensive experience in strategic and financial planning, acquisitions and divestitures, operations, management supervision and development, and compliance. Over the course of his lengthy career in a variety of sectors of the oil and gas industry, Mr. Gibson has gained extensive management and operational experience and has demonstrated a strong track record of leadership, strategic vision and risk management. In light of Mr. Gibson's role as the top executive officer at ONEOK and ONEOK Partners and his extensive industry and managerial experience and knowledge, our Board of Directors has concluded that Mr. Gibson should continue as a member of our Board.

Committee Member: Executive (Chair)

Board skills and qualifications:

- Executive management
- · Operations
- Industry knowledge
- · Acquisitions and divestitures

- Strategic and financial planning
- Risk management and oversight
- · Compliance
- Accounting and financial expertise

TRACY E. **HART**

Age: 57 Director since: 2018 Independent: Yes

Ms. Hart currently serves as President and Chief Executive Officer and on the board of Tarlton Corporation, a St. Louis based general contracting and construction management firm. She is the first woman to become president of a major general contracting company in St. Louis, and one of a few nationally. Since joining the company in 1990, Tarlton has tripled its size and further solidified its market share.

Ms. Hart recently joined Midwest BankCentre's Legal Board of Directors and is also a member of the Board of Trustees for Webster University. She has served on the Executive Committee of the Board of Directors for the St. Louis Regional Chamber since 2002 and has chaired both the Business Services and Energy & Environment committees. Ms. Hart also serves on the Board of Trustees at St. Louis Children's Hospital, having recently chaired the Community Benefit Committee. She was also a Commissioner of the St. Louis Science Center where she served as the Facilities Committee Chairman and Chairman of the Finance Committee. Ms. Hart served on the board of The Municipal Theatre Association of St. Louis and served as the secretary and on the Executive Committee.

In 2008, Ms. Hart was elected the first woman chairperson of the Associated General Contractors of St. Louis, having served on the board since 1996. She also is the first woman to be named chairperson of the AGC Natural Quality in Construction Committee. Ms. Hart is active in the community and has received much recognition as a successful business leader including being awarded the University of Missouri-St. Louis Trailblazer Award for her accomplishments.

Ms. Hart's qualifications to serve on our Board of Directors includes her leadership positions and her experience in executive management, finance, operations and risk management. In light of Ms. Hart's extensive executive managerial experience and her leadership skills, our Board of Directors has concluded that Ms. Hart should continue as a member of our Board.

MICHAEL G. HUTCHINSON

Age: 63 Director Since: 2014 Independent: Yes

Mr. Hutchinson has served on the board of Westmoreland Coal Company since 2012 and in November 2017 became its interim Chief Executive Officer. He is also a member of its Executive Committee. In 2015, Mr. Hutchinson joined the board of ONEOK Partners GP, L.L.C., the general partner of ONEOK Partners, L.P., and served as vice chair of its Audit Committee until the acquisition of ONEOK Partners, L.P. by ONEOK, Inc. in June 2017. Mr. Hutchinson served on the board of CoBiz Financial, Inc. from May 2017 until its acquisition by Bank of Oklahoma in September 2018.

Westmoreland Coal Company filed voluntary petitions for relief under Chapter 11 of the Bankruptcy Code on October 9, 2018, in the U.S. Bankruptcy Court for the Southern District of Texas, Houston Division.

Mr. Hutchinson retired as a partner from Deloitte & Touche in 2012. His Deloitte career spanned nearly 35 years, leading the energy and natural resources practice in Colorado for more than 10 years, while at the same time managing more than 150 professionals in the Denver audit and enterprise risk management practice.

Mr. Hutchinson has substantial expertise in accounting and finance matters gained during his experience in public accounting. He served as the lead audit partner on many of the firm's largest clients in Denver from 1989 until his retirement.

Mr. Hutchinson's qualifications include his experience with accounting principles, financial controls and evaluating financial statements of public companies in the energy sector, particularly from an auditor's perspective. As a result of his experience, Mr. Hutchinson is qualified to analyze the various financial and operational aspects of our company.

In light of Mr. Hutchinson's extensive experience with accounting principles, financial controls and evaluating financial statements of public companies in the energy sector and his ability to analyze the various financial and operational aspects of our company, our Board has concluded that Mr. Hutchinson should continue to serve as a member of our Board.

PATTYE L. **MOORE**

Age: 61 **Director Since: 2014** Independent: Yes

Ms. Moore currently serves as the non-executive Chairman of the Board of Red Robin Gourmet Burgers (NASDAQ: RRGB). Since 2002, Ms. Moore has served on the board of ONEOK and is the Chair of its Executive Compensation Committee. Ms. Moore also serves as a director of privately-held QuikTrip Corporation. In addition, Ms. Moore is a business strategy consultant, speaker and the author of Confessions from the Corner Office, a book on leadership instincts, published by Wiley & Sons in 2007.

Ms. Moore served on the board of Sonic Corp. from 2000 through January 2006 and was the President of Sonic from January 2002 to November 2004. She held numerous senior management positions during her 12 years at Sonic, including Executive Vice President, Senior Vice President-Marketing and Brand Development and Vice President-Marketing. Ms. Moore has extensive senior management, marketing, business strategy, brand development and corporate governance experience as a result of her service at Red Robin, ONEOK, Inc. and Sonic, her service on other boards and her consulting career. In her role as President of Sonic Corp., Ms. Moore was responsible for company and franchise operations, purchasing and distribution, marketing and brand development for the 3,000 unit chain with over \$3 billion in system-wide sales. As a business strategy consultant and as a board member, Ms. Moore has extensive experience in leadership, management development, strategic planning and executive compensation. Ms. Moore also has extensive experience as a member of the board of numerous non-profit organizations, including serving as Chairman of the Board of the National Arthritis Foundation. Ms. Moore is a National Association of Corporate Directors (NACD) Board Leadership Fellow and was named to the NACD 2017 Directorship 100 List. In light of Ms. Moore's extensive executive management, corporate governance and compensation experience and her leadership skills, our Board of Directors has concluded that Ms. Moore should continue as a member of our Board.

PIERCE H. NORTON II

Position: Management Director Age: 59 Director Since: 2014 Independent: No

Mr. Norton is President and Chief Executive Officer of ONE Gas.

Prior to the separation, Mr. Norton served as Executive Vice President and Chief Operating Officer of ONEOK and ONEOK Partners. Before that, Mr. Norton was President of the ONEOK Distribution Companies – Oklahoma Natural Gas, Kansas Gas Service and Texas Gas Service. Also, while at ONEOK, he held the position of Executive Vice President of Natural Gas, which included responsibility for all natural gas pipelines and the natural gas gathering and processing businesses within ONEOK Partners.

Mr. Norton began his natural gas industry career in 1982 at Delhi Gas Pipeline, a subsidiary of Texas Oil and Gas Corporation. He later worked for American Oil and Gas with operational responsibilities for natural gas gathering and processing, and for intrastate and interstate pipelines. Mr. Norton then worked for KN Energy as Vice President and General Manager of the Heartland Region, before moving to Bear Paw Energy as Vice President of Business Development. In 2002, he was named President of Bear Paw Energy (a subsidiary of Northern Border Partners at the time) now ONEOK Rockies Midstream (a subsidiary of ONEOK Partners).

Mr. Norton is a member of the American Gas Association's board of directors and served as its 2017 Chairman. He currently serves as a board member of the Tulsa Community College Foundation, the Tulsa Community Foundation and the Oklahoma Center for Community and Justice. He is a past board member of the Interstate Natural Gas Association of America, the Texas Pipeline Association, the North Dakota Petroleum Council and the Western Energy Alliance, formerly known as the Independent Petroleum Association of Mountain States. He also is a graduate of Harvard Business School's Advanced Management Program.

Mr. Norton has served in a variety of roles of continually increasing responsibility at ONEOK and ONEOK Partners from November 2004 to January 2014. In these roles, Mr. Norton has had direct responsibility for and extensive experience in strategic and financial planning, acquisitions and divestitures, operations, management supervision and development, and compliance. Mr. Norton has significant experience in assessing acquisition opportunities and in structuring, financing and completing merger and acquisition transactions. In addition, during the course of his lengthy career in a variety of sectors of the oil and gas industry, Mr. Norton gained extensive engineering management, compliance, safety, management and operational experience and has demonstrated a strong track record of leadership, strategic vision and risk management. In light of his lengthy career in a variety of sectors of the oil and gas industry, during which Mr. Norton has gained extensive management and operational experience and has demonstrated a strong track record of leadership, strategic vision and risk management, our Board has concluded that Mr. Norton should continue to serve as a member of our Board.

EDUARDO A. **RODRIGUEZ**

Position: Lead Independent **Director**

Age: 63 **Director Since: 2014 Independent:** Yes

Mr. Rodriguez is a member of the ONEOK board and serves as Vice Chair of its Executive Compensation Committee and as Vice Chair of its Corporate Governance Committee and is former chair of its Audit Committee. Mr. Rodriguez is President of Strategic Communication Consulting Group in El Paso, Texas. Mr. Rodriguez previously served as Executive Vice President of Hunt Building Corporation, a privately held company engaged in construction and real estate development headquartered in El Paso, Texas. He also served as a member of the board of Hunt Building Corporation. Prior to his three years with Hunt Building Corporation, Mr. Rodriguez spent 20 years in the electric utility industry at El Paso Electric Company, a publicly traded, investor-owned utility, where he served in various senior-level executive positions, including General Counsel, Senior Vice President for Customer and Corporate Services, Executive Vice President and as Chief Operating Officer. Mr. Rodriguez is a licensed attorney in the states of Texas and New Mexico, and is admitted to the United States District Court for the Western District of Texas.

Mr. Rodriguez has had extensive senior management, operational, entrepreneurial and legal experience in a variety of industries as a result of his service at Strategic Communication Consulting Group, Hunt Building Corporation and El Paso Electric Company. Mr. Rodriguez has engaged in the practice of law for over 30 years. In addition to his extensive legal experience, Mr. Rodriguez's senior management positions have included responsibility for strategic and financial planning, corporate governance, regulatory compliance, customer service and safety matters. In these positions he has demonstrated a strong track record of achievement and sound judgment. In light of Mr. Rodriguez's extensive legal experience, and his numerous senior management positions where he gained extensive experience in strategic planning, corporate governance and regulatory compliance, our Board has concluded that Mr. Rodriguez should continue to serve as a member of our Board.

Committee Member: Corporate Governance (Chair), Audit, Executive Compensation, Executive **Board skills and qualifications:**

DOUGLAS H. **YAEGER**

Age: 70 **Director since: 2014 Independent:** Yes

Mr. Yaeger served as Chairman, President and Chief Executive Officer of The Laclede Group, Inc. (now known as Spire Inc.) and Laclede Gas Company from 1999 until his retirement on February 1, 2012.

After spending nearly 20 years in the interstate pipeline industry, including roles as Executive Vice President of Mississippi River Transmission Corporation and Executive Vice President of Arkla Energy Marketing Company, Mr. Yaeger joined Laclede in 1990 as Vice President-Planning. He was elected Laclede's Senior Vice President-Operations, Gas Supply and Technical Services in 1992. In 1995, Mr. Yaeger was elected Executive Vice President-Operations and Marketing and subsequently in 1997 elected President and Chief Operating Officer and joined Laclede's board.

Mr. Yaeger served on the board and Executive Committee of the American Gas Association and is a past Chairman of its Audit Committee. He also served as Chairman of the Missouri Energy Development Association and the Southern Gas Association. Mr. Yaeger currently serves on the boards of FB Corporation and The Municipal Theatre Association of St. Louis.

Mr. Yaeger has extensive senior management experience in a variety of sectors in the oil and natural gas industry as a result of his service at Laclede where he demonstrated a strong track record of leadership and sound judgment. As a result of his experience, Mr. Yaeger is qualified to analyze the various financial and operational aspects of our company. In light of Mr. Yaeger's extensive industry, financial, compliance, safety, corporate governance, operating and compensation experience, our Board of Directors has concluded that Mr. Yaeger should continue as a member of our Board.

ONE Gas, Inc. Notice of 2019 Annual Meeting of Shareholders and Proxy Statement

33

PROPOSAL 2 – RATIFY THE SELECTION OF PRICEWATERHOUSECOOPERS LLP AS OUR INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM FOR THE YEAR ENDING DECEMBER 31, 2019

RATIFICATION OF THE SELECTION OF PRICEWATERHOUSECOOPERS LLP AS OUR INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM FOR 2019

Our Board has ratified the selection by our Audit Committee of PricewaterhouseCoopers LLP to serve as our independent (consistent with SEC and NYSE policies regarding independence) registered public accounting firm for 2019. In carrying out its duties in connection with the 2018 audit, PricewaterhouseCoopers LLP had unrestricted access to our Audit Committee to discuss audit findings and other financial matters.

Representatives of PricewaterhouseCoopers LLP will be present at the annual meeting to answer questions. They also will have the opportunity to make a statement if they desire to do so.

Approval of this proposal to ratify the selection of PricewaterhouseCoopers LLP as our independent registered public accounting firm requires the affirmative vote of a majority of the voting power of the shareholders present in person or by proxy and entitled to vote on this proposal at the meeting. Abstentions will have the effect of a vote against the proposal.

YOUR BOARD UNANIMOUSLY RECOMMENDS A VOTE FOR THE RATIFICATION OF THE SELECTION OF PRICEWATERHOUSECOOPERS LLP AS OUR INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM FOR 2019.

AUDIT AND NON-AUDIT FEES

Audit services provided by PricewaterhouseCoopers LLP during the 2018 fiscal year included an integrated audit of our consolidated financial statements and internal control over financial reporting, review of our unaudited quarterly financial statements, consents for and review of documents filed with the SEC, and performance of certain agreed-upon procedures.

The following table presents fees billed for services rendered by PricewaterhouseCoopers LLP for the year ended December 31, 2018:

| | 2018 | 2017 |
|-------------------------------|------------|-------------|
| | (Thousands | of Dollars) |
| Audit fees ⁽¹⁾ | \$1,124.5 | \$971.9 |
| Audit related fees(2) | \$6.4 | \$- |
| Tax fees | \$- | \$- |
| All other fees ⁽³⁾ | \$36.6 | \$35.3 |
| Total | \$1,167.5 | \$1,007.2 |

⁽¹⁾ Audit fees include audit services provided for the audits of the annual financial statements and internal controls as required by Section 404 of the Sarbanes-Oxley Act of 2002, and reviews of unaudited quarterly financial information and consents related to the Registration Statements filed with the SEC by us.

AUDIT COMMITTEE POLICY ON SERVICES PROVIDED BY THE INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

Consistent with SEC and NYSE policies regarding auditor independence, the Audit Committee has the responsibility for appointing, setting compensation for and overseeing the work of our independent auditor. In furtherance of this responsibility, the Audit Committee has established a policy with respect to the pre-approval of audit and permissible non-audit services provided by our independent auditor.

Prior to engagement of PricewaterhouseCoopers LLP as our independent auditor for the 2019 audit, a plan was submitted to and approved by the Audit Committee setting forth the audit services expected to be rendered during 2019. The plan included audit services which are comprised of work performed in the audit of our financial statements and to attest and report on our internal controls over financial reporting, as well as work that only the independent auditor can reasonably be expected to provide, including:

- · quarterly review of our unaudited financial statements;
- · comfort letters;
- 34 ONE Gas, Inc. Notice of 2019 Annual Meeting of Shareholders and Proxy Statement

 $^{(2) \ \ \}text{Audit related fees include subscriptions to research software for technical accounting guidance}.$

⁽³⁾ All other fees include fees for a professional education seminar for company personnel.

- · statutory audits;
- · performance of certain agreed-upon procedures;
- · attest services; and
- · consents and assistance with the review of documents filed with the SEC.

Audit fees are budgeted, and the Audit Committee requires the independent auditor and management to report actual fees versus budgeted fees periodically during the year by category of service.

The Audit Committee has adopted a policy that provides that fees for audit, audit related and tax services that are not included in the independent auditor's annual services plan, and for services for which fees are not determinable on an annual basis, are pre-approved if the fees for such services will not exceed \$75,000. In addition, the policy provides that the Audit Committee may delegate pre-approval authority to one or more of its members. The member to whom such authority is delegated must report, for informational purposes only, any pre-approval decisions to the Audit Committee at its next scheduled meeting.

2019 REPORT OF THE AUDIT COMMITTEE

The purpose of the Audit Committee is to assist the Board with the oversight of the integrity of the company's financial statements and internal controls, the company's compliance with legal and regulatory requirements, the independence, qualifications and performance of the company's independent registered public accounting firm and the performance of the company's internal audit function. The Audit Committee's function is more fully described in its charter, which the Board has adopted. The charter is on and may be printed from our website at www.ONEGas.com and is also available from the company's corporate secretary upon request. The Audit Committee reviews the charter on an annual basis. The Board annually reviews the definition of "independence" for audit committee members contained in the listing standards for the NYSE and applicable rules of the SEC, as well as our director independence guidelines, and has determined that each member of the Audit Committee is independent under those standards. In addition, the Board has determined that all members of the Audit Committee are financially literate, and six of the seven committee members are audit committee financial experts.

Management is responsible for the preparation, presentation and integrity of the company's financial statements, accounting and financial reporting principles, internal controls and procedures designed to ensure compliance with accounting standards, applicable laws and regulations. The company's independent registered public accounting firm, PricewaterhouseCoopers LLP, is responsible for performing an independent audit of the company's consolidated financial statements and the company's internal control over financial reporting and expressing an opinion on the conformity of those financial statements with generally accepted accounting principles and on the effectiveness of the company's internal control over financial reporting.

In this context, the Audit Committee has met and held discussions with management and the company's independent registered public accounting firm, PricewaterhouseCoopers LLP, regarding the fair and complete presentation of the company's financial results and management's report on its assessment of the company's internal control over financial reporting. In addition, the Audit Committee reviews the quality of the company's significant accounting policies and presentations in the financial statements. The Audit Committee has discussed the most critical estimates and accounting policies applied by the company in its financial statements, as well as alternative treatments. The Audit Committee has also reviewed both the internal and independent auditors' audit plans and subsequent findings. Management has represented to the Audit Committee that the company's consolidated financial statements were prepared in accordance with generally accepted accounting principles, and the Audit Committee has reviewed and discussed the consolidated financial statements with management and the independent auditor.

The Audit Committee has also reviewed and discussed with both management and the independent registered public accounting firm, management's assessment of the company's internal control over financial reporting. In addition, the Audit Committee has discussed the independent auditor's report on the company's internal control over financial reporting. The Audit Committee has also discussed with the company's independent auditor the matters required to be discussed by Public Company Accounting Oversight Board (United States) Auditing Standard No. 1301, Communications with Audit Committees, and Rule 2-07 of the SEC's Regulation S-X ("Communication with Audit Committees").

In addition, the Audit Committee has discussed with the independent registered public accounting firm, the firm's independence from the company and its management, including the matters in the written disclosures and the letter received from PricewaterhouseCoopers LLP as required by the applicable requirements of the Public Company Accounting Oversight Board (United States) regarding the independent accountant's communications with the Audit Committee concerning independence. While non-audit services provided by PricewaterhouseCoopers LLP were not significant in 2017 or 2018, and thus, did not impact the Audit Committee's determination of PricewaterhouseCoopers LLP's independence, the Audit Committee will also consider in the future whether the provision of non-audit services to the company by PricewaterhouseCoopers LLP is compatible with maintaining that firm's independence. The Audit Committee has concluded that the independent registered public accounting firm is independent from the company and its management. In considering the reappointment of PricewaterhouseCoopers LLP as the company's independent registered public accounting firm, the Audit Committee considered talent and experience on the audit engagement, the appropriateness of fees and the quality and candor of communications with the Audit Committee.

The Audit Committee discussed with the company's internal and independent auditors the overall scope and plans for their respective audits. The Audit Committee meets with both the internal and independent auditors, with and without management present, to discuss the results of their examinations, the assessments of the company's internal control over financial reporting and the overall quality of the company's financial reporting.

Based on the review and discussions referred to above, the Audit Committee recommended to the Board, and the Board approved, the inclusion of the audited financial statements of the company as of and for the year ended December 31, 2018, in the company's Annual Report on Form 10-K for the year ended December 31, 2018, for filing with the SEC.

Respectfully submitted by the members of the Audit Committee of the Board:

Michael G. Hutchinson, Chair Robert B. Evans, Vice Chair Arcilia A. Acosta, Member Tracy E. Hart, Member Pattye L. Moore, Member Eduardo A. Rodriguez, Member Douglas H. Yaeger, Member

STOCK OWNERSHIP

HOLDINGS OF MAJOR SHAREHOLDERS

The following table sets forth the beneficial owners of 5 percent or more of our common stock known to us at March 1, 2019.

| | | Amount and | |
|----------------|---|--------------------------|-------------------------|
| | Name and Address | Nature of | Percent |
| Title of Class | of Beneficial Owner | Beneficial Ownership | of Class ⁽⁵⁾ |
| Common Stock | BlackRock, Inc. 55 E. 52 nd Street New York, NY 10055 | 6,267,260 ⁽¹⁾ | 11.90% ⁽¹⁾ |
| Common Stock | The Vanguard Group, Inc. 100 Vanguard Blvd. Malvern, PA 19355 | 5,214,348 ⁽²⁾ | 9.92%(2) |
| Common Stock | T. Rowe Price Associates, Inc. 100 E. Pratt Street Baltimore, MD 21202 | 4,470,984 ⁽³⁾ | 8.50% ⁽³⁾ |
| Common Stock | American Century Investment Management, Inc. 4500 Main Street, 9 th Floor Kansas City, MO 64111 | 2,856,575 ⁽⁴⁾ | 5.44%(4) |

⁽¹⁾ Based upon Schedule 13G filed with the SEC on January 31, 2019, in which BlackRock, Inc. reported that, as of December 31, 2018, BlackRock, Inc. beneficially owned in the aggregate 6,267,260 shares of our common stock. Of such shares, BlackRock, Inc. reported it had sole dispositive power with respect to 6,267,260 shares and sole voting power with respect to 6,139,792 shares.

(5) The percent of voting securities owned is based on the number of outstanding shares of our common stock on December 31, 2018.

⁽²⁾ Based upon Schedule 13G filed with the SEC on February 11, 2019, in which The Vanguard Group, Inc. reported that, as of December 31, 2018, The Vanguard Group, Inc. directly and through its wholly-owned subsidiaries, Vanguard Fiduciary Trust Company and Vanguard Investments Australia, Ltd., beneficially owned in the aggregate 5,214,348 shares of our common stock. Of such shares, The Vanguard Group, Inc. reported it had sole dispositive power with respect to 65,516 shares, sole voting power with respect to 61,043 shares, and shared voting power with respect to 19,320 shares.

⁽³⁾ Based upon Schedule 13G filed with the SEC on February 14, 2019, in which T. Rowe Price Associates, Inc. reported that as of December 31, 2018, T. Rowe Price Associates, Inc. beneficially owned in the aggregate 4,470,984 shares of our common stock. Of such shares, T. Rowe Price Associates, Inc. reported it had sole dispositive power with respect to 4,470,984 shares and sole voting power with respect to 985,947 shares.

⁽⁴⁾ Based upon Schedule 13G filed with the SEC on February 11, 2019, in which American Century Investment Management, Inc., reported that, as of December 31, 2018, American Century Investment Management, Inc. directly and through its wholly-owned subsidiary, American Century Companies, Inc., American Century Capital Portfolios, Inc. controlled by the Stowers Institute for Medical Research, beneficially owned in the aggregate 2,856,575 shares of our common stock with respect to which American Century Investment Management, Inc. had sole voting power with respect to 2,715,018 shares, and sole dispositive power with respect to 2,856,575 shares.

HOLDINGS OF OFFICERS AND DIRECTORS

The following table sets forth the number of shares of our common stock beneficially owned as of March 1, 2019, by (1) each director and nominee for director, (2) each of the executive officers named in the Summary Compensation Table for 2018 under the caption "Compensation Discussion and Analysis" in this proxy statement, and (3) all directors and executive officers as a group.

| All directors and executive officers as a group | 11,416 | - |

⁽²⁾ Represents shares of phantom stock credited to a director's account under our Deferred Compensation Plan for Non-Employee Directors. Each share of phantom stock is equal to one share of our common stock. Phantom stock has no voting or other shareholder rights, except that dividend equivalents are paid on phantom stock and reinvested in additional shares of phantom stock based on the average of the high and low trading prices of our common stock on the NYSE on the date the dividend equivalent was paid. Shares of phantom stock do not give the holder beneficial ownership of any shares of our common stock because they do not give such holder the power to vote or dispose of any shares of our common stock.

SECTION 16(a) BENEFICIAL OWNERSHIP REPORTING COMPLIANCE

Section 16(a) of the Exchange Act, requires our directors, executive officers and beneficial owners of 10 percent or more of our common stock to file with the SEC and the NYSE initial reports of ownership and reports of changes in ownership of our common stock. Based solely on a review of the copies of reports furnished to us and representations that no other reports were required, we believe that all of our directors, executive officers, and 10 percent or more shareholders during the fiscal year ended December 31, 2018, complied on a timely basis with all applicable filing requirements under Section 16(a) of the Exchange Act, except one Form 4, reporting a purchase of shares by Ms. Acosta, was filed two business days late.

⁽³⁾ The percent of our voting securities owned is based on our outstanding shares of common stock on March 1, 2019.

COMPENSATION DISCUSSION AND ANALYSIS

The Compensation Discussion and Analysis contains a detailed description of our executive compensation philosophy, the elements of compensation that we provide to our NEOs.

Our NEOs for the fiscal year ended December 31, 2018, are as follows:

| Name | Title | |
|---------------------|--|--|
| Pierce H. Norton II | President and Chief Executive Officer | |
| Curtis L. Dinan | Senior Vice President and Chief Financial Officer | |
| Caron A. Lawhorn | Senior Vice President, Commercial | |
| Robert S. McAnnally | Senior Vice President, Operations | |
| Joseph L. McCormick | Senior Vice President, General Counsel and Assistant Secretary | |

EXECUTIVE SUMMARY

The purpose of the Compensation Discussion and Analysis is to describe the process and analysis that the Executive Compensation Committee uses in making compensation decisions for the NEOs, the components of compensation used and the rationale behind the decisions that were made. Our leadership team is committed to improving business results while providing value to both our customers and stakeholders as reflected in the performance highlights below.

2018 Performance Highlights

- In 2018, we generated net income of \$172 million, or \$3.25 per diluted share compared with 2017 net income of \$163 million, or \$3.08 per diluted share. 2018 operating income was \$288 million, compared to operating income of \$317 million in 2017.
- We paid dividends totaling \$1.84 per share, totaling \$97 million.
- The market price of our common stock was \$79.60 per share at December 31, 2018, an increase of approximately 137 percent from the closing price of \$33.63 on February 3, 2014, our first day of "regular way" trading and an increase of 8.7 percent over last year's closing price of \$73.26 at December 29, 2017.
- We generated TSR of approximately 167 percent from February 3, 2014, through December 31, 2018. This return exceeded the returns over the same period of eight of the nine companies in our peer group, the S&P MidCap 400 Index (59.66 percent), the S&P MidCap Utilities Index (57.40 percent) and the Dow Jones Industrial Average (77.26 percent).
- Driving safely, personal injury prevention and public safety continue to be a priority at ONE Gas. We achieved a 7 percent improvement in our DART rate as compared to last year and a 3 percent improvement in our PVIR.
- 40 ONE Gas, Inc. Notice of 2019 Annual Meeting of Shareholders and Proxy Statement

Our executive compensation programs have features designed to align the interests of executives with stakeholders. The following chart provides an overview of our compensation programs:

What We Do

- Emphasize a pay-for-performance focus where the majority of executive compensation is performance based
- Grant an annual incentive that is based on financial, operational and individual performance
- Grant 80 percent of LTI in performance-vesting equity to incent the accomplishment of long-term sustainable business goals while aligning the interests of our executives and stakeholders
- ✓ Engage an independent executive compensation consultant
- Maintain a clawback policy to recoup incentive-based compensation awards under certain circumstances
- Enforce share ownership guidelines for executives and independent directors to ensure dedication to the company's accomplishment of long-term sustainable business goals and to align the interests of our executives, independent directors and stakeholders
- Prohibit executives and independent directors from hedging or pledging activities, subject to an exception for CEO approval pledges described in greater detail below
- √ Restrict CIC cash benefits to "double-trigger" vesting
- Restrict CIC acceleration of equity vesting to "double-trigger" vesting
- Review tally sheets for NEOs prior to making compensation decisions

What We Don't Do

- Enter into employment agreements with executive officers
- Provide excise tax gross-ups upon a CIC
- Provide tax gross-ups on other compensation or benefits
- × Pay dividends on unearned restricted or performance shares
- Encourage excessive or imprudent risk taking
- Offer any perquisites to executive officers
- Offer incentive programs that have uncapped individual performance or company performance modifiers
- Allow unlimited short-term incentive payouts
- Allow hedging or pledging of Company stock

Our Philosophy

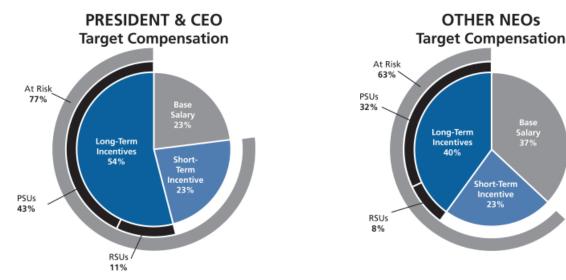

We provide executive compensation programs designed to attract, engage, motivate, reward and retain highly effective key executives who drive our success and who are leaders in our industry. We pay for performance in order to align the long-term interests of our executive officers with those of our stakeholders while also rewarding behaviors that drive collaboration, execution, teamwork, and safety within our culture.

A significant part of each executive's pay is at-risk in the form of performance-based STI and LTI awards. A NEO's compensation package is generally comprised of the following elements:

- Base salary,
- Annual STI cash awards, and
- LTI awards including:
 - PSUs, and
 - RSUs.

We believe that our executive compensation programs provide our executive officers with a balanced pay mix of market-competitive base salaries, STI awards tied to achieving financial and operational targets, and PSU awards promoting long-term sustainable business results by being tied to relative TSR over a three-year performance period.

The Committee evaluates compensation data while considering our compensation philosophy in determining the allocation of these elements to NEOs. For 2018, 77 percent of the CEO's total target compensation was "at risk" and an average of 63 percent was "at risk" for the other NEOs

We generally seek to pay executives within a competitive range of the market median of target total compensation. However, we may target pay opportunities above or below the median for various reasons, including but not limited to experience, company performance, sustained individual performance and internal pay equity.

HOW WE DETERMINE PAY

Role of the Executive Compensation Committee and the Board of Directors

The Committee, which is comprised of independent directors, reviews our executive compensation programs, market benchmark data and the executive officer compensation packages each year. It approves individual base salaries, STI awards and LTI grants for each NEO. The Committee also certifies the achievement of STI and LTI performance levels for the respective performance periods, and approves the current year's STI program, including individual target opportunities.

In making individual compensation decisions, the Committee reviews the recommendations from the CEO with respect to all NEOs other than himself. The Committee reviews and discusses these recommendations in executive session with its independent executive compensation consultant and reaches its own decision with respect to the compensation of the CEO and the other NEOs. The Committee then submits its compensation decisions with respect to the CEO and the other NEOs to the Board for ratification.

Role of the 2018 Shareholder Advisory Vote to Approve 2017 Executive Compensation

In 2018, we received a favorable advisory vote on our executive compensation, with 96.7 percent of the company's shares voting in favor of the executive compensation. The Committee therefore determined shareholders were supportive of the company's pay programs and there was not a need to materially change the executive compensation practices. The Committee will continue to monitor compensation practices, future advisory votes and other shareholder feedback to align executive compensation with the interests of the company and our stakeholders.

Role of the Independent Executive Compensation Consultant

The Committee engages an independent executive compensation consultant, Meridian, to advise on matters related to executive and non-employee director compensation. This includes assessing the peer group and competitive market data, providing advice on the company's STI and LTI programs, informing the Committee of emerging practices, trends and changes in regulatory and corporate governance matters and reviewing the executive and non-employee director compensation programs and policies. The Committee regularly meets with its independent executive compensation consultant with and without management and has the sole authority to approve its fees and terms of engagement. Meridian reports directly to the Committee and does not provide any services or advice to management, although it may meet from time to time with members of management as necessary to support its work on behalf of the Committee.

As required by the Committee's charter, the Committee annually reviews the independence of its executive compensation consultant, considering the factors set forth by the SEC and in the NYSE listing standards. For 2018, the Committee found that Meridian continues to meet the SEC rules and NYSE listing standards for independence.

Role of Executive Officers and Management

Annually, our executive officers present the year's strategic and financial plan to the Board for approval. Based on the approved plan, the company's executive officers recommend the measures, weighting, targets and the threshold/maximum performance goals for the annual STI plan. Management also advises the Committee of their assessment of the challenges facing the company, economic trends related to the business and the overall economy. Following the end of each fiscal year, the CEO reviews the company's actual performance relative to the approved STI goals and the performance of each executive, excluding himself, and recommends an STI award to the Committee for each executive officer, including the NEOs, other than himself. The CEO also makes recommendations for base salary adjustments, STI target opportunities and LTI awards for the executive officers, including the NEOs, other than himself.

The Company's Compensation department supports both the Committee and management by providing analysis and research regarding our executive compensation programs.

The Use of Tally Sheets

When making compensation decisions, the Committee reviews comprehensive tally sheets for the executive officers including the NEOs. The tally sheets, prepared by management and reviewed by the Committee's independent executive compensation consultant, list components of the NEOs' compensation such that the Committee can review the total compensation of the NEOs under different scenarios and so that the Committee can consider wealth accumulation as part of its due diligence in considering and approving compensation.

MARKET BENCHMARKING

The Committee's independent executive compensation consultant provides a competitive assessment of our executive compensation programs and the compensation levels for our executive officers, including the NEOs, using publicly available information from our peer group. The assessment includes information on annual base salaries, STI targets, LTI awards and total compensation opportunities.

With input from its independent executive compensation consultant, the Committee considers the following selection criteria to identify the peer group:

- Primary focus of the company is a natural gas utility company; and
- Similar character in areas such as revenue, market capitalization and number of customers.

After considering this criteria and recommendations from both its independent executive compensation consultant and management, the companies listed below were chosen by the Committee to comprise the 2018 peer group. The Committee believes referencing these peers is appropriate when reviewing our executive compensation programs.

| Alliant Energy Corporation | Pinnacle West Capital Corporation |
|----------------------------------|--|
| Atmos Energy Corporation | PNM Resources Inc. |
| Avista Corporation | Portland General Electric Company |
| El Paso Electric Company | South Jersey Industries, Inc. |
| IDACORP Inc. | Southwest Gas Corporation |
| New Jersey Resources Corporation | Spire, Inc. (formerly Laclede Group, Inc.) |
| Northwest Natural Gas Company | Vectren Corporation |
| Northwestern Corporation | WGL Holdings, Inc.1 |

WGL Holdings, Inc. was eliminated from the peer group upon its acquisition by AltaGas Ltd. on July 6, 2018.

The Committee evaluates the composition of the peer group at least annually and makes appropriate changes, as necessary. For 2018, the benchmarking peer group remains unchanged from the 2017 peer group with the exception of the WGL Holdings, Inc. acquisition.

The Committee assessed the market competitiveness of our NEOs' compensation based on the data provided by its independent executive compensation consultant. This data includes the market benchmarks at the 25th, 50th and 75th percentiles for consideration for the following compensation components:

- Base salary;
- STI target;
- Target total cash compensation (base salary + target STI);
- Target annualized grant date value of LTI awards; and
- Target total direct compensation (target total cash compensation + LTI awards).

ELEMENTS OF OUR EXECUTIVE COMPENSATION PROGRAM FOR 2018

This section describes each component of compensation we pay to our executives. Information regarding how compensation is determined is found in the section "How We Determine Pay" set forth above.

| | Compensation Element | Objective | Type of Compensation |
|-----------|----------------------|---|---|
| Fixed Pay | Base Salary | Provides continuous income to appropriately motivate and retain our executives based on a competitive market analysis and consideration for experience, performance and internal equity. | Annual cash compensation |
| | STI Awards | Aligns executives' efforts with the interests of our stakeholders by providing a financial cash incentive tied directly to key measures of the company's financial and operational performance aligned with our long-term strategy. Awards can be modified based on individual performance. | Annual cash compensation, earned based on performance against pre-established goals and individual performance |
| At-Risk | RSUs | Promotes the alignment of our executives' interests with those of our stakeholders, supports long-term equity ownership and promotes retention through the service-vesting requirement. | Time-based RSUs that cliff vest in three years |
| | PSUs | Provides performance incentives to our executives to align their interests and performance with our stakeholders by rewarding sustained share price performance and promotes retention through the service-vesting requirement. | Performance-based stock units that vest based on relative TSR over a three-year period |
| ther | Benefits | Provides a safety net to protect against financial burdens that can result from illness, disability or death. | Includes medical, dental, disability, life insurance and accidental death which are generally the same as the broader employee base |
| <u>.</u> | Retirement | Provide for basic retirement needs. Attracts and retains executives. | Can include 401(k), pension plans, NQDC plan, SERPs and/or Profit Sharing |

2018 PERFORMANCE AND COMPENSATION DECISIONS

Base Salary

44

The majority of compensation delivered to our NEOs is based on performance. Base salaries for our NEOs are set at competitive levels that enable the company to attract, engage, motivate, reward and retain our leadership team. For the CEO, the base salary component is equal to his STI target opportunity. This balanced approach aligns with our pay-for-performance compensation philosophy. The Committee considered the results of the market benchmarking analysis, the CEO's recommendation, each NEO's individual experience and sustained performance, internal equity and the compensation practices of our peer group to approve the following base salaries for 2018:

| Name | Base Salary as of January 1, 2017 | Base Salary effective January 1, 2018 | Dolla | r Increase | Percentage Increase |
|---------------------|---|---|-------|------------|------------------------|
| Pierce H. Norton | \$720,000 | \$775,000 | \$ | 55,000 | 8% |
| Curtis L. Dinan | \$435,000 | \$435,000 | \$ | 0 | 0% |
| Caron A. Lawhorn | \$360,000 | \$365,000 | \$ | 5,000 | 1% |
| Robert S. McAnnally | \$350,000 | \$365,000 | \$ | 15,000 | 4% |
| Joseph L. McCormick | \$325,000 | \$340,000 | \$ | 15,000 | |

Salary increases are based on performance and bring base salaries closer to the market positioning identified by the independent executive compensation consultant. The base salary for Mr. Dinan remained the same as 2017 due to market positioning.

Short-Term Incentive

Our 2018 STI awards were based on four measures-one financial measure and three operational measures focused on safety:

| Measure | Weighting | Definition |
|---------|-----------|--|
| EPS | 70% | Based on net income as determined in accordance with generally accepted accounting principles, divided by the daily weighted-average number of common shares outstanding for the year ended December 31, 2018, plus fully vested shares that have not been issued and unvested stock awards granted under our compensation plans, but only to the extent the awards dilute earnings per share. |
| TRIR | 10% | The number of OSHA incidents times 200,000 work hours divided by the sum of actual hours worked. |
| DART | 10% | The sum of OSHA incidents resulting in missed workdays, health-related work restrictions and job transfers times 200,000 work-hours divided by the sum of actual hours worked. |
| PVIR | 10% | The number of preventable vehicle incidents per 1,000,000 miles driven. |

We believe that EPS is an appropriate measure to be used in determining short-term incentive compensation since it is:

- transparent and reflects the growth and performance of our operations;
- a measure that better aligns the interests of our NEOs with the interests of our stakeholders;
- · widely used by financial analysts and the investing public; and
- · used by a majority of our peer companies.

Since EPS is a reflection of our financial performance, the Committee has placed a weighting of 70 percent of the overall award on this measure. Safety is one of the company's core values. Safe driving, personal injury prevention, public safety and reducing the severity of injuries are priorities. The Committee reinforces the importance of safety by including three measures in the STI. In addition to these four measures, there is an individual performance modifier ranging from 0–125 percent used to recognize each executive's individual performance against pre-established goals and objectives that support the company's continued success such as:

- strategic planning and execution;
- succession planning with a focus on developing, retaining and attracting a high performing workforce;
- · communication (internal and external); and
- industry and community leadership.

Each NEO has a target opportunity that is established at the beginning of each performance year. Annually, the Committee reviews the STI target opportunities for each NEO. The STI target opportunity for the CEO was increased to 100 percent of base salary in 2018 to align with market. The other NEOs remained unchanged as compared to 2017.

| | 2018 STI Target Opportunity as a Percentage of Base |
|---------------------|---|
| Name | Salary |
| Pierce H. Norton II | 100% |
| Curtis L. Dinan | 65% |
| Caron A. Lawhorn | 65% |
| Robert S. McAnnally | 65% |
| Joseph L. McCormick | 55% |

For 2018, NEOs could earn up to 150 percent of their STI target opportunity prior to individual performance modifiers if maximum company performance goals are achieved. If threshold company performance goals are achieved, the threshold payout is 50 percent of each NEOs target opportunity. After achievement of the threshold award for any measure, the actual award percentage is interpolated for performance between threshold and target or target and maximum. No annual incentive is earned if the company's performance is below the threshold goal.

Individual awards under our STI plan are calculated using the following formula:

| Base Salary | | STI Target | | Company | | Individual |
|----------------|---|-------------|---|----------------------|---|----------------------|
| earned in 2018 | Х | Opportunity | Х | Performance Modifier | Х | Performance Modifier |

The Committee engages in a rigorous process with its independent executive compensation consultant and management to determine the annual STI measures and potential awards. At its February 2018 meeting, the Committee established the threshold, target and maximum performance goals for the 2018 STI measures. The EPS target was set based on the 2018 strategic and financial plan with consideration given to the company's 2017 EPS performance. For the operational goals, TRIR was set at 7 percent over 2017. The DART target was set at 5 percent improvement from our 2017 performance. The PVIR target was set at 5 percent improvement over 2017.

| | | 2018 | Plan | | | 2018 | Actual Results | |
|----------------------------------|---------------------------------|-------------------------------|--------------------------------|--------|------------------------------------|-------------------------------------|------------------------------------|--|
| Criteria | Threshold (50% of Target) | Target (100% of Target) | Maximum (150% of Target) | Weight | Percentage Payable at Target | Percentage Payable at Maximum | Results at December 31, 2018 | Payout Percent Based on December 31, 2018 Results |
| EPS | \$2.89 | \$3.08 | \$3.27 | 70% | 70% | 105% | \$3.25 | 100.9% |
| TRIR | 1.22 | 1.11 | 1.00 | 10% | 10% | 15% | 1.26 | - |
| DART | 0.68 | 0.44 | 0.40 | 10% | 10% | 15% | 0.43 | 11.3% |
| PVIR | 1.92 | 1.71 | 1.62 | 10% | 10% | 15% | 1.75 | 9.0% |
| Company Performance Modifier: | | | | | | | | 121.2% |

For each performance measure in the table above, no incentive amount would be paid for that measure unless the company's actual result exceeds the established threshold levels. If the company's actual results are below the threshold level, the percentage payable for that measure is zero. If our actual results are between the stated performance levels, the percentage payable is interpolated between threshold and target or target and maximum.

The CEO evaluated the 2018 individual performance of each NEO through our annual performance assessment process. The CEO's recommended individual performance modifiers for the NEOs are reviewed and approved, if appropriate by the Committee. The Committee, together with the Corporate Governance Committee, evaluates the CEO's performance against his pre-established goals and objectives to determine the individual performance modifier for the CEO. The Committee determined that the CEO had met the 2018 goals and assigned a rating of 100 percent for his individual performance. Individual performance modifiers for the other NEOs ranged from 105 percent to 107 percent.

Below are the STI awards, reflecting the actual performance against target and the individual performance modifiers applied for each of our NEOs for the 2018 plan year that were paid in March 2019:

| Name | Base Salary earned in 2018 | STI Target Opportunity | Company Performance Modifier | Individual Performance Modifier | STI Award |
|---------------------|----------------------------------|---------------------------|------------------------------------|---------------------------------------|--------------|
| Pierce H. Norton II | \$775,000 | 100% | 121.2% | 100% | \$939,300 |
| Curtis L. Dinan | \$435,000 | 65% | 121.2% | 106% | \$363,255 |
| Caron A. Lawhorn | \$365,000 | 65% | 121.2% | 105% | \$301,924 |
| Robert S. McAnnally | \$365,000 | 65% | 121.2% | 105% | \$301,924 |
| Joseph L. McCormick | \$340,000 | 55% | 121.2% | 107% | \$242,509 |

Long-Term Incentives

During 2018, we granted LTI awards to our NEOs under our ECP consisting of PSUs and RSUs. The grants were awarded as 80 percent PSUs and 20 percent RSUs. The Committee believes that this weighting further strengthens executive officers' alignment with our stakeholders by only vesting PSUs based on how well the company performs compared to its peer group.

The overall grant values were determined based on the market benchmarking data provided by our independent executive compensation consultant and the individual performance of each NEO, among other factors.

| Name | Value of PSUs | Value of RSUs | Value of 2018 Equity Grant* |
|---------------------|------------------|------------------|-----------------------------------|
| Pierce H. Norton II | \$1,400,007 | \$349,985 | \$1,749,992 |
| Curtis L. Dinan | \$ 340,032 | \$ 85,008 | \$ 425,040 |
| Caron A. Lawhorn | \$ 319,990 | \$ 80,032 | \$ 400,022 |
| Robert S. McAnnally | \$ 319,990 | \$ 80,032 | \$ 400,022 |
| Joseph L. McCormick | \$ 300,019 | \$ 74,987 | \$ 375,003 |

^{*} Represents the grant date value approved by the Committee. The values displayed in the Summary Compensation Table represent the accounting value of the PSUs.

Based on compensation data reviewed by the Committee, the 2018 LTI awards for Messrs. Norton, Dinan, McAnnally, and McCormick were increased based on performance and to better align with their market positioning for LTI and target total compensation.

Performance Stock Units

PSUs are payable in common stock based on our TSR relative to the peer group approved by the Committee as shown below over a three-year performance period. In addition to encouraging retention, we believe that PSUs provide incentives to our executives that align their interests and performance with those of our stakeholders through increased share ownership. The actual payout of the PSUs can range from 0 percent to 200 percent of the units originally awarded, as set by the Committee, depending upon the company's relative three-year TSR. This structure is aligned with industry practices.

TSR is the total return on a company's stock over the performance period with dividends reinvested into company stock as they are accrued. The number of PSUs awarded at the time of vesting is based on our TSR positioning as a percentage basis at the end of the three-year performance period as set forth in the following chart. If the actual TSR percentile rank falls between the stated percentile ranks set forth in the chart, the payout percentage is interpolated between the percentile rank above and below the actual percentile rank. No PSUs are earned if our TSR ranking at the end of the performance period is below the 25th percentile.

| Percentile Rank Payout (as a % of Target) 90th percentile and above 200% 75th percentile 150% 50th percentile 100% 25th percentile 50% Below the 25th percentile 0% | | |
|---|---------------------------|---------------------------|
| 75th percentile 150% 50th percentile 100% 25th percentile 50% | Percentile Rank | Payout (as a % of Target) |
| 50th percentile 100% 25th percentile 50% | 90th percentile and above | 200% |
| 25th percentile 50% | 75th percentile | 150% |
| · | 50th percentile | 100% |
| Below the 25th percentile 0% | 25th percentile | 50% |
| | Below the 25th percentile | 0% |

During the three-year performance period, NEOs have their accounts credited with an amount equal to all ordinary cash dividends that would have been paid as if shares were issued on the grant date. The dividend equivalents are deemed to be reinvested. If a NEO forfeits any PSUs, the dividend equivalents are also forfeited. Dividend equivalents are also applied to the number of PSUs earned based on the company's performance factor.

The Committee approved the peer group and the addition of CenterPoint Energy and Chesapeake Utilities for the 2018 PSU grant. These companies are like ONE Gas in having:

- Notable gas utility operations;
- Similarly sized revenue, market capitalization, assets and number of customers;
- Strong trading correlations with ONE Gas; and
- Similar peer companies.

The peer group for the 2018 PSUs is as follows:

| Alliant Energy Corporation | NiSource, Inc. |
|----------------------------------|--|
| Atmos Energy Corporation | Northwest Natural Gas Company |
| Avista Corporation | NorthWestern Corporation |
| CenterPoint Energy, Inc. | South Jersey Industries, Inc. |
| Chesapeake Utilities | Southwest Gas Corporation |
| CMS Energy Corporation | Spire, Inc. (formerly Laclede Group, Inc.) |
| New Jersey Resources Corporation | |

Restricted Stock Units

RSUs are payable in common stock after a three-year vesting period, provided the NEO remains employed with the company through the vesting date. As with the PSUs, RSUs promote retention, increase long-term equity ownership and further promote the alignment of our executives' interests with those of our stakeholders. We believe that it is important to have an element of compensation that is focused directly on retaining executives to help to minimize the disruption associated with unplanned turnover. During the three-year vesting period, employees receiving a grant, including the NEOs, have their accounts credited with an amount equal to all ordinary cash dividends that would have been paid if shares were issued on the grant date. The dividend equivalents are deemed to be reinvested. If an employee, including an NEO, forfeits any RSUs, the dividend equivalents are also forfeited.

Vesting of 2015 PSUs

The 2015 PSU grants vested in February 2018. The Committee reviewed the company's relative TSR performance during the performance period against the peer group and has determined that its 77.45 percent TSR result ranks first amongst the nine peer companies. The Committee certified the performance with a corresponding payout of 200 percent of target.

The peer group previously approved by the Committee for this grant includes, after considering certain merger activity which eliminated three companies:

| Atmos Energy Corporation | Southwest Gas Corporation |
|----------------------------------|---------------------------|
| Avista Corporation | Spire, Inc. |
| New Jersey Resources Corporation | Vectren Corporation |
| Northwest Natural Gas Company | WGL Holdings, Inc. |
| South Jersey Industries, Inc. | |

Other Compensation and Benefit Programs

Retirement Benefits, qualified under the Internal Revenue Code:

- The defined contribution 401(k) Plan is available to all of our employees. The company matches 100 percent of employee contributions, up to 6 percent of eligible pay, subject to Internal Revenue Code contribution limits. All of our NEOs participate in this Plan.
- The Qualified Pension Plan is a defined benefit plan that is available to non-bargaining unit employees hired prior to January 1, 2005, and certain other bargaining unit employees, subject to Internal Revenue Code contribution limits. All of our NEOs, with the exception of Mr. McAnnally, are participants in the Qualified Pension Plan.

NQDC Plan: We maintain a NQDC Plan that provides our NEOs with the opportunity to defer receipt of specified portions of compensation and to have such deferred amounts treated as if invested in specified investment options. The NQDC Plan allows pre-tax deferrals of income and company matching contributions that may have been lost due to government limitations on our qualified retirement plans. The NQDC Plan provides an important financial planning tool which encourages executive retention. Employees eligible for the NQDC Plan are officers and certain other highly compensated employees designated by the company's Benefit Plan Sponsor Committee. All of our NEOs participate in the NQDC Plan.

SERP: We maintain a SERP that provides for two types of benefits. Part A of the SERP is an "excess" benefit that is intended to make up for the benefits not paid to our NEOs from the Qualified Pension Plan, because of the government limits applicable to qualified plans. The formula in Part A of the SERP is the same as the formula used in our Qualified Pension Plan, but uses only eligible earnings above the qualified plan limits. There are three NEOs who are active participants including Mr. Norton, Mr. Dinan, and Ms. Lawhorn.

Part B of the SERP is a supplemental benefit, or "top hat plan" that uses a different formula than the Qualified Pension Plan. The supplemental benefits are based upon a specified percentage of the highest 36 consecutive months' compensation of the NEO's last 60 months of service. This benefit is offset by any payment received from Part A of the SERP and the Qualified Pension Plan. Only one of our NEOs, Mr. Dinan, is a participant in Part B.

The SERP is closed to new participants and has not been extended to any new participants since 2005.

Profit Sharing Plan: We maintain a Profit Sharing Plan for employees who are not eligible for the Qualified Pension Plan. The company contributes 1 percent of a participant's annual eligible compensation. The company may also make additional discretionary contributions each year. Eligible compensation is limited to the qualified plan limits. The company contributions and earnings are not taxable until distributed. Only one of our NEOs, Mr. McAnnally, is a participant in this Profit Sharing Plan.

Other Benefits: Our executive officers, including the NEOs, participate in employee benefit plans under the same terms and premium structure as generally available to all our employees, including our medical, dental, vision, life, employee stock purchase, accidental death and dismemberment, travel and accident, and disability plans.

Perquisites: Our executive officers, including the NEOs, receive no perquisites or other personal benefits from the company.

SHARE OWNERSHIP GUIDELINES

Our Board advocates executive share ownership to align executive interests with our stakeholders. These guidelines are mandatory and generally must be achieved by each officer over the course of five years after becoming subject to the guidelines. Our executives are required to hold all shares, net of taxes, awarded under our ECP until the share ownership guideline is met.

An executive's holdings include shares owned in the open market, shares held in trust for the benefit of the executive or the benefit of the executive's immediate family, unvested RSUs, and shares held in qualified plans. PSU shares that have not yet been earned and vested do not count toward an executive's personal holdings for the purpose of determining whether the executive is permitted to sell shares of the company's common stock.

Executives employed at the time that we became a standalone company have five years from January 31, 2014, to satisfy individual share ownership requirements. Executives hired after that date have five years from their start date to satisfy individual share ownership

Below are the base salary multiples for share ownership for the NEOs:

| Name | Title | Multiple of Base Salary |
|---------------------|--|-------------------------------|
| Pierce H. Norton II | President and Chief Executive Officer | 6 |
| Curtis L. Dinan | Senior Vice President and Chief Financial Officer | 4 |
| Caron A. Lawhorn | Senior Vice President, Commercial | 3 |
| Robert S. McAnnally | Senior Vice President, Operations | 3 |
| Joseph L. McCormick | Senior Vice President, General Counsel and Assistant Secretary | 4 |

As of December 31, 2018, all NEOs with the exception of Mr. McAnnally, had met their individual share ownership requirements. Mr. McAnnally joined the company in March 2015 and has until March 2020 to meet his individual share ownership requirement.

ONE Gas, Inc. Notice of 2019 Annual Meeting of Shareholders and Proxy Statement

49

RISK CONSIDERATIONS

The Committee engaged its independent executive compensation consultant in the annual review of the risks and rewards associated with our executive compensation program. Our executive compensation program is designed with features that mitigate risk without diminishing the incentive nature of the compensation. The framework below lists a range of compensation program features that might create motivations for excessive risk and our practices that mitigate those risks:

| Appropriate Risk | Risk Mitigation |
|--|--|
| √Multiple incentive performance measures | Our annual, STI program features a balance of financial and operational measures |
| √Measures aligned with shareholder value | Our LTI program features multiple vehicles (RSUs and PSUs) and 3-year overlapping performance periods |
| √Measures under broad influence across many people | Our performance measures, performance goals and capital allocation require multiple approval levels and has oversight; the Committee reviews and approves the STI and performance- based LTI award goals at the beginning of each cycle |
| √Balanced pay mix | Our compensation program features an effective balance of STI and LTI compensation components to avoid placing too much value on any one element and is aligned to the market |
| √Balance of formulaic and discretionary factors | Our incentive awards incorporate both objective formulaic and subjective discretionary factors; the Committee retains full discretion |
| √Capped awards | Our short-term and long-term performance-based payments have capped performance modifiers at 150 percent for short-term and 200 percent for performance-based long-term awards |
| √Reasonable CIC and severance benefits | Our CIC and severance benefits are within common norms (cash CIC payments and acceleration of vesting of equity grants are also subject to "double trigger" requirements) and do not provide excessive incentives to seek unwarranted transactions |
| √Clawback provisions in place | Our clawback provisions extend beyond current legal requirements |
| √Meaningful executive stock ownership and consistent LTI practices | Our stock ownership guidelines, annual LTI award grants and vesting provisions create sustained and consistent ownership stakes |

Based on its review, because of the reasons set forth above, the Committee has concluded that the company's executive compensation program does not encourage unreasonable risk taking by our executives, and therefore does not produce risks that are reasonably likely to have a material adverse effect on the company.

CLAWBACK PROVISIONS

Awards made under the annual STI plan and ECP are subject to clawback provisions. The clawback provisions permit the Committee to use appropriate discretion to seek recoupment of awards paid to executives in the event of fraud, negligence or intentional misconduct that is determined to be a contributing factor of having to restate all or a portion of the company's financial statements. We believe executives who are responsible for material noncompliance with applicable financial reporting requirements should not benefit monetarily from such noncompliance.

TERMINATION AND CHANGE IN CONTROL BENEFITS

Our NEOs are eligible to participate in a CIC Severance Plan. The participants in the plan are reviewed and approved annually by the Committee and the full Board. The cash severance multiple varies but is no greater than three times the participant's salary and target STI. The cash severance and acceleration of unvested equity requires a double trigger of a CIC of the company followed by a "qualifying" termination of the executive's employment. See page 61 for more information regarding the determination of when a "double trigger" has occurred. Qualifying terminations include involuntary termination without cause or voluntary termination with "good reason." Good reason includes:

- Demotion or material reduction of authority or responsibility;
- Material reduction in base salary;
- Material reduction in annual incentive or LTI targets;
- · Relocation of greater than 35 miles, or
- · Failure to assume the CIC Severance Plan.
- 50 ONE Gas, Inc. Notice of 2019 Annual Meeting of Shareholders and Proxy Statement

The plan does not provide for additional pension benefits upon a CIC. In addition, the plan does not provide for a tax gross-up feature for "golden parachute" excise taxes, but provides plan participants a "best after-tax results" approach to excise taxes in determining the benefit payable to a participant under the plan. Under this approach, the company will reduce the benefits payable to the participant to the extent necessary to avoid triggering the excise tax, but only if doing so would result in a higher after-tax payment to the participant.

ANTI-HEDGING AND ANTI-PLEDGING POLICIES

An employee designated as an insider, including the NEOs, may not engage in any hedging strategies involving ONE Gas securities that allow a person to lock in much of the value of stockholdings, often in exchange for all or part of the potential upside appreciation in the stock, including, but not limited to:

- Purchasing ONE Gas stock on margin;
- Selling ONE Gas stock short;
- Entering into zero cost collars, prepaid variable forward sale contracts, equity swaps or exchange funds; or
- Buying or selling puts or calls or other derivative instruments.

Insiders are prohibited from holding ONE Gas securities in a margin account or otherwise pledging ONE Gas securities as collateral for a loan. ONE Gas may grant exceptions to the prohibition against pledging on a limited case-by-case basis, provided that the insider must submit a request for approval to the CEO. There is no exception to the prohibition against pledging with respect to the CEO. Any request is subject to pre-clearance under the Securities Insider Trading Policy. However, there is no assurance that an exception will be granted and there were none granted to the policies in 2018.

EMPLOYMENT AGREEMENTS

We do not enter into individual employment agreements with any of our NEOs. Instead, in general, the rights of our NEOs with respect to specific events are covered by our compensation and benefit plans, including our CIC Severance Plan.

INTERNAL REVENUE CODE LIMITATIONS ON DEDUCTIBILITY OF EXECUTIVE COMPENSATION

The Tax Cuts and Jobs Act, enacted on December 22, 2017, substantially modified Section 162(m) of the Internal Revenue Code and, among other things, eliminated the performance-based exception to the \$1 million deduction limit effective as of January 1, 2018. As a result, beginning in 2018, compensation paid to certain executive officers in excess of \$1 million will generally be nondeductible, whether or not it is performance-based. In addition, beginning in 2018, the executive officers subject to Section 162(m) (the "Covered Employees") will include any individual who served as the CEO or CFO at any time during the taxable year and the three other most highly compensated officers (other than the CEO and CFO) for the taxable year, and once an individual becomes a Covered Employee for any taxable year beginning after December 31, 2016, that individual will remain a Covered Employee for all future years, including following any termination of employment.

The Tax Cuts and Jobs Act includes a transition rule under which the changes to Section 162(m) described above will not apply to compensation payable pursuant to a written binding contract that was in effect on November 2, 2017, and is not materially modified after that date. To the extent applicable to our existing contracts and awards, the Committee may avail itself of this transition rule. However, because of uncertainties as to the application and interpretation of the transition rule, no assurances can be given at this time that our existing contracts and awards, even if in place on November 2, 2017, will meet the requirements of the transition rule. Moreover, to maintain flexibility in compensating executive officers in a manner designed to promote varying corporate goals, the Committee does not limit its actions with respect to executive compensation to preserve deductibility under Section 162(m) if the Committee determines that doing so is in the best interests of the company.

EXECUTIVE COMPENSATION COMMITTEE REPORT

The Committee has met, reviewed and discussed with management the Compensation Discussion and Analysis contained in this proxy statement. Based on this review and discussion, the Committee recommended to the Board the inclusion of the Compensation Discussion and Analysis in this proxy statement.

Pattye L. Moore, Chair Douglas H. Yaeger, Vice Chair Arcilia C. Acosta, Member Robert B. Evans, Member Tracy E. Hart, Member Michael G. Hutchinson, Member Eduardo A. Rodriguez, Member

NAMED EXECUTIVE OFFICER COMPENSATION

The following table reflects the compensation paid to the NEOs in respect to our 2018 fiscal year.

SUMMARY COMPENSATION TABLE FOR 2018

| Name and Principal Position | Year | Salary | | Stock Awards ⁽¹⁾ | Ince | on-Equity entive Plan pensation ⁽²⁾ | Nonqua Cor | ge in Pension /alue and alified Deferred npensation arnings ⁽³⁾ | Α | II Other pensation ⁽⁴⁾ | | Total |

⁽¹⁾ The amounts included in the table relate to RSUs and PSUs granted under our ECP and reflect the aggregate grant date fair value of such awards calculated pursuant to ASC Topic 718. Material assumptions used in the calculation of the value of these equity grants are included in Note 11 to our audited financial statements for the year ended December 31, 2018, included in our Annual Report on Form 10-K filed with the SEC on February 20, 2019.

The aggregate grant date fair value of RSUs for purposes of ASC Topic 718 was determined based on the closing price of our common stock on the grant date. With respect to the PSUs, the aggregate grant date fair value for purposes of ASC Topic 718 was determined using the probable outcome of the performance conditions as of the grant date based on a valuation model that considers the market condition (TSR) and using assumptions developed from the referenced peer companies. The value included for the PSUs is based on 100 percent of the PSUs vesting at the end of the performance period. Using the maximum number of shares issuable upon vesting of the PSUs (200 percent of the units granted), the aggregate grant date fair value of the PSUs would be as follows:

| Name | 2018 | 2017 | 2016 |
|---------------------|-----------------|-----------------|-----------------|
| Pierce H. Norton II | \$ 3,041,119 | \$ 2,585,250 | \$ 2,459,904 |
| Curtis L. Dinan | \$ 738,623 | \$ 689,400 | \$ 704,660 |
| Caron A. Lawhorn | \$ 695,088 | \$ 689,400 | \$ 704,660 |
| Robert S. McAnnally | \$ 695,088 | \$ 603,225 | \$ 570,134 |
| Joseph L. McCormick | \$ 651,700 | \$ 561,861 | \$ 528,495 |

⁽²⁾ Reflects STI awards earned in 2018, 2017 and 2016 and paid in 2019, 2018 and 2017, respectively, under our annual STI plan. For a discussion of the performance criteria established by the Committee for awards under the 2018 annual STI plan, see "2018 Performance and Compensation Decisions—Short-Term Incentive" above on page 45.

⁽³⁾ The amounts reflected represent the aggregate change during 2018 in the actuarial present value of the NEOs' accumulated benefits under the Qualified Pension Plan and the SERP. For a description of these plans, see "Pension Benefits" below. The change in the present value of the accrued pension benefit is impacted by variables such as additional years of service, age and the discount rate used to calculate the present value of the change. For 2018, the change in pension value reflects the increase due to additional service and pay for the year, offset by a decrease in present value due to the higher discount rate in effect on the measurement date (3.8 percent as of December 31, 2017, and 4.4 percent as of December 29, 2018). The Qualified Pension Plan was closed to new participants as of December 31, 2004. All of our NEOs, with the exception of Mr. McAnnally, participate in the Qualified Pension Plan. The SERP was closed to new participants on January 1, 2014, although no new participants had been added since 2005. Ms. Lawhorn and Messrs. Norton and Dinan participate in the SERP. During 2018, the pension value for Mr. Dinan decreased \$3,805. During 2018, the pension value for Ms. Lawhorn decreased \$12,373.

(4) Reflects (i) the amounts paid as our dollar-for-dollar match of contributions made by the NEO under our NQDC Plan, 401(k) Plan for Employees of ONE Gas, Inc. and Subsidiaries and Profit Sharing Plan, (ii) amounts paid for length of service awards and (iii) the value of shares received in 2018, 2017 and 2016 under our Employee Stock Award Program as of the date of issuance as follows:

| Name | Year | Noi D Com | ch Under nqualified referred apensation Plan ^(a) | | ch Under (k) Plan ^(b) | | Profit haring Plan ^(c) | | ervice rard ^{(d)(e)} | S | E Gas tock /ard ^(e) |

| Joseph L. McCormick | 2018 2017 2016 | \$ \$ \$ | 34,713 29,003 20,645 | \$ \$ \$ | 16,500 16,200 15,900 | \$ \$ \$ | - - - | \$ \$ \$ | 600 - - | \$ \$ \$ | - 275 996 |

- (a) For additional information on our NQDC Plan, see "Nonqualified Deferred Compensation for 2018" below on page 59.
- (b) Our 401(k) Plan is a tax-qualified plan that covers substantially all of our employees. Employee contributions are discretionary. Subject to certain limits, we match 100 percent of employee contributions to the plan up to a maximum of 6 percent of eligible compensation.
- (c) Represents amounts contributed by the company under the ONE Gas, Inc. Profit Sharing Plan.
- (d) Service awards are amounts paid to employees of the company upon milestone anniversaries with the company beginning upon the employee's fifth anniversary with the company and continuing thereafter for every five years of service with the company.
- (e) There are no tax gross-up payments in connection with shares awarded under our Employee Stock Award Program or cash service awards.

The NEOs received no other perquisites or other personal benefits from the company in 2018.

GRANTS OF PLAN-BASED AWARDS FOR 2018

The following table reflects the grants of plan-based awards to the NEOs during 2018.

Grants of Plan-Based Awards

| | | | d Future Pay / Incentive P | | | Estimated Future Payouts Under Equity Incentive Plan Awards ⁽²⁾ | | | All Other Stock Awards: Number of | | Grant Date Fair Value | |

¹⁾ Reflects amounts that could be earned pursuant to our annual officer STI plan. The plan provides that our NEOs may receive annual STI awards based on the performance of the company measured by financial (EPS) and operational factors (TRIR, PVIR and DART) and individual performance during the relevant fiscal year. Company targets and individual goals are established annually by the Committee. The Committee establishes annual target awards for each officer expressed as a percentage of their base salaries. The actual amounts earned by the NEOs in 2018 under the plan and paid in 2019 are set forth under the "Non-Equity Incentive Plan Compensation" column in the Summary Compensation Table for 2018 above. For each performance measure of our annual officer STI plan, no incentive amount would be paid for that measure unless the company's actual result exceeds the established threshold levels. If the company's actual results are below the threshold level, the percentage payable for that measure is zero. For the 2018 STI plan, the payout range based on the performance of the company was 50 percent–150 percent of base salary and a personal modifier ranging from 0–125 percent. The threshold amounts reflected in the table apply a personal modifier of 125 percent to the 150 percent company performance payout.

⁽²⁾ Reflects the PSUs that could be earned pursuant to awards granted under our ECP that vest three years from the date of grant, at which time the holder is entitled to receive a percentage (0 to 200 percent) of the PSUs granted based on performance criteria. If actual performance is below the threshold level, the percentage of PSUs earned is zero. For this period, the criteria is our TSR over the period of February 19, 2018, to February 13, 2021, compared with the TSR of the peer group. If our actual relative TSR is between the stated performance levels, the percentage of PSUs earned is interpolated between the stated performance levels. One share of our common stock is payable for each performance unit that vests, plus accrued dividends. PSUs are also subject to accelerated vesting upon a CIC.

⁽³⁾ Reflects RSUs granted under our ECP that vest three years from the date of grant, at which time the grantee is entitled to receive the grant in shares of our common stock, plus accrued dividends.

⁽⁴⁾ The aggregate grant date fair value of the RSUs for purposes of ASC Topic 718 was determined based on the closing price of our common stock on the grant date. With respect to the PSUs, the aggregate grant date fair value for purposes of ASC Topic 718 was determined using the probable outcome of the performance conditions as of the grant date based on a valuation model that considers market conditions (such as TSR) and using assumptions developed from historical information of each of the peer companies referenced under "2018 Performance and Compensation Decisions—Long Term Incentives" above. This amount is consistent with the estimate of aggregate compensation cost to be recognized over the performance period determined as of the grant date under ASC Topic 718. The value presented is based on 100 percent of the PSUs vesting at the end of the three-year performance period.

OUTSTANDING EQUITY AWARDS AT FISCAL YEAR END FOR 2018

The following table shows the outstanding equity awards held by the NEOs as of December 31, 2018. Outstanding Equity Awards at Fiscal Year-End

| | | Stock Awards | | | | | | | |
|------------------------|--|--|---|---|--|--|--|--|--|
| Name | Number of Shares or Units of Stock That Have Not Vested(1)(3) | Market Value of Shares or Units of Stock That Have Not Vested | Equity Incentive Plan Awards: Number of Unearned Shares, Units or Other Rights That Have Not Vested(2)(3) | Equity Incentive Plan Awards: Market or Payout Value of Unearned Shares, Units or Other Rights That Have Not Vested | | | | | |
| Pierce H. Norton II | 15,344 | \$1,221,359 | 122,647 | \$9,762,687 | | | | | |
| Curtis L. Dinan | 4,065 | \$ 323,580 | 32,521 | \$2,588,636 | | | | | |
| Caron A. Lawhorn | 3,990 | \$ 317,625 | 31,918 | \$2,540,676 | | | | | |
| Robert S. McAnnally | 3,565 | \$ 283,737 | 28,352 | \$2,256,851 | | | | | |
| Joseph L. McCormick | 3,302 | \$ 262,894 | 26,425 | \$2,103,413 | | | | | |

⁽¹⁾ Represents RSUs that have not yet vested. RSUs vest three years from the date of grant, at which time the grantee is entitled to receive one share of our common stock for each vested RSU, plus accrued dividends. RSUs accrue dividend equivalents from the date of grant through the vesting date. RSUs are scheduled to vest as set forth in the following table:

Restricted Unit Vesting Schedule

| Pierce H. Norton II | 5,153 4,930 | on February 18, 2019 on February 15, 2020 |
|---------------------|-------------------------|--|
| Curtis L. Dinan | 5,261 1,476 1,311 | on February 13, 2021 on February 18, 2019 on February 15, 2020 |
| Caron A. Lawhorn | 1,278 1,476 | on February 13, 2021 on February 18, 2019 |
| Pohort C. Maanally | 1,311 1,203 1.208 | on February 15, 2020 on February 13, 2021 on February 18, 2019 |
| Robert S. McAnnally | 1,206 1,154 1,203 | on February 15, 2020 on February 13, 2021 |
| Joseph L. McCormick | 1,100 1,075 1,127 | on February 18, 2019 on February 15, 2020 on February 13, 2021 |

⁽²⁾ Represents PSUs that have not yet vested. PSUs vest three years from the date of grant, at which time the holder is entitled to receive a percentage (0 to 200 percent) of the PSUs granted based on our TSR over the three-year performance period, compared with the TSR of the peer group. One share of our common stock is payable in respect of each PSU granted that becomes vested, plus accrued dividends. PSUs accrue dividend equivalents from the date of grant through the vesting date. The number of PSUs represented and their corresponding market value is based on 200 percent of the PSUs vesting at the end of the three-year performance period as last year's PSUs paid out at 200 percent.

The following table reflects the projected vesting level based on our TSR compared with the TSR of the referenced peer group at December 31, 2018:

Performance Unit Vesting Schedule

| Pierce H. Norton II | 41,226 | on February 18, 2019 |
|---------------------|--------|----------------------|
| | 39,332 | on February 15, 2020 |
| | 42,088 | on February 13, 2021 |
| Curtis L. Dinan | 11,810 | on February 18, 2019 |
| | 10,489 | on February 15, 2020 |
| | 10,222 | on February 13, 2021 |
| Caron A. Lawhorn | 11,810 | on February 18, 2019 |
| | 10,489 | on February 15, 2020 |
| | 9,620 | on February 13, 2021 |
| Robert S. McAnnally | 9,555 | on February 18, 2019 |
| | 9,177 | on February 15, 2020 |
| | 9,620 | on February 13, 2021 |
| Joseph L. McCormick | 8,857 | on February 18, 2019 |
| | 8,548 | on February 15, 2020 |
| | 9,019 | on February 13, 2021 |

⁽³⁾ The terms of both our RSUs and our PSUs provide that any such unvested units will become fully vested upon a qualifying termination of employment following a CIC. See "Potential Post-Employment Payments and Payments Upon a Change in Control" on page 61.

OPTION EXERCISES AND STOCK VESTED FOR 2018

The following table sets forth stock awards held by the NEOs that vested during 2018. The company has not awarded any options, therefore no NEO exercised any options during 2018, and no NEO or other employee currently holds any unexercised options.

Option Exercises and Stock Vested

| | Stock Awards ⁽¹⁾ | | | | | | | |
|--|-----------------------------|----|-----------|--|--|--|--|--|
| Number of Shares Acquired on Value Realized Name Vesting on Vesting ⁽²⁾ | | | | | | | | |
| Pierce H. Norton II | 58,511 | \$ | 3,970,852 | | | | | |
| Curtis L. Dinan | 18,705 | \$ | 1,269,431 | | | | | |
| Caron A. Lawhorn | 18,705 | \$ | 1,269,431 | | | | | |
| Robert S. McAnnally | 13,956 | \$ | 947,131 | | | | | |
| Joseph L. McCormick | 14,049 | \$ | 953,443 | | | | | |

(1) Certain of the NEOs elected to have vested shares withheld to cover applicable state and federal taxes incurred upon vesting. As a result, the net shares received upon the vesting and the related net value realized are as follows:

| Name | Net Shares Acquired on Vesting | Net Value Realized on Vesting |
|---------------------|--------------------------------------|-------------------------------------|
| Pierce H. Norton II | 32,539 | \$2,208,306 |
| Curtis L. Dinan | 10,359 | \$ 703,056 |
| Caron A. Lawhorn | 10,352 | \$ 702,525 |
| Robert S. McAnnally | 7,709 | \$ 523,196 |
| Joseph L. McCormick | 7,759 | \$ 526,658 |

⁽²⁾ The value realized on vesting represents the market value of the shares received based on the average of the high and low prices of our common stock on the NYSE on the date of vesting.

PENSION BENEFITS FOR 2018

The following table sets forth the estimated present value of accumulated benefits as of December 31, 2018, and payments made during 2018, in respect to each NEO under the referenced retirement plans.

Pension Benefits

| Name | Plan Name | Number of Years Credited Service | Present Value of Accumulated Benefit ⁽¹⁾ | Payments During Last Fiscal Year |
|---------------------|---|--|---|-------------------------------------|
| Pierce H. Norton II | Supplemental Executive Retirement Plan Qualified Pension Plan | 14.08 14.08 | \$ 3,442,287 \$ 757,627 | \$ - \$ - |
| Curtis L. Dinan | Supplemental Executive Retirement Plan Qualified Pension Plan | 15.00 ⁽²⁾ 15.00 ⁽²⁾ | \$ 2,326,198 \$ 590,353 | \$ - \$ - |
| Caron A. Lawhorn | Supplemental Executive Retirement Plan Qualified Pension Plan | 20.25 20.25 | \$ 1,333,373 \$ 1,117,711 | \$ - \$ - |
| Robert S. McAnnally | Supplemental Executive Retirement Plan Qualified Pension Plan | _(3) _(3) | \$ - \$ - | \$ - \$ - |
| Joseph L. McCormick | Supplemental Executive Retirement Plan Qualified Pension Plan | _(4) 16.00 ⁽⁴⁾ | \$ - \$ 870,068 | \$ - \$ - |

⁽¹⁾ Each executive officer's benefit is determined as of age 62 when an unreduced benefit can be received under the SERP and Qualified Pension Plan. The present value of the unreduced benefit is determined using the assumptions from a measurement date of December 31, 2018. Material assumptions used in the calculation of the present value of accumulated benefits are included in Note 12 to our audited financial statements for the year ended December 31, 2018, included in our Annual Report on Form 10-K filed with the SEC on February 20, 2019.

Qualified Pension Plan. The Qualified Pension Plan is a defined benefit pension plan qualified under the Internal Revenue Code. At December 31, 2018, the plan covered non-bargaining unit employees hired prior to January 1, 2005, and certain bargaining-unit employees. Also, at December 31, 2018, non-bargaining unit employees hired after December 31, 2004, employees represented by Local No. 304 of the International Brotherhood of Electrical Workers hired on or after July 1, 2010, employees represented by United Steelworkers hired on or after December 15, 2011, and employees who accepted a one-time opportunity to opt out of the Qualified Pension Plan were covered by our Profit Sharing Plan.

Benefits under the Qualified Pension Plan generally become vested and non-forfeitable after completion of five years of continuous employment. Under the plan, a vested participant receives a monthly retirement benefit at normal retirement age, unless an early retirement benefit is elected under the plan, in which case the retirement benefit may be actuarially reduced for early commencement. Generally, participants retiring on or after age 62 through normal retirement age receive 100 percent of their accrued monthly benefit which may be reduced depending on the optional form of payment elected at retirement. Benefits are calculated at retirement date based on a participant's credited service (limited to a maximum of 35 years) and final average earnings. The earnings utilized in the retirement plan benefit formula in the Qualified Pension Plan for employees includes the base salary and STI compensation paid to an employee during the period of the employee's final average earnings, less any amounts deferred under the NQDC Plan. The period of final average earnings means the employee's highest earnings during any 60 consecutive months of the last 120 months of employment. For any NEO who retires with vested benefits under the plan, the compensation shown as "Salary" and "Non-Equity Incentive Plan Compensation" in the Summary Compensation Table for 2018 would be considered eligible compensation in determining benefits, except that the plan benefit formula takes into account only fixed percentages of final average earnings. The amount of eligible compensation that may be considered in calculating retirement benefits is also subject to limitations in the Internal Revenue Code and the limitations contained in certain collective bargaining agreements applicable to the plan.

SERP. We maintain a SERP in order to provide supplemental retirement benefits to certain officers. The SERP provides that officers may be selected for participation in a supplemental retirement benefit or an excess retirement benefit, or both. If a participant is eligible for both the supplemental retirement benefit and the excess retirement benefit, the excess retirement benefit and benefits payable under the Qualified Pension Plan are treated as an offset that reduces the supplemental retirement benefit.

Participants in the SERP were selected by our CEO or, in the case of our CEO, by our Board. Our Board may amend or terminate the SERP at any time, provided that accrued benefits to current participants may not be reduced.

⁽²⁾ Mr. Dinan's actual service is 14 years and ten months. There is no resulting benefit augmentation with respect to the additional two months credited to Mr. Dinan's years

⁽³⁾ Mr. McAnnally is not a participant in the SERP or the Qualified Pension Plan.

⁽⁴⁾ Mr. McCormick's actual service is 15 years and ten months. There is no resulting benefit augmentation with respect to the additional two months credited to Mr. McCormick's years of service. Mr. McCormick is not a participant in the SERI

No new participants have been added to our SERP since 2005, and the SERP was closed to any additional participants as of January 1, 2014.

Supplemental benefits payable to participating employees in the SERP are based upon a specified percentage (reduced for early retirement and commencement of payment of benefits under the SERP) of the highest 36 consecutive months' compensation of the employee's last 60 months of service. The excess retirement benefit under the SERP pays a benefit equal at least to the benefit that would be payable to the participant under the Qualified Pension Plan if limitations imposed by the Internal Revenue Code were not applicable, less the benefit payable under the Qualified Pension Plan with such limitations. Benefits under the SERP are offset by the payment of benefits under the Qualified Pension Plan that were or would have been paid if the Qualified Pension Plan benefits were commenced at the same time as the SERP benefits. We fund benefits payable under the SERP through a rabbi trust arrangement.

NONQUALIFIED DEFERRED COMPENSATION FOR 2018

The following table sets forth certain information regarding the participation by the NEOs in our NQDC Plan.

Nonqualified Deferred Compensation

⁽¹⁾ The "All Other Compensation" column of the Summary Compensation Table at page 53 includes these amounts paid under our NQDC Plan as our excess matching contributions with respect to our 401(k) Plan and excess quarterly and annual company contributions, if applicable, with respect to our Profit Sharing Plan.

- (5) Includes the value of 25,130 ONEOK shares the receipt of which was deferred by Mr. Dinan upon vesting in January 2010, 27,594 ONEOK shares the receipt of which was deferred by Mr. Dinan upon vesting in January 2011, 74,504 ONEOK shares the receipt of which was deferred upon vesting in January 2012, 56,000 ONEOK shares the receipt of which was deferred upon vesting in January 2013, and 48,738 ONE Gas shares issued upon our separation from ONEOK, in the case of 2010, 2011, 2012 and 2013, under the deferral provisions of ONEOK's Equity Compensation Plan, plus the dividend accumulation on these deferrals for a year-end deferred share balance of 215,182, 231,081 and 243,227 for 2015, 2016, and 2017, respectively, in ONEOK shares and 51,221, 52,430 and 53,666 for 2015, 2016 and 2017, respectively, in ONE Gas shares.
- (6) Includes the value of 25,130 ONEOK shares the receipt of which was deferred by Mr. Dinan upon vesting in January 2010, 27,594 ONEOK shares the receipt of which was deferred by Mr. Dinan upon vesting in January 2011, 74,504 ONEOK shares the receipt of which was deferred upon vesting in January 2012, 56,000 ONEOK shares the receipt of which was deferred upon vesting in January 2013, and 48,738 ONE Gas shares issued upon our separation from ONEOK, in the case of 2010, 2011, 2012 and 2013, under the deferral provisions of ONEOK's Equity Compensation Plan, plus the dividend accumulation on these deferrals for a year-end deferred share balance of 231,081, 243,227 and 255,985 for 2016, 2017, and 2018, respectively, in ONEOK shares and 52,430, 53,666 and 54,992 for 2016, 2017 and 2018, respectively, in ONEOK shares.

⁽²⁾ There were no above-market earnings in 2018, 2017, or 2016.

⁽³⁾ Includes amounts previously reported in the Summary Compensation Table in the previous years when earned, if that officer's compensation was required to be disclosed in a previous year. Amounts reported in such years include previously earned, but deferred, salary and annual incentive awards, company matching contributions, and shares that were deferred upon vesting and the dividend equivalents accumulated on these deferrals.

⁽⁴⁾ Includes the value of 25,130 ONEOK shares the receipt of which was deferred by Mr. Dinan upon vesting in January 2010, 27,594 ONEOK shares the receipt of which was deferred by Mr. Dinan upon vesting in January 2011, 74,504 ONEOK shares the receipt of which was deferred upon vesting in January 2012, 56,000 ONEOK shares the receipt of which was deferred upon vesting in January 2013, and 48,738 ONE Gas shares issued upon our separation from ONEOK, in the case of 2010, 2011, 2012 and 2013, under the deferral provisions of ONEOK's Equity Compensation Plan, plus the dividend accumulation on these deferrals for a year-end deferred share balance of 201,805, 215,182 and 231,081 for 2014, 2015, and 2016, respectively, in ONEOK shares and 49,849, 51,221 and 52,430 for 2014, 2015 and 2016, respectively, in ONEOK shares.

We maintain a NQDC Plan to provide select employees with the option to defer portions of their compensation and provide nonqualified deferred compensation benefits that are not otherwise available due to limitations on employer and employee contributions to qualified defined contribution plans under the federal tax laws. We match contributions for the benefit of plan participants to replace any company contributions a participant may lose because of limits imposed under the federal tax laws on contributions by a participant in the 401(k) Plan and our Profit Sharing Plan, as well as participants in the Qualified Pension Plan who do not participate in the SERP.

The NQDC Plan also allows for supplemental credit amounts, which are amounts that can be contributed at the discretion of the Committee. Under the NQDC Plan, participants have the option to defer a portion of their salary and/or STI compensation to a short-term deferral account, which pays out a minimum of five years from the date of election to defer compensation into the short-term deferral account, or to a long-term deferral account, which pays out at retirement or termination of the participant's employment. Participants are immediately 100 percent vested. Short-term and Long-term deferral accounts are credited with the actual investment return based on the amount of gains, losses and earnings for each of the investment options selected by the participant. For the year ended December 31, 2018, the investment return for the investment options for short-term and long-term investment accounts were as follows:

| Plan Level Returns |

At the distribution date, cash is distributed to participants based on the fair market value of the deemed investment of the participant's accounts at that date. We fund benefits payable under the NQDC Plan through a rabbi trust arrangement.

POTENTIAL POST-EMPLOYMENT PAYMENTS AND PAYMENTS UPON A CHANGE IN CONTROL

Described below are the post-employment compensation and benefits that we provide to our NEOs. The objectives of these compensation and benefits are to:

- · assist in recruiting and retaining talented executives in a competitive market;
- provide security for any compensation or benefits that have been earned;
- permit executives to focus on our business;
- eliminate any potential personal bias of an executive against a transaction that is in the best interests of our stakeholders;
- avoid the costs associated with separately negotiating executive severance benefits, and
- · provide us with the flexibility needed to react to a continually changing business environment.

We do not enter into individual employment agreements with our executive officers. Instead, in general, the rights of our executives with respect to specific events are covered by our compensation and benefit plans. Under this approach, post-employment compensation and benefits are established separately from the other compensation elements of our executives.

The use of a "plan approach" instead of individual employment agreements serves two objectives. First, the plan approach provides us with more flexibility to change the terms of severance benefits from time to time if necessary. Second, the plan approach is more transparent, both internally and externally. Internal transparency eliminates the need to negotiate separation benefits on a case-by-case basis and assures an executive that his or her severance benefits are comparable with those of his or her peers.

Payments Made Upon Any Termination. Regardless of the manner in which an NEO's employment terminates, he or she is entitled to receive amounts earned during his or her term of employment. These amounts include:

- accrued but unpaid salary;
- * amounts contributed under our 401(k) Plan, Profit Sharing Plan and NQDC Plan; and
- amounts accrued and vested through our Qualified Pension Plan and SERP.

Payments Made Upon Retirement. In the event of the retirement of an NEO, in addition to the items identified above, such NEO will be entitled to:

- receive a prorated share of each outstanding performance unit granted under our ECP upon completion of the performance period;
- receive a prorated portion of each outstanding RSU granted under our ECP;
- receive a prorated portion of the outstanding STI upon completion of the plan year; and
- participate, along with his or her qualifying dependents, in post-retirement health and life benefits.

Payments Made Upon Death or Disability. In the event of the death or disability of an NEO, in addition to the benefits listed under the headings "Payments Made Upon Any Termination" and "Payments Made Upon Retirement" above, the NEO will receive applicable benefits under our disability plan or payments under our life insurance plan.

Payments Made Upon a Termination Without Cause (Other than Following a CIC). In the event of an involuntary termination without cause (other than a qualifying termination following a CIC), an NEO will receive a prorated portion of each outstanding RSU granted under our ECP upon the date of termination. Outstanding PSUs are forfeited.

Payments Made Upon a Qualifying Termination Within Two Years Following a CIC. We believe that the possibility of a CIC creates uncertainty for executive officers because such transactions frequently result in changes in senior management. Our Board has adopted a CIC severance plan (the "Change in Control Plan") that covers all of our executive officers, including the NEOs. Subject to certain exceptions, the Change in Control Plan will provide our officers with severance benefits if they are terminated by us without cause (as defined below) or if they resign for good reason (as defined below), in each case within two years following a CIC of ONE Gas. All CIC benefits are "double trigger," meaning that payments and benefits under the plan are payable only if the officer's employment is terminated by us without "cause" or by the officer for a "good reason" at any time during the two years following a CIC. Severance payments under the plan consist of a cash payment that may be up to three times the participant's base salary and target STI award, plus reimbursement of COBRA healthcare premiums for 18 months. Our Board, upon the recommendation of the Committee, established a severance multiplier of one, two or three times annual salary plus target annual award for all participants in the Change in Control Plan, including three times for the CEO and two times for each of the other NEOs.

The Change in Control Plan does not provide for additional pension benefits upon a CIC. In addition, the Change in Control Plan does not contain an excise tax gross-up for any participant. Rather, severance payments and benefits under the Change in Control Plan will be reduced if, as a result of such reduction, the officer would receive a greater total payment after taking taxes, including excise taxes, into account.

In the event of a qualifying termination following a CIC, an NEO will receive all outstanding RSUs and PSUs granted under our ECP upon the date of termination.

For the purposes of the Change in Control Plan, a "CIC" generally means any of the following events:

- an acquisition of our voting securities by any person that results in the person having beneficial ownership of 20 percent or more of the combined voting power of our outstanding voting securities, other than an acquisition directly from us;
- the current members of our Board, and any new director approved by a vote of at least two-thirds of our Board, cease for any reason to constitute at least a majority of our Board, other than in connection with an actual or threatened proxy contest (collectively, the "Incumbent Board"):
- the consummation of a merger, consolidation or reorganization with us or in which we issue securities, unless (a) our shareholders immediately before the transaction, as a result of the transaction, directly or indirectly own at least 50 percent of the combined voting power of the voting securities of the company resulting from the transaction, (b) the members of our Incumbent Board, after the execution of the transaction agreement, constitute at least a majority of the members of the Board of the company resulting from the transaction, or (c) no person other than persons who, immediately before the transaction owned 20 percent or more of our outstanding voting securities, has beneficial ownership of 20 percent or more of the outstanding voting securities of the company resulting from the transaction; or
- · our complete liquidation or dissolution or the sale or other disposition of all or substantially all of our assets.

For the purposes of the Change in Control Plan, termination for "cause" means a termination of employment of a participant in the Change in Control Plan by reason of:

- a participant's indictment for or conviction in a court of law of a felony, crime, or offense involving misuse or misappropriation of money or property;
- a participant's violation of any covenant, agreement or obligation not to disclose confidential information regarding the business of the company (or a division or subsidiary) or a participant's violation of any covenant, agreement or obligation not to compete with the company (or a division or subsidiary);
- any act of dishonesty by a participant that adversely affects the business of the company (or a division or subsidiary) or any
 willful or intentional act of a participant that adversely affects the business, or reflects unfavorably on the reputation, of the
 company (or a division or subsidiary);
- · a participant's material violation of any written policy of the company (or a division or subsidiary); or
- a participant's failure or refusal to perform the specific directives of the Board or its officers, which are consistent with the scope and nature of the participant's duties and responsibilities, to be determined in the Board's sole discretion.

For the purposes of the Change in Control Plan, "good reason" means:

- a participant's demotion or material reduction of the participant's significant authority or responsibility with respect to employment with the company as of the date the CIC occurred;
- a material reduction in the participant's base salary as of the date immediately prior to the CIC;
- a material reduction in STI and/or LTI targets from those applicable to the participant immediately prior to the CIC;
- the relocation to a new principal place of employment of the participant's employment by the company, which is more than 35 miles farther from the participant's principal place of employment prior to such change; and
- the failure of a successor company to explicitly assume the Change in Control Plan.
- ONE Gas, Inc. Notice of 2019 Annual Meeting of Shareholders and Proxy Statement

Potential Post-Employment Payments Tables. The following tables reflect estimates of the incremental amount of compensation due each NEO in the event of such executive's termination of employment by reason of death, disability or retirement, termination of employment without cause, or a qualifying termination within two years following a CIC. The amounts shown assume that such termination was effective as of December 31, 2018, and are estimates of the amounts that would be paid to the executives upon such termination, including, with respect to PSUs, the performance factor calculated as if the performance period ended on December 31, 2018. The amounts reflected in the "Qualifying Termination Following a Change in Control" column of the following tables are amounts that would be paid pursuant to our Change in Control Plan and, with respect to the PSUs, assume achievement of a performance factor at the target of 100 percent.

CEO PAY RATIO FOR 2018

In accordance with the requirements of the Dodd-Frank Wall Street Reform and Consumer Protection Act, the SEC adopted Regulation S-K Item 402(u) requiring registrants to disclose (i) the median of the annual total compensation of all employees of the registrant, except the principal executive officer, (ii) the annual total compensation of the principal executive officer of the registrant, and (iii) the ratio of the median of the annual total compensation of all employees of the registrant to the principal executive officer's annual total compensation (the "CEO Pay Ratio").

We used the same median employee as disclosed in our pay ratio disclosure in our 2018 Proxy Statement as there have been no changes in our employee population, employee compensation arrangements or the median employee's position that we reasonably believe would result in a significant change to our pay ratio disclosure. In 2018, we identified the median employee using the total cash compensation for all our employees (whether full-time, part-time, seasonal or temporary) other than the CEO who were employed and received Form W-2 Box 1 earnings as of December 31, 2017. Specifically, we used Form W-2 Box 1 compensation minus any compensation received from the vesting of LTIs (i.e., PSU and RSU vestings) in 2018. We excluded any compensation related to LTIs since PSUs and RSUs are not widely used throughout the company. Less than 5 percent of our employee population receive LTI grants. We did not annualize the compensation for any partial year permanent employees. Since annual short-term incentives are used widely throughout our employee population, we believe total cash compensation which includes short-term incentives is a consistently applied compensation measure that is the most representative measure of compensation for identifying our median employee. No other estimates, assumptions or adjustments were used in identifying our median employee.

After we identified our median employee, we calculated the median employee's annual total compensation in the same manner we calculate the annual total compensation of the NEOs in the Summary Compensation Table which includes base salary plus overtime, if any, short-term incentives, change in pension value and all other compensation. We then calculated the ratio of the CEO's annual total compensation (\$4,222,330) to the median employee's annual total compensation (\$88,565). The ratio between the annual total compensation of our CEO to the median of the annual total compensation of all of our employees is 48:1. This ratio is a reasonable estimate calculated in a manner consistent with Item 402(u) of Regulation S-K. We believe the methodology, assumptions, and estimates described above to be reasonable given our specific employee population. The SEC rules grant companies flexibility in determining the methodology, assumptions and estimates used to comply with the requirements of this disclosure. As acknowledged by the SEC, this flexibility could reduce the comparability of disclosed pay ratios across companies and our pay ratio may not necessarily be representative or comparable to the ratios disclosed by other companies.

ONE Gas, Inc. Notice of 2019 Annual Meeting of Shareholders and Proxy Statement

PROPOSAL 3 – ADVISORY VOTE ON EXECUTIVE COMPENSATION

INTRODUCTION

At our 2015 Annual Meeting of Shareholders, a substantial majority of our shareholders voted for an annual say on pay vote. As a result, we intend to provide our shareholders with an annual, non-binding advisory say on pay vote on executive compensation until the next required non-binding advisory vote on the frequency of future advisory say on pay votes as required by the rules of the SEC.

OUR EXECUTIVE COMPENSATION PROGRAM

As described in the Compensation Discussion and Analysis section of this proxy statement and the compensation tables and narratives discussion set forth above, our executive compensation program is based on our pay-for-performance philosophy and is designed with the following goals in mind:

- to align the interests of our executive officers with the interests of our stakeholders;
- to attract, retain and motivate executives who are critical to the successful implementation of our strategic plan;
- to pay our executives fairly relative to our industry peers based on their responsibilities, experience and performance; and
- to implement sound governance practices by implementing executive compensation best practices and policies.

Our Executive Compensation Committee regularly reviews the compensation program for our NEOs to assess their effectiveness in delivering these goals.

Examples of how the various elements of our compensation program for our NEOs are linked to company performance and are designed to achieve the goals set forth above include:

- a substantial portion of our NEOs' compensation is "variable" or "at-risk" incentive compensation, meaning that it is tied to our performance relative to various short-term and long-term objectives, which are based on a number of financial and business goals;
- · awards to each executive officer are subject to fixed maximums established by our Executive Compensation Committee;
- incentive awards are based on a review of a variety of indicators of performance, thus diversifying the risk associated with any single indicator of performance;
- STI and LTI awards are not tied to formulas that are designed to focus executives on specific short- and intermediate-term outcomes;
- the Executive Compensation Committee approves the final annual incentive plan awards after the review and confirmation of executive and operating and financial performance;
- STI and LTI awards are subject to clawback provisions as described on page 50;
- for executive officers, a significant portion of incentive award value is delivered in the form of our stock-based compensation that vests over multiple years;
- for executive officers, approximately 80 percent of the long-term, stock-based incentive amounts are in the form of PSUs; and
- executive officers are subject to our share-ownership guidelines, described on page 49.

For additional information on the compensation program for our NEOs, including specific information about compensation in fiscal year 2018, please read the "Compensation Discussion and Analysis," along with the subsequent tables and narrative descriptions, beginning on page 40.

For the reasons discussed above, the Board recommends that shareholders vote in favor of the following resolution:

"RESOLVED, that the shareholders hereby approve, on an advisory basis, the compensation paid to the NEOs, as disclosed in the company's proxy statement for the 2019 Annual Meeting of Shareholders pursuant to Item 402 of Regulation S-K, including the Compensation Discussion and Analysis, compensation tables and narrative discussion."

VOTE REQUIRED AND BOARD RECOMMENDATION

This vote is advisory and will not be binding on the company, our Board or our Executive Compensation Committee. Our Board and our Executive Compensation Committee value the opinions of our shareholders and, to the extent there is any significant vote against the NEO compensation as disclosed in this proxy statement, we will consider our shareholders' concerns, and the Executive Compensation Committee will evaluate whether any actions are necessary to address those concerns.

Approval of this proposal requires the affirmative vote of the holders of a majority of the voting power of the shareholders present in person or by proxy and entitled to vote on the proposal at the meeting. Abstentions will have the same effect as votes against this proposal and broker non-votes do not count as present and entitled to vote for purposes of determining the outcome of the vote on this proposal.

THE BOARD UNANIMOUSLY RECOMMENDS A VOTE FOR THE APPROVAL OF THE COMPENSATION OF OUR NEOS, AS DISCLOSED IN THIS PROXY STATEMENT PURSUANT TO ITEM 402 OF REGULATION S-K, INCLUDING THE COMPENSATION DISCUSSION AND ANALYSIS, THE COMPENSATION TABLES AND THE RELATED NARRATIVE DISCUSSION.

ONE Gas, Inc. Notice of 2019 Annual Meeting of Shareholders and Proxy Statement

57

RELATED-PERSON TRANSACTIONS

Our Board recognizes that transactions in which we participate and in which a related person (executive officer, director, director nominee, five percent or greater shareholder and their immediate family members) has a direct or indirect material interest can present potential or actual conflicts of interest and create the appearance that company decisions are based on considerations other than the best interests of the company and its shareholders. Accordingly, as a general matter, it is our preference to avoid related-person transactions. Nevertheless, we recognize that there are situations where related-person transactions may be in, or may be consistent with, the best interests of the company and its shareholders including, but not limited to, situations where we provide products or services to related persons on an arm's length basis and on terms comparable with those provided to unrelated third parties.

In the event we enter into a transaction in which an executive officer (other than an employment relationship), director (other than compensation arrangements for service on our Board provided to each director), director nominee, five percent or greater shareholder, or a member of their immediate family has a direct or indirect material interest, the transaction is presented to our Audit Committee and, if warranted, our Board, for review to determine if the transaction creates a conflict of interest and, if so, is otherwise fair to the company. In determining whether a particular transaction creates a conflict of interest and, if so, that is fair to the company, our Audit Committee and, if warranted, our Board, consider the specific facts and circumstances applicable to each such transaction, including: the parties to the transaction, their relationship to the company and nature of their interest in the transaction; the nature of the transaction; the aggregate value of the transaction; the length of the transaction; whether the transaction occurs in the normal course of our business; the benefits to our company provided by the transaction, including price or other consideration, are the same or substantially the same as those available to the company if the transaction were entered into with an unrelated party.

We require each executive officer and director to annually provide us written disclosure of any transaction in which we participate and in which the officer or director or any of his or her immediate family members has a direct or indirect material interest. Our Corporate Governance Committee reviews our disclosure of related-party transactions in connection with its annual review of director independence. These procedures are not in writing but are documented through the meeting agendas and minutes of our Audit and Corporate Governance Committees.

ABOUT THE 2019 ANNUAL MEETING

The following questions and answers are provided for your convenience and briefly address some commonly asked questions about our 2019 Annual Meeting of Shareholders. Please also consult the more detailed information contained elsewhere in this proxy statement and the documents referred to in this proxy statement.

Why did I receive these proxy materials?

We are providing these proxy materials in connection with the solicitation by the Board of ONE Gas, Inc. of proxies to be voted at our 2019 Annual Meeting of Shareholders and at any adjournment or postponement of the meeting. You are invited to attend our Annual Meeting of Shareholders on May 23, 2019, at 9:00 a.m., Central Daylight Time. The meeting will be held at our company headquarters at ONE Gas, Inc., First Place Tower, 15 E. Fifth Street, 2nd Floor, Tulsa, Oklahoma 74103. For directions to the meeting, please visit our website at www.ONEGas.com.

Who may attend and vote at the annual meeting?

All shareholders who held shares of our common stock at the close of business on March 25, 2019, may attend and vote at the meeting. If your shares are held in the name of a broker, bank, or other holder of record, often referred to as being held "in street name," bring a copy of your brokerage account statement or legal proxy, which you may obtain from your broker, bank, or other holder of record of your shares.

Please note: no cameras, recording equipment, large bags, weapons, briefcases or packages will be permitted in the meeting.

Will the annual meeting be webcast?

Our annual meeting also will be webcast on May 23, 2019. You are invited to visit www.ONEGas.com at 9:00 a.m., Central Daylight Time, on May 23, 2019, to access the webcast of the meeting. Registration for the webcast is required. An archived copy of the webcast will also be available on our website for 30 days following the meeting.

How do I vote?

If you were a shareholder of record at the close of business on the record date of March 25, 2019, you have the right to vote the shares of record you held that day in person at the meeting or you may appoint a proxy through the internet, by telephone or by mail to vote your shares on your behalf. The internet and telephone methods of voting generally are available 24 hours a day and will ensure that your proxy is confirmed and posted immediately. These methods of voting are also available to shareholders who hold their shares in our Direct Stock Purchase and Dividend Reinvestment Plan, our Employee Stock Purchase Plan, our 401(k) Plan and our Profit Sharing Plan. In addition, these voting methods are available to ONEOK employees who own our shares in the ONEOK, Inc. 401(k) Plan (the "ONEOK Plan"). You may revoke your proxy any time before the annual meeting by following the procedures outlined below under the caption "What can I do if I change my mind after I vote my shares by proxy?" Please help us save time and postage costs by appointing a proxy via the internet or by telephone.

When you appoint a proxy via the internet, by telephone or by mailing a signed proxy card, you are appointing John W. Gibson, Chairman of the Board and Joseph L. McCormick, Senior Vice President, General Counsel and Assistant Secretary, as your representatives at the annual meeting, and they will vote your shares as you have instructed them. If you appoint a proxy via the internet, by telephone or by mailing a signed proxy card but do not provide voting instructions, your shares will be voted *for* the election of each proposed nine director nominees named herein, and *for* proposal numbers 2 and 3.

To appoint a proxy to vote your shares on your behalf, please select from the following options:

Via the internet

- Go to the website at www.proxypush.com/ogs, which is available 24 hours a day, 7 days a week, until 11:59 p.m. (Central Daylight Time) on May 22, 2019.
- Enter the control number that appears on your proxy card. This process is designed to verify that you are a shareholder and allows you to vote your shares and confirm that your instructions have been properly recorded.
- Follow the simple instructions
- If you appoint a proxy via the internet, you do not have to return your proxy card.

By telephone

- On a touch-tone telephone, call toll-free **1.866.883.3382** 4 hours a day, 7 days a week, until 11:59 p.m. (Central Daylight Time) on May 22, 2019.
- Enter the control number that appears on your proxy card. This process is designed to verify that you are a shareholder and allows you to vote your shares and confirm that your instructions have been properly recorded.

- · Follow the simple recorded instructions
- If you appoint a proxy by telephone, you do not have to return your proxy card.

By mail

- Mark your selections on the proxy card.
- Date and sign your name exactly as it appears on your proxy card.
- · Mail the proxy card in the enclosed postage-paid envelope.
- If mailed, your completed and signed proxy card must be received prior to the commencement of voting at the annual meeting.

What if my shares are held by my broker, bank or another holder of record?

If your shares are held in a brokerage account, by a bank or another holder of record, your shares are considered to be held "in street name." If you held shares "in street name" as of the record date of March 25, 2019, this proxy statement and our 2018 annual report to shareholders should have been forwarded to you by your bank, broker or other holder of record, together with a voting instruction card. You have the right to direct your bank, broker or other holder of record how to vote your shares by using the voting instruction card you received from your bank, broker or other holder of record, or by following any instructions provided by your bank, broker or other holder of record for voting via the internet or telephone.

Under the rules of the NYSE, unless you provide your bank, broker or other holder of record with your instructions on how to vote your shares, your bank, broker or other holder of record is prohibited from:

- (1) voting your shares in the election of directors; and
- (2) voting on the advisory vote to approve executive compensation.

However, your bank, broker or other holder of record can vote on the ratification of the selection of our independent registered public accounting firm.

Consequently, unless you respond to their request for your voting instructions in a timely manner, your shares held by your bank, broker or other holder of record will not be voted on any of these matters (which is referred to as a "broker non-vote"), except the ratification of the selection of our independent registered public accounting firm. Please provide your voting instructions so that your shares may be voted.

What can I do if I change my mind after I vote my shares by proxy?

If you were a shareholder of record at the close of business on the record date, you have the right to revoke your proxy at any time before it is voted at the meeting by:

- (1) notifying our corporate secretary in writing;
- (2) authorizing a later proxy via the internet or by telephone;
- (3) returning a later-dated proxy card; or
- (4) voting at the meeting in person.

If your shares are held by your bank, broker or other holder of record you may revoke any voting instructions you may have previously provided only in accordance with revocation instructions provided by the bank, broker or other holder of record.

Is my vote confidential?

Proxy cards, ballots and voting tabulations that identify individual shareholders are mailed and returned directly to our stock transfer agent who is responsible for tabulating the vote in a manner that protects your voting privacy. It is our policy to protect the confidentiality of shareholder votes throughout the voting process. The vote of any shareholder will not be disclosed to our directors, officers or employees, except:

- (1) to meet legal requirements;
- (2) to assert or defend claims for or against us; or
- (3) in those limited circumstances where:
 - (a) a proxy solicitation is contested (which, to our knowledge, is not the case in connection with the 2019 annual meeting),
 - (b) a shareholder writes comments on a proxy card, or
 - (c) a shareholder authorizes disclosure.
- 70 ONE Gas, Inc. Notice of 2019 Annual Meeting of Shareholders and Proxy Statement

The vote tabulator and the inspector of election has been, and will remain, independent of us. This policy does not prohibit shareholders from disclosing the nature of their votes to our directors, officers or employees, or prevent us from voluntarily communicating with our shareholders, ascertaining which shareholders have voted or making efforts to encourage shareholders to vote.

How is common stock held in our 401(k) Plan, our Profit Sharing Plan and the ONEOK Plan voted?

If you hold shares of our common stock through our 401(k) Plan, our Profit Sharing Plan or the ONEOK Plan, in order for those shares to be voted as you wish, you must instruct the trustee of these plans, Fidelity Management Trust Company, how to vote those shares by providing your instructions via the internet, by telephone or by mail in the manner outlined above. If you fail to provide your instructions, or if you return an instruction card with an unclear voting designation or with no voting designation at all, then the trustee will vote the shares in your account in proportion to the way the other participants in each respective plan vote their shares. These votes receive the same confidentiality as all other shares voted.

To allow sufficient time for voting by the trustee of our 401(k) Plan, our Profit Sharing Plan and the ONEOK Plan, your voting instructions must be received by May 20, 2019.

How will shares for which a proxy is appointed be voted on any other business conducted at the annual meeting that is not described in this proxy statement?

Although we do not know of any business to be considered at the 2019 annual meeting other than the proposals described in this proxy statement, if any other business is properly presented at the annual meeting, your proxy gives authority to John W. Gibson, Chairman of the Board, and Joseph L. McCormick, our Senior Vice President, General Counsel and Assistant Secretary, to vote on these matters at their discretion.

What shares are included on the proxy card(s)?

The shares included on your proxy card(s) represent all of the shares that you owned of record as of the close of business on March 25, 2019, including those shares held in our Direct Stock Purchase and Dividend Reinvestment Plan, our Employee Stock Purchase Plan, our 401(k) Plan, our Profit Sharing Plan and the ONEOK Plan. If you do not authorize a proxy via the internet, by telephone or by mail, your shares, except for those shares held in our 401(k) Plan, our Profit Sharing Plan and the ONEOK Plan, will not be voted. Please refer to the discussion above for an explanation of the voting procedures for your shares held by our 401(k) Plan, our Profit Sharing Plan and the ONEOK Plan.

What does it mean if I receive more than one proxy card?

If your shares are registered differently or are in more than one account, you will receive more than one proxy card. Please sign and return all proxy cards, or appoint a proxy via the internet or telephone, to ensure that all your shares are voted. We encourage you to have all accounts registered in the same name and address whenever possible.

Why did we receive just one copy of the proxy statement and annual report when we have more than one stock account in our household?

We have adopted a procedure approved by the SEC called "householding." This procedure permits us to send a single copy of the proxy statement and annual report to a household if the shareholders provide written or implied consent. We previously mailed a notice to eligible registered shareholders stating our intent to utilize this rule unless the shareholder provided an objection. Shareholders continue to receive a separate proxy card for each stock account. Shareholders of record voting by mail can choose this option by marking the appropriate box on the proxy card included with this proxy statement. Shareholders of record voting via telephone or over the internet can choose this option by following instructions provided by telephone or over the internet, as applicable. If you are a registered shareholder and received only one copy of the proxy statement and annual report in your household, we will promptly deliver copies, to the extent you request them, for each member of your household who was a registered shareholder as of the record date. You may make this request by providing written instructions to EQ Shareowner Services, Attn: Householding/ONE Gas, Inc., P.O. Box 64854, St. Paul, Minnesota 55164-0854. You may contact EQ Shareowner Services at 1-800-468-9716. For assistance. You also may contact EQ Shareowner Services in the same manner if you are currently receiving a single copy of the proxy statement and annual report in your household and desire to receive separate copies in the future for each member of your household who is a registered shareholder or if your household is currently receiving multiple copies of the proxy statement and annual report and you desire to receive a single copy in the future for your entire household. If you are not a registered shareholder and your shares are held by a broker, bank or other holder of record, you will need to contact that entity to revoke your election and receive multiple copies of these documents.

Is there a list of shareholders entitled to vote at the annual meeting?

The names of shareholders of record entitled to vote at the annual meeting will be available at the annual meeting and for 10 days prior to the meeting for any purpose relevant to the meeting between the hours of 9:00 a.m. and 4:30 p.m. CDT at our principal executive offices at 15 East Fifth Street, Tulsa, Oklahoma, and may be viewed by contacting our corporate secretary.

May I access the notice of annual meeting, proxy statement, 2018 annual report and accompanying documents on the internet?

The notice of annual meeting, proxy statement, 2018 annual report and accompanying documents are currently available on our website at www.onegas.com. Additionally, in accordance with rules of the SEC, you may access this proxy statement, our 2018 annual report and any other proxy materials we use at https://shareholder.onegas.com, which does not infringe on the anonymity of a person accessing such website. The website does not employ "cookies" or other user-tracking features.

Instead of receiving future copies of our proxy and annual report materials by mail, shareholders may elect to receive an email that will provide electronic links to these proxy and annual report materials. Opting to receive your proxy materials online will save us the cost of producing and mailing documents to your home or business and will also give you an electronic link to the proxy voting site. You may log on to www.proxypush.com/ogs and follow the prompts to enroll in the electronic proxy delivery service. If you hold your shares in a brokerage account, you may also have the opportunity to receive copies of these documents electronically. Please check the information provided in the proxy materials mailed to you by your broker, bank, or other holder of record of your shares regarding the availability of this service.

What out-of-pocket costs will we incur in soliciting proxies?

Morrow Sodali LLC, 470 West Avenue, Stamford, Connecticut 06902, will assist us in the distribution of proxy materials and solicitation of votes for a fee of \$10,000, plus out-of-pocket expenses. We also reimburse brokerage firms, banks and other custodians, nominees and fiduciaries for their reasonable expenses for forwarding proxy materials to our shareholders. We will pay all costs of soliciting proxies.

Who is soliciting my proxy?

Our Board is sending you this proxy statement in connection with its solicitation of proxies for use at our 2019 Annual Meeting of Shareholders. Certain of our directors, officers and employees also may solicit proxies on our behalf in person or by mail, telephone, fax or email.

Who will count the vote?

Representatives of our stock transfer agent, EQ Shareholder Services, a division of Equiniti Trust Company, will tabulate the votes and act as the inspector of the election.

How can I find out the results of the voting at the annual meeting?

Preliminary voting results will be announced at the annual meeting. Voting results will be published in a Current Report on Form 8-K that we will file with the SEC within four business days after the annual meeting.

SHAREHOLDER PROPOSALS

The rules of the SEC provide when a company must include a shareholder's proposal in its proxy statement and identify the proposal in its form of proxy when the company holds an annual or special meeting of shareholders. Under these rules, proposals that shareholders would like to submit for inclusion in our proxy statement for our 2020 Annual Meeting of Shareholders should be received by our corporate secretary at our principal executive offices no later than December 5, 2019. Only those shareholder proposals eligible for inclusion under the rules of the SEC will be included in our proxy statement.

If a shareholder desires to present a proposal, other than the nomination of directors at our 2020 annual meeting, outside the process provided by the rules of the SEC, the shareholder must follow the procedures set forth in our bylaws. Our bylaws generally provide that a shareholder may present a proposal at an annual meeting if (1) the shareholder is a shareholder of record at the time the shareholder gives written notice of the proposal and is entitled to vote at the meeting and (2) the shareholder gives timely written notice of the proposal, including any information regarding the proposal required under our bylaws, to our corporate secretary. To be timely for our 2020 annual meeting, a shareholder's notice must be delivered to, or mailed to and received at, our principal executive offices no later than December 5, 2019.

HOUSEHOLDING

Shareholders with multiple accounts that share the same last name and household mailing address will receive a single copy of shareholder documents (annual report, proxy statement, or other informational statement) unless we are instructed otherwise. Each shareholder, however, will continue to receive a separate proxy card. This practice, known as "householding," is designed to reduce our printing and postage costs.

If you are a registered shareholder and received only one copy of the proxy statement and annual report in your household, we will promptly deliver additional copies, to the extent you request copies, for each member of your household who was a registered shareholder as of the record date by providing written instructions to EQ Shareowner Services, Attn: Householding/ONE Gas, Inc., P.O. Box 64854, St. Paul, Minnesota 55164-0854. You may contact EQ Shareowner Services at 1-800-468-9716 for assistance. You also may contact us in the same manner if you are currently receiving a single copy of the proxy statement and annual report in your household and desire to receive separate copies in the future for each member of your household who is a registered shareholder, or if your household is currently receiving multiple copies of the proxy statement and annual report and you desire to receive a single copy in the future for your entire household. If you are not a registered shareholder and your shares are held by a broker, bank or other holder of record, you will need to contact that entity to revoke your election and receive multiple copies of these documents.

ONE Gas, Inc. Notice of 2019 Annual Meeting of Shareholders and Proxy Statement

73

ANNUAL REPORT ON FORM 10-K

Our 2018 annual report to shareholders (which includes our Annual Report on Form 10-K for the year ended December 31, 2018) is available on our website at www.ONEGas.com. Additionally, and in accordance with the rules of the SEC, you may access our 2018 annual report at http://shareholder.onegas.com, which does not infringe on the anonymity of a person accessing such website. The website does not employ "cookies" or other user-tracking features. We will provide, without charge, on the written request of any person solicited hereby, a copy of our Annual Report on Form 10-K as filed with the SEC for the year ended December 31, 2018. Written requests should be mailed to Brian K. Shore, Corporate Secretary, ONE Gas, Inc., 15 E. Fifth Street, Tulsa, Oklahoma 74103.

OTHER MATTERS

Lian K. Store

So far as is now known to us, there is no business other than that described above in this proxy statement to be presented to the shareholders for action at the annual meeting. Should other business come before the annual meeting, votes may be cast pursuant to proxies in respect to any such business in the best judgment of the persons acting under the proxies.

Please return your proxy as soon as possible. Unless a quorum consisting of a majority of the outstanding shares entitled to vote is represented at the annual meeting, no business can be transacted. Therefore, please authorize a proxy electronically via the internet, by telephone, or by mail. Please act promptly to ensure that you will be represented at this important meeting.

By order of the Board.

Brian K. Shore Corporate Secretary

Tulsa, Oklahoma April 3, 2019

ANNUAL MEETING OF SHAREHOLDERS

Thursday, May 23, 2019 9:00 a.m. Central Time

15 East Fifth Street Tulsa, Oklahoma 74103

proxy

ANNUAL MEETING OF SHAREHOLDERS MAY 23, 2019

THIS PROXY IS SOLICITED ON BEHALF OF THE BOARD OF DIRECTORS

The undersigned hereby appoints John W. Gibson and Joseph L. McCormick, or either of them, with the power of substitution in each, proxies to vote all shares of stock of the undersigned in ONE Gas, Inc. at the Annual Meeting of Shareholders to be held May 23, 2019, and at any and all adjournments or postponements thereof, upon the matter of the election of directors, the proposals referred to in Items 2 and 3 of this Proxy, and any other business that may properly come before the meeting.

Shares will be voted as specified. IF YOU SIGN BUT DO NOT GIVE SPECIFIC INSTRUCTIONS, YOUR SHARES WILL BE VOTED FOR THE ELECTION OF DIRECTORS AS PROPOSED AND FOR PROPOSALS 2 AND 3.

This card also constitutes voting instructions by the undersigned participant to the trustee of the ONE Gas, Inc. 401(k) Plan, the ONE Gas, Inc. Profit Sharing Plan, and the ONEOK, Inc. 401(k) Plan for all shares votable by the undersigned participant and held of record by such trustee, if any. The trustee will vote these shares as directed provided your voting instruction is received by 11:59 p.m. Central Daylight Time on May 20, 2019. If there are any shares for which instructions are not timely received, the trustee will cause all such shares to be voted in the same manner and proportion as the shares of the plan for which timely instructions have been received, unless to do so would be contrary to ERISA. All voting instructions for shares held of record by the plans shall be confidential.

THE BOARD OF DIRECTORS RECOMMENDS A VOTE FOR THE ELECTION OF DIRECTORS AS PROPOSED AND FOR PROPOSALS 2 AND 3.

If you vote by the Internet or Telephone, DO NOT return your proxy card.

Please complete, sign and date the proxy card and return it in the postage-paid envelope.

Vote by Internet, Telephone or Mail 24 Hours a Day, 7 Days a Week

Your phone or Internet vote authorizes the named proxies to vote your shares in the same manner as if you marked, signed and returned your proxy card.

INTERNET/MOBILE www.proxypush.com/ogs

Use the Internet to vote your proxy until 11:59 p.m. (CT) on May 22, 2019.

PHONE 1-866-883-3382

Use a touch-tone telephone to vote your proxy until 11:59 p.m. (CT) on May 22, 2019.

MAIL

Mark, sign and date your proxy card and return it in the postage-paid envelope provided.

If you vote your proxy by Internet or by Telephone, you do NOT need to mail back your Proxy Card.

Exhibits JDB-2 through JDB-10 are Confidential and will be provided pursuant to the terms of the Protective Agreement.

| 1 | | DIRECT TESTIMONY OF CYNDI KING |
|----|----|---|
| 2 | | I. <u>INTRODUCTION AND QUALIFICATIONS</u> |
| 3 | Q. | PLEASE STATE YOUR NAME AND BUSINESS ADDRESS. |
| 4 | A. | My name is Cyndi King. My business address is 15 East Fifth Street in Tulsa, |
| 5 | | Oklahoma. |
| 6 | Q. | BY WHOM AND IN WHAT CAPACITY ARE YOU EMPLOYED? |
| 7 | A. | I am the Director of Treasury and Finance for ONE Gas, Inc. ("ONE Gas"). Texas |
| 8 | | Gas Service Company ("TGS" or the "Company") is a Division of ONE Gas. |
| 9 | Q. | PLEASE DESCRIBE YOUR EDUCATIONAL BACKGROUND AND |
| 10 | | PROFESSIONAL EXPERIENCE. |
| 11 | A. | I have a Bachelor of Science degree in Business Administration majoring in |
| 12 | | Accounting from Oklahoma State University. I have worked for ONE Gas or its |
| 13 | | predecessor ONEOK, Inc., for 19 years in areas that include Gas Accounting and |
| 14 | | Treasury. I have been a Certified Treasury Professional since 2014, and I have |
| 15 | | served on the ONE Gas Benefits Committee, which reviews all pension activity, |
| 16 | | since 2014. |
| 17 | Q. | HAVE YOU PREVIOUSLY TESTIFIED BEFORE ANY REGULATORY |
| 18 | | COMMISSIONS? |
| 19 | A. | Yes. I provided testimony in the Company's statement of intent filed in June 2017 |
| 20 | | with the cities in the Rio Grande Valley Service Area and in Gas Utilities Docket |
| 21 | | ("GUD") Nos. 10739 and 10766 before the Railroad Commission of Texas |
| 22 | | ("Commission"). |

| 1 | Q. | WAS THIS TESTIMONY PREPARED BY YOU OR UNDER YOUR |
|----|----|---|
| 2 | | DIRECTION? |
| 3 | A. | Yes, it was. |
| 4 | Q. | WHAT IS THE PURPOSE OF YOUR TESTIMONY? |
| 5 | A. | The purpose of my testimony is to support the Company's request to earn a return |
| 6 | | on the portion of the contributions to the ONE Gas prepaid pension asset that are |
| 7 | | attributable to TGS and are part of the rates the Company is seeking approval of in |
| 8 | | this statement of intent. |
| 9 | | II. PENSION FUNDING BACKGROUND |
| 10 | Q. | WHAT FINANCIAL ACCOUNTING STANDARD IS APPLICABLE TO |
| 11 | | PENSION PLAN EXPENSE? |
| 12 | A. | The expense associated with a pension plan is determined in accordance with |
| 13 | | Financial Accounting Standards Board ("FASB") Financial Accounting Standard |
| 14 | | 87 that is now codified as FASB Accounting Standards Codification Topic 715 |
| 15 | | ("ASC Topic 715"), Compensation - Retirement Benefits. 1 |
| 16 | Q. | ARE ANY OTHER REGULATIONS OR STANDARDS APPLICABLE TO |
| 17 | | PENSION PLAN EXPENSE? |
| 18 | A. | Yes. Pension funding is regulated by the Employee Retirement Income Security |
| 19 | | Act ("ERISA") and the Pension Protection Act ("PPA"). ² ERISA sets minimum |
| 20 | | standards for defined-benefit pension plans, including ONE Gas'. The PPA, which |
| 21 | | was enacted after ERISA, contains the rules used to determine the minimum |

² The Pension Protection Act is available at https://www.pbgc.gov/prac/laws-and-regulations/pension-protection-act-of-2006.

1 required cash contribution and the maximum deductible cash contribution for each 2 year. 3 HOW WERE PENSION PLANS TYPICALLY FUNDED UNDER ERISA? Q. 4 For pension plan years earlier than 2008, minimum pension funding requirements A. 5 were specified in ERISA. In general, any projected unfunded liability was designed 6 to be eliminated over a period of 10-15 years, meaning a typical plan would be fully 7 funded after 10-15 years (this assumes no change in relevant variables such as 8 interest rates, investment return, or participant demographics). 9 Q. DID THE PPA CHANGE FUNDING REQUIREMENTS? IF SO, HOW? 10 Yes, it did. The PPA, which became effective with the 2008 plan year, established A. 11 new minimum funding requirements for nearly all pension plans. The PPA requires 12 a pension plan sponsor to annually contribute an amount equal to: (1) the benefits 13 estimated to be earned for the current plan year; plus (2) an amount sufficient to reduce any underfunding over a seven-year period. Since the PPA decreased the 14 15 period for amortizing the unfunded liability, it significantly accelerated the required 16 contributions to satisfy the new funding requirements. 17 Q. HOW HAS PENSION EXPENSE TYPICALLY BEEN DETERMINED FOR 18 **RATEMAKING PURPOSES?** 19 A. For ratemaking purposes, the accrual methodology set forth in ASC Topic 715 is 20 used to calculate pension expense. This is the same methodology required for

financial reporting purposes under Generally Accepted Accounting Principles

("GAAP"). ASC Topic 715 requires companies to accrue pension costs over the

working life of each qualified employee. An annual calculation is required to

determine the amount of pension expense that must be recognized for financial

21

22

23

24

| 1 | | reporting purposes. The calculation considers the accumulated amount that should |
|----|----|---|
| 2 | | have been accrued at the present time for each participant, and requires a number |
| 3 | | of assumptions to be made, including the age at which active employees are likely |
| 4 | | to retire, the expected future return on pension plan assets, expected future payroll |
| 5 | | levels, and an appropriate discount rate. In addition, certain gains and losses are |
| 6 | | amortized over a multi-year period. This amortization helps to mitigate significant |
| 7 | | fluctuations that can occur from year-to-year in pension plan investment earnings. |
| 8 | | Thus, the calculation of pension expense is a snapshot at a point in time. It is |
| 9 | | impacted by what has happened in the past as well as what is expected to happen |
| 10 | | in the future. In addition, there is a gradual true-up of past estimates with actual |
| 11 | | results over time. |
| 12 | Q. | ARE THE ONE GAS AND TGS PENSIONS STILL OPEN TO NEW |
| 13 | | PARTICIPANTS? |
| 14 | A. | No. The ONE Gas pension plan has been closed to new entrants since 2005 and |
| 15 | | the TGS pension plan was closed when TGS was acquired. The two plans were |
| 16 | | merged into one plan in 2016. |
| 17 | | III. PRIOR COMMISSION DECISIONS SUPPORT TGS'S REQUEST |
| 18 | Q. | HAS THE INCLUSION OF THE COMPANY'S PREPAID PENSION |
| 19 | | ASSET IN RATE BASE BEEN PREVIOUSLY REVIEWED AND |
| 20 | | APPROVED? |
| 21 | A. | Yes, the Commission approved the rate base treatment of TGS's portion of the ONE |
| 22 | | Gas prepaid pension asset in the Company's West Texas Service Area case in GUD |
| 23 | | No. 10506. The Commission determined that the inclusion of the prepaid pension |
| 24 | | asset in rate base is just and reasonable. The Commission explained that the asset |

- 1 benefits ratepayers by reducing expenses more than the rate of return on the asset. 2 The Commission also found that it avoids future additional costs and restrictions being placed on the pension plan.³ In sum, the prepaid pension asset avoids future 3 additional pension expense, increased variable rate PGBC premiums and 4 5 restrictions placed on the pension plan. The Company also proposed the same 6 treatment of the prepaid pension asset in GUD Nos. 10488, 10526, 10656, 10739 7 and 10766 all of which were resolved through settlement agreements that were approved by the Commission.⁴ 8
- 9 Q. SINCE THE COMMISSION'S DECISIONS IN PRIOR TGS RATE CASES,
 10 HAS ONE GAS OR TGS CHANGED THE WAY IT APPROACHES THE
 11 FUNDING REQUIREMENTS FOR THE PREPAID PENSION ASSET OR
 12 THE RELATED RATE CALCULATIONS INCLUDED IN THIS
 13 STATEMENT OF INTENT?
- 14 A. No. As I explain below, ONE Gas and TGS are taking the same approach to these issues as they did in GUD No. 10506 and other prior cases identified above.

3 (

³ Statement of Intent of Texas Gas Service Company, a Division of ONE Gas, Inc., to Increase Gas Utility Rates Within the Unincorporated Areas of the El Paso Service Area (EPSA), Permian Service Area (PSA) and Dell City Service Area (DCSA), GUD No. 10506, Final Order at FoF 61 (Sep. 27, 2016).

⁴ With respect to the Commission's Final Orders in GUD Nos. 10488, 10526, 10656, 10739, and 10766, the parties agreed on "black box" settlement amounts in each of those cases. However, the rate base amount agreed to in each settlement includes the Company's proposed pension plan asset. Statement of Intent of Texas Gas Service Company, a Division of ONE Gas, Inc., to Increase Gas Utility Rates Within the Unincorporated Areas of the Galveston Service Area (GSA) and South Jefferson County Service Area (SJCSA), GUD No. 10488, Final Order (May 3, 2016); Statement of Intent of Texas Gas Service Company (TGS), a Division of ONE Gas, Inc., to Change Gas Utility Rates Within the Unincorporated Areas of the Central Texas Service Area (CTSA) and South Texas Service Area (STSA), GUD No. 10526, Final Order (Nov. 15, 2016); and Statement of Intent of Texas Gas Service Company, a Division of ONE Gas, Inc., to Increase Gas Utility Rates Within the Unincorporated Areas of the Rio Grande Valley Service Area, GUD No. 10656, Final Order at FoF 30 (March 20, 2018).

IV. ONE GAS' APPROACH TO FUNDING ITS PENSION OBLIGATIONS

| $\mathbf{\Lambda}$ | TIOTI TO A | DDDDAID | DENICIONI | ACCIDIO | ODE A DEDO |
|--------------------|------------|---------|-----------|---------|-----------------|
| O. | HOW IS A | PKEPAID | PENSION | ASSET | CREATED? |

A.

A.

The difference between total cumulative contributions made to the pension trust and the cumulative ASC Topic 715 expense recognized at a point in time equals either a prepaid pension asset (historically, because contributions have exceeded ASC Topic 715 expense) or an accrued pension liability (historically, because ASC Topic 715 expense recognized has exceeded contributions).

While a plan may not be fully funded, it is still possible for a company to fund an amount more than what it has expensed. In ONE Gas' case, it has funded more than it has expensed. If at any point in time a prepaid pension asset exists, then it means that cumulative cash contributions to the plan exceed cumulative ASC Topic 715 pension expense.

Additionally, IRS minimum required contributions, as spelled out by the PPA, and ASC Topic 715 expense are not the same and are not designed to be the same. ASC Topic 715 expense is leveled out over the life of the benefit. However, IRS required minimum payments (i.e., contributions) are leveled over a seven-year period. This difference is what leads to the prepaid pension asset on which TGS is seeking to earn a return, consistent with the Commission's prior decisions in prior TGS cases.

20 Q. HOW DOES ONE GAS DETERMINE HOW MUCH IS REQUIRED TO BE 21 CONTRIBUTED TO ITS PENSION PLAN EACH YEAR?

ONE Gas relies on third-party actuaries to calculate the level of funding required under the PPA. As required by the PPA, ONE Gas contributes an annual amount at least equal to: (1) the benefits expected to be earned by plan participants in the

coming year; plus (2) one-seventh of the underfunded balance. Once the plan 2 becomes fully funded, the required contribution becomes simply the benefits 3 expected to be earned in the coming year. In some previous years, ONE Gas has found advantages to fund more than this amount which include lower pension expense, lower variable-rate Pension Benefit Guarantee Committee ("PBGC") 6 premiums and income tax reductions.

7 DOES ONE GAS HAVE A TARGETED FUNDING PERCENTAGE? 0.

1

4

5

12

13

14

15

16

17

18

19

20

21

22

8 A. Yes, ONE Gas does have a targeted funding percentage. At a minimum, ONE Gas 9 targets the plan funding to ensure plan assets equal approximately 80% of the plan's 10 liability on a GAAP basis (in accordance with ASC Topic 715) and at least 80% on 11 a IRS funding basis (as calculated under the PPA).

Q. WHAT IS THE RATIONALE BEHIND THIS PERCENTAGE?

A. A target of 80% is prudent because failure to fund at least 80% of the plan's liability on an IRS funding basis may result in benefit limitations, prohibition of lump sum payment to retirees, cessation of benefit accruals and restrictions on plan amendments. Specifically, under the PPA, a plan may become subject to various benefit limitations if its Adjusted Funding Target Attainment Percentage Certain financial and actuarial ("AFTAP") falls below certain thresholds. information (i.e., a "4010 filing") must be provided to the PBGC if the Funding Target Attainment Percentage ("FTAP") is less than 80% on a IRS funding basis. At-risk status for determining minimum required contributions is defined in the PPA.

1 Q. WHEN IS A PPA PLAN CONSIDERED TO BE AT RISK?

- 2 A. A plan is in at-risk status for the plan year under review if the plan's FTAP for the
- 3 preceding plan year was less than 80% of liabilities on an IRS funding basis and
- 4 the plan's FTAP measured using certain "at-risk assumptions" is less than 70% of
- 5 liabilities on a IRS funding basis.

6 Q. WHAT HAPPENS WHEN A PLAN'S STATUS DROPS TO AT-RISK?

- 7 A. The overall cost of the plan increases. When a plan's status drops to at-risk, the
- 8 plan is subject to higher minimum contribution requirements based on mandated
- 9 actuarial assumption changes. Specifically, participants eligible to retire within the
- next 11 years must be assumed to retire immediately when first eligible and all
- participants must be assumed to elect the most valuable form of payment available
- when they begin receiving benefits. The net effect of the assumptions and expense
- adjustments is to increase contribution and PBGC variable-rate premiums.

14 Q. WHAT AMOUNTS THAT ARE ATTRIBUTABLE TO TGS WERE

15 **CONTRIBUTED TO THE PENSION PLAN?**

- 16 A. ONE Gas' pension plan assets, liabilities, contributions and payments are tracked
- in four distinct categories: (1) TGS, (2) Oklahoma Natural Gas, (3) Kansas Gas
- Service, and (4) Corporate. Contributions made to the Corporate category are
- allocated to the three divisions. Amounts contributed to the pension plan for which
- TGS is responsible are listed below as included in Exhibit CLK-1.

Contributions attributable to TGS pension plan

| | TGS Portion of | | |
|------|----------------|--------------|--------------|
| | Corporate | Direct TGS | |
| | Contribution | Contribution | TGS Total |
| 2009 | \$14,731,220 | \$8,097,644 | \$22,828,864 |
| 2010 | \$17,698,110 | \$3,781,762 | \$21,479,872 |
| 2011 | \$12,154,900 | \$2,855,836 | \$15,010,736 |
| 2012 | \$18,548,704 | \$4,719,691 | \$23,268,395 |
| 2013 | \$0 | \$0 | \$0 |
| 2014 | \$0 | \$0 | \$0 |
| 2015 | \$0 | \$0 | \$0 |
| 2016 | \$0 | \$0 | \$0 |
| 2017 | \$6,171,808 | \$21,395,091 | \$27,566,899 |
| 2018 | \$8,083,440 | \$8,700,000 | \$16,783,440 |
| 2019 | \$0 | \$0 | \$0 |

1 Q. WHAT ACTIONS ARE TAKEN TO ENSURE THAT THE PENSION IS

NOT OVERFUNDED WHILE ALSO ATTEMPTING TO REDUCE

3 FUTURE VOLATILITY?

2

4

5

6

7

8

9

10

11

A.

ONE Gas has undertaken a Liability Driven Investment Strategy ("LDIS") with a glide path to obtain a less volatile investment objective. The glide path simply moves more of the assets into fixed income with maturities that match plan liabilities as the plan becomes better funded, thus reducing risk to the plan. This will result in the plan assets moving in tandem with the liability as interest rates rise and fall, creating less volatility and less fluctuation in the annual expense. The value of a LDIS is the assurance that assets are not over-exposed to equity markets that could require ONE Gas and/or customers to make large future fundings.

| 1 2 | | V. RETURN ON THE FUNDS ONE GAS HAS COMMITTED TO ITS PENSION OBLIGATIONS |
|-----|----|--|
| 3 | Q. | WHY DO YOU BELIEVE TGS SHOULD RECEIVE A RETURN ON ITS |
| 4 | | PORTION OF THE PREPAID PENSION ASSET? |
| 5 | A. | I believe a return is warranted because it: (1) is consistent with the Commission's |
| 6 | | treatment in GUD No. 10506, which I addressed previously; (2) is consistent with |
| 7 | | traditional rate-making principles; (3) encourages ONE Gas to ensure adequate |
| 8 | | funding of its pension obligations, which is a prudent practice; and (4) encourages |
| 9 | | ONE Gas to continue to minimize future expenses for customers. |
| 10 | Q. | HOW IS ALLOWING TGS A RETURN ON THE PREPAID PENSION |
| 11 | | ASSET CONSISTENT WITH TRADITIONAL RATEMAKING |
| 12 | | PRINCIPLES? |
| 13 | A. | To receive full recovery of an investment, (a cash outlay that is expensed over a |
| 14 | | number of years), TGS must recover both the expense and the cost of capital |
| 15 | | associated with the investment which, in this case, is the prepaid pension asset. |
| 16 | | Changes in federal funding requirements (through the PPA), coupled with |
| 17 | | financial market downturns, which have an inverse relationship to plan liabilities, |
| 18 | | have significantly increased the amount of required contributions to the ONE Gas |
| 19 | | pension plan and have accelerated the timing of such required payments. The |
| 20 | | investment ONE Gas is required to make in the safety of its pension obligations is |
| 21 | | no different than the investment it must make in the safety of its physical assets and |
| 22 | | the return on that investment should be no different. |

1 Q. HOW WAS THE PREPAID PENSION ASSET FUNDED?

A. The prepaid pension asset is the amount of cash ONE Gas has contributed to the plan that is more than expense; therefore, the cost of the asset has not been collected from customers and has been funded solely by ONE Gas through cash on hand, which was replaced with long-term debt and equity.

6 Q. IS IT REASONABLE TO FUND PENSION OBLIGATIONS IN A MANNER

THAT MAY CREATE A PREPAID PENSION ASSET?

7

8

9

10

11

12

13

14

15

16

17

18

19

20

21

22

A.

Yes, it is. Funding the pension obligations in a manner that creates a prepaid pension asset is reasonable because it avoids the negative (and costly) consequences of underfunding the plan and putting the plan into an at-risk status, either intentionally or inadvertently, through failure to build sufficient cushion into actuarially determined estimates. Absent the prepaid pension asset, the plan would be further underfunded increasing future pension expense and related costs such as the variable-rate PBGC premium which for plan year 2019 is calculated as a 4.3% of unfunded vested benefits. Funding in this manner increases the likelihood that funds will be available to pay the promised benefits, while earning returns on the asset that reduce pension expense. Each additional dollar of contribution reduces pension expense by an amount equal to the expected return on the additional contribution. If the proposed Central-Gulf Service Area ("CGSA") prepaid asset of \$23.3 million did not exist, pension expense for the following year would increase by \$1.7 million using the expected pension earnings rate of 7.2% (\$23.3) million times 7.2%).

1 Q. HOW HAVE OTHER JURISDICTIONS TREATED PREPAID PENSION

2 ASSETS?

3 A. Utilities in several states have been allowed to earn a return on the prepaid pension 4 assets, including the District of Columbia, Michigan, New York, Ohio, Oklahoma, 5 In an Oregon Public Utility Commission Pension Survey, 16 and Texas. 6 commissions reported that they recognize a "Prepaid Pension Asset/Liability" 7 through allowing "a return on amount invested in asset." An additional three 8 commissions reported that they include cash contributions in "Working Capital," 9 and six other commissions used a "Combination of Methods." Of those using 10 multiple methods, several commissions mentioned including pension costs in rate 11 base, or otherwise allowing the utility to earn a return on the asset.

Q. WHAT ARE THE TGS AND PROPOSED CGSA PORTIONS OF THE PREPAID PENSION ASSET AS OF THE END OF THE TEST YEAR?

A. TGS has a total prepaid asset as of June 30, 2019, of \$34.9 million and an allocated portion of the corporate prepaid asset of \$15.3 million. TGS's portion of the total asset is \$50.2 million, and the proposed CGSA portion is \$23,340,745. These amounts are shown on Exhibit CLK-2

⁵ Oregon Public Utility Commission Pension Survey, Pension Treatment in Rate Making Survey, Summary Report, (Mar. 28, 2013) included in my workpapers.

.

- 1 Q. WHAT IS THE REVENUE REQUIREMENT IMPACT OF INCLUDING
- THE PREPAID PENSION ASSET IN RATE BASE, AND WHAT IS THE
- 3 IMPACT THIS FUNDING HAS ON CURRENT EXPENSE?
- 4 A. The revenue requirement impact of including the prepaid pension asset in rate base
- 5 is approximately \$1.8 million calculated as follows and as shown in Exhibit CLK-
- 6 3:

| T. | • . |
|----------|-------------|
| RAVANIIA | raguiramant |
| Kevenue | requirement |
| | |

| | Texas Gas Service | Proposed CGSA |
|-------------------------------|--------------------------|----------------------|
| Prepaid Pension Asset | \$ 50,202,599 | \$ 23,340,745 |
| Less Deferred Taxes | (10,542,546) | (4,901,556) |
| Rate Base | \$ 39,660,053 | \$ 18,439,188 |
| Pre-Tax Rate of Return | 9.57% | 9.578% |
| Impact to Revenue Requirement | \$ 3,798,640 | \$ 1,766,105 |

- While including the prepaid pension asset in rate base increases the revenue
- 8 requirement by \$1.8 million as discussed below, it also has the impact of reducing
- 9 current year expense by \$3.6 million for TGS and \$1.7 million for the proposed
- 10 CGSA. These calculations are also shown in Exhibit CLK-3.

11 Q. HOW HAS THE FUNDING STRATEGY USED BY ONE GAS PROVIDED

12 A BENEFIT TO TGS'S CUSTOMERS?

- 13 A. Pension expense is lower due to the funding strategy ONE Gas uses. Test year
- expense is \$5.6 million for TGS and \$2,584,326 for the proposed CGSA. However,
- if the prepaid pension asset did not exist, TGS's plan assets would be \$50.2 million
- less, and ASC Topic 715 pension expense would be \$3.6 million higher for TGS
- and \$1.7 million higher for the proposed CGSA. Therefore, the 2019 ASC Topic

| 1 | | 715 pension expense for TGS and the proposed CGSA is \$3.6 million and \$1.7 |
|----|----|---|
| 2 | | million less, respectively, because of ONE Gas' funding strategy. The savings of |
| 3 | | \$3.6 million in pension expense are calculated by taking the PPA asset multiplied |
| 4 | | by the expected return of 7.2%, which is the same expected return used for the |
| 5 | | calculation of pension expense. |
| 6 | | Additionally, a reduced level of funding would result in an increase in |
| 7 | | expense related to the PBGC variable-rate premium. Had ONE Gas not made the |
| 8 | | contributions that created the prepaid pension asset, the plan would be significantly |
| 9 | | less funded, which would cause an increase in the PBGC variable premiums. |
| 10 | | Therefore, ONE Gas' approach is not only good for the plan but also minimizes |
| 11 | | long-term costs for all stakeholders. |
| 12 | Q. | HOW MUCH HAVE TEXAS CUSTOMERS BENEFITED SINCE THE |
| 13 | | PREPAID PENSION ASSET STARTED ACCUMULATING? |
| 14 | A. | As shown on Exhibit CLK-3 the cumulative benefit for TGS's customers since |
| 15 | | December 2008 has been \$34 million and \$15.8 million for the proposed CGSA. |
| 16 | | The benefit experienced during the test year is the \$3.6 million I discussed earlier |
| 17 | | for TGS and \$1.7 million for the proposed CGSA. |
| 18 | | VI. <u>CONCLUSION</u> |
| 19 | Q. | PLEASE SUMMARIZE YOUR POSITION ON THE INCLUSION OF THE |
| 20 | | PREPAID PENSION ASSET IN RATE BASE. |
| 21 | A. | The Commission's treatment of the prepaid pension asset in GUD No. 10506 |
| 22 | | should be followed in this statement of intent. In addition, the prepaid asset was |
| 23 | | created from an investment by ONE Gas, just as ONE Gas would invest in a |
| 24 | | pipeline. Accordingly, in line with traditional rate-making principles, TGS should |

- 1 be allowed to earn the full rate of return because ONE Gas' capital (both debt and
- equity) was used to create the asset. Moreover, customers are benefiting from the
- 3 prepaid pension asset by having a reduced expense.
- 4 Q. DOES THIS CONCLUDE YOUR DIRECT TESTIMONY?
- 5 A. Yes, it does.

Exhibit CLK-1 pension contributions CGSA Exhibit CLK-1

| 1 | | DIRECT TESTIMONY OF MARK W. SMITH |
|----|----|---|
| 2 | | I. <u>INTRODUCTION AND QUALIFICATIONS</u> |
| 3 | Q. | PLEASE STATE YOUR NAME AND BUSINESS ADDRESS. |
| 4 | A. | My name is Mark W. Smith. My business address is 15 East Fifth Street in Tulsa, |
| 5 | | Oklahoma. |
| 6 | Q. | BY WHOM ARE YOU EMPLOYED AND IN WHAT CAPACITY? |
| 7 | A. | I am Vice President and Treasurer for ONE Gas, Inc. ("ONE Gas"). |
| 8 | Q. | ON WHOSE BEHALF ARE YOU PRESENTING THIS TESTIMONY? |
| 9 | A. | I am testifying on behalf of Texas Gas Service Company ("TGS" or the |
| 10 | | "Company"), a Division of ONE Gas, in support of its request to change rates for |
| 11 | | its proposed Central-Gulf Service Area. |
| 12 | Q. | PLEASE DESCRIBE YOUR EDUCATIONAL BACKGROUND AND |
| 13 | | PROFESSIONAL EXPERIENCE. |
| 14 | A. | I have a Bachelor of Science in Accounting from Oklahoma State University and a |
| 15 | | Master's in Business Administration from Phillips University. I am also a CPA. I |
| 16 | | have testified in cases before the Oklahoma Corporation Commission, the Kansas |
| 17 | | Corporation Commission, Railroad Commission of Texas ("Commission") and |
| 18 | | Federal Energy Regulatory Commission. I previously served on the Southern Gas |
| 19 | | Association Rate Committee where I taught a portion of its Regulatory 101 course. |
| 20 | | I have worked for ONE Gas or ONEOK, Inc. for over 31 years in areas that include |
| 21 | | Rates and Regulatory, Corporate Accounting, Budgeting, Corporate Development |
| 22 | | and Treasury. |

| 1 | Q. | HAVE YOU PREVIOUSLY TESTIFIED BEFORE ANY REGULATORY |
|----|----|--|
| 2 | | COMMISSIONS? |
| 3 | A. | Yes, I filed testimony in Gas Utilities Docket ("GUD") Nos. 10506, 10526, 10739 |
| 4 | | and 10766 in Texas. |
| 5 | Q. | WAS THIS TESTIMONY PREPARED BY YOU OR UNDER YOUR |
| 6 | | DIRECT SUPERVISION? |
| 7 | A. | Yes, it was. |
| 8 | Q. | HAVE YOU PREPARED ANY EXHIBITS IN CONNECTION WITH YOUR |
| 9 | | TESTIMONY? |
| 10 | A. | Yes. I prepared and sponsor Confidential Exhibit MWS-1 which summarizes the |
| 11 | | Utility Insurance Company ("UIC") insurance expense charged to TGS and the |
| 12 | | change in direct insurance cost inclusive of lower deductible limits. Attached as |
| 13 | | Exhibit MWS-2 is a document showing the Oklahoma Insurance Commission's |
| 14 | | ("OIC's") approval of UIC's original rates and approving UIC as an approved and |
| 15 | | regulated insurance company. Confidential Exhibits MWS-3, MWS-4, MWS-5, |
| 16 | | and MWS-6 are the policies issued by UIC to TGS. Confidential Exhibit MWS-7 |
| 17 | | is the feasibility study that was filed with the OIC. |
| 18 | Q. | WERE THESE EXHIBITS PREPARED BY YOU OR UNDER YOUR |
| 19 | | DIRECT SUPERVISION? |
| 20 | A. | Yes, they were. |
| 21 | Q. | WHAT IS THE PURPOSE OF YOUR TESTIMONY? |
| 22 | A. | My testimony will describe the ONE Gas risk management program and the |
| 23 | | services provided to TGS by UIC, ONE Gas' captive insurer. I will also explain |
| 24 | | why the insurance rates paid by TGS to UIC are reasonable and necessary and attest |

1 to the fact that the price paid by TGS complies with the affiliate cost recovery 2 standard in Section 104.055(b) of the Texas Utilities Code. In addition to my 3 testimony addressing UIC, Company witness Stacey L. McTaggart also addresses 4 the affiliate cost recovery standard, and Company witnesses Anthony Brown and 5 Mindy R. Edwards sponsor the schedule that identifies the amount of Corporate 6 insurance premium costs TGS is seeking to recover through rates. 7 II. ONE GAS' INSURANCE AND RISK MANAGEMENT PROGRAM 8 Q. WHAT IS A CAPTIVE INSURANCE COMPANY? 9 A. A captive or captive insurance company is a company formed by a corporation to 10 provide insurance to its divisions and subsidiaries. Captives are regulated insurance 11 companies that must follow the insurance laws of the state in which they were 12 incorporated and file annually with their respective insurance commissions. WHY WAS THE UTILITY INSURANCE COMPANY FORMED? 13 Q. 14 UIC was formed to provide ONE Gas and its divisions in Kansas, Oklahoma and A. 15 Texas: 16 1) consistent and competitive insurance rates over the long-term; 17 2) continuity of insurance product offerings at a cost that is considerably lower than what ONE Gas could achieve if it sought insurance in the 18 19 general or retail marketplace; 20 3) insurance at lower deductible levels than can be purchased in the retail 21 market; and 22 4) access to the lower priced reinsurance in the wholesale market.

| 1 | Q. | REGARDING ITEM FOUR ABOVE, WHY IS IT IMPORTANT THAT UIC |
|----|----|--|
| 2 | | BE ABLE TO PURCHASE REINSURANCE IN THE WHOLESALE |
| 3 | | MARKET? |
| 4 | A. | In the Company's experience, the retail market does not often write insurance with |
| 5 | | low deductibles. In almost all cases in the past, ONE Gas has had to obtain |
| 6 | | insurance containing a \$2 million deductible. There have been several instances |
| 7 | | where the retail insurance market has pushed for a \$5 million deductible. These |
| 8 | | high levels of deductibles result in the company and the customers being exposed |
| 9 | | to significant financial losses because they must incur large claims prior to |
| 10 | | deductibles being met. Additionally, buying in the wholesale market eliminates a |
| 11 | | premium tax which can be as much as \$400,000 for ONE Gas in total. |
| 12 | Q. | DOES UIC HAVE THE POTENTIAL TO SMOOTH OUT PREMIUM |
| 13 | | COSTS OVER THE LONG TERM? |
| 14 | A. | Yes, it does. In the general marketplace, rates fluctuate due to overall market |
| 15 | | conditions and events that are out of ONE Gas' control such as tornadoes, |
| 16 | | hurricanes, terrorist attacks or other companies inside or outside of our industry |
| 17 | | suffering significant liability events. In contrast, UIC is able to look at premiums |
| 18 | | over a longer period and prevent spikes from happening in the short term. |
| 19 | Q. | PLEASE DESCRIBE REINSURANCE AND THE REINSURANCE |
| 20 | | MARKET. |
| 21 | A. | The reinsurance market is a market that sells insurance to insurance companies and |
| 22 | | not on a retail basis. In effect, it is insurance for retail insurance companies. |
| 23 | | Because UIC is a regulated insurance company, UIC allows ONE Gas access to |
| 24 | | reinsurance markets directly versus going through the retail insurance markets |

where rates include profit, commissions, overhead, taxes and other transactional 2 costs that can significantly increase premiums. By having the option to access the 3 reinsurance markets directly, UIC can obtain lower rates, customize policy language, and secure additional insurance by either lowering the deductibles or 4 5 raising insurance limits. This ensures competitive and consistent rates for TGS. 6 Reinsurance markets are also much more stable than retail markets and should result in more favorable rates over the long-term.

22

23

A.

PLEASE BRIEFLY DESCRIBE UIC AND HOW IT FITS INTO ONE GAS' 8 Q. 9 CORPORATE STRUCTURE.

UIC was chartered in Oklahoma on August 29, 2017 and was operational as of 10 A. 11 October 1, 2017. UIC is a wholly-owned subsidiary of ONE Gas and is 12 incorporated under Oklahoma's laws and regulations. It is fully capitalized under 13 the requirements of applicable Oklahoma law, as required by the OIC, and does not 14 provide services to any entity other than ONE Gas and its divisions.

HOW ARE THE OPERATIONS OF UIC MANAGED? Q.

UIC is managed on a day-to-day basis by Aon Risk Solutions, ("Aon"), a thirdparty captive manager. Aon is one of the largest third-party risk management consulting firms in the world and has a team of individuals who specialize in the management, regulation, and uses for captive insurance companies and their The main differentiator of a captive insurance company and a retail insurance company is that a captive will write only the risks of its parent, namely ONE Gas. Captives can also write third party risks but currently UIC is responsible for the risks of ONE Gas and its operating divisions only.

| 1 | | In addition to providing management services for the daily operations of |
|----------|----|---|
| 2 | | UIC, Aon provides ONE Gas with consultation services regarding insurable risks, |
| 3 | | coverage, actuarial and other related services. However, the direction and |
| 4 | | philosophy of UIC is determined by UIC's board of directors and the ONE Gas risk |
| 5 | | management group, which reports to me. Importantly, the OIC has oversight and |
| 6 | | governs the rates and capitalization of UIC. Attached as Exhibit MWS-2 is a |
| 7 | | document approving UIC's original rates and approving UIC as an insurance |
| 8 | | company. UIC's initial annual filing along with its audited annual financials have |
| 9 | | been filed with the OIC and have been accepted. |
| 10 | Q. | HAVE THE PREMIUMS FROM UIC BEEN ACCEPTED IN RATES IN |
| 11 | | OTHER JURISDICTIONS? |
| 12 | | Yes, they have been accepted as appropriate costs in Oklahoma, Kansas, and Texas. |
| 13 | | Specifically, UIC costs were included in the GUD Nos. 10739 and 10766. |
| 14 | Q. | DO THE PREMIUMS CHARGED TO TGS INCLUDE INSURANCE |
| 15 | | COVERAGE FOR CORPORATE ASSETS OF ONE GAS? |
| 16 | A. | No, not directly. The corporate area is charged as if it is a division, its own |
| 17 | | appropriate premium based on its asset and risks. This Corporate insurance expense |
| 18 | | is allocated through Distrigas to each division, including TGS, as described by |
| 19 | | Mr. Brown. |
| 20 | Q. | WHAT TYPES OF INSURANCE COVERAGE DOES UIC PROVIDE FOR |
| 21 | | ONE GAS' TGS DIVISION? |
| 22 | A. | UIC provides the following insurance coverages for TGS: |
| 23 24 | | property, plant, and equipment, including business interruption; general liability and employment practices; |

1 3) workers' compensation and employers' liability; and 2 4) automobile liability. 3 Copies of these policies are attached as Confidential Exhibit MWS-3 through 4 Confidential Exhibit MWS-6. 5 CAN YOU DESCRIBE THE NATURE OF THE COVERAGE PROVIDED Q. 6 BY UIC TO TGS? 7 A. Yes. TGS receives insurance coverage in the areas listed above for an amount that 8 is equal to or in excess of \$25 million per event, with a \$250,000 deductible per 9 occurrence for each type of policy listed above. This \$250,000 deductible is much 10 lower than what is commercially available in the retail insurance markets for 11 companies the size of ONE Gas, because, liability insurance (Item 2 above) could 12 not be purchased in the retail marketplace with a deductible below \$1 million. In 13 fact, during our November 2018 renewal of the liability coverage, we requested

from third-party insurers a rate for coverage from \$250,000 to \$2 million and

received informal quotes at a premium rate of \$1.4 million. In our November 2019

renewal, we requested the same information and a verbal quote was given for \$3.6

million. In contrast, UIC is able to offer liability insurance coverage from \$250,000

to \$2 million for \$946,000 to ONE Gas Corporate and its three divisions. This

results in an annual savings of \$2.7 million.

14

15

16

17

18

19

| 1 | Q. | YOU STATED THAT UIC PROVIDES INSURANCE COVERAGE THAT |
|----|----|--|
| 2 | | IS NOT COMMERCIALLY AVAILABLE AT THE UIC DEDUCTIBLE |
| 3 | | LEVEL AND UIC PRICING. WHAT DO YOU RELY ON TO SUPPORT |
| 4 | | THIS STATEMENT? |
| 5 | A. | As insurance risks are renewed for an annual term, ONE Gas has attempted to |
| 6 | | obtain lower deductibles from third-party insurers and has not been able to do so at |
| 7 | | reasonable rates. During each renewal of our property insurance (Item 1 above), |
| 8 | | we ask our broker to request quotes for a \$250,000 deductible, and only two of the |
| 9 | | three carriers were willing to quote at this deductible level. Moreover, while one |
| 10 | | carrier was willing to agree to a rate that would result in a program cost of \$710,000, |
| 11 | | we could not obtain coverage from the carrier because it refused to quote a fee for |
| 12 | | this coverage. On the other hand, UIC was able to offer this coverage to ONE Gas |
| 13 | | corporate and its three divisions at a total of \$545,000, a savings of \$165,000. |
| 14 | Q. | EXPLAIN HOW THE COST OF OBTAINING INSURANCE COVERAGE |
| 15 | | FOR TGS AND ITS PEER DIVISIONS THROUGH UIC IS DETERMINED. |
| 16 | A. | UIC bases premiums on a long-term time horizon, consistent with the industry- |
| 17 | | accepted approach for captives. This approach recognizes that there will be periods |
| 18 | | when losses are less than forecasted and periods when losses are greater than |
| 19 | | forecasted. The price paid to UIC by TGS and its peer divisions (Oklahoma Natural |
| 20 | | Gas, Kansas Gas Service and ONE Gas Corporate) is determined using several |
| 21 | | factors and based upon the advice and actuarial services of Aon. These factors are: |
| 22 | | 1) administrative fees; |
| 23 | | 2) cost of reinsurance premiums; |
| 24 | | 3) reserve requirements; |

| 1 | | 4) loss history; and | | |
|----------------|---|--|--|--|
| 2 | 5) projected losses for all the various policies. | | | |
| 3 | | The administrative fees and cost of reinsurance premiums are paid by UIC directly | | |
| 4 | | to non-affiliated third parties and are included within the overall premium charged | | |
| 5 | | to TGS by UIC at cost without mark-up. | | |
| 6 | Q. | WHAT ARE SOME OF THE MAJOR DRIVERS IN SETTING THE COSTS | | |
| 7 | | OF THE PREMIUMS? | | |
| 8 | A. | The major drivers for the cost of premiums are as follows for: | | |
| 9 10 | | 1) property insurance, the replacement value of the assets being insured and the potential business interruption or net margins of the division; | | |
| 11 12 | | workers' compensation, the salary and number of employees in a division; | | |
| 13 14 | | 3) automotive insurance, the number of vehicles that each division is operating; and | | |
| 15 16 17 | | 4) liability insurance, net margins, the number of customers, the value of the assets deployed, the age of the assets used, and the number of employees. | | |
| 18 | | All these potential risk factors are updated annually, along with loss | | |
| 19 | | histories for each type of coverage, and Aon provides actuarial services to | | |
| 20 | | determine the rates just as any insurance company would do for its clients. These | | |
| 21 | | rates and actuarial study are then filed with the OIC for their review and approval. | | |
| 22 | | I have attached Confidential Exhibit MWS-7, which is the original application filed | | |
| 23 | | with the OIC. Any amount of reinsurance that UIC purchases is allocated at cost | | |
| 24 | | based on the annual premiums being charged for that type of coverage. | | |
| 25 | Q. | DOES THE LONG-TERM FORECAST METHOD OF DETERMINING | | |
| 26 | | PREMIUM COSTS BENEFIT TGS AND ITS CUSTOMERS? | | |
| 27 | A. | Yes. Over the long-term, these forecasts provide TGS with more consistency in | | |
| 28 | | the premium cost to be incurred. Insurance costs are a necessary part of providing | | |

natural gas service. To the extent the costs significantly vary from year to year, based on an annual review of the actual losses incurred, the rates charged to customers would experience more variance in the general market. For example, there were large Texas property losses caused by hurricanes in 2017. Premiums based solely on losses from that year would be markedly higher than premiums based on a longer time horizon. In addition to cost variances, after major catastrophic events, there can be contraction in insurance availability. Through UIC, TGS and its customers are assured of the availability of the same level of insurance coverage at relatively consistent premium costs without being subjected to the inevitable insurance cycles. Further, having a relatively stable premium rate allows the utility to plan with greater certainty the investment necessary to ensure a safe and reliable system.

Q. HOW ARE THE CHARGES TO TGS FROM UIC DETERMINED?

A.

The actual amount of the premium charged is based on different factors such as property replacement values, employee count, net margins, the number of autos, and loss history for each division, and will vary depending on the type of coverage. UIC uses actuarial services of Aon to develop risk-based premiums as previously explained. If a division's property replacement values are greater than that of another utility division, then the division with the greater amount will bear more of the total premium cost charged by UIC. This is also the case for losses. If the loss history is greater in one division, that division will bear a larger premium. ONE Gas believes this is important as it prevents one division from subsidizing another division which may have higher losses. Specifically, Aon provides a quantification of the potential exposure under the various risks by producing a forecast for the

| 1 | | upcoming policy year. The analysis is based on ONE Gas and its divisions' own |
|----------------------------|-----|--|
| 2 | | loss experience with actuarial adjustments to account for the nature of the claims, |
| 3 | | development of claims, underlying loss cost trends and changes in exposure. This |
| 4 | | risk-based approach more appropriately allocates the cost to each of ONE Gas' |
| 5 | | divisions and corporate office than a simple rate multiplied by a headcount or rate |
| 6 | | multiplied by an asset value. |
| 7 | Q. | IS THE PRICE CHARGED TO TGS BY UIC HIGHER THAN THE PRICE |
| 8 | | CHARGED BY UIC TO OTHER DIVISIONS, AFFILIATES OR THIRD |
| 9 | | PARTIES FOR THE SAME ITEM OR CLASS OF ITEMS? |
| 10 | A. | No, it is not. On a risk-adjusted basis, the price charged by UIC to TGS is no higher |
| 11 | | than what is charged to ONE Gas' other divisions. The same types of underlying |
| 12 | | costs and methodology are employed in calculating each division's premium. |
| 13 | Q. | DOES UIC PROVIDE INSURANCE COVERAGE TO ANY THIRD |
| 14 | | PARTIES? |

| 1 | | DIRECT TESTIMONY OF JEFFREY J. HUSEN |
|----|----|--|
| 2 | | I. <u>INTRODUCTION AND QUALIFICATIONS</u> |
| 3 | Q. | PLEASE STATE YOUR NAME AND BUSINESS ADDRESS. |
| 4 | A. | My name is Jeffrey J. Husen. My business address is 15 E. 5th Street Tulsa, |
| 5 | | Oklahoma 74103. |
| 6 | Q. | BY WHOM ARE YOU EMPLOYED AND IN WHAT CAPACITY? |
| 7 | A. | I am a Vice-President, Chief Accounting Officer and Controller for ONE Gas, Inc. |
| 8 | | ("ONE Gas"). I have responsibility for the accounting, tax, financial reporting and |
| 9 | | budgeting and forecasting functions for ONE Gas. These responsibilities include |
| 10 | | the selection and application of accounting policies and practices for ONE Gas and |
| 11 | | its divisions, including Texas Gas Service Company ("TGS" or the "Company"). |
| 12 | Q. | PLEASE DESCRIBE YOUR EDUCATIONAL BACKGROUND AND |
| 13 | | PROFESSIONAL EXPERIENCE. |
| 14 | A. | I earned a Bachelor of Science in Accounting from Oklahoma State University. For |
| 15 | | more than 20 years, I have worked in accounting and financial reporting roles. Prior |
| 16 | | to my current position, I was Assistant Controller - Corporate Accounting and |
| 17 | | Reporting where I was responsible for corporate accounting, SEC reporting, |
| 18 | | Sarbanes Oxley and enterprise risk management processes for ONEOK, Inc., |
| 19 | | ("ONEOK") and ONEOK Partners. During my tenure at ONEOK, I also served as |
| 20 | | the Director of Accounting for the Gathering and Fractionation portion of ONEOK |
| 21 | | Partners' natural gas liquids business, and as Director of Accounting for Oklahoma |
| 22 | | Natural Gas, which is now a division of ONE Gas. Prior to joining ONEOK, I was |
| 23 | | a Senior Manager in the audit practice with KPMG LLP in Tulsa, Oklahoma. In |
| 24 | | that role, I audited accounting policies and practices for companies in the utility, |

1 transportation and manufacturing industries. I am licensed as a Certified Public 2 Accountant in Oklahoma. I also am certified as a Chartered Global Management 3 Accountant by the American Institute of Certified Public Accountants. 4 0. WAS THIS TESTIMONY PREPARED BY YOU OR UNDER YOUR 5 **DIRECTION?** 6 A. Yes, it was. 7 HAVE YOU PREVIOUSLY TESTIFIED BEFORE ANY REGULATORY 0. 8 **COMMISSIONS?** 9 A. Yes, I filed testimony before the Railroad Commission of Texas ("Commission") 10 in Gas Utilities Docket ("GUD") Nos. 10739 and 10766 and before the Kansas 11 Corporation Commission in 18-KGSG-560-RTS. 12 WHAT IS THE PURPOSE OF YOUR TESTIMONY? Q. My testimony addresses the aspects of the Tax Cuts and Jobs Act of 2017 (the 13 A. 14 "Act") that affect TGS. In addition, I explain the Company's calculation of Excess 15 Accumulated Deferred Income Tax ("EDIT").¹ 16 HOW DOES YOUR TESTIMONY RELATE TO THE TESTIMONY OF 0. 17 OTHER COMPANY WITNESSES? 18 Company witness Stacey L. McTaggart addresses TGS's compliance with the A. 19 Accounting Order issued by the Commission in GUD No. 10695, and the 20 Company's proposal for returning EDIT to customers. Company witness Janet M.

.

21

22

Simpson addresses the calculation of Accumulated Deferred Income Taxes

("ADIT") in her testimony, and Company witness Gracie Guerra sponsors the

¹ https://www.congress.gov/115/bills/hr1/BILLS-115hr1enr.pdf.

schedule that provides the amount of federal income tax expense TGS seeks to recover through rates.

II. THE TAX CUTS AND JOBS ACT OF 2017

4 Q. HAS THE COMMISSION ADDRESSED THE EFFECT OF TAX REFORM

ON TEXAS UTILITIES AND THEIR CUSTOMERS?

A. Yes. In response to the Act, the Commission issued an Accounting Order in GUD No. 10695 on February 27, 2018, that reflects the Commission's directives regarding changes to utility rates to account for the change in the federal corporate tax rate.² The Accounting Order includes two specific requirements related to the treatment of EDIT, which I address in my testimony. These requirements are: (1) gas utilities subject to the Commission's jurisdiction are to accrue on their books, as of January 1, 2018, a regulatory liability to reflect the excess deferred reserve, including any associated gross up in taxes, caused by the reduction in the federal corporate income tax rate (Ordering Paragraph 1(C)) and; (2) the amortization of the entire regulatory liability shall be consistently calculated using a methodology set forth under the Act (Ordering Paragraph 7). Ms. McTaggart explains other requirements of the Accounting Order in her testimony and explains the Company's proposal to return EDIT to customers.

Q. DOES THE REVENUE REQUIREMENT IN THIS STATEMENT OF INTENT REFLECT THE NEW CORPORATE TAX RATE?

- 21 A. Yes. This is addressed in my testimony and the testimonies of Ms. McTaggart, Ms.
- Guerra, and Ms. Simpson.

12

13

14

15

16

17

18

19

20

21

A.

As Ms. Simpson describes in her testimony, ADIT reflects the cumulative timing differences between Income Tax Expense recorded pursuant to accounting principles generally accepted in the United States ("GAAP") for financial reporting purposes and actual income taxes paid to taxing authorities. The Company then applies the tax rate at which it expects the cumulative timing differences to reverse. which rates are typically the current enacted federal and state tax rates (if applicable), to the cumulative timing difference balance to determine the amount of ADIT to record. After a change in the income tax rate is enacted, GAAP requires a company to remeasure the ADIT balance on its books to reflect the new tax rate at which it expects the related timing differences to reverse. EDIT is the difference between the ADIT balance on the day before the tax rate change was enacted and the ADIT balance calculated using the newly enacted corporate tax rate. For regulated public utilities, Accounting Standards Codification ("ASC") 980-740-25³ requires that a regulatory asset or liability be recorded for the resulting remeasurement of ADIT if it is probable that the excess will be collected from customers or returned to customers through future rates. Ms. McTaggart addresses in her testimony that the Company proposes to treat this excess deferred liability as a separate bill credit outside of base rates to allow for easier tracking of the item and ensure 100% of the EDIT is returned to customers.

.

³ https://asc.fasb.org/section&trid=2156937#d3e54046-110423.

1 Q. DOES THE EDIT REGULATORY LIABILITY INCLUDE ANY

2 ASSOCIATED GROSS UP IN TAXES?

3

4

5

6

7

8

9

10

11

12

13

14

15

16

22

A. No. The Company has not included a gross up of the regulatory liability because the regulatory liability is a refund obligation to customers and not a reduction of future revenues. If the regulatory liability were treated as a reduction of future revenues, ASC 980-740-25 would require the regulatory liability to be grossed-up for the income tax effect of the increase or decrease in future revenues. The gross-up regulatory asset or liability associated with EDIT would itself be considered a temporary tax timing difference for which a deferred tax asset or liability would be recognized. Because the gross-up regulatory liability would generate an offsetting deferred tax asset, recording a tax gross-up associated with the EDIT regulatory liability has no effect on rate base. Because the EDIT liability is a refund obligation and not a reduction of future revenues, the Company has not included an associated gross up nor the corresponding deferred tax asset in rate base. Rate base reflects only the remeasured deferred taxes using the current enacted federal tax rate and the related regulatory liability resulting from remeasurement.

17 Q. WHAT IS THE AMOUNT OF EDIT FOR TGS?

A. The amount of EDIT is \$28,460,166, as shown on Exhibit JMS-2, provided with

Ms. Simpson's direct testimony. Exhibit JMS-2 calculates the effect of the change

in the statutory federal tax rate on the ADIT of TGS at December 31, 2017 and

reflects all adjustments resulting from ONE Gas filing its 2017 federal tax return.

Q. PLEASE DESCRIBE PROTECTED AND UNPROTECTED EDIT.

A. With the implementation of tax reform in 1986, the term "protected EDIT" was adopted to refer to EDIT balances that were described in Section 203(e) of the Tax

Reform Act of 1986 ("TRA 1986"). 4 Pursuant to Section 203(e), federal 2 method/life depreciation differences are protected EDIT under the TRA 1986. In 3 addition, any ADIT balances attributable to net operating loss carryforwards are considered to be the result of the federal method/life depreciation differences and 4 5 those balances are also protected EDIT. There are other items in Section 203(e) 6 that are protected in addition to federal method/life depreciation differences, however, neither the Company, nor ONE Gas, has any of the other categories of 8 protected EDIT. "Unprotected EDIT" referred to all other balances.

9 Q. PLEASE DESCRIBE THE TREATMENT OF EDIT UNDER TRA 1986.

10 The TRA 1986 allowed the reduction to the excess tax reserve under Section 203(e) A. 11 to occur no more rapidly than the rate under the average rate assumption method 12 ("ARAM").

13 Q. WHAT IS ARAM?

14 A. ARAM is a methodology that annually reduces the excess tax reserve over the 15 remaining regulatory lives of the property that gave rise to the reserve for deferred 16 taxes during the years in which the deferred tax reserve related to such property is 17 reversing. Under this method, the excess tax reserve is annually reduced as the 18 timing differences reverse over the remaining lives of the assets that existed at the 19 date the excess tax reserve was measured.

20 Q. DOES THE ACT PROVIDE FOR COMPARABLE TREATMENT?

21 A. Yes. A similar provision is included in the Act at Section 13001(d). To maintain a 22 normalization method of accounting, the Act requires that the utility reduce its

1

7

⁴ https://www.congress.gov/bill/99th-congress/house-bill/3838.

| 1 | | protected excess tax reserve no faster than it would be reduced under ARAM. It |
|----|----|---|
| 2 | | also allows for use of another alternative method if the utility does not have the data |
| 3 | | needed for ARAM. The Company has the data needed for ARAM, so the |
| 4 | | alternative method is not applicable. |
| 5 | Q. | IS THE COMPANY'S PROPOSAL TO USE ARAM CONSISTENT WITH |
| 6 | | THE COMMISSION'S ACCOUNTING ORDER ADDRESSING EDIT? |
| 7 | A. | Yes. Ordering Paragraph 7 requires the amortization of the EDIT regulatory |
| 8 | | liability to be calculated using a methodology under the Act, and ARAM is a |
| 9 | | methodology set forth under the Act. |
| 10 | Q. | WHAT TGS AND ONE GAS ITEMS ARE PROTECTED UNDER THE |
| 11 | | NORMALIZATION RULES? |
| 12 | A. | The EDIT attributable to federal method/life depreciation differences are protected. |
| 13 | | All other EDIT amounts are unprotected under the normalization rules. |
| 14 | Q. | WHAT WOULD HAPPEN IF TGS OR ONE GAS VIOLATED |
| 15 | | NORMALIZATION RULES? |
| 16 | A. | The penalties associated with a normalization violation can be very punitive. ONE |
| 17 | | Gas and the Company could lose the ability to utilize accelerated depreciation. |
| 18 | | Furthermore, the Act calls for an additional penalty that would be assessed for the |
| 19 | | amount by which the excess tax reserve was reduced more rapidly than was allowed |
| 20 | | using a normalized method of accounting. These penalties would be severely |
| 21 | | detrimental to both the Company and the Company's customers and would |
| 22 | | significantly increase the cost of service. For instance, the loss of accelerated |
| 23 | | depreciation would result in the loss of a significant tax deduction that allow |
| 24 | | companies making significant capital investments to defer income tax liabilities |

| 1 | | until future periods. The lost tax deduction or any associated tax penalties increases |
|----|----|--|
| 2 | | the current cash needs of the company to pay income taxes and can result in |
| 3 | | incremental borrowings to finance capital expenditure programs or the company's |
| 4 | | operations. The increased borrowings would result in higher financing costs and |
| 5 | | ultimately increase the cost of service to ratepayers. |
| 6 | Q. | HOW DOES THE COMPANY PROPOSE TO TREAT UNPROTECTED |
| 7 | | EDIT? |
| 8 | A. | TGS proposes to amortize the unprotected EDIT over a ten-year period consistent |
| 9 | | with the Final Orders issued in GUD Nos. 10739 and 10766. |
| 10 | Q. | WHAT AMOUNT OF EDIT WILL BE REFUNDED TO TGS'S |
| 11 | | CUSTOMERS IN 2020? |
| 12 | A. | Exhibit JJH-1 shows the calculation of the amortization amount using the ARAM |
| 13 | | methodology and the ten-year amortization period for unprotected EDIT. In 2020, |
| 14 | | \$1,286,160 will be credited to customers if the Company's proposal is approved. |
| 15 | | The calculation in Exhibit JJH-1 utilizes the EDIT balance calculated in Exhibit |
| 16 | | JMS-2 and an ARAM amortization percentage derived from the Company's fixed |
| 17 | | asset accounting system that tracks the tax and financial reporting balances and |
| 18 | | depreciation for the Company and ONE Gas Corporate property plant and |
| 19 | | equipment. |
| 20 | Q. | IS THE COMPANY PROVIDING A SCHEDULE OF REFUNDS TO BE |
| 21 | | MADE IN FUTURE PERIODS? |
| 22 | A. | No. It is not possible to provide the estimated amortization amounts over the |
| 23 | | remaining regulatory lives of the protected EDIT using the ARAM methodology |
| 24 | | because it would require the Company to know when assets will be replaced or |

abandoned in the future. Any estimate of future amounts would have to assume that all assets that existed will be used for their full remaining regulatory lives, and that is not a reasonable assumption. The refund amounts in future periods could change as the Company's property, plant and equipment at December 31, 2017, is retired or replaced, which would impact the timing of the amount of ARAM amortization that is refunded in the future. As these assets are retired or replaced, the timing of the amortization of the EDIT will change in a given year; however, the total amount to be refunded will not change over the life of the assets. Ms. McTaggart explains in her testimony how the Company will provide the annual ARAM amounts in the annual Rate Schedule EDIT-RIDER filing.

A.

11 Q. HOW DOES THE COMPANY INTEND TO REFUND THIS LIABILITY 12 BACK TO CUSTOMERS?

As amounts are identified by the ARAM calculation for refund within a given year, the Company intends to identify those amounts and the associated customer bill credits consistent with the terms of proposed Rate Schedule EDIT-RIDER, which Ms. McTaggart addresses. The Company also intends that the amount of the EDIT credit be applied as an annual one-time bill credit as reflected in Rate Schedule EDIT-RIDER. The Company intends to return this excess deferred liability as a separate bill credit outside of base rates to ensure 100% of the EDIT is returned to customers.

1 Q. HAS THE COMMISSION PREVIOUSLY APPROVED THE COMPANY'S

- 2 **PROPOSED TREATMENT OF EDIT?**
- 3 A. Yes, in GUD Nos. 10739 and 10766, the Commission approved the same treatment
- 4 of EDIT that the Company proposes here.⁵
- 5 Q. DOES THIS CONCLUDE YOUR DIRECT TESTIMONY?
- 6 A. Yes, it does.

.

STATE OF OKLAHOMA §

COUNTY OF TULSA §

AFFIDAVIT OF JEFFREY J. HUSEN

BEFORE ME, the undersigned authority, on this day personally appeared Jeffrey J. Husen who having been placed under oath by me did depose as follows:

- 1. "My name is Jeffrey J. Husen. I am over the age of eighteen (18) and fully competent to make this affidavit. I am employed as Vice President, Chief Accounting Officer and Controller of ONE Gas, Inc. The facts stated herein are true and correct based upon my personal knowledge.
- 2. I have prepared the foregoing Direct Testimony and the information contained in this document is true and correct to the best of my knowledge."

Further affiant sayeth not.

Jeffrey J. Husen

SUBSCRIBED AND SWORN TO BEFORE ME by the said Jeffrey J. Husen on this 10 4

day of December, 2019.

| 1 | | DIRECT TESTIMONY OF JANET M. SIMPSON |
|----|----|--|
| 2 | | I. <u>INTRODUCTION AND QUALIFICATIONS</u> |
| 3 | Q. | PLEASE STATE YOUR NAME AND BUSINESS ADDRESS. |
| 4 | A. | My name is Janet M. Simpson. My business address is 13215 Bee Cave Pkwy., |
| 5 | | Galleria Oaks Building B, Suite B-250, Bee Cave, TX 78738. |
| 6 | Q. | BY WHOM ARE YOU EMPLOYED AND IN WHAT CAPACITY? |
| 7 | A. | I am Vice President of Dively Energy Services Company ("DESC"). DESC is a |
| 8 | | consulting firm specializing in regulatory accounting and utility ratemaking (DESC |
| 9 | | is not a CPA firm). |
| 10 | Q. | PLEASE DESCRIBE YOUR EDUCATION AND PROFESSIONAL |
| 11 | | CREDENTIALS. |
| 12 | A. | I am a Certified Public Accountant and a Certified Forensic Accountant. I obtained |
| 13 | | my Bachelor of Business Administration in Accounting from the University of |
| 14 | | Texas in 1982. In 1983, I began employment as an analyst with the Public Utility |
| 15 | | Commission of Texas. Beginning in 1987, I was employed by Southern Union |
| 16 | | Company ("SUCo") for fourteen years, during which time I held various positions |
| 17 | | including Rate Manager and Director of Economic and Market Analysis in SUCo's |
| 18 | | Rate Department. I have participated in a variety of projects, including utility |
| 19 | | company software implementation projects, utility accounting and tariff |
| 20 | | compliance, and development and review of utility rate requests, including |
| 21 | | development of recommendations relating to accumulated deferred income taxes. |

1 Q. HAVE YOU PREVIOUSLY TESTIFIED IN A UTILITY REGULATORY

2 **RATE PROCEEDING?**

- A. Yes. I have testified before the Public Utility Commission of Texas, the Railroad

 Commission of Texas ("Commission"), the Missouri Public Service Commission,
- 5 and the Massachusetts Department of Public Utilities. A copy of my resume
- 6 identifying the various docketed proceedings in which I have testified is attached
- 7 to my testimony as Exhibit JMS-1.

8 Q. WAS THIS TESTIMONY PREPARED BY YOU OR UNDER YOUR

9 **DIRECTION?**

10 A. Yes, it was.

11 Q. WHAT IS THE PURPOSE OF YOUR TESTIMONY?

12 My testimony presents the Texas Gas Service Company ("TGS" or the Α. "Company"), a division of ONE Gas, Inc. ("ONE Gas") Accumulated Deferred 13 Income Tax ("ADIT") and Excess ADIT amounts that are applicable when 14 15 determining rates in the Company's proposed Central-Gulf Service Area 16 ("CGSA"). The CGSA combines the Company's existing Central Texas Service 17 Area ("CTSA"), Gulf Coast Service Area ("GCSA") and the City of Beaumont, 18 Texas. The cost of service for customers in the City of Beaumont, Texas is included 19 in and a part of the GCSA. Total CGSA ADIT is a liability of \$51,961,390, and 20 Excess ADIT is a liability of \$28,460,166, resulting in a combined rate base 21 reduction of \$80,421,556. Excess ADIT exists as a result of the reduction in the 22 federal corporate income tax rate pursuant to the Tax Cuts and Jobs Act of 2017 23 (the "Act"), which was effective January 1, 2018. The sum of total ADIT and 24 Excess ADIT balances are reflected as reductions to rate base on the CGSA Rate

Case Schedules, Schedule B, line 12 and are itemized on Schedule B-9. On a standalone basis, the CTSA ADIT is a liability of \$40,097,517, and Excess ADIT is a liability of \$21,927,556, resulting in a combined rate base reduction of \$62,025,073. On a stand-alone basis, the GCSA ADIT is a liability of \$11,863,874, and Excess ADIT is a liability of \$6,532,611, resulting in a combined rate base reduction of \$18,396,483. These ADIT and Excess ADIT amounts are reflected on Schedule B, line 12 and itemized on Schedule B-9 of the CTSA and GCSA Rate Case Schedules.

A.

In addition, the Commission issued an Accounting Order containing requirements for utilities related to the effects the Act on utility rates. Company witness Stacey L. McTaggart addresses the requirements of the Accounting Order, and Company witness Jeffrey J. Husen explains the reversal of Excess ADIT, and Company witness Gracie Guerra describes the calculation of federal income tax at the new rate.

II. BACKGROUND

Q. PLEASE DEFINE ACCUMULATED DEFERRED INCOME TAXES.

ADIT are amounts that are recorded on the balance sheet of a company to capture and accumulate the difference between income tax expense calculated on the company's financial statement and income tax expense calculated for tax return purposes. An ADIT liability is recognized for temporary differences that will result in taxable amounts in future years, while an ADIT asset is recognized for temporary differences that will result in deductible amounts in future years. The differences between financial statement and tax return taxable income that result in the creation of ADIT represent temporary differences in taxable income rather than permanent

differences. Over time, the same total amount of expense or revenue will be reflected in taxable income per Book and per Tax, but the year(s) in which the expense or revenue is recognized will differ. The ADIT balance represents the cumulative net amount of those deferred tax liabilities and assets at a given point in time.

Q. WHAT IS THE MAJOR SOURCE OF ADIT FOR TGS?

1

2

3

4

5

18

19

20

21

22

23

24

A.

The primary source of ADIT for TGS, and utility companies in general, is the difference in depreciation rates and methods used on a company's financial statement (i.e., "per Book") and the depreciation rates and methods authorized by the Internal Revenue Service ("IRS") for use on the income tax return (i.e., "per Tax"). Generally speaking, the IRS depreciation rates and methods are accelerated as compared to the financial statement and rate case depreciation rates and methods. That means that plant assets are typically depreciated more rapidly per Tax than per Book. As a result, for any particular "vintage" (i.e., calendar year) of plant additions, higher levels of depreciation expense will be deducted on the tax return in early years and lower amounts will be deducted in later years of that asset's life as compared to the depreciation expense recorded per Books. Having higher depreciation deductions per Tax in the early years of an asset's life results in lower taxable income and, therefore, lower income taxes in those early years as compared to per Book. This results in the Company recording an ADIT liability on its books. Conversely, in the later years of an asset's life, when depreciation is greater on the books than on the tax return for that particular asset, related income tax expense per Tax is greater than per Book. When this happens, entries are recorded on the books that reverse the ADIT liability.

Q. ARE THERE OTHER PER BOOK AND PER TAX DIFFERENCES ASSOCIATED WITH PLANT ASSETS THAT RESULT IN RECORDING ADIT FOR UTILITY COMPANIES?

Α.

Yes. In addition to depreciation life and method differences, there are four other major per Book and per Tax differences that impact a utility company's plant-related ADIT balance. First, for utility companies that apply mass-asset depreciation, a gain or loss is generally not recognized on the income statement when an asset is retired. Instead, the plant amount is charged against the accumulated depreciation account, resulting in any gain or loss applicable to that asset being captured in the accumulated depreciation balance. For tax purposes, however, a taxable gain, or more commonly, a taxable loss, is recognized in the year the asset is retired. The expense recognized per Tax is equal to the underdepreciated tax basis at that time. For example, if at the time of its retirement, the tax basis accumulated depreciation was \$600 relating to an asset originally costing \$1,000, a tax "loss" of \$400 would be reflected as an expense on the tax return. The recognition of that tax loss essentially accomplishes expensing the remaining under-depreciated cost of that asset in the year of retirement on the tax return.

Another event that is recognized as an expense for tax purposes but is captured in the accumulated depreciation account per Book, is the cost of removal (net of salvage value if any) associated with retiring or removing plant assets from service. For tax purposes, net cost of removal is deducted as an expense in the year it is incurred, but the net cost of removal per Book is charged to the accumulated depreciation account. The impact on the book accumulated depreciation balance of both the retirement of an asset and the cost of removal is factored into the

development and periodic recalculation of book depreciation rates. As a result, over time, the full cost of the asset, along with cost of removal, is recognized in per Book net income through book depreciation expense. Therefore, the book depreciation expense reverses the temporary differences created by recognition of tax retirement losses and cost of removal.

The third additional plant-related per Book and per Tax difference relates to the tax treatment of certain types of construction costs as repair expense. Those amounts are capitalized to plant per Book and are depreciated but are deducted as an expense in the year incurred for tax purposes. All three of the temporary differences described above, as well as the depreciation rate differences discussed previously, generate an ADIT liability, because the recognition of expense occurs earlier per Tax than per Book.

The final plant-related temporary difference that creates ADIT for utility companies is Contributions in Aid of Construction ("CIAC"), and it has the opposite effect on ADIT. CIAC reduces the plant balance recorded per Book, thereby lowering per Book depreciation over the life of the asset; however, for tax purposes, CIAC is recognized as taxable revenue in the year the utility receives the CIAC. As a result, the depreciable tax basis of the related plant is not reduced, and higher depreciation expense is reflected per Tax than per Book over the life of the asset. Unlike the other temporary items, which result in earlier expense per Tax than per Book, CIAC results in earlier revenue per Tax than the recognition of the subsequent reduction in depreciation expense per Book.

Q. CAN YOU DETERMINE THE NET ADIT BALANCE ASSOCIATED WITH

2 ALL OF THESE TEMPORARY PLANT-RELATED DIFFERENCES AT A

SINGLE POINT IN TIME?

A. Yes. All of the temporary differences described above result in differences in the balance of property, plant and equipment per Book as compared the amounts per Tax and/or differences in the balance of accumulated depreciation per Book as compared to the amounts per Tax. As a result, plant-related ADIT can be determined at any point in time by multiplying the income tax rate by the difference between Book Net Plant (i.e., gross property, plant and equipment per Book minus accumulated depreciation per Book) and Tax Net Plant (i.e., gross property, plant and equipment per Tax minus accumulated depreciation per Tax). As explained above, typically for utility companies, that calculation yields a net ADIT liability, which reduces a utility's rate base as described below.

Q. HOW IS ADIT TREATED FOR RATEMAKING PURPOSES?

A. From a ratemaking standpoint, to the extent that a company has had sufficient taxable income to make use of all of the net accelerated tax return deductions described above, the balance in ADIT represents interest-free funds for the company. Because ADIT does not consist of funds or capital provided by investors, ADIT, like customer-supplied funds, is used to reduce rate base. More specifically, in establishing accelerated depreciation methods for utility companies, the IRS included a provision to prohibit the resulting early year reductions in income taxes from being directly passed on to ratepayers in the form of lower income tax expense in the revenue requirement. Essentially, through the accelerated depreciation provisions, the IRS provides a loan, at no cost, to companies in the form of lower

| taxes payable in the early years of an asset's life. That loan gets "repaid" to the |
|--|
| IRS in the later years of the asset's life in the form of higher taxes in those years. |
| Therefore, the ADIT balance at any given point in time represents the outstanding |
| amount of cost-free capital that has been provided to the company by the IRS |
| through the tax rules. As a source of cost-free capital that supports investment, the |
| ADIT balance is deducted from rate base, which results in a reduction in required |
| return and a reduction in the revenue requirement. |

A.

Q. WHAT HAPPENS IF, FOR INCOME TAX RETURN PURPOSES, A COMPANY HAS MORE EXPENSE DEDUCTIONS AVAILABLE TO IT THAN TAXABLE INCOME FOR A PARTICULAR YEAR?

If expenses on the tax return are greater than taxable income, a company has experienced a Tax Net Operating Loss ("NOL"). Because it is not possible to reduce a tax obligation to an amount below zero, a portion of the total allowable tax return expense deductions (equal to the dollar amount of the NOL) does not provide a benefit to the company in the form of a reduced tax obligation in that year. As a result, the accelerated expense deductions reflected on the tax return have not yet actually generated cost-free capital to the extent of the amount of the NOL. The company can carry forward that NOL – i.e., the unused expense deductions – to future years and use them to reduce future taxable income and future income taxes payable. Until a company has sufficient taxable income to use those deductions to offset its income, an adjustment is made to reduce the amount of the ADIT liability that is recorded on the balance sheet. This recognizes the tax effect of those deductions as a future benefit rather than as a current reduction in taxes payable and provision of cost-free capital.

| 1 | Q. | ARE THERE OTHER ELEMENTS OF ADIT THAT IT MAY BE |
|----|----|---|
| 2 | | APPROPRIATE FOR UTILITIES TO INCLUDE IN RATE BASE? |
| 3 | A. | Yes. Book/tax temporary differences may arise because of differences in treatment |
| 4 | | of items other than plant-related items. If the company is including other items in |
| 5 | | rate base for which there is a timing difference in the treatment for book purposes |
| 6 | | and tax purposes, it may be appropriate to include the related ADIT in rate base as |
| 7 | | well. However, because those differences also impact the amount of the company's |
| 8 | | taxable income or loss, for consistency, it is necessary to take those temporary |
| 9 | | differences into account when determining if the company is in a NOL position and |
| 10 | | when calculating the related NOL ADIT balance used for rate base. |
| 11 | | III. TAX CUTS AND JOBS ACT OF 2017 |
| 12 | Q. | WHAT IS THE TAX CUTS AND JOBS ACT OF 2017? |
| 13 | A. | On December 22, 2017, the Act was signed into law. Among other changes, as of |
| 14 | | January 1, 2018, the Act reduces the corporate federal income tax rate to 21% from |
| 15 | | 35%. |
| 16 | Q. | WHAT IS THE IMPACT OF THE ACT ON THE PROPOSED CGSA ADIT |
| 17 | | BALANCE IN THIS CASE? |
| 18 | A. | Prior to December 22, 2017, the cumulative timing differences underlying the |
| 19 | | ADIT balance were valued at the then-current statutory income tax rate of 35%. |
| 20 | | The decrease in the tax rate pursuant to the Act, resulted in the Company owing |
| 21 | | income tax to the IRS at only 21% when those timing differences reverse. As of |
| 22 | | December 31, 2017, the portion of that balance that is equal to the underlying |
| 23 | | timing differences multiplied by 14% (35% minus 21%) represents "Excess |
| 24 | | ADIT." The Company has not yet amortized and returned to customers the |

December 31, 2017, balance of Excess ADIT because this is the first general rate case for either the CTSA or the GCSA since the effective date of the Act. As a result, the entire December 31, 2017 Excess ADIT balances relating to the existing CTSA and GCSA still represent cost free capital appropriate for deduction from rate base in this case. I am presenting the ADIT balance and the Excess ADIT balance separately on Schedule B-9. Ms. McTaggart and Mr. Husen address the impact of the Act as it pertains to the refund of Excess ADIT in this case.

IV. CALCULATION OF THE CGSA ADIT BALANCE

8

9

10

13

14

15

16

Q. WHAT ARE THE COMPONENTS OF THE PROPOSED CGSA ADIT AMOUNT?

11 A. The proposed CGSA ADIT balance, inclusive of Excess ADIT consists of the 12 following five major components:

| | ADIT at 21% | Excess ADIT | Total |
|-----------------------------------|--------------|--------------|---------------|
| CGSA Direct Plant-Related | (79,896,725) | (44,586,349) | (124,483,074) |
| CGSA Other Direct Rate Base Items | (5,420,956) | (3,136,047) | (8,557,003) |
| TGS Division Plant-Related | (58,273) | (264,573) | (322,846) |
| ONE Gas Plant-Related | (2,766,140) | (1,542,000) | (4,308,140) |
| CGSA NOL | 36,180,704 | 21,068,803 | 57,249,507 |
| Total CGSA ADIT | (51,961,390) | (28,460,166) | (80,421,556) |

Detailed calculations of each component of ADIT at 21% are discussed below and shown on Exhibit JMS-2. The Excess ADIT column above represents the comparable balances of each category of ADIT as of December 31, 2017, valued at 14% as explained in the previous Section III.

17 Q. PLEASE EXPLAIN HOW YOU CALCULATED ADIT RELATING TO 18 THE PROPOSED CGSA DIRECT PLANT ASSETS.

19 A. The first component of total CGSA ADIT is ADIT associated with the plant-related 20 timing differences for plant that is physically located in the proposed CGSA (i.e.,

| 1 | | "direct plant"). I first computed ADIT applicable to CGSA plant items as of June |
|----------|----|--|
| 2 | | 30, 2019 by comparing per Book net plant for those locations as of June 30, 2019 |
| 3 | | to per Tax net plant for those locations as of June 30, 2019, and then updated that |
| 4 | | comparison of per book amounts to September 30, 2019, consistent with the |
| 5 | | Company's adjustments to Plant and Reserves. The difference between these two |
| 6 | | amounts, multiplied by the current income tax rate of 21%, represents the proposed |
| 7 | | CGSA direct plant-related ADIT as of September 30, 2019. Total CGSA plant- |
| 8 | | related ADIT as of September 30, 2019 equals (\$79,896,725). |
| 9 | Q. | PLEASE EXPLAIN THE SECOND COMPONENT OF CGSA ADIT THAT |
| 10 | | PERTAINS TO OTHER RATE BASE ITEMS. |
| 11 | A. | There are several other items that the Company is including in rate base in this case |
| 12 | | for which there is a difference in the book and tax treatment, specifically: |
| 13 14 | | Rule 8.209 Regulatory Asset - Distribution Integrity Management Program ("DIMP") Deferral; |
| 15 16 | | Pension & Financial Accounting Standards ("FAS") 106 Regulatory Asset Deferral; and |
| 17 | | Prepaid Pension Asset |
| 18 | | Both the Rule 8.209 deferrals and the Pension and FAS 106 Regulatory Assets |
| 19 | | deferrals represent journal entries in which amounts that would otherwise be |
| 20 | | expensed on the books are instead charged to a deferred asset account and then |
| 21 | | expensed in subsequent periods. For tax purposes, the expense is recognized in the |
| 22 | | year that it would have been expensed on the books absent those amounts being |
| 23 | | deferred. As a result, for tax purposes, the deferral entry is reversed. At any given |
| 24 | | point in time, the ADIT related to this temporary difference is equal to the balance |
| 25 | | remaining in the deferred asset account multiplied by the tax rate of 21%. |

| The third item is an additional layer of temporary difference that pertains to |
|--|
| the book/tax treatment of pension costs. For tax purposes, the amount deducted in |
| any given tax year is equal to the amount of funding made to the pension plan rather |
| than the amount of expense that is recorded on the books in accordance with the |
| requirements of Accounting Standards Codification - "ASC" 715-20 (formerly |
| FAS 87). The difference between the cumulative ASC 715-20 pension expense and |
| the cumulative contributions to the plant amount is referred to as the Prepaid |
| Pension Asset. Thus, the reversal of the item identified above as "Pension/ FAS |
| 106 Regulatory Asset deferral" adjusts the pension expense deduction for tax |
| purposes to be equal to the amount that would have been expensed per Book in |
| accordance with ASC 715-20 absent the regulatory deferral of a portion of that |
| expense. Then, the third item reflects the additional temporary difference that |
| arises because actual deduction for tax purposes is equal to the amount by which |
| the pension plan is funded. The sum of these three temporary differences multiplied |
| by the tax rate of 21% represents the CGSA Other Direct Rate Base-related ADIT |
| as of September 30, 2019, which is equal to (\$5,420,956). |
| DI ELGE DEGODINE WITE NEWE WITE GOLDONENEG OF WITE A DIE |

A.

Q. PLEASE DESCRIBE THE NEXT TWO COMPONENTS OF THE ADIT CALCULATION.

The next two components of the CGSA ADIT calculation are for (1) ADIT related to an allocated portion of TGS Division plant, and (2) an allocated portion of ONE Gas Corporate plant as of test-year end. These amounts were computed by comparing net book plant and net tax plant balances for TGS Division and ONE Gas Corporate plant as of June 30, 2019 and, as with respect to direct plant, adjusting those amounts to September 30, 2019. The ONE Gas temporary

differences were multiplied by the allocation factors that have been applied to the related plant amounts by Company witness Mindy R. Edwards to determine the portion of those differences applicable to TGS. Both the TGS Division plant temporary differences and the TGS portion of allocated corporate plant temporary differences were multiplied by the Federal tax rate of 21%, and then allocated to the proposed CGSA. To allocate the appropriate portions to the proposed CGSA, both the TGS Division and the allocated ONE Gas Corporate ADIT amounts were multiplied by the CGSA test-year-end customer allocation factor, consistent with the methodology used by Ms. Mindy Edwards to allocate shared service and corporate expenses and plant and accumulated depreciation balances. The result is (\$58,273) of TGS Division plant ADIT and (\$2,766,140) of ONE Gas corporate plant ADIT applicable to the proposed CGSA.

13 Q. WHAT IS THE FINAL COMPONENT OF CGSA ADIT?

CALCULATION?

A.

14 A. The final component is ADIT relating to the proposed CGSA's portion of the TGS
 15 NOL.

16 Q. WHY IS ADIT RELATING TO THE TAX NOL INCLUDED IN THE ADIT

As explained previously, a reduction to rate base for ADIT is only necessary or appropriate to the extent it represents cost-free capital. As of June 30, 2019, the Company had a cumulative Tax NOL and, as a result, has been unable to take full advantage of the temporary differences that gave rise to the entire ADIT liability balance discussed above. To the extent the Company does not have sufficient taxable income for tax purposes to realize the full benefit of the cost-free capital arising from the temporary differences between financial statement and tax return

income, no reduction to rate base is warranted. As a result, when computing ADIT for rate base, the ADIT balance must be reduced to remove the portion of that balance that has yet to provide actual cost-free capital to the Company. Reduction of the ADIT liability balance has the effect of increasing rate base.

Q. WHAT IS THE TOTAL ESTIMATED TGS NOL ADIT APPLICABLE TO THE PROPOSED CGSA AS OF SEPTEMBER 30, 2019, AND HOW IS IT COMPUTED?

8

9

10

11

12

13

14

15

16

17

18

19

20

21

22

23

A.

The total estimated NOL ADIT applicable to the proposed CGSA as a separate jurisdiction as of September 30, 2019 is \$36,180,705. The calculation of this amount starts with cumulative 2003 through September 30, 2019 total TGS taxable income per Book of \$414,915,273. Using the cost center component of the Company's account structure, I segregated and grouped this amount into each of the Company's direct jurisdictional cost center groups, each allocable regional cost center group, and the TGS allocable division office cost center group. The TGS allocable division office cost center group includes the TGS portion of allocated corporate costs. I then made several rate-making adjustments and tax adjustments to determine the CGSA NOL. First, an adjustment was made to align the purchased gas cost expense reflected in the proposed CGSA and other TGS jurisdiction cost centers to equal the jurisdictional purchased gas revenue. Next, I removed amounts that are not applicable for rate-making purposes such as legislative, charitable, merchandising, and other non-utility expenses and revenues as well as unbilled revenue transactions that are not included in the development of the revenue requirement.

| 1 | Then, various adjustments were made to compute taxable income |
|----|---|
| 2 | appropriate for use in calculating the regulatory tax NOL amount. First, to calculate |
| 3 | the per tax deduction applicable for meals, I removed from per book expense 50% |
| 4 | of the cumulative meals cost, consistent with the IRS treatment of that item as a |
| 5 | permanent difference. I also removed parking expenses, which are no longer |
| 6 | deductible for tax purposes as a result of the Act. Next, tax deductions were |
| 7 | reflected pertaining to the Rule 8.209 Regulatory Asset - DIMP Deferral and |
| 8 | Pension and FAS 106 Regulatory Asset Deferral reversals and to reflect the Prepaid |
| 9 | Pension Asset deduction as discussed above. Lastly, adjustments were made to |
| 10 | reverse the deduction of book depreciation and reflect the deduction of tax |
| 11 | depreciation. In this context "depreciation" includes the next amounts reflected for |
| 12 | tax purposes associated with recognition of plant-related adjustments for tax |
| 13 | purposes including tax depreciation, cost of removal expense, retirement losses, |
| 14 | and repairs adjustment, net of CIAC amounts that are treated as taxable income. |
| 15 | Because the actual tax depreciation expense that is reflected on the Company's tax |
| 16 | returns includes the impact of the Company's acquisition adjustment that arose |
| 17 | from the 2004 acquisition of the TGS assets from SUCo, the tax depreciation used |
| 18 | in the rate-making NOL ADIT calculation referenced above was recalculated |
| 19 | excluding the impact of the acquisition adjustment. The final step was to apply the |
| 20 | CGSA customer-based allocation factors to the resulting allocable TGS division |
| 21 | net loss and the allocable regional net loss amounts as shown on Exhibit JMS-2, |
| 22 | page 2. The allocated amounts applicable to the proposed CGSA were then added |
| 23 | to the proposed CGSA direct amounts to determine the total CGSA tax NOL. |

1 Q. WHAT IS THE RESULTING CGSA NOL ADIT AMOUNT?

- 2 A. The result is a cumulative CGSA Tax NOL of \$172,289,069 as of September 30,
- 3 2019. Multiplying this amount by the income tax rate of 21% yields the CGSA
- 4 NOL ADIT of \$36,180,705, which is the final component of the CGSA ADIT
- 5 calculation.

23

24

A.

6 Q. IS INCLUSION OF ADIT ON THE NOL CONSISTENT WITH THE

COMMISSION'S PAST TREATMENT OF THIS ISSUE?

Yes. The Company's treatment of the NOL in this case is consistent with the Commission's Final Order in Gas Utilities Docket ("GUD") No. 10170 in which the Commission approved an increase in rate base for the ADIT associated with Atmos' NOL, as calculated on a jurisdictional stand-alone basis. As in that case, the driving force behind the Company's NOL position is the substantial plantrelated tax deductions associated with its regulated operations. Because these deductions created the ADIT liability that is deducted from rate base, inclusion of the NOL ADIT asset "matches the ADIT liabilities to the ADIT NOL asset created by those deductions," which is what the Commission concluded GUD No. 10170. In addition, inclusion of ADIT on the NOL in this case is consistent with the Company's methodology on this issue in GUD Nos. 10488, 10506, 10526, 10656, 10739, and 10766. GUD Nos. 10488, 10526, 10656, 10739, and 10766 were resolved through unanimous settlement agreements the Commission approved on May 3, 2016, November 15, 2016, March 20, 2018, November 13, 2018, and February 5, 2019, respectively. GUD No. 10506 was a litigated case in which the Commission approved the Company's request to include ADIT on the NOL. The Final Order in GUD No. 10506 was issued on September 27, 2016.

| 1 | Q. | DOES YOUR ADIT CALCULATION INCLUDE THE IMPACT OF ADIT |
|----|----|--|
| 2 | | PERTAINING TO THE KNOWN AND MEASURABLE POST TEST YEAR |
| 3 | | ADJUSTMENTS TO PLANT THAT ARE REFLECTED IN THE |
| 4 | | COMPANY'S FILED SCHEDULES? |
| 5 | A. | Yes. As noted above, adjustments were made to be consistent with the adjustments |
| 6 | | proposed by the Company to reflect Plant and Accumulated Depreciation changes |
| 7 | | through September 30, 2019 as well as to reflect other miscellaneous Plant and |
| 8 | | Accumulated Depreciation adjustments proposed by the Company. The Company |
| 9 | | will make a true-up adjustment to ADIT to exclude any plant that is not used and |
| 10 | | useful as of December 31, 2019, and will provide December 31, 2019 Plant in |
| 11 | | Service, construction completed not classified, and Accumulated Reserve balances |
| 12 | | by February 14, 2020. |
| 13 | | V. CALCULATION OF THE CTSA AND GCSA ADIT BALANCES |
| 14 | Q. | DID YOU FOLLOW THE SAME APPROACH WHEN SEPARATELY |
| 15 | | CALCULATING THE ADIT AMOUNTS FOR THE CTSA AND GCSA? |
| 16 | A. | Yes, the same methodology was used for the CTSA and GCSA calculations as was |
| 17 | | used for the combined CGSA calculation except that direct service area amounts |
| 18 | | specifically applicable to the CTSA and GCSA were used rather than total CGSA |
| 19 | | amounts, and the CTSA and GCSA allocation factors applicable to TGS Division |
| 20 | | and ONE Gas plant as well as to TGS shared services were used. |

1 Q. PLEASE SUMMARIZE YOUR RECOMMENDATIONS PERTAINING TO

- 2 THE CTSA ADIT.
- 3 A. The amount of ADIT, inclusive of excess ADIT, applicable to the CTSA that should
- 4 be deducted from rate base if it is necessary to develop a CTSA stand-alone revenue
- 5 requirement is (\$62,025,073) and consists of the following components:

| | ADIT at 21% | Excess ADIT | Total |
|-----------------------------------|--------------|--------------|---------------|
| CTSA Direct Plant-Related | (67,915,870) | (37,013,367) | (104,929,237) |
| CTSA Other Direct Rate Base Items | (4,680,500) | (2,676,419) | (7,356,919) |
| TGS Division Plant-Related | (49,842) | (225,312) | (275,154) |
| ONE Gas Plant-Related | (2,365,913) | (1,308,791) | (3,674,704) |
| CTSA NOL | 34,914,608 | 19,296,333 | 54,210,914 |
| Total CTSA ADIT | (40,097,517) | (21,927,556) | (62,025,073) |

6 Q. PLEASE SUMMARIZE YOUR RECOMMENDATIONS PERTAINING TO

- 7 THE GCSA ADIT.
- 8 A. The amount of ADIT, inclusive of excess ADIT, applicable to the GCSA that
- 9 should be deducted from rate base if it is necessary to develop a GCSA stand-alone
- revenue requirement is (\$18,396,483) and consists of the following components:

| | ADIT at 21% | Excess ADIT | Total |
|-----------------------------------|--------------|-------------|--------------|
| GCSA Direct Plant-Related | (11,980,855) | (7,572,983) | (19,553,837) |
| GCSA Other Direct Rate Base Items | (740,456) | (459,628) | (1,200,084) |
| TGS Division Plant-Related | (8,431) | (39,261) | (47,692) |
| ONE Gas Plant-Related | (400,227) | (233,209) | (633,436) |
| GCSA NOL | 1,266,097 | 1,772,469 | 3,038,566 |
| Total GCSA ADIT | (11,863,873) | (6,532,611) | (18,396,483) |

- 11 Q. DOES THE SUM OF YOUR RECOMMENDED CTSA AND GCSA ADIT
- 12 AMOUNTS EQUAL YOUR RECOMMENDED CGSA ADIT?
- 13 A. Yes.
- 14 Q. DOES THIS CONCLUDE YOUR DIRECT TESTIMONY?
- 15 A. Yes, it does.

JANET M. SIMPSON, CPA, CR.FA

CONTACT INFORMATION

3 Lakeway Centre Crt. Blvd, Ste 110, Lakeway, TX 78734

PROFILE

Janet Simpson is Vice President of Dively Energy Services Company, LLC, a consulting firm providing accounting and regulatory services to the utility industry. She is also Vice President of Financial Planning and Analysis for Si Energy, LP, a natural gas distribution company in Texas. She is a professional accountant with approximately thirty-five years of experience in utility accounting and rate regulation and has participated in various accounting and regulatory projects as well as accounting information system implementations for utility companies. As a forensic professional, she has been recognized as an expert and has provided testimony in both written and oral form on numerous matters and in multiple jurisdictions related to utility cost of service and rate mechanisms.

Ms. Simpson assists clients in a variety of financial, regulatory, and technical areas, including evaluating financial transactions, developing accounting entries and procedures, implementing financial processes, analyzing financial data, and creating complex spreadsheet models. As a specialist in utility regulatory accounting and ratemaking, she develops and reviews utility cost-of-service filings and supports her recommendations through expert testimony, issuance of and responses to requests for information, and general litigation support.

EDUCATION, CERTIFICATIONS AND DESIGNATIONS

- BBA in Accounting, University of Texas at Austin
- Certified Public Accountant, Texas
- Certified Forensic Accountant

AFFIDAVIT OF JANET SIMPSON

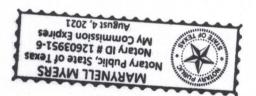

BEFORE ME, the undersigned authority, on this day personally appeared Janet Simpson who having been placed under oath by me did depose as follows:

- 1. "My name is Janet Simpson. I am over the age of eighteen (18) and fully competent to make this affidavit. I am employed as a Principal in Dively &Associates, PLLC, a public accounting firm specializing in regulatory and forensic accounting. The facts stated herein are true and correct based upon my personal knowledge.
- 2. I have prepared the foregoing Direct Testimony and the information contained in this document is true and correct to the best of my knowledge."

 Further affiant sayeth not.

Janet Simpson

SUBSCRIBED AND SWORN TO BEFORE ME by the said Janet Simpson on this 2 day of December, 2019.

DIRECT TESTIMONY OF DR. RONALD E. WHITE

I. INTRODUCTION AND QUALIFICATIONS

Q. PLEASE STATE YOUR NAME AND BUSINESS ADDRESS.

A. My name is Ronald E. White. My business address is 17595 S. Tamiami Trail, Suite 260, Fort Myers, Florida 33908.

Q. WHAT IS YOUR OCCUPATION?

A. I serve as President of Foster Associates Consultants, LLC. Foster Associates is a public utility economic consulting firm offering economic research and consulting services on issues and problems arising from governmental regulation of business. Areas of specialization supported by the firm's Fort Myers office include property service—life forecasting, depreciation estimation, and valuation of industrial property.

Q. PLEASE DESCRIBE YOUR EDUCATIONAL TRAINING AND PROFESSIONAL BACKGROUND.

A. I was awarded a B.S. degree in Engineering Operations and an M.S. degree and Ph.D. degree in Engineering Valuation from Iowa State University. I have taught graduate and undergraduate courses in industrial engineering, engineering economics, and engineering valuation at Iowa State University and previously served on the faculty for Depreciation Programs for public utility commissions, companies, and consultants, sponsored by Depreciation Programs, Inc., in cooperation with Western Michigan University. I also conduct courses in depreciation and public utility economics for clients of the firm.

I have prepared and presented a number of papers to professional organizations, committees, and conferences and have published several articles on matters relating to depreciation, valuation and economics. I am a past member of the Board of Directors of the Iowa State Regulatory Conference and an affiliate

member of the joint American Gas Association (A.G.A.) – Edison Electric Institute (EEI) Depreciation Accounting Committee, where I previously served as chairman of a standing committee on capital recovery and its effect on corporate economics. I am also a member of the American Economic Association, the Financial Management Association, the Midwest Finance Association, and a founding member of the Society of Depreciation Professionals.

O. WHAT IS YOUR PROFESSIONAL EXPERIENCE?

A. I joined the firm of Foster Associates in 1979, as a specialist in depreciation, the economics of capital investment decisions, and cost of capital studies for ratemaking applications. Before joining Foster Associates, I was employed by Northern States Power Company (1968–1979) in various assignments related to finance and treasury activities. As Manager of the Corporate Economics Department, I was responsible for book depreciation studies, studies involving staff assistance from the Corporate Economics Department in evaluating the economics of capital investment decisions, and the development and execution of innovative forms of project financing. As Assistant Treasurer at Northern States, I was responsible for bank relations, cash requirements planning, and short–term borrowings and investments.

Q. HAVE YOU PREVIOUSLY TESTIFIED BEFORE A REGULATORY BODY?

A. Yes. I have testified in numerous proceedings before administrative and judicial bodies in over 30 jurisdictions, including Texas. I have also testified before the Federal Energy Regulatory Commission, the Federal Power Commission, the Alberta Energy Board, the Ontario Energy Board, and the Securities and Exchange Commission. I have sponsored position statements before the Federal Communication Commission and numerous local franchising authorities in matters relating to the regulation of telephone and cable television. A more detailed description of my professional qualifications is contained in Attachment REW–1.

Q. WHAT IS THE PURPOSE OF YOUR TESTIMONY IN THIS PROCEED-1 ING? 2 A. Foster Associates was engaged by Texas Gas Service Company (TGS), a division 3 of ONE Gas, Inc., to conduct a 2019 depreciation rate study for: a) plant located 4 in a proposed Central-Gulf Service Area (CGSA), which consolidates the Central 5 Texas Service Area (CTSA) and the Gulf Coast Service Area (GCSA); and b) for 6 common facilities shared among all TGS Service Areas (the TGS Division). Ac-7 companying my testimony are the following attachments: 8 a) Attachment REW-1 is a description of my professional qualifica-9 10 tions. b) Attachment REW-2 is the 2019 study for the Central-Gulf Service 11 Area and the TGS Division. 12 13 The purpose of my testimony is to sponsor and describe the studies conducted by Foster Associates. 14 II. DEVELOPMENT OF DEPRECIATION RATES 15 Q. PLEASE EXPLAIN WHY DEPRECIATION STUDIES ARE NEEDED 16 FOR ACCOUNTING AND RATEMAKING PURPOSES. 17 A. The goal of depreciation accounting is to charge to operations a reasonable esti-18 mate of the cost of the service potential of an asset (or group of assets) consumed 19 during an accounting interval. The service potential (or future economic benefit) 20 of an asset is the present value of future net revenue (i.e., revenue less expenses 21 exclusive of depreciation and other noncash expenses) or cash inflows attributable 22 to the use of that asset alone. A number of depreciation systems have been devel-23 oped to achieve this objective, most of which employ time as the apportionment 24 base. 25 Implementation of a time-based (or age-life) system of depreciation account-26 ing requires the estimation of several parameters or statistics related to a plant ac-27 count. The average service life of a vintage, for example, is a statistic that will 28 ¹ Plant serving the City of Beaumont is located in the GCSA.

not be known with certainty until all units from the original placement have been retired from service. A vintage average service life, therefore, must be estimated initially and periodically revised as indications of the eventual average service life become more certain. Future net salvage rates and projection curves, which describe the expected distribution of retirements over time, are also estimated parameters of a depreciation system that are subject to future revisions. Depreciation studies should be conducted periodically to assess the continuing reasonableness of parameters and accrual rates derived from prior estimates.

The need for periodic depreciation studies is also a derivative of the ratemaking process which establishes prices for utility services based on costs. Absent regulation, deficient or excessive depreciation rates will produce no adverse consequence other than a systematic over or understatement of an accounting measurement of earnings. While a continuance of such practices may not comport with the goals of depreciation accounting, the achievement of capital recovery is not dependent upon either the amount or the timing of depreciation expense for an unregulated entity. In the case of a regulated utility, however, recovery of investor—supplied capital is dependent upon allowed revenues, which are in turn dependent upon authorized levels of depreciation expense. Periodic reviews of depreciation rates are, therefore, essential to the achievement of timely capital recovery for a regulated utility.

It is also important to recognize that revenue associated with depreciation is a significant source of internally generated funds used to finance plant replacements and new capacity additions. This is not to suggest that internal cash generation should be substituted for the goals of depreciation accounting. However, the potential for realizing a reduction in the marginal cost of external financing provides an added incentive for conducting periodic depreciation studies and adopting proper depreciation rates.²

² I do not discuss nor have I considered whether other regulatory or public policy goals should influence or be reflected in establishing depreciation rates. Such considerations remain the prerogative of the regulatory agency responsible for prescribing appropriate depreciation rates.

Q. PLEASE DESCRIBE THE PRINCIPAL ACTIVITIES INVOLVED IN CONDUCTING A DEPRECIATION STUDY.

A. The first step in conducting a depreciation study is the collection of plant accounting data needed to conduct a statistical analysis of past retirement experience.

Data are also collected to permit an analysis of the relationship between retirements and realized gross salvage and cost of removal. The data collection phase should include a verification of the accuracy of the plant accounting records and a reconciliation of the assembled data to the official plant records of the company.

The next step in a depreciation study is the estimation of service life statistics from an analysis of past retirement experience. The term *life analysis* is used to describe the activities undertaken in this step to obtain a mathematical description of the forces of retirement acting upon a plant category. The mathematical expressions used to describe these forces are known as survival functions or survivor curves.

Life indications obtained from an analysis of past retirement experience are blended with expectations about the future to obtain an appropriate projection life and curve descriptive of the parent population from which a plant account is viewed as a random sample. This step, called *life estimation*, is concerned with predicting the expected remaining life of property units still exposed to the forces of retirement. The amount of weight given to the analysis of historical data will depend upon the extent to which past retirement experience is considered descriptive of the future.

An estimate of the net salvage rate applicable to future retirements is most often obtained from an analysis of gross salvage and cost of removal realized in the past. An analysis of past experience (including an examination of trends over time) provides a baseline for estimating future salvage and cost of removal. Consideration, however, should be given to events that may cause deviations from net salvage realized in the past. Among the factors that should be considered are the age of plant retirements; the portion of retirements that will be reused;

changes in the method of removing plant; the type of plant to be retired in the future; inflation expectations; the shape of the estimated projection life curve; and economic conditions that may warrant greater or lesser weight to be given to the net salvage observed in the past.

A comprehensive depreciation study will also include an analysis of the adequacy of the recorded depreciation reserve. The purpose of such an analysis is to compare the current recorded reserve balance with the balance required to achieve the goals and objectives of depreciation accounting if the amount and timing of future retirements and net salvage are realized exactly as predicted. The difference between the required (or theoretical) reserve and the recorded reserve provides a measurement of the expected excess or shortfall that will remain in the depreciation reserve if corrective action is not taken to extinguish the reserve imbalance.

Although reserve records are typically maintained by various account classifications, the sum of all reserves is the most important indicator of the adequacy (or inadequacy) of recorded depreciation reserves. Differences between theoretical (or computed) and recorded reserves will arise as a normal occurrence when service lives, dispersion patterns and net salvage estimates are adjusted in the course of depreciation reviews. Differences will also arise due to plant accounting activity such as transfers and adjustments requiring an identification of reserves at a different level from that maintained in the accounting system. It is appropriate, therefore, and consistent with group depreciation theory, to periodically redistribute or rebalance recorded reserves among primary accounts based on the most recent estimates of retirement dispersion and net salvage rates. A redistribution of recorded reserves will initialize a reserve balance for each primary account consistent with the estimates of retirement dispersion selected to describe mortality characteristics of the accounts and establish a baseline against which future comparisons can be made.

Finally, parameters estimated from service life and net salvage studies are integrated into an appropriate formulation of an accrual rate based upon a selected depreciation system. Three elements are needed to describe a depreciation system. The sub–elements most widely used in constructing a depreciation system are shown in Figure 1 below.

| Methods | Procedures | Techniques |
|----------------------|-----------------------|----------------|
| Retirement | Total Company | Whole-Life |
| Compound-Interest | Broad Group | Remaining-Life |
| Sinking-Fund | Vintage Group | Probable-Life |
| Straight-Line | Equal-Life Group | |
| Declining Balance | Unit Summation | |
| Sum-of-Years'-Digits | Item | |
| Expensing | | |
| Unit-of-Production | | |
| Net Revenue | | |

Figure 1. Elements of a Depreciation System

The above elements (*i.e.*, method, procedure and technique) can be visualized as three dimensions of a cube in which each face describes a variety of sub–elements that can be combined to form a system. A depreciation system is therefore formed by selecting a sub–element from each face such that the system contains one method, one procedure and one technique.

III. 2019 TGS DEPRECIATION STUDIES

Q. PLEASE DESCRIBE THE SOURCE OF DEPRECIATION RATES CURRENTLY USED BY TGS FOR THE PROPOSED CGSA.

A. Current depreciation rates for CTSA and the TGS Division were developed in a

2015 study conducted by Foster Associates based on December 31, 2014 plant and depreciation reserves. Rates developed for CTSA were approved by the Railroad Commission of Texas pursuant to a Settlement Agreement in GUD No. 10526 (Final Order dated November 15, 2016). Current depreciation rates for GCSA were developed in a 2015 update of a 2013 study and approved by the Commission pursuant to a Settlement Agreement in GUD No. 10488 (Final Order dated May 3, 2016).

Q. DID TGS PROVIDE FOSTER ASSOCIATES PLANT ACCOUNTING DATA FOR CONDUCTING THE 2019 DEPRECIATION STUDY?

A. Yes. The database used in the 2019 study was assembled by appending 2018 plant and reserve activity to the statewide data base used in conducting a 2018 update for the North Texas Service Area (NTSA). Detailed accounting entries were assigned transaction codes to identify the nature of the accounting activity. Transaction codes for plant additions, for example, were used to distinguish normal additions from acquisitions, purchases, reimbursements and adjustments. Similar transaction codes were used to distinguish normal retirements from sales, reimbursements, abnormal retirements and adjustments. Transaction codes are also assigned to transfers, gross salvage, cost of removal and other recorded accounting activity.

Age distributions at December 31, 2018 were derived by Foster Associates in a forward–flow calculation in which accounting activity was appended to the database used in the 2018 study. The accuracy and completeness of the assembled data base was validated for 2018 by comparing the beginning plant balance, additions, retirements, transfers and adjustments, and the ending plant balance derived for each rate category to the official plant records of the Company. Derived age distributions at December 31, 2018 were also reconciled to the continuing property records of TGS. Annual plant activity prior to 2018 was reconciled in the 2018 and prior depreciation rate studies.

Q. DID FOSTER ASSOCIATES CONDUCT STATISTICAL LIFE STUDIES FOR TGS PLANT AND EQUIPMENT?

A. Yes. As discussed in Attachment REW-2, all plant accounts were analyzed using a technique in which first, second and third degree polynomials were fitted to a set of observed retirement ratios. The resulting functions were expressed as survivorship functions and numerically integrated to obtain an estimate of the projection life of a plant category. The observed proportions surviving were then fitted

2.7

by a weighted least–squares procedure to the Iowa–curve family (using the projection life derived from the polynomial hazard function) to obtain a mathematical description or classification of the dispersion characteristics of the data. Service life indications derived from the statistical analyses were blended with informed judgment and expectations about the future to obtain an appropriate projection life and curve for each plant category.

Plant accounting and depreciation reserve records are maintained by TGS for its existing six service areas and the TGS Division that supports all service areas.³ Projection lives and projection curves were estimated in the TGS study from the combined database of the existing six service areas. Average service lives and remaining service lives were distinguished among service areas in the development of vintage–group depreciation rates.

Q. WHY WERE PARAMETERS FOR THE PROPOSED CGSA ESTIMATED FROM A COMBINED DATABASE OF TGS SERVICE AREAS RATHER THAN FROM SERVICE–AREA SPECIFIC DATABASES?

A. Service areas were combined to maximize sample sizes for estimating projection lives, projection curves and future net salvage rates and, as a cost saving measure, to reduce the number of independent statistical studies needed for TGS. Total plant included in the 2019 study at December 31, 2018 for TGS (including the TGS Division) was \$1,360,877,342. The amount of investment in each of the existing six service areas ranges between \$14.6 million for Borger/Skellytown and \$557.4 million for the existing Central Texas Service Area. CTSA represents 41.0 percent of TGS total plant investments and GCSA represents \$98.8 million or 7.3 percent of TGS total plant investments.

Plant investments located in the six service areas are designed, constructed and maintained under uniform policies and practices. Retirement units are standardized for all TGS service areas as are design standards, maintenance practices

³ Existing service areas include: Borger/Skellytown; North Texas; Rio Grande Valley; West Texas; Central Texas and Gulf Coast.

1
 2
 3

and material types. Recommended projection lives, projection curves and future net salvage rates derived from a combined database were reviewed by TGS operations personnel and found to be reasonable for all Service Areas.

Q. DID FOSTER ASSOCIATES CONDUCT A NET SALVAGE ANALYSIS FOR TGS PLANT AND EQUIPMENT?

A. Yes. A five—year moving average analysis of the ratio of realized salvage and removal expense to the associated retirements was used in the 2019 study to a) estimate a realized net salvage rate; b) detect the emergence of historical trends; and c) establish a basis for estimating a future net salvage rate. Cost of removal and salvage opinions obtained from TGS personnel were blended with judgment and historical net salvage indications in developing estimates of the future. Future net salvage rates were estimated from the combined database of the six service areas.

Average net salvage rates for all depreciable plant accounts were estimated using direct dollar weighting of historical retirements with the historical net salvage rate and future retirements (*i.e.*, surviving plant) with the estimated future net salvage rate. Average net salvage rates were distinguished among service areas in the development of vintage–group depreciation rates.

Q. WERE OTHER FACTORS CONSIDERED IN RECOMMENDING FU-TURE NET SALVAGE RATES FOR TGS?

A. Yes. Future net salvage rates currently approved for transmission mains (Account 367.00), distribution mains (Account 376.00) and distribution services (Account 380.00) are significantly lower than historical indications would suggest. Increasing net salvage rates (*i.e.* the ratio of net salvage to retirements) observed over the last ten years is partially attributable to cost of removal stated in current dollars divided by retirements stated in dollars at the year of installation. The cost per foot to retire a gas main today, for example, is no different for a main that was installed yesterday or a main that was installed many years ago. The percentage rate applied to the cost of an old asset to accrue the same cost per unit to retire a new

asset, however, depends upon the relative difference in the cost per unit incurred to install the assets. The percentage rate required to accrue for \$100 per foot of removal expense on a main costing \$50 per foot to install is twice the rate required to accrue the same amount of removal expense on a main costing \$100 per foot to install.

The extent to which past inflation is captured in the ratio of cost of removal to retirements is a function of both the rate of change in the cost of labor required to abandon or remove plant from service and the rate of change in the installed unit cost of plant retired from service. While realized net salvage is independent of the age of retirements, revenue requirements created for cost of removal must be recovered in dollars sufficient to pay the cost of removal or abandonment when the associated plant is retired from service.

A second contributing factor to increasing net salvage rates is costs imposed by local requirements such as mandatory police traffic control or curb—to—curb refurbishment when a much smaller section of roadway is disturbed in a plant replacement project.

ONE Gas in general and TGS in particular became increasingly mindful of the apparent upward trend in net savage rates. Based on an internal investigation, standard material and labor costs were recently assigned to retirement units for both installation and retirement/removal activities. The new standards were adopted in March 2018.

It is the opinion of Foster Associates that it is premature to adjust currently approved net salvage rates for mains and services based on the recently developed retirement unit standards. The magnitude and trend of future net salvage rates will not be observable until the new standards have been applied for a number of years. The recently adopted retirement unit standards may permit a per—unit formulation of future net salvage rates that should be explored in future depreciation

studies. With consideration given to the above factors, Foster Associates is recommending to retain future net salvage rates currently approved for transmission mains (Account 367.00), distribution mains (Account 376.00) and distribution services (Account 380.00)

Q. DID FOSTER ASSOCIATES CONDUCT AN ANALYSIS OF RECORDED DEPRECIATION RESERVES?

A. Yes. Statement C of Attachment REW–2 provides a comparison of recorded, computed and redistributed reserves at December 31, 2018. The recorded reserve for the CGSA was \$167,281,380 or 25.5 percent of the depreciable plant investment. The corresponding computed reserve is \$149,644,601 or 22.8 percent of the depreciable plant investment. A proportionate amount of the measured reserve imbalance of \$17,636,779 will be amortized over the composite weighted–average remaining life of each rate category using the remaining life depreciation rates proposed in this study.

Recorded reserves for the TGS Division at December 31, 2018 were set equal to computed reserves of \$3,391,838 or 67.7 percent of the amortizable plant investment. The equivalency between recorded and computed reserves (a condition required for amortization accounting) was achieved by transferring recorded reserves, in proportion to customer count, from Account 390.10 (Structures and Improvements) from each jurisdiction in which investments were recorded in Account 390.10. The amount of reserve transferred to the TGS Division from CTSA was \$361,194 and \$61,509 was transferred from GCSA.

Q. DID FOSTER ASSOCIATES REBALANCE DEPRECIATION RESERVES IN THE 2019 STUDY?

A. Yes. A rebalancing of recorded reserves is consistent with the objectives of depreciation accounting and Commission precedent.⁴ Offsetting reserve imbalances attributable to both the passage of time and parameter adjustments recommended in

-

⁴ See, for example, GUD Nos. 10488 and 10526.

the current study should be realigned among primary accounts to reduce offsetting imbalances and increase depreciation rate stability. Recorded reserves should also be realigned to eliminate reserve imbalances created by the implementation of amortization accounting.

Recorded reserves were rebalanced by multiplying the calculated reserve for each primary account by the ratio of total recorded reserves to total calculated reserves. The sum of redistributed reserves is, therefore, equal to total recorded reserves before redistribution. Reserves for amortizable categories were adjusted by replacing recorded reserves with current measured theoretical reserves and distributing any reserve imbalances to depreciable categories.

Q. PLEASE DESCRIBE THE DEPRECIATION SYSTEM USED TO DE-VELOP CURRENT DEPRECIATION RATES FOR TGS.

A. With the exception of selected general support asset categories for which amortization accounting has been approved, TGS is currently using a depreciation system composed of the straight–line method, vintage group procedure and, remaining–life technique for all rate categories in the CTSA, GCSA and TGS Division. Amortization accounting is used for general plant categories in which the unit cost of plant items is small in relation to the number of units classified in the account. Plant is retired (*i.e.*, credited to plant and charged to the reserve) as each vintage achieves an age equal to the amortization period. Any realized net salvage for amortizable accounts is netted against current–year vintage additions.

The formulation of an account accrual rate using the vintage–group procedure is given by:

$$Accrual\ Rate = \frac{1.0 - Reserve\ Ratio - Future\ Net\ Salvage\ Rate}{Remaining\ Life}.$$

A remaining—life rate is equivalent to the sum of a whole—life rate and an amortization of any reserve imbalance over the estimated remaining life of a rate category. Stated as an equation, a remaining—life accrual rate is equivalent to

$$Accrual\ Rate = \frac{1.0 - Average\ Net\ Salvage}{Average\ Life} + \frac{Computed\ Reserve - Recorded\ Reserve}{Remaining\ Life}$$

where both the computed reserve and the recorded reserve are expressed as ratios to the plant in service.

Q. WAS THE DEPRECIATION SYSTEM IN THE 2019 STUDY CHANGED FROM THE SYSTEM CURRENTLY APPROVED FOR TGS?

A. No. The system used for all service areas was retained in the 2019 study. Depreciation theory provides that the cost of an asset (or group of assets) should be allocated to operations over an estimate of the economic life of the asset in proportion to the consumption of service potential. It is the opinion of Foster Associates that the objectives of depreciation accounting are being achieved using the currently approved vintage—group procedure, which distinguishes service lives among vintages, and the remaining—life technique, which provides cost apportionment over the estimated weighted—average remaining life of a rate category. It is also the opinion of Foster Associates that amortization accounting remains appropriate for the approved amortization categories.

Q. PLEASE SUMMARIZE THE DEPRECIATION RATES AND ACCRUALS RECOMMENDED FOR TGS IN THE 2019 STUDY.

A. Table 1 below provides a summary of the changes in annual rates and accruals resulting from an application of the parameters and depreciation rates recommended for the proposed CGSA.

| | | Accrual Ra | te | 2019 Annualized Accrual | | | | | |
|---------------|-----------------------------|------------|--------|-------------------------|--------------|-------------|--|--|--|
| Function | Current Proposed Difference | | | Current | Proposed | Difference | | | |
| Α | В | С | D=C-B | E | F | G=F-E | | | |
| Transmission | 1.88% | 1.77% | -0.11% | \$ 135,901 | \$ 127,302 | \$ (8,599) | | | |
| Distribution | 2.31% | 2.51% | 0.20% | 13,899,684 | 15,047,190 | 1,147,506 | | | |
| General Plant | 6.20% | 6.53% | 0.33% | 3,005,043 | 3,164,654 | 159,611 | | | |
| Total | 2.60% | 2.79% | 0.19% | \$ 17,040,628 | \$18,339,146 | \$1,298,518 | | | |

Table 1. Central-Gulf Service Area

Foster Associates is recommending primary account depreciation rates equivalent to a composite rate of 2.79 percent. Depreciation expense is currently accrued at rates that composite to 2.60 percent. The recommended change in the composite depreciation rate is, therefore, an increase of 0.19 percentage points.

A continued application of current rates would provide annualized depreciation expense of \$17,040,628 compared with an annualized expense of \$18,339,146 using the rates developed in this study. The proposed 2019 expense increase is \$1,298,518.

Table 2 below provides a summary of the changes in annual rates and accruals resulting from an application of the parameters and depreciation rates recommended for the CTSA.

| | | Accrual Ra | te | 2019 Annualized Accrual | | | | |
|---------------|-----------------------------|------------|---------|-------------------------|---------------|--------------|--|--|
| Function | Current Proposed Difference | | Current | Proposed | Difference | | | |
| Α | В | С | D=C-B | E | F | G=F-E | | |
| Transmission | 1.88% | 1.77% | -0.11% | \$ 135,901 | \$ 127,302 | \$ (8,599) | | |
| Distribution | 2.24% | 2.48% | 0.24% | 11,469,125 | 12,673,628 | 1,204,503 | | |
| General Plant | 6.21% | 6.67% | 0.46% | 2,425,550 | 2,603,243 | 177,693 | | |
| Total | 2.52% | 2.76% | 0.24% | \$ 14,030,576 | \$ 15,404,173 | \$ 1,373,597 | | |

Table 2. Central Texas Service Area

Foster Associates is recommending primary account depreciation rates equivalent to a composite rate of 2.76 percent. Depreciation expense is currently accrued at rates that composite to 2.52 percent. The recommended change in the composite depreciation rate is, therefore, an increase of 0.24 percentage points.

A continued application of current rates would provide annualized depreciation expense of \$14,030,576 compared with an annualized expense of \$15,404,173 using the rates developed in this study. The proposed 2019 expense increase is \$1,373,597.

Table 3 below provides a summary of the changes in annual rates and accruals resulting from an application of the parameters and depreciation rates recommended for the GCSA.

Foster Associates is recommending primary account depreciation rates equivalent to a composite rate of 2.97 percent. Depreciation expense is currently accrued at rates that composite to 3.05 percent. The recommended change in the

| | | Accrual Ra | te | 2019 Annualized Accrual | | | | | |
|---------------|---------|------------|------------|-------------------------|------------------|----|----------|--|--|
| Function | Current | Proposed | Difference | Current | Current Proposed | | | | |
| Α | В | С | D=C-B | E | F | | G=F-E | | |
| Distribution | 2.72% | 2.66% | -0.06% | \$ 2,430,559 | \$ 2,373,561 | \$ | (56,998) | | |
| General Plant | 6.15% | 5.96% | -0.19% | 579,493 | 561,411 | | (18,082) | | |
| Total | 3.05% | 2.97% | -0.08% | \$ 3,010,052 | \$ 2,934,972 | \$ | (75,080) | | |

Table 3. Gulf Coast Service Area

composite depreciation rate is, therefore, a decrease of 0.08 percentage points.

A continued application of current rates would provide annualized depreciation expense of \$3,010,052 compared with an annualized expense of \$2,934,972 using the rates developed in this study. The proposed 2019 expense decrease is \$75,080.

Table 4 below provides a summary of the changes in annual rates and accruals resulting from the parameters and depreciation rates recommended for the TGS Division.

| | Accrual Rate | | | | 2019 Annualized Accrual | | | | |
|---------------|--------------|----------|------------|----|-------------------------|----|---------|------------|--|
| Function | Current | Proposed | Difference | | Current | Р | roposed | Difference | |
| A | В | С | D=C-B | | E | | F | G=F-E | |
| General Plant | 9.90% | 9.90% | | \$ | 496,158 | \$ | 496,025 | (\$133) | |
| Total | 9.90% | 9.90% | | \$ | 496,158 | \$ | 496,025 | (\$133) | |

Table 4. TGS Division

Foster Associates is recommending primary account depreciation rates equivalent to a composite rate of 9.90 percent. Depreciation expense is currently accrued at rates that composite to 9.90 percent. No change is recommended in the composite depreciation rate.

A continued application of current rates would provide annualized depreciation expense of \$496,158 compared with an annualized expense of \$496,025 using the rates developed in this study. The resulting 2019 expense reduction is \$133, attributable to rounding of trailing digits.

Q. DOES THIS CONCLUDE YOUR DIRECT TESTIMONY?

A. Yes, it does.

EXECUTIVE SUMMARY

INTRODUCTION

This report presents findings and recommendations developed in a 2019 depreciation study conducted by Foster Associates Consultants, LLC (Foster Associates) for gas plant owned and operated by Texas Gas Service (TGS), a division of ONE Gas, Inc., and located in the Central–Gulf Service Area (CGSA). The study also includes TGS Division, supporting common facilities shared among all TGS Service Areas.

Foster Associates is a public utility economic consulting firm offering economic research and consulting services on issues and problems arising from governmental regulation of business. Areas of specialization supported by the firm's Fort Myers office include property life forecasting, technological forecasting, depreciation estimation, and valuation of industrial property.

Foster Associates has undertaken numerous depreciation engagements for both public and privately owned businesses including detailed statistical life studies, analyses of required net salvage rates, and the selection of depreciation systems that will most nearly achieve the goals of depreciation accounting under the constraints of either government regulation or competitive market pricing. Foster Associates is widely recognized for industry leadership in the development of depreciation systems, life analysis techniques and computer software for conducting depreciation and valuation studies.

At the request of TGS, the CGSA was created in the 2019 study by consolidating the Central Texas Service Area (CTSA) and the Gulf Coast Service Area (GCSA). Service areas consolidated into the CGSA are shown in Figure 1 below.

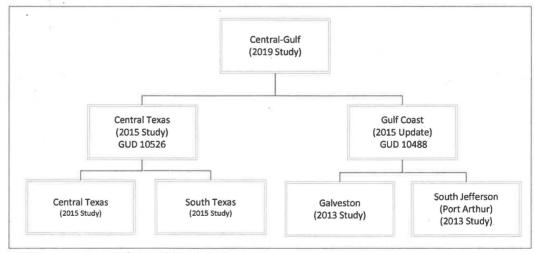

Figure 1. Central-Gulf Consolidated Service Areas

Recommended parameters (*i.e.*, projection curves, projection lives and future net salvage rates) estimated for the CGSA were derived from a 2019 combined analysis of all TGS Service Areas. Proposed depreciation rates for the CGSA were de-

rived from a weighted average of accrual rates developed separately for CTSA and GCSA. Rates for each of the two Service Areas were derived from age distributions of surviving plant, recorded depreciation reserves and average net salvage rates specific to each Service Area.

Current depreciation rates for CTSA and the TGS Division were developed in a 2015 study conducted by Foster Associates based on December 31, 2014 plant and depreciation reserves. Rates developed for CTSA were approved by the Railroad Commission of Texas pursuant to a Settlement Agreement in GUD 10526 (Order dated November 15, 2016). Current depreciation rates for GCSA were developed in a 2015 update of a 2013 study and approved by the Commission pursuant to a Settlement Agreement in GUD 10488 (Order dated May 3, 2016).

The principal findings and recommendations of the 2019 CGSA study are summarized in Section IV (Statements) of this report. A corresponding set of statements is provided for both CGSA and the TGS Division. Depreciation rates for CGSA are also developed separately for CTSA and GCSA.

Statement A provides a comparative summary of current and proposed annual depreciation rates for each rate category. Statement B provides a comparison of current and proposed annual depreciation accruals. Statement C provides a comparison of computed, recorded and redistributed depreciation reserves for each rate category. Statement D provides of summary of the investment and net salvage components of rebalanced reserves. Statement E provides a summary of the components used to obtain weighted—average net salvage rates. Statement F provides a comparative summary of current and proposed parameters including projection life, projection curve and future net salvage rates. Statement F also contains current and proposed statistics including average service lives, average remaining lives, and average net salvage rates.

SCOPE OF STUDY

The principal activities undertaken in the course of the current study included:

- Collection of plant and net salvage data;
- Reconciliation of data to Company official records;
- Discussions with TGS operations and plant accounting personnel;
- Statistical studies of historical retirement activity;
- Estimation of projection lives and retirement dispersion patterns;
- Analysis of gross salvage and cost of removal;
- Analysis and redistribution of recorded depreciation reserves; and
- Development of recommended accrual rates for each rate category.

DEPRECIATION SYSTEM

A depreciation rate is formed by combining the elements of a depreciation system. A depreciation system is composed of a method, a procedure and a technique. A depreciation method (e.g., straight-line) describes the component of the system that determines the acceleration or deceleration of depreciation accruals in relation to either time or use. A depreciation procedure (e.g., vintage group) identifies the level of grouping or sub-grouping of assets within a plant category. The level of grouping specifies the weighting used to obtain composite life statistics for a plant category. A depreciation technique (e.g., remaining-life) describes the life statistic used in the system.

With the exception of selected general support asset categories for which amortization accounting has been adopted, TGS is currently using a depreciation system composed of the straight-line method, vintage group procedure and remaining-life technique for all rate categories in CTSA, GCSA and the TGS Division. Amortization accounting is used for general plant categories in which the unit cost of plant items is small in relation to the number of units classified in the account. Plant is retired (*i.e.*, credited to plant and charged to the reserve) as each vintage achieves an age equal to the amortization period. Any realized net salvage for amortizable accounts is netted against current—year vintage additions.

Depreciation theory provides that the cost of an asset (or group of assets) should be allocated to operations over an estimate of the economic life of the asset in proportion to the consumption of service potential. It is the opinion of Foster Associates that the objectives of depreciation accounting are being achieved using the currently approved vintage—group procedure, which distinguishes service lives among vintages, and the remaining—life technique, which provides cost apportionment over the estimated weighted—average remaining life of a rate category. It is also the opinion of Foster Associates that amortization accounting remains appropriate for the approved amortization categories.

PROPOSED DEPRECIATION RATES

Table 1 below provides a summary of the changes in annual rates and accruals resulting from an application of the parameters and depreciation rates recommended for CGSA.

| | | Accrual Ra | ate | 2019 | Annualized Acc | crual |
|---------------|---------|------------|------------|---------------|----------------|--------------|
| Function | Current | Proposed | Difference | Current | Proposed | Difference |
| Α | В | C | D=C-B | Е | F | G=F-E |
| Transmission | 1.88% | 1.77% | -0.11% | \$ 135,901 | \$ 127,302 | \$ (8,599 |
| Distribution | 2.31% | 2.51% | 0.20% | 13,899,684 | 15,047,190 | 1,147,506 |
| General Plant | 6.20% | 6.53% | 0.33% | 3,005,043 | 3,164,654 | 159,611 |
| Total | 2.60% | 2.79% | 0.19% | \$ 17,040,628 | \$ 18,339,146 | \$ 1,298,518 |

Table 1. Central-Gulf Consolidated Service Area

Foster Associates is recommending primary account depreciation rates equivalent to a composite rate of 2.79 percent. Depreciation expense is currently accrued at rates that composite to 2.60 percent. The recommended change in the composite depreciation rate is, therefore, an increase of 0.19 percentage points.

A continued application of current rates would provide annualized depreciation expense of \$17,040,628 compared with an annualized expense of \$18,339,145 using the rates developed in this study. The proposed 2019 expense increase is \$1,298,518. The computed change in annualized accruals includes a reduction of \$1,050,028 attributable to an amortization of a \$17,636,779 reserve imbalance. The remaining portion of the change is attributable to adjustments in service life and net salvage statistics recommended in the 2019 study. Of the 44 plant accounts included in the 2019 study, Foster Associates is recommending rate reductions for 13 accounts, rate increases for 14 accounts and no rate changes for 17 accounts.

Table 2 below provides a summary of annual rates and accruals for the TGS Division in which all plant accounts are amortizable.

| | | Accrual Ra | ite | 2015 A | Annualized A | ccru | al |
|---------------|---------|------------|------------|------------|--------------|------|---------|
| Function | Current | Proposed | Difference | Current | Proposed | Dif | ference |
| Α | В | С | D=C-B | · E | F | G | F-E |
| General Plant | 9.90% | 9.90% | | \$ 496,158 | \$ 496,025 | \$ | (133) |
| Total | 9.90% | 9.90% | | \$ 496,158 | \$ 496,025 | \$ | (133) |

Table 2. TGS Division

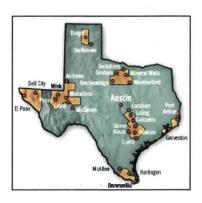

Foster Associates is recommending primary account depreciation rates equivalent to a composite rate of 9.90 percent. Depreciation expense is currently accrued at rates that composite to 9.90 percent. No change is recommended in the composite depreciation rate.

A continued application of current rates would provide annualized depreciation expense of \$496,158 compared with an annualized expense of \$496,025 using the rates developed in this study. The resulting 2019 expense reduction is \$133, attributable to rounding of trailing digits.

COMPANY PROFILE

GENERAL

Texas Gas Service is a division of Tulsa-based ONE Gas, Inc. (NYSE:OGS), one of the largest publicly traded, 100 percent-regulated natural gas utilities in the United States. ONE Gas provides natural gas distribution services to more than 2 million customers in Oklahoma, Kansas and Texas. Headquartered in Tulsa, Oklahoma, its companies include the largest natural gas distributor in Oklahoma and Kansas, and the third largest in Texas, in terms of customers.

ONE Gas is a successor to the company founded in 1906 as Oklahoma Natural Gas Company, and became ONEOK, Inc. (NYSE: OKE) in 1980. ONEOK separated its natural gas distribution business in 2014 to create ONE Gas, Inc.

Texas Gas Service was founded in Wink, Texas in 1929 as Southern Union Gas. The Company grew to become the third largest natural gas distribution company in Texas. In January 2003, ONEOK purchased these Texas assets and named the distribution company Texas Gas Service Company.

GAS UTILITY OPERATIONS

By December 31, 2018, Texas Gas Service owned and operated approximately 10,225 miles of distribution mains and 310 miles of transmission mains. The distribution system consists of 5,248 miles of cathodically protected pipe, 562 miles of unprotected steel pipe, 31miles of cast/wrought iron and 4,384 miles of plastic mains. All transmission mains are cathodically protected.

At the end of 2018, Texas Gas Service maintained 671,336 service lines consisting of 48,936 unprotected lines, 232,898 cathodically protected lines, 216 copper lines and 338,877 plastic lines.

The Company owns and operates 124 city gate stations serving wholesale and retail customers. A total of 14 service centers are located in Central Texas, North Texas, West Texas, the Rio Grande Valley and the Gulf Coast.

The majority of natural gas supply is provided under contracts from a number of suppliers awarded through a competitive bid process. The remainder of natural gas supply is purchased from a combination of direct wellhead production, natural gas processing plants, natural gas marketers and production companies.

CUSTOMER BASE

Texas Gas Service provides natural gas service to over 663,000 customers including residential, commercial, industrial, and transportation. Texas Gas Service serves more than 100 communities. The Company's largest Service Areas are Austin, El Paso, and the Rio Grande Valley. In addition, Texas Gas Service pro-

vides service to customers in Galveston, Port Arthur, Mineral Wells, several towns south of Austin, including Lockhart and several communities in the Permian Basin and the Texas panhandle.

STUDY PROCEDURE

INTRODUCTION

The purpose of a depreciation study is to analyze the mortality characteristics, net salvage rates and adequacy of depreciation accruals and recorded depreciation reserves for each rate category. This study provides the foundation and documentation for recommended changes in depreciation rates used by TGS for CGSA and the TGS Division.

SCOPE

Steps involved in conducting a depreciation study can be grouped into five major tasks:

- Data Collection;
- Life Analysis and Estimation;
- Net Salvage Analysis;
- Depreciation Reserve Analysis; and
- Development of Accrual Rates.

The scope of the 2019 study included a consideration of each of these tasks as described below.

DATA COLLECTION

The minimum database required to conduct a statistical life study consists of a history of vintage year additions and unaged activity—year retirements, transfers and adjustments. These data must be appropriately adjusted for transfers, sales and other plant activity that would otherwise bias the measured service life of normal retirements. Age distributions of surviving plant for unaged data can be estimated by distributing plant in service at the beginning of a study year to prior vintages in proportion to the theoretical amount surviving from a projection or survivor curve identified in the life study. Statistical methods of life analysis used to examine unaged plant data are known as *semi—actuarial techniques*.

A far more extensive database is required to apply statistical methods of life analysis known as *actuarial techniques*. Plant data used in an actuarial life study most often include age distributions of surviving plant at the beginning of a study year and the vintage year, activity year, and dollar amounts associated with normal retirements, reimbursed retirements, sales, abnormal retirements, transfers, corrections, and extraordinary adjustments over a series of prior activity years. An actuarial database may include age distributions of surviving plant at the beginning of the earliest activity year, rather than at the beginning of the study year. Plant additions, however, must be included in a database containing an opening age distribution to derive aged survivors at the beginning of a study year. All activity year transactions with vintage year identification are coded in a database. These data are processed by a computer program and transaction summary reports are created in a format reconcilable to official plant records. The availability of such detailed

information is dependent upon an accounting system that supports aged property records. The Continuing Property Record (CPR) system used by TGS provides aged transactions for all plant accounts.

The database used in the 2019 study was assembled by appending 2018 plant and reserve activity to the statewide data base used in conducting a 2018 update for the North Texas Service Area (NTSA). Detailed accounting entries were assigned transaction codes to identify the nature of the accounting activity. Transaction codes for plant additions, for example, were used to distinguish normal additions from acquisitions, purchases, reimbursements and adjustments. Similar transaction codes were used to distinguish normal retirements from sales, reimbursements, abnormal retirements and adjustments. Transaction codes are also assigned to transfers, gross salvage, cost of removal and other recorded accounting activity.

Age distributions at December 31, 2018 were derived by Foster Associates in a forward–flow calculation in which accounting activity was appended to the database used in the 2018 study. The accuracy and completeness of the assembled data base was validated for 2018 by comparing the beginning plant balance, additions, retirements, transfers and adjustments, and the ending plant balance derived for each rate category to the official plant records of the Company. Derived age distributions at December 31, 2018 were also reconciled to the continuing property records of TGS. Annual plant activity prior to 2018 was reconciled in the 2018 and prior depreciation rate studies.

LIFE ANALYSIS AND ESTIMATION

Life analysis and life estimation are terms used to describe a two-step procedure for estimating the mortality characteristics of a plant category. The first step (*i.e.*, life analysis) is largely mechanical and primarily concerned with history. Statistical techniques are used in this step to obtain a mathematical description of the forces of retirement acting upon a plant category and an estimate of the *projection life* of the account. The mathematical expressions used to describe these life characteristics are known as *survival functions* or *survivor curves*.

The second step (*i.e.*, life estimation) is concerned with predicting the expected remaining life of property units still exposed to forces of retirement. It is a process of blending the results of a life analysis with informed judgment (including expectations about the future) to obtain an appropriate projection life and curve descriptive of the parent population from which a plant account is viewed as a random sample. The amount of weight given to a life analysis will depend upon the extent to which past retirement experience is considered descriptive of the future.

The analytical methods used in a life analysis are broadly classified as actuarial and semi-actuarial techniques. Actuarial techniques can be applied to plant accounting records that reveal the age of a plant asset at the time of its retirement from service. Stated differently, each property unit must be identifiable by date of

installation and age at retirement. Semi-actuarial techniques can be used to derive service life and dispersion estimates when age identification of retirements is not maintained or readily available. Age identification of retirements was available for all plant accounts contained in the 2019 study.

An actuarial life analysis program designed and developed by Foster Associates was used in this study. The first step in an actuarial analysis involves a systematic treatment of the available data for the purpose of constructing an observed life table. A complete life table contains the life history of a group of property units installed during the same accounting period and various probability relationships derived from the data. A life table is arranged by age—intervals (usually defined as one year) and shows the number of units (or dollars) entering and leaving each age—interval and probability relationships associated with this activity. A life table minimally shows the age of each survivor and the age of each retirement from a group of units installed in a given accounting year.

A life table can be constructed in any one of at least five methods. The annual—rate or retirement—rate method was used in this study. The mechanics of the annual—rate method require the calculation of a series of ratios obtained by dividing the number of units (or dollars) surviving at the beginning of an age interval into the number of units (or dollars) retired during the same interval. This so—called "retirement ratio" (or set of ratios) is an estimator of the hazard rate or conditional probability of retirement during an age interval. The cumulative proportion surviving is obtained by multiplying the retirement ratio for each age interval by the proportion of the original group surviving at the beginning of that age interval and subtracting this product from the proportion surviving at the beginning of the same interval. The annual—rate method is applied to multiple groups or vintages by combining the retirements and/or survivors of like ages for each vintage included in the analysis.

The second step in an actuarial analysis involves graduating or smoothing the observed life table and fitting the smoothed series to a family of survival functions. The functions used in the 2019 study are the Iowa—type curves mathematically described by the Pearson frequency curve family. Observed life tables were smoothed by a weighted least—squares procedure in which first, second and third degree orthogonal polynomials were fitted to the observed retirement ratios. The resulting function was expressed as a survivorship function and numerically integrated to obtain an estimate of the projection life for each plant account. The observed proportions surviving were then fitted by a weighted least—squares procedure to the Iowa—curve family (using the projection life derived from the polynomial hazard function) to obtain a mathematical description or classification of the dispersion characteristics of the data. Service life indications derived from the statistical analyses were blended with informed judgment and expectations about the future to obtain an appropriate projection life and curve for each plant category.

The set of computer programs used in the TGS study provides multiple rolling—band and shrinking—band analyses of an account. Observation bands are defined for a "retirement era" that restricts the analysis to retirement activity of all vintages represented by survivors at the beginning of a selected era. In a rolling—band analysis, a year of retirement experience is added to each successive retirement band and the earliest year from the preceding band is dropped. A shrinking—band analysis begins with the total retirement experience available and the earliest year from the preceding band is dropped for each successive band. A progressive—band analysis adds a year of retirement activity to a previous band without dropping earlier years from the analysis. Rolling, shrinking and progressive band analyses are used to detect the emergence of trends in the behavior of the dispersion and projection life.

Options available in the actuarial life analysis program include the width and location of both placement and observation bands; the interval of years included in a selected band analysis; the estimator of the hazard rate (actuarial, conditional proportion retired, or maximum likelihood); the elements to include on the diagonal of a weight matrix (exposures, inverse of age, inverse of variance, or unweighted); and the age at which an observed life table is truncated. The program also provides tabular and graphics output and algorithms for calculating depreciation rates and accruals.

While actuarial and semi-actuarial statistical methods are well suited to an analysis of plant categories containing a large number of homogeneous units (e.g., meters and services), retirement dispersion is also exhibited in plant categories composed of major items of plant that will most likely be retired as a single unit. Property units retired from an integrated system prior to the retirement of the entire facility are viewed as "interim" retirements that will be replaced in order to maintain the integrity of the system. Plant facilities may also be added to the existing system (i.e., interim additions) in order to expand or enhance its productive capacity without extending the service life of the existing system. A proper depreciation rate can be developed for an integrated system using a life—span method. All plant accounts were treated as full mortality categories in the TGS study.

Plant accounting and depreciation reserve records are currently maintained by TGS for six (6) service areas and the TGS Division that supports all service areas. Projection lives and projection curves were estimated in the TGS study from the combined database of the six service areas. Average service lives and remaining service lives were distinguished among service areas in the development of vintage—group depreciation rates.

¹ Service areas include: Borger/Skellytown; North Texas; Rio Grande Valley; West Texas; Central Texas and Gulf Coast.

NET SALVAGE ANALYSIS

Depreciation rates designed to achieve the goals and objectives of depreciation accounting will include a parameter for future net salvage and a variable for average net salvage reflecting both realized and future net salvage rates.

Estimates of net salvage rates applicable to future retirements are most often derived from an analysis of gross salvage and cost of removal realized in the past. An analysis of past experience (including an examination of trends over time) provides a basis for estimating future salvage and cost of removal. However, consideration should also be given to events that may cause deviations from net salvage realized in the past. Among the factors that should be considered are: the age of plant retirements; the portion of retirements likely to be reused; changes in the method of removing plant; the type of plant to be retired in the future; inflation expectations; the shape of the projection life curve; and economic conditions that may warrant greater or lesser weight to be given to net salvage rates observed in the past.

Special consideration should also be given to the treatment of insurance proceeds and other forms of third—party reimbursements credited to the depreciation reserve. A properly conducted net salvage study will exclude such activity from the estimate of future parameters and include the activity in the computation of realized and average net salvage rates.

As noted above, depreciation reserve records are maintained by TGS for six service areas. Future net salvage rates were estimated in the TGS study from the combined database of the six service areas. Average net salvage rates were distinguished among service areas in the development of vintage—group depreciation rates.

A five-year moving average analysis of the ratio of realized salvage and cost of removal to the associated retirements was used in the 2019 study to: a) estimate realized net salvage rates; b) detect the emergence of historical trends; and c) establish a basis for estimating future net salvage rates. Cost of removal and salvage opinions obtained from Company personnel were blended with judgment and historical net salvage indications in developing estimates of the future.

Average net salvage rates are derived from a direct dollar weighting of a) historical retirements with historical (or realized) net salvage rates and b) future retirements (i.e., surviving plant) with the estimated future net salvage rate. Average net salvage rates will change, therefore, as additional years of retirement and net salvage activity become available and as the weighting of future net salvage estimates changes from the installation of subsequent plant additions. The computation of estimated average net salvage rates is shown in Statement E.

Future net salvage rates currently approved for transmission mains (Account

367.00), distribution mains (Account 376.00) and distribution services (Account 380.00) are significantly lower than historical indications would suggest. Increasing net salvage rates (*i.e.* the ratio of net salvage to retirements) observed over the last ten years is partially attributable to cost of removal stated in current dollars divided by retirements stated in dollars at the year of installation. The cost per foot to retire a gas main today, for example, is no different for a main that was installed yesterday or a main that was installed many years ago. The percentage rate applied to the cost of an old asset to accrue the same cost per unit to retire a new asset, however, depends upon the relative difference in the cost per unit incurred to install the assets. The percentage rate required to accrue for \$100 per foot of removal expense on a main costing \$50 per foot to install is twice the rate required to accrue the same amount of removal expense on a main costing \$100 per foot to install.

The extent to which past inflation is captured in the ratio of cost of removal to retirements is a function of both the rate of change in the cost of labor required to abandon or remove plant from service and the rate of change in the installed unit cost of plant retired from service. While realized net salvage is independent of the age of retirements, revenue requirements created for cost of removal must be recovered in dollars sufficient to pay the cost of removal or abandonment when the associated plant is retired from service.

A second contributing factor to increasing net salvage rates is costs imposed by local requirements such as mandatory police traffic control or curb-to-curb refurbishment when a much smaller section of roadway is disturbed in a plant replacement project.

ONE Gas in general and TGS in particular became increasingly concerned over the apparent upward trend in net savage rates. Based on an internal investigation, standard material and labor costs were assigned to retirement units for both installation and retirement/removal activities. The new standards were adopted in March 2018.

It is the opinion of Foster Associates that it is premature to adjust currently approved net salvage rates for mains and services based on the recently developed retirement unit standards. The magnitude and trend of future net salvage rates will not be observable until the new standards have been applied for a number of years. It is also the opinion of Foster Associates that the recently adopted retirement unit standards may permit a per—unit formulation of future net salvage rates that should be explored in future depreciation studies.

Based on the above considerations, it is recommended that currently approved net salvage rates of: -10 percent for transmission mains; -20 percent for distribution mains and -30 percent for services be retained in the current depreciation study. These rates were initially approved for El Paso in GUD No. 9988 (Order dated

December 14, 2010) and subsequently adopted in West Texas GUD No. 10506 (Order dated September 27, 2016, GCSA GUD 10488 and CTSA GUD 10526.

DEPRECIATION RESERVE ANALYSIS

The purpose of a depreciation reserve analysis is to compare the current level of recorded reserves with the level required to achieve the goals or objectives of depreciation accounting if the amount and timing of future retirements and net salvage are realized as predicted. The difference between a required (or theoretical) depreciation reserve and a recorded reserve provides a measurement of the expected excess or shortfall that will remain in the depreciation reserve if corrective action is not taken to eliminate the reserve imbalance.

Unlike a recorded reserve which represents the net amount of depreciation expense charged to previous periods of operations, a theoretical reserve is a measurement of the implied reserve requirement at the beginning of a study year if the timing of future retirements and net salvage is in exact conformance with a survivor curve chosen to predict the probable life of property still exposed to the forces of retirement. Stated differently, a theoretical depreciation reserve is the difference between the recorded cost of plant presently in service and the sum of depreciation expense and net salvage that will be charged in the future if retirements are distributed over time according to a specified retirement frequency distribution.

The survivor or projection curve used in the calculation of a theoretical depreciation reserve is intended to describe forces of retirement that will be operative in the future. However, retirements caused by forces such as accidents, physical deterioration and changing technology seldom, if ever, remain stable over time. It is unlikely, therefore, that a probability or retirement frequency distribution can be identified that will accurately describe the age of plant retirements over the complete life cycle of multiple vintages. It is for this reason that depreciation rates should be reviewed periodically and adjusted for observed or expected changes in the parameters chosen to describe the underlying forces of mortality.

Although reserve records are commonly maintained by various account classifications, the total recorded reserve in relation to the sum of account computed reserves is the most important indicator of the adequacy (or inadequacy) of recorded reserves. If statistical life studies have not been conducted or retirement dispersion has been overlooked in setting depreciation rates, it is likely that some accounts will be over—depreciated and other accounts will be under—depreciated relative to a calculated or theoretical reserve. Differences between a theoretical reserve and a recorded reserve also will arise as a normal occurrence when service lives, dispersion patterns and net salvage estimates are adjusted in the course of depreciation reviews. It is appropriate, therefore, and consistent with group depreciation theory to periodically redistribute or rebalance recorded reserves among the various primary accounts based upon the most recent estimates of service

lives, retirement dispersion and net salvage rates.

A redistribution of recorded reserves is considered appropriate for TGS at this time. Offsetting reserve imbalances attributable to both the passage of time and parameter adjustments recommended in the current study should be realigned among primary accounts to reduce offsetting imbalances and increase depreciation rate stability. Recorded reserves should also be realigned to eliminate reserve imbalances created by the implementation of amortization accounting.

Recorded reserves were rebalanced by multiplying the calculated reserve for each primary account within a function by the ratio of the total recorded reserves to the calculated reserve. The sum of the redistributed reserves is, therefore, equal to the total recorded depreciation reserve before the redistribution. Reserves for general amortizable categories were adjusted by replacing recorded reserves with current measured theoretical reserves and distributing any reserve imbalances to depreciable categories.

Statement C provides a comparison of recorded, computed and redistributed reserves at December 31, 2018. The recorded reserve for the CGSA was \$167,281,380 or 25.5 percent of the depreciable plant investment. The corresponding computed reserve is \$149,644,601 or 22.8 percent of the depreciable plant investment. A proportionate amount of the measured reserve imbalance of \$17,636,779 will be amortized over the composite weighted—average remaining life of each rate category using the remaining life depreciation rates proposed in this study.

Recorded reserves for the TGS Division at December 31, 2018 sere set equal to computed reserves of \$3,391,828 or 67.7 percent of the amortizable plant investment. The equivalency between recorded and computed reserves (a condition required for amortization accounting) was achieved by transferring recorded reserves in proportion to customer counts, from Account 390.10 (Structures and Improvements) from each service area in which investments were recorded in Account390.10, The amount of reserve transferred to the TGS Division from CTSA was \$361,194 and \$61,509 was transferred from GCSA. Reserve amounts totaling \$910,056 transferred from each service area are shown in Figure 2 below.

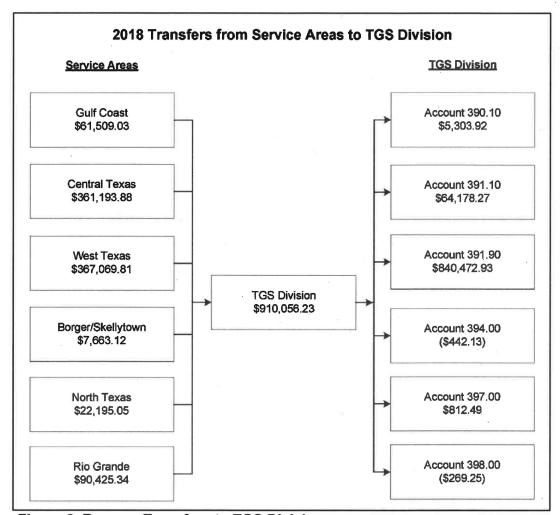

Figure 2. Reserve Transfers to TGS Division

DEVELOPMENT OF ACCRUAL RATES

The goal or objective of depreciation accounting is cost allocation over the economic life of an asset in proportion to the consumption of service potential. Ideally, the cost of an asset—which represents the cost of obtaining a bundle of service units—should be allocated to future periods of operation in proportion to the amount of service potential expended during an accounting interval. The service potential of an asset is the present value of future net revenue (*i.e.*, revenue less expenses exclusive of depreciation and other non—cash expenses) or cash inflows attributable to the use of that asset alone.

Cost allocation in proportion to the consumption of service potential is often approximated by the use of depreciation methods employing time rather than net revenue as the apportionment base. Examples of time-based methods include sinking-fund, straight-line, declining balance, and sum-of-the-years' digits. The

advantage of a time-based method is that it does not require an estimate of the remaining amount of service potential an asset will provide or the amount of potential actually consumed during an accounting interval. Using a time-based allocation method, however, does not change the goal of depreciation accounting. If it is predictable that the net revenue pattern of an asset will either decrease or increase over time, then an accelerated or decelerated time-based method should be used to approximate the rate at which service potential is actually consumed.

The time period over which the cost of an asset will be allocated to operations is determined by the combination of a procedure and a technique. A depreciation procedure describes the level of grouping or sub—grouping of assets within a plant category. The broad group, vintage group, equal—life group, and item (or unit) are a few of the more widely used procedures. A depreciation technique describes the life statistic used in a depreciation system. Whole—life and remaining—life (or expectancy) are the most common techniques.

Depreciation rates recommended in the 2019 study were developed using the currently approved system composed of the straight—line method, vintage group procedure and remaining—life technique. This formulation of the accrual rate is equivalent to a straight—line method, vintage group procedure and whole—life technique with amortization of reserve imbalances over the estimated composite remaining life of each rate category.

As noted earlier, plant accounting and depreciation reserve records are maintained by TGS for six (6) service areas and the TGS Division that supports all service areas. Projection lives, projection curves and future net salvage rates were estimated in the TGS study from the combined database of the six service areas. Average service lives and remaining service lives were distinguished among service areas in the development of generation arrangements unique to each service area. Average net salvage rates were similarly distinguished from a direct dollar weighting of a) historical retirements with historical (or realized) net salvage rates and b) future retirements (i.e., surviving plant) with estimated future net salvage rates unique to each service area.

It is the opinion of Foster Associates that the vintage group procedure will remain appropriate for TGS, provided depreciation studies are conducted periodically and parameters are routinely adjusted to reflect changing operating conditions. Although the emergence of economic factors such as restructuring and performance based regulation may ultimately encourage abandonment of the straight–line method, no attempt was made in the current study to address this concern.

It is also the opinion of Foster Associates that amortization accounting included in this study is consistent with the goals and objectives of depreciation accounting derived from the matching and expense recognition principles of accounting. Amortization accounting for the selected general plant categories relieves TGS of the burden of maintaining detailed plant records for numerous plant items in which the unit cost is small in relation to the cost of tracking the disposition of the assets.

The treatment of amortization accounts in the current study was designed to produce annualized accruals equivalent to applying a rate equal to the reciprocal of an amortization period to plant balances after retirements have been recorded. Applying a rate equal to the reciprocal of the amortization period to plant balances prior to posting retirements would overstate the annualized amortization expense. Accrual rates contained in Statement A have been applied to plant balances containing vintages that will be retired upon approval and implementation of amortization accounting. Accrual rates contained in Statement A should be applied to current plant balances. Accrual rates equal to the reciprocal of the amortization period should be applied to these categories after plant balances have been reduced by all vintages that have achieved an age equal to the amortization period.

STATEMENTS

INTRODUCTION

This section provides a comparative summary of depreciation rates, annual depreciation accruals, recorded, computed and redistributed depreciation reserves, and current and proposed service life and net salvage parameters recommended for TGS plant and equipment categories. The content of these statements is briefly described below.

- Statement A provides a comparative summary of current and proposed annual depreciation rates using the vintage group procedure, remaining—life technique.
- Statement B provides a comparison of current and proposed annualized 2019 depreciation accruals derived from the depreciation rates contained in Statement A.
- Statement C provides a comparison of recorded, computed and redistributed reserves for each rate category at December 31, 2018.
- Statement D provides a summary of the investment and net salvage components of rebalanced reserves.
- Statement E provides a summary of the components used to obtain weighted average net salvage rates.
- Statement F provides a comparative summary of current and proposed parameters and statistics including projection life, projection curve, average service life, average remaining life, and average and future net salvage rates.

Current depreciation accruals shown on Statement B are the product of plant investments (Column B) and current depreciation rates shown on Statement A. These are the effective rates used by TGS for the mix of investments recorded at December 31, 2018. Similarly, proposed depreciation accruals shown on Statements B are the product of plant investments and proposed depreciation rates shown on Statement A. Proposed remaining life accrual rates are given by:

Accrual Rate =
$$\frac{1.0 - Reserve \, Ratio - Future \, Net \, Salvage \, Rate}{Remaining \, Life}$$

This formulation of a remaining-life accrual rate is equivalent to

$$Accrual\ Rate = \frac{1.0 - Average\ Net\ Salvage}{Average\ Life} + \frac{Computed\ Reserve - Recorded\ Reserve}{Remaining\ Life}$$

where Average Net Salvage, Computed Reserve and Recorded Reserve are expressed in percent.

ANALYSIS

INTRODUCTION

This section provides an explanation of the supporting schedules developed in the TGS depreciation study to estimate appropriate projection curves, projection lives and net salvage statistics for each rate category. The form and content of the schedules developed for an account depend upon the method of analysis adopted for the category.

This section also includes an example of the supporting schedules developed for Account 376.00 – Distribution Mains. Documentation for all other plant accounts is contained in the study work papers. Supporting schedules developed in the TGS study include:

Schedule A – Generation Arrangement;

Schedule B – Age Distribution;

Schedule C – Plant History;

Schedule D – Actuarial Life Analysis;

Schedule E – Graphics Analysis; and

Schedule F – Historical Net Salvage Analysis.

The format and content of these schedules are briefly described below.

SCHEDULE A - GENERATION ARRANGEMENT

The purpose of this schedule is to obtain appropriate weighted—average life statistics for a rate category. A weighted—average remaining—life is the sum of Column H divided by the sum of Column I. A weighted average life is the sum of Column C divided by the sum of Column I.

It should be noted that the generation arrangement does not include parameters for net salvage. Computed Net Plant (Column H) and Accruals (Column I) must be adjusted for net salvage to obtain a correct measurement of theoretical reserves and annualized depreciation accruals. The following table provides a description of each column in the generation arrangement.

| Column | Title | Description |
|--------|--------------------|---|
| Α | Vintage | Vintage or placement year of surviving plant. |
| В | Age | Age of surviving plant at beginning of study year. |
| С | Surviving Plant | Actual dollar amount of surviving plant. |
| D | Average Life | Estimated average life of each vintage. This statistic is the sum of the realized life and the unrealized life, which is the product of the remaining life (Column E) and the theoretical proportion surviving. |
| E | Remaining Life | Estimated remaining life of each vintage. |
| F | Net Plant Ratio | Theoretical net plant ratio of each vintage. |
| G | Allocation Factor | A pivotal ratio which determines the amortization period of the difference between the recorded and computed |
| Н | Computed Net Plant | Plant in service less theoretical reserve for each vintage. |
| 1 | Accrual | Ratio of computed net plant (Column H) and remaining life (Column E). |

Table 3. Generation Arrangement

SCHEDULE B - AGE DISTRIBUTION

This schedule provides the age distribution and realized life of surviving plant shown in Column C of the Generation Arrangement (Schedule A). The format of the schedule depends upon the availability of either aged or unaged data. Derived additions for vintage years older than the earliest activity year in an account for unaged data are obtained from the age distribution of surviving plant at the beginning of the earliest activity year. The amount surviving from these vintages is shown in Column D. The realized life (Column G) is derived from the dollar years of service provided by a vintage over the period of years the vintage has been in service. Plant additions for vintages older than the earliest activity year in an account are represented by the opening balances shown in Column D.

The computed proportion surviving (Column D) for unaged data is derived from a computed mortality analysis. The average service life displayed in the title block is the life statistic derived for the most recent activity year, given the derived age distribution at the start of the year and the specified retirement dispersion. The realized life (Column F) is obtained by finding the slope of an SC retirement dispersion, which connects the computed survivors of a vintage (Column E) to the recorded vintage addition (Column B). The realized life is the area bounded by the SC dispersion, the computed proportion surviving and the age of the vintage.

SCHEDULE C - PLANT HISTORY

An Unadjusted Plant History schedule provides a summary of recorded plant data extracted from the continuing property records maintained by the Company. Activity year total amounts shown on this schedule for aged data are obtained from a historical arrangement of the database in which all plant accounting transactions

are identified by vintage and activity year. Activity year totals for unaged data are obtained from a transaction file without vintage identification. Information displayed in the unadjusted plant history is consistent with regulated investments reported internally by the Company.

An Adjusted Plant History schedule provides a summary of recorded plant data extracted from the continuing property records maintained by the Company with sales, transfers, and adjustments appropriately aged for depreciation study purposes. Activity year total amounts shown on this schedule for aged data are obtained from a historical arrangement of the data base in which all plant accounting transactions are identified by vintage and activity year. Ageing of adjusting transactions is achieved using transaction codes that identify an adjusting year associated with the dollar amount of a transaction. Adjusting transactions processed in the adjusted plant history are not aged in the Company's records or in the unadjusted plant history.

SCHEDULE D - ACTUARIAL LIFE ANALYSIS

These schedules provide a summary of the dispersion and life indications obtained from an actuarial life analysis for a specified placement band. The observation band (Column A) is specified to produce a rolling—band, shrinking—band, or progressive—band analysis depending upon the movement of the end points of the band. The degree of censoring (or point of truncation) of the observed life table is shown in Column B for each observation band. The estimated average service life, best fitting Iowa dispersion, and a statistical measure of the goodness of fit are shown for each degree polynomial (First, Second, and Third) fitted to the estimated hazard rates. Options available in the analysis include the width and location of both the placement and observation bands; the interval of years included in a selected rolling, shrinking, or progressive band analysis; the estimator of the hazard rate (actuarial, conditional proportion retired, or maximum likelihood); the elements to include on the diagonal of a weight matrix (exposures, inverse of age, inverse of variance, or unweighted); and the age at which an observed life table is truncated.

Estimated projection lives (Columns C, F, and I) are flagged with an asterisk if negative hazard rates are indicated by the fitted polynomial. All negative hazard rates are set equal to zero in the calculation of the graduated survivor curve. The Conformance Index (Columns E, H, and K) is the square root of the mean sumof–squared differences between the observed proportions surviving and the best fitting Iowa curve. A Conformance Index of zero would indicate a perfect fit.

SCHEDULE E - GRAPHICS ANALYSIS

This schedule provides a graphics plot of a) the observed proportion surviving for a selected placement and observation band; b) the statistically best fitting Iowa dispersion and derived average service life; and c) the projection curve and projection life selected to describe future forces of mortality.

The graphics analysis also provides a plot of the observed hazard rates and graduated hazard function for a selected placement and observation band. The estimator of the hazard rates and weighting used in fitting orthogonal polynomials to the observed data are displayed in the title block of the displayed graph.

SCHEDULE F - HISTORICAL NET SALVAGE ANALYSIS

This schedule provides a moving average analysis of the ratio of realized net salvage (Column I) to the associated retirements (Column B). The schedule also provides a moving average analysis of the components of net salvage related to retirements. The ratio of gross salvage to retirements is shown in Column D and the ratio of cost of removal to retirements is shown in Column G.

AFFIDAVIT OF RONALD E. WHITE

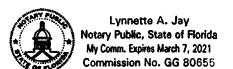

BEFORE ME, the undersigned authority, on this day personally appeared Ronald E. White who having been placed under oath by me did depose as follows:

- 1. "My name is Ronald E. White. I am over the age of eighteen (18) and fully competent to make this affidavit. I am employed as President for Foster Associates Consultants, LLC. The facts stated herein are true and correct based upon my personal knowledge.
- 2. I have prepared the foregoing Direct Testimony and the information contained in this document is true and correct to the best of my knowledge."

 Further affiant sayeth not.

Ronald E. White, Ph.D.

SUBSCRIBED AND SWORN TO BEFORE ME by the said Ronald E. White on this 25th day of November, 2019.

Notary Public in and for the State of Florida

| 1 | | DIRECT TESTIMONY OF BRUCE H. FAIRCHILD |
|----|-----------|--|
| 2 | | I. <u>INTRODUCTION</u> |
| 3 | Q. | PLEASE STATE YOUR NAME AND BUSINESS ADDRESS. |
| 4 | A. | Bruce H. Fairchild, 3907 Red River, Austin, Texas 78751. |
| 5 | Q. | BY WHOM ARE YOU EMPLOYED AND IN WHAT POSITION? |
| 6 | A. | I am a principal in Financial Concepts and Applications, Inc. ("FINCAP"), a firm |
| 7 | | engaged in financial, economic, and policy consulting to business and government. |
| 8 | A. | Qualifications |
| 9 | Q. | DESCRIBE YOUR EDUCATIONAL BACKGROUND, PROFESSIONAL |
| 10 | | QUALIFICATIONS, AND PRIOR EXPERIENCE. |
| 11 | A. | I hold a BBA degree from Southern Methodist University and MBA and PhD |
| 12 | | degrees from the University of Texas at Austin. I am also a Certified Public |
| 13 | | Accountant. My previous employment includes working in the Controller's |
| 14 | | Department at Sears, Roebuck and Company and serving as Assistant Director of |
| 15 | | Economic Research at the Public Utility Commission of Texas ("PUCT"). I have |
| 16 | | also been on the business school faculties at the University of Colorado at Boulder |
| 17 | | and the University of Texas at Austin, where I taught undergraduate and graduate |
| 18 | | courses in finance and accounting. |
| 19 | Q. | BRIEFLY DESCRIBE YOUR EXPERIENCE IN UTILITY-RELATED |
| 20 | | MATTERS. |
| 21 | A. | While at the PUCT, I assisted in managing a division comprised of approximately |
| 22 | | twenty-five professionals responsible for financial analysis, cost allocation and rate |
| 23 | | design, economic and financial research, and data processing systems. I testified |
| 24 | | on behalf of the PUCT staff in numerous cases involving most major investor- |

owned and cooperative electric, telephone, and water/sewer utilities in the state regarding a variety of financial, accounting, and economic issues. Since forming FINCAP in 1979, I have participated in a wide range of analytical assignments involving utility-related matters on behalf of utilities, industrial consumers, municipalities, and regulatory commissions. I have also prepared and presented expert testimony before a number of regulatory authorities addressing revenue requirements, cost allocation, and rate design issues for gas, electric, telephone, and water/sewer utilities. I have been a frequent speaker at regulatory conferences and seminars and have published research concerning various regulatory issues. A resume that contains the details of my experience and qualifications is attached as Appendix A, with Appendix B listing my prior testimony before regulatory agencies since leaving the PUCT.

B. Overview

14 Q. WHAT IS THE PURPOSE OF YOUR TESTIMONY?

- 15 A. My purpose is to recommend an overall rate of return to apply to Texas Gas Service
 16 Company's ("TGS") invested capital for its proposed Central-Gulf Service Area
 17 ("CGSA").
- 18 Q. WHAT IS THE ROLE OF RATE OF RETURN IN SETTING A UTILITY'S
- **RATES?**
- A. Rate of return serves to compensate investors for the use of their capital to finance
 the plant and equipment necessary to provide utility service to customers. Investors
 only commit money in anticipation of earning a return on their investment
 commensurate with that from other investment alternatives having comparable
 risks. Consistent with both sound regulatory economics and the standards specified

in the U.S. Supreme Court cases of *Bluefield Water Works & Improvement Co.*, (1923) and *Hope Natural Gas Co.*, (1944), rates should provide the utility a reasonable opportunity to earn a rate of return sufficient to: 1) fairly compensate capital presently invested in the utility; 2) enable the utility to offer a return adequate to attract new capital on reasonable terms; and 3) maintain the utility's financial integrity.

A.

Q. IN GENERAL, HOW HAVE YOU DEVELOPED YOUR RECOMMENDED RATE OF RETURN FOR TGS?

My evaluation begins with a brief review of the operations and finances of TGS and general conditions in the natural gas industry and capital markets, including a discussion of the actions the Federal Reserve Board ("Fed") is taking in the aftermath of the financial crisis and Great Recession. With this background, I next develop a mix of investor-supplied capital (*i.e.*, debt and equity) to be used as weightings in calculating an overall rate of return. An average cost of debt applicable to the debt component of the capital structure is then calculated. Next, various analyses are conducted to determine a fair rate of return on common equity ("ROE"). These analyses include applications of the discounted cash flow ("DCF") model, capital asset pricing model ("CAPM"), risk premium method, and comparable earnings method to develop a cost of equity range, from which my recommended ROE for TGS is selected and evaluated for reasonableness. Finally, these components are combined to calculate my recommended overall rate of return for the proposed CGSA.

C. Summary of Conclusions

2 Q. WHAT IS YOUR RATE OF RETURN RECOMMENDATION?

- A. As developed on Schedule BHF-1, I recommend an overall rate of return for TGS on the invested capital in its proposed CGSA of 7.93%. This rate of return is based on capital structure ratios of 37.88% debt and 62.12% equity, a cost of debt of 4.53%, and an ROE of 10.0%.
- 7 Q. WHAT ARE YOUR RECOMMENDED CAPITAL STRUCTURE RATIOS
- **FOR TGS?**

1

9

10

11

12

13

14

15

16

17

18

19

20

A. My recommended capital structure ratios of 37.88% debt and 62.12% equity are those of ONE Gas, Inc. ("ONE Gas"), of which TGS is a division, as of the end of the test year, June 30, 2019. These ratios are consistent with the capital structure ONE Gas has maintained since it was spun off from ONEOK, Inc. ("ONEOK") into a stand-alone company on January 31, 2014. They reflect ONE Gas' need to establish a credit profile supporting an industry standard, single-A bond rating that enables it to attract new capital on reasonable terms and maintain its financial integrity. Besides being TGS's actual capital structure and conforming to the normal practice of the Railroad Commission of Texas ("Commission"), ONE Gas' test year-end capital structure ratios are generally consistent with and fall within the range of those historically maintained by other local natural gas distribution companies ("LDCs") and approved in LDC rate cases before the Commission.

21 Q. WHAT IS YOUR RECOMMENDED COST OF DEBT FOR TGS?

A. My recommended 4.53% cost of debt is the average cost of ONE Gas' approximately \$1.285 billion of long-term debt at the June 30, 2019 test year-end.

| 0. | WHAT IS | YOUR | RECOM | MENDED | ROE FOI | R TGS? |

1

2

3

4

5

6

7

8

9

10

11

12

13

14

A. Based on applications of the DCF, CAPM, risk premium, and comparable earnings methods to a proxy group of publicly traded LDCs, I conclude that investors currently require a ROE from a publicly traded LDC in the range of 9.1% to 10.1%. Despite recent increases in stock prices and declines in interest rates, the cost of all capital, including common equity, is projected to be considerably higher over the next few years. This implies that the ROE for TGS should be selected from the top of the cost of equity range, which is slightly offset by ONE Gas' capital structure ratios that indicate modestly lower financial risk relative to the LDC proxy group. Therefore, I recommend an ROE for TGS just below the top of my 9.1% to 10.1% cost of equity range, or 10.0%. The reasonableness of my recommended ROE is evidenced by the fact that it falls within the 9.5% to 10.1% range the Commission has granted LDCs in Texas the last approximately five years.

II. FUNDAMENTAL ANALYSIS

15 Q. WHAT IS THE PURPOSE OF THIS SECTION OF YOUR TESTIMONY?

- A. As a predicate to subsequent quantitative analyses, this section briefly reviews the operations and finances of TGS and ONE Gas. It also examines the natural gas distribution industry along with current conditions in the capital markets and the U.S. economy.
- 20 A. Texas Gas Service Company
- 21 Q. BRIEFLY DESCRIBE TGS.
- A. TGS is the operating division of ONE Gas that distributes natural gas to approximately 640,000 sales and transport customers in 100 communities throughout Texas. In addition to its proposed CGSA, which includes the major

cities of Austin, Port Arthur and Galveston, TGS also serves the Rio Grande Valley
and the city of El Paso. In total, TGS serves approximately 14% of the natural gas
customers in Texas. At June 30, 2019, TGS had total assets of approximately \$1.4
billion, with operating revenues for the previous twelve months being
approximately \$391 million.

Q. BRIEFLY DESCRIBE ONE GAS.

A.

A. ONE Gas is the largest natural gas distributor in Oklahoma and Kansas, and the third largest in Texas, serving a total of approximately 2.2 million customers. ONE Gas was created when ONEOK spun off its natural gas distribution operations into a separate entity on January 31, 2014. At June 30, 2019, ONE Gas had total assets of approximately \$5.4 billion, with revenues during 2018 totaling more than \$1.6 billion. ONE Gas' common stock is traded on the New York Stock Exchange and its debt is rated A by Standard & Poor's Financial Services LLC ("S&P") and A2 by Moody's Investors Service, Inc. ("Moody's").

15 B. Natural Gas Distribution Industry

16 Q. PLEASE DESCRIBE THE NATURAL GAS DISTRIBUTION INDUSTRY.

LDCs normally transport, deliver, and sell natural gas from receipt points on interand intrastate pipelines to households and businesses. They often have an exclusive right to operate in a specified geographic area, with their rates and operations being subject to the jurisdiction of state or local regulatory authorities. Historically, LDCs provided only "bundled" service, which included the transportation, distribution, and natural gas itself, although some now allow customers to choose their own gas supplier, with the LDC providing the delivery and service of that gas. Structural changes, which have occurred on both the demand and supply sides, have

| 1 | eroded the traditional monopoly status of many gas utilities, with LDCs |
|---|---|
| 2 | experiencing "bypass" as large commercial and industrial customers seek to acquire |
| 3 | gas supplies at the lowest possible prices and, in the process, abandon traditional |
| 4 | "full-service" utility suppliers. |

5 Q. WHAT RISKS DO LDCS FACE THAT ARE OF CONCERN TO

A.

INVESTORS?

LDCs face a variety of market, operating, capital-related, and regulatory risks. The natural gas business is increasingly competitive and complex, with LDCs having to vie with electric companies, oil and propane suppliers, and, in some cases, energy marketers and trading companies. Moreover, the demand for natural gas is impacted by energy efficiency and technological advances adversely affecting growth over time, especially in the residential sector. The financial results of LDCs are also heavily dependent on general economic conditions, not only in terms of the overall activity of businesses, but also in the growth of households and use per customer.

With respect to operations, gas distribution inherently involves a variety of hazards and operating risks, including the need to replace aging and obsolete infrastructure, leaks, accidents, and third-party damages. Many LDCs are faced with substantial known and unknown environmental costs (e.g., pipeline integrity testing) and post-retirement employee costs (e.g., pensions and medical benefits). Inflation and other increases could adversely impact an LDC's ability to control operating expenses and costs, and interruptions in gas supply, strikes, natural disasters, security breaches, and terrorist activities could disrupt or shut down

| 1 | operations. Finally, most LDCs are involved in ongoing legal or administrative |
|---|--|
| 2 | proceedings before courts and governmental bodies related to a variety of matters |
| 3 | (e.g., general claims, taxes, environmental issues, billing, and credit and collection |
| 4 | matters), which could result in detrimental outcomes. |

Q. PLEASE ELABORATE ON THE CAPITAL AND REGULATORY RISKS FACED BY LDCS.

A.

Regarding capital-related risks, virtually all LDCs are facing significant infrastructure improvements to meet customer service requirements and improve system reliability, as well as satisfy a number of government-mandated safety initiatives. The ability of LDCs to fund these and other capital expenditures is affected by a variety of factors, including regulatory decisions, maintenance of a sufficient bond rating, capital market conditions (e.g., interest rates), and availability of credit facilities and access to capital markets. In addition, LDCs' ability to retain and attract capital is subject to changes in state and federal tax laws and accounting standards, which may adversely affect their cash flows and financial condition.

Finally, because most aspects of an LDC's operations (e.g., rates; operating terms and conditions of service; types of services offered; construction of new facilities; the integrity, safety, and security of facilities and operations; acquisition, extension, or abandonment of services or facilities; reporting and information posting requirements; maintenance of accounts and records; and relationships with affiliate companies) are subject to government oversight, investors are understandably concerned with rate, safety, and environmental regulation.

Potential changes in laws, regulations, and policies, as well as the inherent uncertainty surrounding regulatory decisions, all represent significant risks to LDCs.

11

12

13

14

15

16

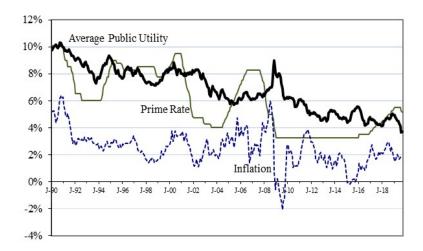

17

A.

Q. WHAT HAS BEEN THE PATTERN OF INTEREST RATES OVER THE

6 LAST TWO DECADES?

Average long-term public utility bond rates, the borrowing prime rate, and inflation as measured by the Consumer Price Index since 1990 are plotted in the graph below. After rising to approximately 10% in mid-1990, the average yield on long-term public utility bonds generally fell because of monetary and fiscal policies designed to keep the economy growing. This ended abruptly with the 2008 financial market meltdown and global recession. Investors became exceedingly risk averse, causing interest rates on corporate bonds to spike, while government policies pushed down short-term interest rates and depressed economic conditions and lower energy prices reduced inflation. Since that time, various actions by the Fed to stimulate the economy through easy-money policies resulted in short- and long-term interest rates reaching record low levels:

1 Q. HOW HAS THE MARKET FOR COMMON EQUITY CAPITAL 2

PERFORMED OVER THIS SAME PERIOD?

3

4

5

6

7

8

9

10

11

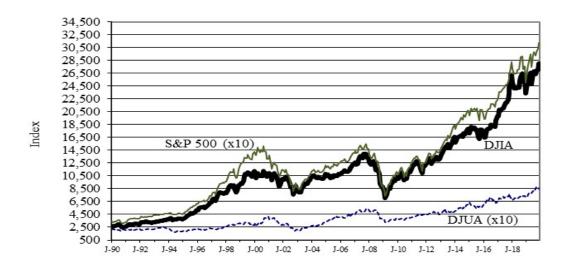

12

13

14

A.

Between 1990 and early 2000, stock prices pushed steadily higher as the longest bull market in United States history continued unabated. In mid-2000, mounting concerns over prospects for future growth, particularly for firms in the high technology and telecommunications sectors, pushed equity prices lower, in some cases precipitously. Common stock prices generally recovered and reached record highs, buoyed in large part by widespread acquisition activity, until the capital market crisis and global recession hit in 2008. Stock prices tumbled by some 40%, and although they have fully recovered and reached all-time highs, the market remains volatile, with share values routinely changing in full percentage points during a single day's trading. The graph below plots the performances of the Dow-Jones Industrial Average, the S&P 500, and the Dow Jones Utility Average since 1990 (the latter two indices were scaled for comparability):

Q. WHAT IS THE OUTLOOK FOR THE U.S. ECONOMY?

A.

The U.S. economy has fully recovered from the Great Recession precipitated by the 2007-2009 financial crisis that led the Fed to implement extraordinary programs, which included reducing the federal funds rate to effectively zero and purchasing some \$4.5 trillion in mortgage-backed and Treasury securities. In December 2015, the Fed began to return to more "normal" monetary policies by increasing the target federal funds rate unwinding its massive portfolio of securities. As foreign economies slowed and a trade war persisted, the U.S. economic outlook began to turn in early 2019, with an inverted yield curve portending a recession. The Fed responded by reducing the federal funds rate and discontinuing the unwinding of its \$3.8 trillion securities portfolio.

The economic outlook is now more uncertain than ever, in large part due to continued global economic and trade uncertainty. That uncertainty, combined with overhanging recession fears, aggravate the normal uncertainties faced by the U.S.

| 1 | | economy and capital markets, which is evidenced by unusually greater stock and |
|----|----|---|
| 2 | | bond price volatility. Although stock prices have recently increased and interest |
| 3 | | rates fallen, these are largely regarded as temporary. For example, The Value Line |
| 4 | | Investment Survey ("Value Line") and the Blue Chip Financial Forecasts both |
| 5 | | project interest rates on 30-year Treasury bonds to increase from their current level |
| 6 | | of approximately 2.1% to 3.6% in the 2023 time-frame, which implies a higher cost |
| 7 | | of all capital, including common equity, over the next few years. |
| 8 | | III. CAPITAL STRUCTURE |
| 9 | Q. | WHAT IS THE PURPOSE OF THIS SECTION OF YOUR TESTIMONY? |
| 10 | A. | The purpose of this section is to recommend capital structure ratios for use in |
| 11 | | calculating an overall rate of return for the proposed CGSA. |
| 12 | Q. | WHAT IS THE ROLE OF CAPITAL STRUCTURE IN SETTING A |
| 13 | | UTILITY'S RATE OF RETURN? |
| 14 | A. | A utility's capital structure reflects the mix of capital - debt, preferred stock (if any), |
| 15 | | and common equity - used to finance the utility's assets. The proportions of a |
| 16 | | utility's total capitalization attributable to each source of capital are typically used |
| 17 | | to weight the cost of debt, cost of preferred stock, and ROE in calculating an overall |
| 18 | | rate of return. |
| 19 | Q. | HOW DOES THE USE OF DIFFERENT AMOUNTS OF DEBT AND |
| 20 | | EQUITY IN A FIRM'S CAPITAL STRUCTURE AFFECT THE RATES OF |
| 21 | | RETURN REQUIRED BY INVESTORS? |
| 22 | A. | A higher debt ratio, or lower common equity ratio, generally translates into |
| 23 | | increased financial risk for all investors. A greater amount of debt means more |
| 24 | | investors have a senior claim on available cash flow, thereby reducing the certainty |

that each will receive his contractual payments. This, in turn, increases the risks to which lenders are exposed, and they require correspondingly higher rates of interest for bearing this increased risk. From common shareholders' viewpoint, higher debt ratios mean that there are proportionately more investors ahead of them, thereby increasing the uncertainty as to the amount of cash flow, if any, that remains. Again, in accordance with the fundamental risk-return trade-off principle to be discussed in greater detail later, common shareholders require a correspondingly higher rate of return to compensate them for bearing the greater financial risk associated with a lower common equity ratio.

1

2

3

4

5

6

7

8

9

10 Q. WHAT SOURCES OF CAPITAL ARE USED TO FINANCE TGS'S 11 INVESTMENT IN UTILITY PLANT?

- A. As an operating division of ONE Gas, TGS has no independent financing, and it relies entirely on capital supplied by ONE Gas to finance its investment in assets, including those in its proposed CGSA.
- 15 Q. WHAT ARE THE SOURCES OF CAPITAL USED TO FINANCE ONE 16 GAS?
- A. ONE Gas' permanent financing at test year-end, June 30, 2019, is shown below (dollar amounts in 000s). Also calculated are ONE Gas' test year-end capital structure ratios, which were 37.88% debt and 62.12% equity:

| Capital Component | Amount | % of Total |
|-------------------|--------------|------------|
| Long-term Debt | \$ 1,285,811 | 37.88% |
| Common Equity | 2,108,463 | 62.12 |
| Total | \$ 3,153,466 | 100.00% |

| 1 | Ų. | WHAT CONSIDERATIONS WENT INTO HOW ONE GAS WAS |
|-----------------------|----|--|
| 2 | | FINANCED WHEN IT WAS SPUN OFF FROM ONEOK? |
| 3 | A. | The Registration Form 10 filed with the Securities and Exchange Commission in |
| 4 | | connection with the spin-off of ONE Gas from ONEOK stated: |
| 5 6 7 8 9 | | Our capital structure was designed to obtain investment grade credit ratings that are higher than the current credit ratings of ONEOK and similar to those of our natural gas utility peers and to provide us with the financial flexibility to maintain our current level of operations and to continue to invest in our natural gas distribution system. |
| 10 | | Toward this objective, ONE Gas was initially financed with approximately 40% |
| 11 | | debt and 60% equity. This capital structure was instrumental in ONE Gas being |
| 12 | | rated A- by S&P, which has since been increased to A, and A2 by Moody's. As |
| 13 | | shown on Schedule BHF-9, single-A is the average bond rating of the publicly |
| 14 | | traded LDCs included in Value Line's Natural Gas Utility industry that are |
| 15 | | predominantly involved in natural gas distribution and are not affected by an |
| 16 | | acquisition or divestiture. Also, ONE Gas' single-A ratings are an improvement |
| 17 | | over the triple-B bond ratings of ONEOK prior to the spin off. Of additional |
| 18 | | importance is that ONE Gas' capital structure and single-A bond ratings enabled it |
| 19 | | to issue its initial debt on favorable terms, which has been a direct benefit to |
| 20 | | customers. |
| 21 | Q. | HAS ONE GAS MAINTAINED SIMILAR CAPITAL STRUCTURE |
| 22 | | RATIOS SINCE ITS INCEPTION? |
| 23 | A. | Yes. Schedule BHF-2 displays the capital structure of ONE Gas at each year-end |
| 24 | | since it became a separate entity in 2014. As evidenced there, ONE Gas' capital |
| 25 | | structure ratios have generally remained in the approximately 40% debt and 60% |

equity vicinity over this period, although its equity ratio has increased slightly as
earnings have been retained and reinvested in the Company's distribution system.

Most recently, ONE Gas increased its debt outstanding by \$100 million when it
refinanced \$300 million that matured earlier in 2019.

5 Q. HOW DO ONE GAS' CAPITAL STRUCTURE RATIOS COMPARE WITH 6 THOSE OF OTHER LDCS?

A. Based on data published by the American Gas Association, the gas distribution industry maintained the following composite capital structure ratios between 2013 and 2017:

10

11

12

13

14

15

16

17

18

19

| Capital Component | 2017 | 2016 | 2015 | 2014 | 2013 |
|-------------------|--------|--------|--------|--------|--------|
| Long-term Debt | 41.6% | 40.1% | 42.0% | 42.3% | 42.4% |
| Preferred Stock | 0.1% | 1.1% | 0.6% | 1.0% | 0.1% |
| Common Equity | 58.3% | 58.8% | 57.3% | 56.7% | 57.5% |
| Total | 100.0% | 100.0% | 100.0% | 100.0% | 100.0% |

The table above indicates that gas distribution companies have historically financed their investment in utility plant with around 42% long-term debt and 58% preferred and common equity.

Alternatively, Schedule BHF-3 displays the capital structure ratios at each fiscal year-end between 2014 and 2018 for the eight LDCs other than ONE Gas in the proxy group identified later in my testimony. While ONE Gas' test year-end capital structure ratios of approximately 38% debt and 62% equity are below and above, respectively, the averages for this group over the last five years, they fall well within industry bounds. Moreover, it is noteworthy that the LDCs in the proxy group are longstanding companies that did not need to establish their

| 1 | | creditworthiness to be able to attract new capital on reasonable terms and maintain |
|----|----|---|
| 2 | | their financial integrity as ONE Gas did when it was spun-off from ONEOK. |
| 3 | Q. | HAS ANYTHING OCCURRED RECENTLY THAT ILLUSTRATES THE |
| 4 | | BENEFIT OF ONE GAS MAINTAINING DEBT AND EQUITY RATIOS AT |
| 5 | | THE LOWER AND UPPERS ENDS, RESPECTIVELY, OF INDUSTRY |
| 6 | | NORMS? |
| 7 | A. | Yes. In January 2018, Moody's lowered its rating outlook for ONE Gas from |
| 8 | | "stable" to "negative" because of the adverse impact on its credit metrics resulting |
| 9 | | from the reduction of the corporate income tax rate from 35% to 21% provided for |
| 10 | | in the Tax Cuts and Jobs Act. A "negative" outlook is intended to warn investors |
| 11 | | of the potential for a bond rating downgrade. On January 29, 2019, Moody's |
| 12 | | revised its rating outlook for ONE Gas from negative to "stable", citing primarily, |
| 13 | | among other factors, "corporate actions ONE Gas has taken to strengthen its |
| 14 | | balance sheet and key financial ratios." Indeed, ONE Gas' capital structure ratios |
| 15 | | of approximately 40% debt and 60% equity were instrumental in it maintaining a |
| 16 | | solid single-A bond rating, which benefits customers by ensuring continuous access |
| 17 | | to capital markets and that ONE Gas can raise capital on favorable terms. |
| 18 | Q. | WHAT CAPITAL STRUCTURE RATIOS HAS THE COMMISSION |
| 19 | | APPROVED FOR LDCS IN TEXAS OVER THE LAST FIVE YEARS? |
| 20 | A. | The table below lists the capital structure ratios approved by the Commission for |
| 21 | | the larger LDCs in Texas from 2015 through the present. As shown there, with but |
| 22 | | a few exceptions, the equity ratios included in the rates of return authorized by the |
| 23 | | Commission over the last five year have been above 60%: |
| | | |

| Date | Docket | Utility | Debt | Equity |
|------------|--------|---------------------|--------|--------|
| 8/25/2015 | 10432 | CP Entex – Houston | 45.50% | 54.50% |
| 5/3/2016 | 10488 | TGS – Gulf Coast | 39.80% | 60.20% |
| 9/27/2016 | 10506 | TGS – West Texas | 39.90% | 60.10% |
| 11/15/2016 | 10526 | TGS – Central Texas | 39.50% | 60.50% |
| 5/23/2017 | 10567 | CP Entex – Houston | 44.85% | 55.15% |
| 12/5/2017 | 10640 | Atmos – Dallas | 41.49% | 58.51% |
| 3/20/2018 | 10656 | TGS - RGV | 38.71% | 61.29% |
| 5/22/2018 | 10669 | CP Entex – S. Texas | 45.00% | 55.00% |
| 11/13/2018 | 10739 | TGS - NTSA | 37.84% | 62.16% |
| 12/11/2018 | 10742 | Atmos – Mid-Tex | 39.82% | 60.18% |
| 12/11/2018 | 10743 | Atmos – West Texas | 39.82% | 60.18% |
| 2/5/20199 | 10766 | TGS – BSSA | 37.84% | 62.16% |
| 5/21/2019 | 10779 | Atmos – Mid-Tex | 39.82% | 60.18% |

Q. WHAT CAPITAL STRUCTURE RATIOS DO YOU RECOMMEND BE

USED TO CALCULATE THE RATE OF RETURN FOR THE PROPOSED

CGSA?

A.

I recommend that the rate of return for the proposed CGSA be calculated using ONE Gas' June 30, 2019 test year-end capital structure ratios of 37.88% debt and 62.12% equity, which were designed to secure a credit rating similar to other LDCs when ONE Gas was spun-off from ONEOK and support its solid single-A rating. Besides reflecting how TGS is actually financed, my recommendation follows the Commission's practice of using the utility's actual capital structure ratios when they are generally consistent with and fall within the range of those maintained by other LDCs, which ONE Gas' do. It is also consistent with the capital structure ratios approved by the Commission over the last five years in rate cases for in TGS's Gulf Coast, West Texas, Central Texas, Rio Grande Valley, North Texas, and Borger-Skellytown service areas.

| 1 | | IV. <u>COST OF DEBT</u> |
|----|----|---|
| 2 | Q. | WHAT IS THE PURPOSE OF THIS SECTION OF YOUR TESTIMONY? |
| 3 | A. | The purpose of this section is to recommend a cost of debt applicable to the debt |
| 4 | | component of the capital structure used to calculate an overall rate of return for the |
| 5 | | proposed CGSA. |
| 6 | Q. | PLEASE DESCRIBE THE DEBT ONE GAS ISSUED AT ITS INCEPTION. |
| 7 | A. | In conjunction with its spin-off from ONEOK in January 2014, ONE Gas |
| 8 | | completed the private placement of three series of senior notes, consisting of \$300 |
| 9 | | million maturing in 2019 and carrying an interest rate of 2.07%, \$300 million due |
| 10 | | in 2024 with an interest rate of 3.61%, and \$600 million maturing in 2044 at an |
| 11 | | interest rate of 4.658%. The favorable interest rates on the debt issued by ONE Gas |
| 12 | | reflected capital market conditions at the time of issue, its capital structure ratios, |
| 13 | | and the single-A bond rating ONE Gas had received from S&P and Moody's. |
| 14 | Q. | WHAT HAS OCCURRED SINCE ONE GAS INITIALLY ISSUED DEBT? |
| 15 | A. | In November 2018, ONE Gas issued \$400 million of new, 30-year notes that mature |
| 16 | | in November 2048. The proceeds from the sale were used to retire the \$300 million |
| 17 | | of senior notes that were scheduled to mature in early 2019 and fund other |
| 18 | | corporate purposes. The interest rate on the new 2048 notes is 4.50%. |
| 19 | Q. | WHAT IS THE AVERAGE COST OF ONE GAS' DEBT? |
| 20 | A. | As developed below, the weighted average cost of ONE Gas' outstanding debt at |
| 21 | | the June 30, 2019 is 4.53% (dollar amounts in 000s): |

| Description | Amount | Interest Rate | Annual Expense |
|---------------------------------|--------------|------------------|-------------------|
| 3.61% due 2024 | \$ 300,000 | 3.610% | \$ 10,830 |
| 4.658% due 2044 | 600,000 | 4.658% | 27,948 |
| 4.50% due 2048 | 400,000 | 4.500% | 18,000 |
| Debt Issuance Costs Expenses | (11,158) | | 439 |
| Debt Retirement Costs | (6,893) | | 811 |
| Total | \$ 1,281,948 | | \$ 58,028 |
| Cost of Debt | | 4.53% | |

1 Q. WHAT COST OF DEBT DO YOU RECOMMEND BE USED TO 2 CALCULATE THE RATE OF RETURN FOR THE PROPOSED CGSA?

3

4

5

6

7

8

9

10

11

12

13

14

15

16

17

A.

A. Consistent with using ONE Gas' actual capital structure ratios at June 30, 2019, I recommend that the rate of return for the proposed CGSA be calculated using ONE Gas' test year-end cost of debt of 4.53%. This cost of debt reflects ONE Gas' single-A bond rating, which is largely predicated on its actual capital structure ratios. It is also consistent with how the cost of debt was determined in the rates of return approved by the Commission in TGS's Gas Utilities Docket Nos. 10488,

V. <u>RETURN ON EQUITY</u>

Q. WHAT IS THE PURPOSE OF THIS SECTION OF YOUR TESTIMONY?

10506, 10526, 10656, 10739 and 10766.

The purpose of this section is to develop a cost of equity range for a proxy group of LDCs having similar risks to TGS. It begins by introducing the cost of equity concept, explaining the risk-return tradeoff principle fundamental to capital markets, and discussing the importance of using multiple approaches to estimate the cost of equity. The DCF model is then developed and applied to the proxy group of publicly traded LDCs to estimate their current cost of equity. Next, the

| 1 | CAPM is described and alternative cost of equity estimates developed for the proxy |
|---|---|
| 2 | group using this method. Cost of equity estimates are also developed using the risk |
| 3 | premium method based on ROEs previously authorized for other LDCs, and a |
| 4 | comparable earnings method is applied. The results of these analyses are then |
| 5 | combined to arrive at a current cost of equity range for LDCs having similar risks |
| 6 | to TGS. |
| | |

7 A. **Cost of Equity Concept**

8 Q. HOW IS A RATE OF RETURN ON COMMON EQUITY CUSTOMARILY

9 **DETERMINED?**

21

- 10 A. Unlike debt capital, there is no contractually guaranteed return on common equity 11 capital, because shareholders are the residual owners of the utility. Nonetheless, 12 common equity investors still require a return on their investment, with the "cost 13 of equity" being the minimum rent that must be paid for the use of their money.
- 14 WHAT FUNDAMENTAL ECONOMIC PRINCIPLE UNDERLIES THIS Q. 15 **COST OF EQUITY CONCEPT?**
- 16 Α. The cost of equity concept is predicated on the notion that investors are risk averse 17 and willingly accept additional risk only if they expect to be compensated for 18 bearing that risk. In capital markets where relatively risk-free assets are available, 19 such as U.S. Treasury securities, investors can be induced to hold more risky assets 20 only if they are offered a premium, or additional return, above the rate of return on a risk-free asset. Since all assets compete with each other for investors' funds, 22 riskier assets must yield a higher expected rate of return than less risky assets in 23 order for investors to be willing to hold them.

| 1 | | Given this risk-return tradeoff, the minimum required rate of return (k) from |
|--------|----|--|
| 2 | | an asset (i) can be generally expressed as: |
| 3 | | $k_i = R_f + RPi$ |
| 4 5 | | where: $R_f = Risk$ -free rate of return; and $RP_I = Risk$ premium required to hold more risky asset i. |
| 6 | | Thus, the minimum required rate of return for a particular asset at any point in time |
| 7 | | is a function of: 1) the yield on risk-free assets, and 2) its relative risk, with investors |
| 8 | | demanding correspondingly larger risk premiums for assets bearing greater risk. |
| 9 | Q. | IS THERE EVIDENCE THAT THE RISK-RETURN TRADEOFF |
| 10 | | PRINCIPLE ACTUALLY OPERATES IN THE CAPITAL MARKETS? |
| 11 | A. | Yes. The risk-return tradeoff can be readily documented in certain segments of the |
| 12 | | capital markets where required rates of return can be directly inferred from market |
| 13 | | data and generally accepted measures of risk exist. For example, bond yields are |
| 14 | | reflective of investors' expected rates of return, and bond ratings are indicative of |
| 15 | | the risk of fixed income securities. The observed yields on government securities |
| 16 | | and bonds of various rating categories demonstrate that the risk-return tradeoff |
| 17 | | does, in fact, exist in the capital markets. |
| 18 | | To illustrate, average yields during September 2019 on 30-year U.S. |
| 19 | | Treasury bonds and public utility bonds of different ratings reported by Moody's |
| 20 | | are shown in the table below. As evidenced there, as risk increases (measured by |
| 21 | | progressively lower bond ratings), the required rate of return (measured by yields) |
| 22 | | rises accordingly. Also shown are the indicated risk premiums over long-term |
| 23 | | government securities for the additional risk associated with each bond rating |
| 24 | | category. |

| | September 2019 | Risk Premium Over |
|------------------------|----------------|--------------------------|
| Bond and Rating | <u>Yield</u> | 30-Year Treasury |
| U.S. Treasury | | |
| 30-Year | 2.41% | |
| Public Utility | | |
| Aa | 3.24% | 0.83% |
| A | 3.37% | 0.96% |
| Baa | 3.71% | 1.30% |

O. DOES THE RISK-RETURN TRADEOFF OBSERVED WITH FIXED

INCOME SECURITIES EXTEND TO COMMON STOCKS AND OTHER

ASSETS?

A.

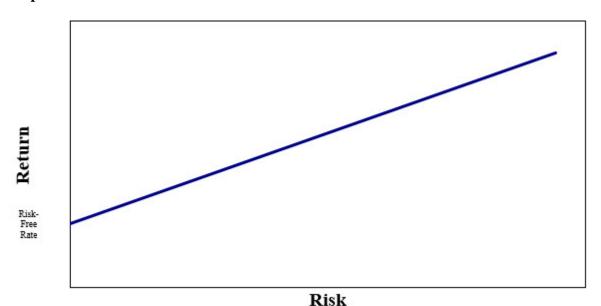

Documenting the risk-return tradeoff for assets other than fixed income securities is complicated by two factors. First, there is no standard measure of risk applicable to all assets. Second, for most assets (e.g., common stock), required rates of return cannot be directly observed. Yet there is every reason to believe that investors exhibit risk aversion in deciding whether to hold common stocks and other assets, just as when choosing among fixed income securities. Accordingly, it is generally accepted that the risk-return tradeoff evidenced with long-term debt extends to all assets.

The extension of the risk-return tradeoff from assets with observable required rates of return (e.g., bonds) to other assets is represented by the concept of a "capital market line." In particular, competition between securities and among investors in the capital markets drives the prices of assets to equilibrium such that the expected rate of return from each is commensurate with its risk. Thus, the expected rate of return from any asset is a risk-free rate of return plus a corresponding risk premium. This concept of a capital market line is illustrated

below. The vertical axis represents required rates of return and the horizontal axis indicates relative riskiness, with the intercept of the capital market line being the risk-free rate of return.

Capital Market Line

A.

Q. IS THIS RISK-RETURN TRADEOFF LIMITED TO DIFFERENCES BETWEEN FIRMS?

No. The risk-return tradeoff principle applies not only to investments in different firms, but also to different securities issued by the same firm. As discussed earlier, the securities issued by a utility vary considerably in risk because they have different characteristics and priorities. Long-term debt secured by a mortgage on property is senior among all capital in its claim on a utility's net revenues and is, therefore, the least risky because mortgage bondholders have a direct claim on the utility's property. Following first mortgage bonds are other debt instruments also holding contractual claims on the utility's net revenues, such as debentures. The last investors in line are common shareholders. They only receive the net revenues,

if any, that remain after all other claimants have been paid. As a result, the minimum rate of return that investors require from a utility's common stock, the most junior and riskiest of its securities, must be considerably higher than the yield offered by the utility's senior, long-term debt.

5 Q. WHAT DOES THE ABOVE DISCUSSION IMPLY WITH RESPECT TO 6 ESTIMATING THE COST OF EQUITY FOR A UTILITY?

7

8

9

10

11

12

13

14

15

18

19

20

21

22

A.

A.

Although the cost of equity cannot be observed directly, it is a function of the returns available from other investment alternatives and the risks to which the equity capital is exposed. Because it is unobservable, the cost of equity for a particular utility must be estimated by analyzing information about capital market conditions generally, assessing the relative risks of the utility specifically, and employing various quantitative methods that focus on investors' required rates of return. These various quantitative methods typically attempt to infer investors' required rates of return from stock prices, by extrapolating interest rates, or through an analysis of other financial data.

16 Q. DO YOU RELY ON A SINGLE METHOD TO ESTIMATE THE COST OF 17 EQUITY?

No. Despite the theoretical appeal of or precedent for using a particular method to estimate the cost of equity, no single approach can be regarded as wholly reliable. Therefore, I use multiple methods to estimate the cost of equity for TGS. Indeed, it is essential that estimates of investors' minimum required rate of return produced by one method be compared with those produced by other methods, and that all

1 cost of equity estimates be required to pass fundamental tests of reasonableness and 2 economic logic.

B. Discounted Cash Flow Model

A.

A.

Q. HOW ARE DCF MODELS USED TO ESTIMATE THE COST OF EQUITY?

The use of DCF models to estimate the cost of equity is essentially an attempt to replicate the market valuation process that led to the price investors are willing to pay for a share of a company's common stock. It is predicated on the assumption that investors evaluate the risks and expected rates of return from all securities in the capital markets. Given these expected rates of return, the price of each share of stock is adjusted by the market so that investors are adequately compensated for the risks to which they are exposed. Therefore, we can look to the market to determine what investors believe a share of common stock is worth, and by estimating the cash flows they expect to receive from the stock in the way of future dividends and stock price, their required rate of return can be mathematically imputed. In other words, the cash flows that investors expect from a stock are estimated, and given the stock's current market price, we can "back-into" the discount rate, or cost of equity, investors presumably used in arriving at that price.

Q. WHAT MARKET VALUATION PROCESS UNDERLIES DCF MODELS?

DCF models are derived from a theory of valuation that posits that the price of a share of common stock is equal to the present value of the expected cash flows (i.e., future dividends and stock price) that will be received while holding the stock, discounted at investors' required rate of return, or the cost of equity. Notationally, the general form of the DCF model is as follows:

| 1 2 3 4 5 | | $P_0 = \frac{D_1}{(1+K_e)^1} + \frac{D_2}{(1+K_e)^2} + L + \frac{D_t}{(1+K_e)^t} + \frac{P_t}{(1+K_e)^t}$ where: $P_0 = \text{Current price per share;}$ $P_t = \text{Future price per share in period t;}$ $D_t = \text{Expected dividend per share in period t;}$ $K_e = \text{Cost of equity.}$ |
|-----------------------|----|--|
| 6 | Q. | HAS THIS GENERAL FORM OF THE DCF MODEL CUSTOMARILY |
| 7 | | BEEN SIMPLIFIED FOR USE IN ESTIMATING THE COST OF EQUITY |
| 8 | | IN RATE CASES? |
| 9 | A. | Yes. In an effort to reduce the number of required estimates and computational |
| 10 | | difficulties, the general form of the DCF model has been simplified to a "constant |
| 11 | | growth" form. In order to convert the general form of the DCF model to the |
| 12 | | constant growth DCF model, a number of assumptions must be made. These |
| 13 | | include: |
| 14 15 | | A constant growth rate for both dividends and earnings; A stable dividend payout ratio; |
| 16 17 | | The discount rate exceeds the growth rate; A constant growth rate for book value and price; |
| 18 | | A constant growth rate for book value and price; A constant earned rate of return on book value; |
| 19 | | No sales of stock at a price above or below book value; |
| 20 | | • A constant price-earnings ratio; |
| 21 | | A constant discount rate (i.e., no changes in risk or interest rate |
| 22 | | levels and a flat yield curve); and |
| 23 | | All of the above extend to infinity. |
| 24 | | Given these assumptions, the general form of the DCF model can be reduced to the |
| 25 | | more manageable formula of: |

$$P_{0} = \frac{D_{1}}{K_{s} - g}$$

where: g = Investors' long-term growth expectations.

The cost of equity ("K_e") can be isolated by rearranging terms:

$$K_e = \frac{D_1}{P_0} + g$$

The constant growth form of the DCF model recognizes that the rate of return to stockholders consists of two parts: 1) dividend yield (D_1/P_0) , and 2) growth (g). In other words, investors expect to receive a portion of their total return in the form of current dividends and the remainder through price appreciation.

While the constant growth form of the DCF model provides a more manageable formula to estimate the cost of equity, it is important to note that the assumptions required to convert the general form of the DCF model to the constant growth form are never strictly met in practice. In some instances, where earnings are derived solely from stable activities, and earnings, dividends, and book value track fairly closely, the constant growth form of the DCF model may be a reasonable working approximation of stock valuation. However, in other cases, where the circumstances cause the required assumptions to be severely violated, the constant growth DCF model may produce widely divergent and meaningless results. This is especially the case if the firm's earnings or dividends are unstable, or if investors are expecting the stock price to be affected by factors other than earnings and dividends.

| 1 | Q. | HOW DID YOU ESTIMATE THE COST OF EQUITY USING THE DCF |
|----|----|--|
| 2 | | MODEL? |
| 3 | A. | I applied the constant growth form of the DCF model to the proxy group of publicly |
| 4 | | traded LDCs identified earlier, which includes ONE Gas. Specifically, I began with |
| 5 | | the ten companies included in Value Line's Natural Gas Utility industry and |
| 6 | | excluded those that are not predominantly engaged in natural gas distribution (i.e., |
| 7 | | UGI Corp.). This resulted in a proxy group consisting of the following nine LDCs: |
| 8 | | 1) Atmos Energy, 2) Chesapeake Utilities, 3) New Jersey Resources, 4) NiSource, |
| 9 | | Inc., 5) Northwest Natural Gas, 6) ONE Gas, 7) South Jersey Industries, 8) |
| 10 | | Southwest Gas Holdings, and 9) Spire, Inc. |
| 11 | Q. | HOW IS THE CONSTANT GROWTH FORM OF THE DCF MODEL USED |
| 12 | | TO ESTIMATE THE COST OF EQUITY? |
| 13 | A. | The first step in implementing the constant growth DCF model is to determine the |
| 14 | | expected dividend yield (D_1/P_0) for the firm in question. This is usually calculated |
| 15 | | based on an estimate of dividends to be paid in the coming year divided by the |
| 16 | | current price of the stock. |
| 17 | Q. | HOW DID YOU CALCULATE THE DIVIDEND YIELD COMPONENT OF |
| 18 | | THE CONSTANT GROWTH DCF MODEL FOR THE GAS UTILITY |
| 19 | | GROUP? |
| 20 | A. | Because estimating the cost of equity using the DCF model is an attempt to replicate |
| 21 | | how investors arrived at an observed stock price, all of its components should be |
| 22 | | contemporaneous. Price, dividend, and growth data from different points in time, |
| 23 | | or averaged over long time periods, violate the matching principle underlying the |

1 DCF model. Therefore, dividend yield was calculated by dividing an estimate of 2 dividends to be paid by each of the LDCs in the group over the next twelve months, 3 obtained from the index to Value Line's October 11, 2019 edition, by the average 4 daily closing price of each firm's stock during the month of September 2019. The 5 expected dividends, representative price, and resulting dividend yield for each of 6 the nine gas utilities are displayed on Schedule BHF-4. As also shown there, the 7 average dividend yield for the industry group is 2.58%, with a median of 2.67%.

8 Q. EXPLAIN HOW ESTIMATES OF INVESTORS' LONG-TERM GROWTH EXPECTATIONS ARE CUSTOMARILY DEVELOPED FOR USE IN THE 10 CONSTANT GROWTH DCF MODEL.

9

11

12

13

14

15

16

17

18

19

20

21

22

23

A.

A.

In constant growth DCF theory, earnings, dividends, book value, and market price are all assumed to grow in lockstep, and the growth horizon of the DCF model is infinite. But implementation of the DCF model is more than just a theoretical exercise; it is an effort to replicate the mechanism investors used to arrive at observable stock prices. Therefore, the only "g" that matters in using the DCF model to estimate the cost of equity is that which investors expect and have embodied in current market prices.

WHAT DRIVES INVESTORS' GROWTH EXPECTATIONS? Q.

Trends in earnings, which ultimately support future dividends and share price, play a pivotal role in determining investors' long-term growth expectations. Security analysts' growth forecasts are generally regarded as the closest single measure of the expected long-term growth rate of the constant growth DCF model. While being primarily based on the outlook for a firm, they also reflect the utility's

historical experience and other factors considered by investors in forming their long-term growth expectations. Moreover, various empirical studies have found that security analysts' projections are a superior source of DCF growth rates. The 5-year earnings growth projections by security analysts for each of the nine gas utilities reported by *Value Line*, Thomson Reuters' *Institutional Brokers Estimate System* ("*I/B/E/S*"), and *Zacks Investment Research* ("*Zacks*") are displayed on Schedule BHF-5, with the averages for the group being 8.2%, 5.4%, and 6.6%, respectively. To eliminate the impact of extreme values, the medians for the group are also shown, which range between 4.7% and 8.5%. Also shown on Schedule BHF-5 are the 10-year and 5-year historical earnings growth rates reported by *Value Line* for each of the nine gas utilities, which average 5.8% and 7.1%, respectively, and have medians of 6.8% and 7.5%, respectively.

- 13 Q. HOW ELSE ARE INVESTOR EXPECTATIONS OF FUTURE
 14 LONG-TERM GROWTH PROSPECTS FOR A FIRM OFTEN
- 15 ESTIMATED FOR USE IN THE CONSTANT GROWTH DCF MODEL?
- 16 A. In DCF theory and practice, growth in book equity comes from the reinvestment of
 17 earnings within the business and the effects of external financing. Accordingly,
 18 conventional applications of the constant growth DCF model often examine the
 19 relationships between variables that determine the "sustainable" growth attributable
- 21 Q. HOW IS A FIRM'S SUSTAINABLE GROWTH ESTIMATED?
- 22 A. The sustainable growth rate is calculated by the formula:
- g = br + sv

to these two factors.

1

2

3

4

5

6

7

8

9

10

11

12

20

where "b" is the expected earnings retention ratio (one minus the dividend payout 2 ratio), "r" is the expected rate of return earned on book equity, "s" is the percent of 3 common equity expected to be issued annually as new common stock, and "v" is the equity accretion ratio. The "br" term represents the growth from reinvesting 5 earnings within the firm while the "sv" term represents the growth from external 6 financing. This external financing growth results because existing shareholders share in a portion of any excess received from selling new shares at a price above 8 book value.

4

7

15

16

17

18

19

20

21

22

23

A.

9 Q. WHAT GROWTH RATE DOES THE SUSTAINABLE GROWTH 10 METHOD SUGGEST FOR THE GAS UTILITY GROUP?

11 A. The sustainable growth rate for each of the gas utilities in the industry group based 12 on Value Line's projections for 2021-2023 is developed in Schedule BHF-6. As 13 shown there, the sustainable growth method implies an average long-term growth 14 rate for the gas utility group of 7.3%, and 6.5% based on the median.

WHAT ARE OTHER PROJECTED AND HISTORICAL GROWTH RATES Q. FOR THE INDUSTRY GROUP?

Schedule BHF-7 displays Value Line projected growth rates and 10- and 5-year historical growth rates in book value per share, dividends per share, and stock price for each of the nine gas utilities in the industry group. The averages for the LDC group range from 2.6% (projected growth in share price) to 13.2% (5-year historical growth in share price), with the corresponding medians ranging from 2.1% to 12.5%. Besides the fact that some of these growth rates, when combined with the group's 2.6% dividend yield, imply implausible cost of equity estimates, the

| 1 | | variation in these other growth rates results in them providing limited guidance as |
|----|----|--|
| 2 | | to the prospective growth that investors expect. |
| 3 | Q. | WHAT IS YOUR CONCLUSION AS TO THE GROWTH THAT |
| 4 | | INVESTORS ARE EXPECTING FROM THE INDUSTRY GROUP? |
| 5 | A. | After excluding clearly unreliable indicators of growth, the plausible growth rates |
| 6 | | shown on Schedules BHF-5, BHF-6, and BHF-7 indicate a range for the LDC group |
| 7 | | of between approximately 6.0% and 8.0%, which compares with Zacks projected |
| 8 | | earnings growth rate for its gas distribution industry of 7.8%. Taken together, I |
| 9 | | conclude that investors expect long-term growth from the LDC group in the 6.5% |
| 10 | | to 7.5% range. |
| 11 | Q. | WHAT CURRENT DCF COST OF EQUITY ESTIMATES DO THESE |
| 12 | | GROWTH RATE RANGES IMPLY FOR THE GAS UTILITY GROUP? |
| 13 | A. | Summing the LDC group's dividend yield of approximately 2.6% with a 6.5% to |
| 14 | | 7.5% growth rate range indicates a current DCF cost of equity for the industry group |
| 15 | | of between approximately 9.1% and 10.1%. |
| 16 | C. | Capital Asset Pricing Model |
| 17 | Q. | HOW ELSE DID YOU ESTIMATE THE COST OF EQUITY? |
| 18 | A. | The cost of equity to the gas utility group was also estimated using the CAPM, |
| 19 | | which is a theory of market equilibrium that serves as the basis for current financial |
| 20 | | education and management. Under the CAPM, investors are assumed fully |
| 21 | | diversified, so that the relevant risk of an individual asset (e.g., common stock) is |
| 22 | | its volatility relative to the market as a whole, which is measured using a "beta" |
| 23 | | coefficient. Beta reflects the tendency of a stock's price to follow changes in the |
| 24 | | market, with stocks having a beta less than 1.00 being considered less risky and |

| 1 | | stocks with a beta greater than 1.00 being regarded as more risky. The CAPM is |
|-----------------------|----|--|
| 2 | | mathematically expressed as: |
| 3 4 5 6 7 | | $R_{j} = R_{f} + \beta_{j} (R_{m} - R_{f})$ where: $R_{j} = \text{required rate of return for stock } j;$ $R_{f} = \text{risk-free interest rate;}$ $R_{m} = \text{expected return on the market portfolio; and}$ $\beta_{j} = \text{beta, or systematic risk, for stock } j.$ |
| 8 | | While the CAPM is not without controversy, it is routinely referenced in the |
| 9 | | financial literature and regulatory proceedings, and firms' beta values are widely |
| 10 | | reported. |
| 11 | Q. | HOW DID YOU APPLY THE CAPM? |
| 12 | A. | I applied the CAPM using two methods to determine the risk premium for the |
| 13 | | market as a whole, or the $(R_{\rm m}$ - $R_{\rm f})$ term in the CAPM formula. The first was based |
| 14 | | on historical rates of return and the second was based on forward-looking estimates |
| 15 | | of investors' required rates of return. In both instances, the companies included in |
| 16 | | the S&P 500 index were used as a proxy for the market portfolio and the 30-year |
| 17 | | U.S. Treasury bond served as the risk-free investment. |
| 18 | Q. | PLEASE DESCRIBE THE FIRST METHOD BASED ON HISTORICAL |
| 19 | | RATES OF RETURN. |
| 20 | A. | Under the historical rate of return approach, equity risk premiums are calculated by |
| 21 | | first measuring the rate of return (including dividends and capital gains and losses) |
| 22 | | actually realized on an investment in common stocks over historical time periods. |
| 23 | | The historical return on bonds is then subtracted from that earned on common |
| 24 | | stocks to measure equity risk premiums. Widely used in academia, the historical |
| 25 | | rate of return approach is based on the assumption that, given a sufficiently large |
| 26 | | number of observations over long historical periods, average market rates of return |

| 1 | | will converge to investors' required rates of return. From a more practical |
|----|----|---|
| 2 | | perspective, investors may base their expectations for the future on, or may have |
| 3 | | come to expect that they will earn, rates of return corresponding to those in the past. |
| 4 | Q. | WHAT IS THE MARKET RISK PREMIUM BASED ON HISTORICAL |
| 5 | | RATES OF RETURN? |
| 6 | A. | Perhaps the most exhaustive study of historical rates of return, and the one most |
| 7 | | frequently cited in regulatory proceedings, is that contained in Market Results for |
| 8 | | Stocks, Bonds, Bills and Inflation, variously published by Ibbotson Associates, |
| 9 | | Morningstar, and Duff & Phelps. Most recently, Duff & Phelps reports that the |
| 10 | | annual rate of return realized on the S&P 500 averaged 11.88% over the period |
| 11 | | 1926 through 2018 while the annual average income rate of return on 30-year |
| 12 | | Treasury bonds over this same period averaged 4.97%. Thus, the market risk |
| 13 | | premium based on historical average annual rates of return is 6.91%. |
| 14 | Q. | PLEASE DESCRIBE THE SECOND METHOD BASED ON FORWARD- |
| 15 | | LOOKING REQUIRED RATES OF RETURN. |
| 16 | A. | Consistent with the CAPM being an expectational (i.e., forward-looking) model, |
| 17 | | the second method estimated the market risk premium using current indicators of |
| 18 | | investors' required rates of return. For the market portfolio, the cost of equity was |
| 19 | | estimated by applying the DCF model to the firms in the S&P 500 paying cash |
| 20 | | dividends, with each firm's dividend yield and growth rate being weighted by its |
| 21 | | proportionate share of total market value. The expected dividend yield for each |
| 22 | | firm was obtained from Value Line, with the expected growth rate being based on |
| 23 | | the earnings forecasts published for each firm by <i>Value Line</i> , <i>I/B/E/S</i> , and <i>Zacks</i> . |

| 1 | | As shown in footnote (b) on Schedule BHF-8, summing the 2.41% expected |
|----|----|---|
| 2 | | dividend yield for this market group, which is composed primarily of non-regulated |
| 3 | | firms, with the average Value Line, I/B/E/S, and Zacks projected growth rate of |
| 4 | | 9.31% produces a required rate of return from the market portfolio (R_{m}) of 11.71%. |
| 5 | Q. | WHAT IS THE MARKET RISK PREMIUM BASED ON FORWARD- |
| 6 | | LOOKING REQUIRED RATES OF RETURN? |
| 7 | A. | From the 11.71% required rate of return on the market portfolio, a market risk |
| 8 | | premium is calculated by subtracting the average yield on 30-year Treasury bonds |
| 9 | | during September 2019 of 2.12%. This produces a forward-looking market risk |
| 10 | | premium of 9.59%. |
| 11 | Q. | WHAT IS THE NEXT STEP IN APPLYING THE CAPM? |
| 12 | A. | Having calculated market risk premiums of 6.91% and 9.59% using historical rates |
| 13 | | of return and forward-looking rates of return, respectively, the next step in the |
| 14 | | CAPM method is to calculate specific risk premiums for the LDC industry group. |
| 15 | | This is done by multiplying the alternative market risk premium estimates by the |
| 16 | | LDC group's average beta of 0.66, calculated using firm betas obtained from Value |
| 17 | | Line and shown on Schedule BHF-9, which produces current industry risk |
| 18 | | premiums of 4.53% and 6.29%. |
| 19 | Q. | WHAT ARE THE RESULTING THEORETICAL CAPM COST OF |
| 20 | | EQUITY ESTIMATES FOR THE LDC GROUP? |
| 21 | A. | As developed in Schedule BHF-8, summing the industry risk premiums of 4.53% |
| 22 | | and 6.29% with a risk-free interest rate equal to the September 2019 30-year |
| | | |

| 1 | | Treasury bond yield of 2.12% produces current theoretical CAPM cost of equity |
|---------------------------|----|---|
| 2 | | estimates for the LDC industry group of 6.65% and 8.41%. |
| 3 | Q. | ARE THESE THEORETICAL CAPM COST OF EQUITY ESTIMATES |
| 4 | | ACCURATE MEASURES OF INVESTORS' REQUIRED RATE OF |
| 5 | | RETURN FROM THE GROUP OF LDCS? |
| 6 | A. | No. These cost of equity estimates are based on CAPM theory. However, as |
| 7 | | explained by Morningstar in its 2015 Classic Yearbook edition of Stocks, Bonds, |
| 8 | | Bills and Inflation: |
| 9 10 11 12 13 | | One of the most remarkable discoveries of modern finance is that of a relationship between company size and return. Historically on average, small companies have higher returns than those of large ones The relationship between company size and return cuts across the entire size spectrum; it is not restricted to the smallest stocks. (page 99, footnote omitted) |
| 15 | | In other words, in addition to the systematic risk measured by beta, investors' |
| 16 | | required rate of return depends on a firm's relative size. To account for this, Duff |
| 17 | | & Phelps has developed size premiums that need to be added to the theoretical |
| 18 | | CAPM cost of equity estimates to account for the level of a firm's market |
| 19 | | capitalization in determining the CAPM cost of equity. |
| 20 | Q. | WHAT ARE THE CURRENT CAPM COST OF EQUITY ESTIMATES |
| 21 | | FOR THE LDC GROUP ONCE SIZE EFFECTS ARE TAKEN INTO |
| 22 | | ACCOUNT? |
| 23 | A. | As shown on Schedule BHF-9, the average market capitalization of the LDC group |
| 24 | | is \$5.4 billion. Based on Duff & Phelps most recent schedule of size premiums, |
| 25 | | which is reproduced in the lower portion of Schedule BHF-9, this means that the |
| 26 | | theoretical CAPM cost of equity estimates need to be increased by 0.82% to |

account for the LDC industry group's smaller size relative to the S&P 500. As shown on Schedule BHF-8, increasing the theoretical CAPM cost of equity estimates for the LDC group by this size premium results in current CAPM cost of equity estimates based on historical rates of return and forward-looking rates of return of 7.47% and 9.23%, respectively.

A.

7 Q. HOW ELSE DID YOU ESTIMATE THE COST OF EQUITY?

I also estimated the cost of equity using a risk premium method based on ROEs previously authorized for LDCs by state regulatory commissions. The risk premium method to estimate investors' required rate of return is an extension of the risk-return tradeoff observed with bonds to common stocks. The cost of equity is estimated by determining the additional return investors require to forego the relative safety of a bond and bear the greater risks associated with common stock, and then adding this equity risk premium to the current yield on bonds.

Q. GENERALLY DESCRIBE THE APPLICATION OF THE RISK PREMIUM METHOD USING AUTHORIZED ROES.

Application of the risk premium method based on authorized ROEs is predicated on the presumption that allowed returns reflect regulatory commissions' best estimates of the cost of equity, however determined, at the time they issued their final orders. A current risk premium is estimated based on the difference between past authorized ROEs and then-prevailing interest rates. This risk premium is then added to current interest rates to estimate the cost of equity.

Q. WHAT WAS THE PRINCIPAL SOURCE OF THE DATA USED TO APPLY

2 THIS RISK PREMIUM METHOD?

1

14

15

16

17

18

19

20

21

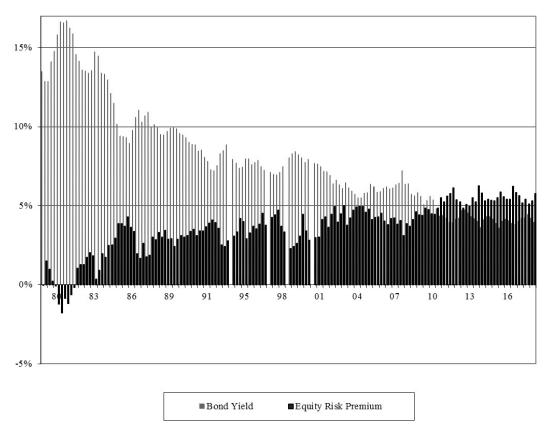

22

A.

3 A. Regulatory Research Associates, Inc., ("RRA"), which is now a group within S&P 4 Global Market Intelligence, and its predecessors have compiled the ROEs 5 authorized for major electric and gas utilities by regulatory commissions across the 6 U.S. The average ROE authorized for natural gas utilities published by RRA in 7 each quarter between 1980 and the second quarter of 2019 are displayed in 8 Schedule BHF-10. As shown there, the ROEs granted LDCs over this 9 approximately 39-year period have averaged 11.58%, while the average single-A 10 utility bond yield has averaged 7.98%, resulting in an average risk premium of 11 3.60%.

12 Q. IS THIS 3.60% AVERAGE RISK PREMIUM THE RELEVANT 13 BENCHMARK FOR ESTIMATING THE COST OF EQUITY?

No. It is necessary to account for the fact that authorized ROEs do not move in lockstep with interest rates. In particular, when interest rate levels are relatively high, ROEs tend to be lower (i.e., equity risk premiums narrow), and when interest rates are relatively low, authorized ROEs are greater (i.e., equity risk premiums increase). This inverse relationship can be observed in the data contained in Schedule BHF-10, which is shown graphically below. As evident there, the higher the level of interest rates (shaded bars), the lower the equity risk premiums (the solid bars calculated as the difference between authorized ROEs and bond yields), and vice versa:

The implication of this inverse relationship is that for a one percent increase or decrease in interest rates, the cost of equity may only rise or fall, say, one-half of a percent, respectively.

Q. HOW DID YOU REFLECT THE RELATIONSHIP BETWEEN EQUITY RISK PREMIUMS AND INTEREST RATES IN ESTIMATING THE COST OF EQUITY FOR THE LDC GROUP USING PAST AUTHORIZED ROES?

A.

To account for the fact that equity risk premiums are lower when interest rates are high and higher when interest rates are low, I developed two regression equations relating authorized past equity risk premiums to single-A bond yields. The first was a simple linear regression between equity risk premiums and interest rates and the second equation adjusted for first order autocorrelation using the Prais-Winsten

| 1 | | algorithm. Shown in the bottom portion of Schedule BHF-10, substituting the |
|----|----|---|
| 2 | | September 2019 yield of 3.37% on single-A public utility bonds into the regression |
| 3 | | equations indicates that the equity risk premium for an LDC at current interest rate |
| 4 | | levels is between approximately 5.76% and 5.94%. |
| 5 | Q. | WHAT CURRENT COST OF EQUITY DOES THIS RISK PREMIUM |
| 6 | | IMPLY FOR THE GROUP OF LDCS? |
| 7 | A. | Adding the 5.76% and 5.94% equity risk premiums developed on Schedule BHF- |
| 8 | | 10 to the September 2019 yield on single-A utility bonds of 3.37% produces a |
| 9 | | current risk premium cost of equity range for LDC's of between 9.13% and 9.31%. |
| 10 | E. | Comparable Earnings Method |
| 11 | Q. | WHAT IS THE LAST METHOD THAT YOU USED TO ESTIMATE THE |
| 12 | | COST OF EQUITY? |
| 13 | A. | Often referred to as the comparable earnings method, this approach looks to the |
| 14 | | rates of return that other firms of comparable risk that compete for investors' capital |
| 15 | | are expected to earn on their book equity. Reference to the expected return on book |
| 16 | | equity of other LDCs demonstrates the level of earnings that TGS needs in order to |
| 17 | | offer investors a competitive return, be able to attract capital on reasonable terms, |
| 18 | | and maintain its financial integrity. |
| 19 | Q. | WHAT RETURNS ON BOOK EQUITY ARE OTHER LDCS EXPECTED |
| 20 | | TO EARN? |
| 21 | A. | Schedule BHF-11 displays the return on book equity projected for each of the eight |
| 22 | | LDCs other than ONE Gas in the industry group for the 2018, 2019, and the 2022- |
| 23 | | 2024 timeframes, calculated by dividing Value Line's projected earnings per share |
| 24 | | by average book value per share. As shown there, the average expected book ROE |

- 1 for this group is 9.2% in 2019, 9.6% for 2020, and 10.5% for 2022-2024, with 2 medians of 9.1%, 9.5%, and 10.1%, respectively.
- 3 F. Recommended Rate of Return on Equity

19

20

21

22

23

24

A.

- 4 Q. WHAT IS YOUR CONCLUSION AS TO THE CURRENT COST OF
 5 EQUITY RANGE FOR LDCS?
- 6 A. The DCF method indicates a cost of equity range for the LDC group of between 7 9.1% and 10.1%, while the CAPM indicates a cost of equity range of between 8 approximately 7.5% and 9.2%. Meanwhile, the risk premium method based on the 9 authorized ROEs for LDCs and current interest rates indicates a cost of equity of 10 between 9.1% and 9.3%, and the comparable earnings method shows that other 11 LDCs are expected to earn between 9.1% and 10.5% on their book equity. Taken 12 together, I conclude that investors currently require a ROE from the LDC industry 13 group in the 9.1% to 10.1% range.

14 Q. WHAT ROE DO YOU RECOMMEND FOR THE PROPOSED CGSA?

As discussed earlier, the outlook for the U.S. economy is now more uncertain than ever, with global trade uncertainty and overhanging recession fears aggravating the normal uncertainties faced by the capital markets. Despite recent increases in stock prices and declines in interest rates, the cost of all capital, including common equity, is expected to be considerably higher over the next few years. So that TGS is able to offer investors a competitive return, attract capital on reasonable terms, and maintain its financial integrity, the allowed ROE should reflect the higher capital market requirements that are expected to exist when the proposed CGSA's rates will be in effect. The outlook for higher capital costs implies that the ROE for the proposed CGSA should be from the top of the cost of equity range. And

while ONE Gas' debt and equity ratios are above and below, respectively, industry 2 averages, they are well within LDCs norms, and warrant only a slight reduction in 3 the cost of equity to account for lower financial risk. Therefore, I recommend an 4 ROE for the proposed CGSA just below the top of my 9.1% to 10.1% cost of equity 5 range, or 10.0%.

1

6 HAVE YOU CONDUCTED ANY CHECKS OF REASONABLENESS OF Q. 7 YOUR RECOMMENDED ROE FOR THE PROPOSED CGSA?

8 A. Yes. The reasonableness of my recommended 10.0% ROE for the proposed CGSA 9 can be evaluated by reviewing the ROEs previously granted by the Commission. 10 The table below lists the ROEs authorized for the larger LDCs in Texas from 2015 11 through the present:

| Date | Docket | Utility | ROE |
|------------|--------|---------------------|--------|
| 8/25/2015 | 10432 | CP Entex – TX Coast | 10.00% |
| 5/3/2016 | 10488 | TGS – Gulf Coast | 9.50% |
| 9/27/2016 | 10506 | TGS – West Texas | 9.50% |
| 11/15/2016 | 10526 | TGS – Central Texas | 9.50% |
| 5/23/2017 | 10567 | CP Entex Houston | 9.60% |
| 12/5/2017 | 10640 | Atmos Dallas | 10.10% |
| 3/20/2018 | 10656 | TGS RGV | 9.50% |
| 5/22/2018 | 10669 | CP Entex – S. Texas | 9.80% |
| 11/13/2018 | 10739 | TGS NTSA | 9.75% |
| 12/11/2018 | 10742 | Atmos – Mid-Tex | 9.80% |
| 12/11/2018 | 10743 | Atmos – West Texas | 9.75% |
| 2/5/2019 | 10766 | TGS BSSA | 9.75% |
| 5/21/2019 | 10779 | Atmos – Mid-Tex | 9.80% |

- 12 As shown there, these allowed ROEs have ranged between 9.5% and 10.1%.
- 13 Because my recommended 10.0% ROE falls within this range, the ROEs previously

| 1 | | granted by the Commission over the last approximately five years support the |
|----|----|--|
| 2 | | reasonableness on my recommended 10.0% for the proposed CGSA. |
| 3 | | VI. OVERALL RATE OF RETURN |
| 4 | Q. | WHAT OVERALL RATE OF RETURN DO YOU RECOMMEND BE |
| 5 | | APPLIED TO THE RATE BASE OF THE PROPOSED CGSA? |
| 6 | A. | I recommend that the Commission authorize an overall rate of return on the invested |
| 7 | | capital in the proposed CGSA of 7.93%. As developed in Schedule BHF-1, this |
| 8 | | overall rate of return is the result of combining ONE Gas' actual June 30, 2019 test |
| 9 | | year-end capital structure ratios of 37.88% debt and 62.12% equity with its average |
| 10 | | cost of debt of 4.53% and an ROE of 10.0%. |
| 11 | Q. | DOES THAT CONCLUDE YOUR DIRECT TESTIMONY IN THIS CASE? |
| 12 | A. | Yes, it does. |

APPENDIX A

BRUCE H. FAIRCHILD

FINCAP, INC.
Financial Concepts and Applications
Economic and Financial Counsel

3907 Red River Austin, Texas 78751 (512) 458-4644 FAX (512) 458-4768 fincap2@texas.net

Summary of Qualifications

M.B.A. and Ph.D. in finance, accounting, and economics; Certified Public Accountant. Extensive consulting experience involving regulated industries, valuation of closely-held businesses, and other economic analyses. Previously held managerial and technical positions in government, academia, and business, and taught at the undergraduate, graduate, and executive education levels. Broad experience in technical research, computer modeling, and expert witness testimony.

Employment

Principal, FINCAP, Inc. (Sep. 1979 to present)

Adjunct Assistant Professor, University of Texas at Austin (Sep. 1979 to May. 1981)

Assistant Director, Economic Research Division, Public Utility Commission of Texas (Sep. 1976 to Aug. 1979) Economic consulting firm specializing in regulated industries and valuation of closely-held businesses. Assignments have involved electric, gas, telecommunication, and water/sewer utilities, with clients including utilities, consumer groups, municipalities, regulatory agencies, and cogenerators. Areas of participation have included revenue requirements, rate of return, rate design, tariff analysis, avoided cost, forecasting, and negotiations. Other assignments have involved some seventy valuations as well as various economic (e.g., damage) analyses, typically in connection with litigation. Presented expert witness testimony before courts and regulatory agencies on over one hundred occasions.

Taught undergraduate courses in finance: Fin. 370 – Integrative Finance and Fin. 357 – Managerial Finance.

Division consisted of approximately twenty-five financial analysts, economists, and systems analysts responsible for rate of return, rate design, special projects, and computer systems. Directed Staff participation in rate cases, presented testimony on approximately thirty-five occasions, and was involved in some forty other cases ultimately settled. Instrumental in the initial development of rate of return and financial policy for newly-created agency. Performed independent research and managed State and Federal funded projects. Assisted in preparing appeals to the Texas Supreme Court and testimony presented before the Interstate Commerce Commission and Department of Energy. Maintained communications with financial community, industry representatives, media, and consumer groups. Appointed by Commissioners as Acting Director.

BRUCE H. FAIRCHILD Page 2 of 5

Assistant Professor, College of Business Administration, University of Colorado at Boulder (Jan. 1977 to Dec. 1978)

Teaching Assistant, University of Texas at Austin (Jan. 1973 to Dec. 1976)

Internal Auditor,
Sears, Roebuck and Company, Dallas,
Texas
(Nov. 1970 to Aug 1972)

Accounts Payable Clerk,
Transcontinental Gas Pipeline Corp.,
Houston, Texas
(May. 1969 to Aug. 1969)

Taught graduate and undergraduate courses in finance: Fin. 305 – Introductory Finance, Fin. 401 – Managerial Finance, Fin. 402 – Case Problems in Finance, and Fin. 602 – Graduate Corporate Finance.

Taught undergraduate courses in finance and accounting: Acc. 311 – Financial Accounting, Acc. 312 – Managerial Accounting, and Fin. 357 – Managerial Finance. Elected to College of Business Administration Teaching Assistants' Committee.

Performed audits on internal operations involving cash, accounts receivable, merchandise, accounting, and operational controls, purchasing, payroll, etc. Developed operating and administrative policy and instruction. Performed special assignments on inventory irregularities and Justice Department Civil Investigative Demands.

Processed documentation and authorized payments to suppliers and creditors.

Education

Ph.D., Finance, Accounting, and Economics, University of Texas at Austin (Sep. 1974 to May 1980)

M.B.A., Finance and Accounting, University of Texas at Austin, (Sep. 1972 to Aug. 1974)

B.B.A., Accounting and Finance,
Southern Methodist University, Dallas,
Texas

(Sep. 1967 to Dec. 1971)

Doctoral program included coursework in corporate finance, investment theory, accounting, and economics. Elected to honor society of Phi Kappa Phi. Received University outstanding doctoral dissertation award.

Dissertation: Estimating the Cost of Equity to Texas Public Utility Companies

Awarded Wright Patman Scholarship by World and Texas Credit Union Leagues.

Professional Report: Planning a Small Business Enterprise in Austin, Texas

Dean's List 1967-1971 and member of Phi Gamma Delta Fraternity.

Other Professional Activities

Certified Public Accountant, Texas Certificate No. 13,710 (October 1974); entire exam passed in May 1972. Member of the American Institute of Certified Public Accountants.

Participated as session chairman, moderator, and paper discussant at annual meetings of Financial Management Association, Southwestern Finance Association, American Finance Association, and other professional associations.

Visiting lecturer in Executive M.B.A program at the University of Stellenbosch Graduate Business School, Belleville, South Africa (1983 and 1984).

Associate Editor of Austin Financial Digest, 1974-1975. Wrote and edited a series of investment and economic articles published in a local investment advisory service.

BRUCE H. FAIRCHILD Page 3 of 5

Military

Texas Army National Guard, Feb. 1970 to Sep. 1976. Specialist 5th Class with duty assignments including recovery vehicle operator for armor unit and company clerk for finance unit.

APPENDIX B

BRUCE H. FAIRCHILD SUMMARY OF TESTIMONY BEFORE REGULATORY AGENCIES

| No. | Utility Case | Agency | Docket | Date | Nature of Testimony |
|-----|---|---------------------------|------------------------------------|--------|--|
| 1. | Arkansas Electric Cooperative | Arkansas PSC | U-3071 | Aug-80 | Wholesale Rate Design |
| 2. | East Central Oklahoma Electric Cooperative | Oklahoma CC | 26925 | Sep-80 | Retail Rate Design |
| 3. | Kansas Gas & Electric Company | Kansas CC | 115379-U | Nov-80 | PURPA Rate Design Standards |
| 4. | Kansas Gas & Electric Company | Kansas CC | 128139-U | May-81 | Attrition |
| 5. | City of Austin Electric Department | City of Austin | | Jun-81 | PURPA Rate Design Standards |
| 6. | Tarrant County Water Control and Improvement District No. 1 | Texas Water Commission | | Oct-81 | Wholesale Rate Design |
| 7. | Owentown Gas Company | Texas RRC | 2720 | Jan-82 | Revenue Requirements and Retail Rate Design |
| 8. | Kansas Gas & Electric Company | Kansas CC | 134792-U | Aug-82 | Attrition |
| 9. | Mississippi Power Company | Mississippi PSC | U-4190 | Sep-82 | Working Capital |
| 10. | Lone Star Gas Company | Texas RRC | 3757; 3794 | Feb-83 | Rate of Return on Equity |
| 11. | Kansas Gas & Electric Company | Kansas CC | 134792-U | Feb-83 | Rate of Return on Equity |
| 12. | Southwestern Bell Telephone Company | Oklahoma CC | 28002 | Oct-83 | Rate of Return on Equity |
| 13. | Morgas Company | Texas RRC | 4063 | Nov-83 | Revenue Requirements |
| 14. | Seagull Energy | Texas RRC | 4541 | Jul-84 | Rate of Return |
| 15. | Southwestern Bell Telephone Company | FCC | 84-800 | Nov-84 | Rate of Return on Equity |
| 16. | Kansas Gas & Electric Company, Kansas City Power & Light Company, and Kansas Electric Power Cooperatives | Kansas CC | 142098-U; 142099-U; 142100-U | May-85 | Nuclear Plant Capital Costs and Allowance for Funds Used During Construction |
| 17. | Lone Star Gas Company | Texas RRC | 5207 | Oct-85 | Overhead Cost Allocation |
| 18. | Westar Transmission Company | Texas RRC | 5787 | | Rate of Return, Rate Design, and Gas Processing Plant Economics |
| 19. | City of Houston | Texas Water Commission | RC-022; RC- 023 | Nov-86 | Line Losses and Known and Measurable Changes |
| 20. | ENSTAR Natural Company | Alaska PUC | TA 50-4; R-87-2; U-87-2 | | Cost Allocation, Rate Design, and Tax Rate Changes |
| 21. | Brazos River Authority | Texas Water Commission | RC-020 | Jan-87 | Revenue Requirements and Rate Design |
| 22. | East Texas Industrial Gas Company | Texas RRC | 5878 | Feb-87 | Revenue Requirements and Rate Design |

| No. | Utility Case | Agency | Docket | Date | Nature of Testimony |
|-----|--|---------------------------|----------|----------------------------|--|
| 23. | Seagull Energy | Texas RRC | 6629 | Jun-87 | Revenue Requirements |
| 24. | ENSTAR Natural Company | Alaska PUC | U-87-42 | Jul-87 | Cost Allocation, Rate Design, |
| | | | | Sep-87 | and Contracts |
| | | | | Sep-87 | |
| 25. | High Plains Natural Gas Company | Texas RRC | 6779 | Sep-87 | Rate of Return |
| 26. | Hughes Texas Petroleum | Texas RRC | 2-91,855 | Jan-88 | Interim Rates |
| 27. | Cavallo Pipeline Company | Texas RRC | 7086 | Sep-88 | Revenue Requirements |
| 28. | Union Gas System, Inc. | Kansas CC | 165591-U | Mar-89 Aug-89 | Rate of Return |
| 29. | ENSTAR Natural Gas Company | Alaska PUC | U-88-70 | Mar-89 | Cost Allocation and Bypass |
| 30. | Morgas Co. | Texas RRC | 7538 | Aug-89 | Rate of Return and Cost Allocation |
| 31. | Corpus Christi Transmission Company | Texas RRC | 7346 | Sep-89 | Revenue Requirements |
| 32. | Amoco Gas Co. | Texas RRC | 7550 | Oct-89 | Rate of Return and Cost Allocation |
| 33. | Iowa Southern Utilities | Iowa Utilities Board | RPU-89-7 | Nov-89 Mar-90 | Rate of Return on Equity |
| 34. | Southwestern Bell Telephone Company | FCC | 89-624 | Feb-90 Apr-90 | Rate of Return on Equity |
| 35. | Lower Colorado River Authority | Texas PUC | 9427 | Mar-90 Aug-90 Aug-90 | Revenue Requirements |
| 36. | Rio Grande Valley Gas Company | Texas RRC | 7604 | May-90 | Consolidated FIT and Depreciation |
| 37. | Southern Union Gas Company | El Paso PURB | | Oct-90 | Disallowed Expenses and FIT |
| 38. | Iowa Southern Utilities | Iowa Utilities Board | RPU-90-8 | Nov-90 Feb-91 | Rate of Return on Equity |
| 39. | East Texas Gas Systems | Texas RRC | 7863 | Dec-90 | Revenue Requirements |
| 40. | San Jacinto Gas Transmission | Texas RRC | 7865 | Dec-90 | Revenue Requirements |

| 1 | | DIRECT TESTIMONY OF CRYSTAL D. DRUMM |
|----|----|--|
| 2 | | I. <u>INTRODUCTION AND QUALIFICATIONS</u> |
| 3 | Q. | PLEASE STATE YOUR NAME AND BUSINESS ADDRESS. |
| 4 | A. | My name is Crystal D. Drumm (Turner), and my business address is 15 East Fifth |
| 5 | | Street, Tulsa, Oklahoma. |
| 6 | Q. | BY WHOM ARE YOU EMPLOYED AND IN WHAT CAPACITY? |
| 7 | A. | I am employed by ONE Gas, Inc. ("ONE Gas") as a Rates Specialist. I am |
| 8 | | testifying on behalf of Texas Gas Service Company ("TGS" or the "Company"), |
| 9 | | which is a division of ONE Gas. |
| 10 | Q. | PLEASE DESCRIBE YOUR EDUCATIONAL BACKGROUND AND |
| 11 | | PROFESSIONAL EXPERIENCE. |
| 12 | A. | I received a Master's of Science Degree in Quantitative Financial Economics from |
| 13 | | Oklahoma State University and a Bachelor's of Science Degree in Statistics with |
| 14 | | minors in Mathematics and Spanish as well as an Honors Degree with International |
| 15 | | Emphasis from Oklahoma State University. I began my career with ONE Gas in |
| 16 | | May 2014 as a Rates Analyst I. In May 2016, I was promoted to a Rates Analyst |
| 17 | | II and in April 2018, I was promoted to Rates Specialist. Prior to joining ONE Gas, |
| 18 | | I worked as a Risk Analyst for Seminole Energy Services, LLC from February 2012 |
| 19 | | to April 2014. From May 2011 to January 2012, I worked as a Technical Sales |
| 20 | | Support Intern for Enogex. In my current position at ONE Gas, my responsibilities |
| 21 | | include calculating, researching and analyzing accounting related issues, analyzing |
| 22 | | and preparing studies, reports, and testimony related to cost of service, rate design, |
| 23 | | alternative ratemaking, and depreciation. |

| | | 1 age 2 of 10 |
|----|----|--|
| 1 | Q. | HAVE YOU PREVIOUSLY TESTIFIED BEFORE ANY REGULATORY |
| 2 | | JURISDICTIONS? |
| 3 | A. | Yes, I have filed testimony in proceedings before the Oklahoma Corporation |
| 4 | | Commission, the Kansas Corporation Commission and the Railroad Commission |
| 5 | | of Texas ("Commission"). A list of the dockets in which I have testified is provided |
| 6 | | as Exhibit CDD-1. |
| 7 | Q. | HAVE YOU PREPARED ANY EXHIBITS IN CONNECTION WITH YOUR |
| 8 | | TESTIMONY? |
| 9 | A. | Yes. I prepared and sponsor the exhibits listed in the Table of Contents. |
| 10 | Q. | WERE YOUR TESTIMONY AND EXHIBITS PREPARED BY YOU OR |
| 11 | | UNDER YOUR DIRECTION? |
| 12 | A. | Yes. |
| 13 | Q. | WHAT IS THE PURPOSE OF YOUR TESTIMONY? |
| 14 | A. | My testimony presents and supports the class cost of service ("CCOS") study and |
| 15 | | class revenue allocation based on the CCOS study results I prepared for the |

A. My testimony presents and supports the class cost of service ("CCOS") study and class revenue allocation based on the CCOS study results I prepared for the proposed consolidated Central-Gulf Service Area ("CGSA"). Consistent with the Company's request, should consolidation not be approved, I have also prepared individual CCOS studies and their respective class revenue allocations for the Central Texas Service Area ("CTSA") and the Gulf Coast Service Area ("GCSA"). I support the CCOS study tabs listed below in each of the integrated models.

II. CLASS COST OF SERVICE STUDY

2 Q. WHAT IS A CLASS COST OF SERVICE STUDY?

1

A. A CCOS study is an analysis to fully allocate a utility's cost of service, or revenue requirement, to each customer class. The components of a utility's revenue requirement, including operating expenses, depreciation, taxes, and required return, are distributed to each customer class based on cost causation principles.

1 Q. PLEASE EXPLAIN THE PURPOSE OF A CCOS STUDY.

A.

A. Upon setting a utility's revenue requirement, the utility must determine how much of its revenue requirement to collect from each customer class. The CCOS study results provide a useful guide in distributing the utility's overall revenue requirement to its customer classes because interclass equity considerations require that each customer class pay the cost to serve their class, and interclass inequities can often arise over time. Interclass inequities can be due to changes in customer class characteristics, adjustments to rates from interim rate filings, and changes in a company's investment and expenses. In identifying both fixed and variable costs, the CCOS study also provides information that is useful in setting monthly customer charges to recover fixed costs and setting usage charges to recover variable costs for each class. Please see the direct testimony of Company witness Paul Raab discussing TGS's proposed rate design to recover fixed and variable costs for each class.

Q. HOW IS A CCOS STUDY PREPARED?

A CCOS study consists of three steps. The first step is functionalization, where elements of the cost of service are broken down according to the functions that they perform. The second step is classification, which involves classifying each of the functionalized components of the cost of service into one of four classifications. The final step is the allocation step, where each of the classified rate base and cost of service components are fully assigned to customer classes based on direct assignment of costs or on application of causally-related allocation factors.

| 1 | Q. | PLEASE DISCUSS THE FUNCTIONALIZATION STEP TYPICALLY |
|----|----|--|
| 2 | | PERFORMED IN A GAS UTILITY CCOS STUDY. |
| 3 | A. | A gas utility CCOS study typically consists of three functions: (1) production and |
| 4 | | storage, (2) transmission, and (3) distribution. The production and storage function |
| 5 | | includes the costs of gas wells, gas field lines, and gas processing plants. |
| 6 | | Transmission costs involve the cost of facilities and related expenses associated |
| 7 | | with delivering gas from production and storage areas to city gates, which are the |
| 8 | | points at which the gas enters a utility's distribution system. Distribution costs refer |
| 9 | | to costs and expenses associated with delivering gas from city gates to end use |
| 10 | | customers and providing associated services such as meter reading, billing, and |
| 11 | | customer service. |
| 12 | Q. | PLEASE DISCUSS THE CLASSIFICATIONS USED IN THE |
| 13 | | CLASSIFICATION STEP. |
| 14 | A. | There are four classifications that are used in the second step of a CCOS study. |
| 15 | | These classifications are (1) customer-related, (2) demand-related, (3) commodity- |
| 16 | | related, and (4) revenue-related costs. I describe each of these four classifications |
| 17 | | below. |
| 18 | | Customer-related costs are those costs that vary with the number of |
| 19 | | customers or customer locations served, regardless of whether or not any gas is |
| 20 | | used. Examples include the cost of a meter at a customer's location and the portion |
| 21 | | of the cost of distribution mains associated with reaching the customer's location. |
| | | |
| 22 | | These costs do not depend on the amount of gas used over the course of the year or |

at peak periods but rather are incurred to provide customer access to gas service.

Demand-related costs are defined as those costs that depend on the maximum delivery requirements of the gas system. These delivery requirements are measured by usage at the time of the system's peak. The system's peak usage is based on historically extreme winter weather conditions that relate to sizing facilities that are weather dependent. An example of demand costs is the portion of the cost of distribution mains associated with the sizing of distribution mains to meet peak loads. Transmission costs and related expenses are another example of demand costs.

Commodity-related costs are defined as those costs that vary with the amount of gas that is delivered to customers. Odorization cost and related expenses are examples of commodity-related costs. ²

Revenue-related costs are those costs that vary directly with the utility's gross revenue. Revenue-related taxes are examples of revenue-related expenses. In the CCOS study in this case, I have classified revenue-related elements as customer-related and allocated them based on revenues in the allocation step of the study, rather than using a separate revenue classification. The allocated cost results will be the same with this approach as with the use of the separate revenue-based classification.

_

² Purchased gas expense is also commodity-related, but this expense is removed in determining a company's revenue requirement and is not part of a CCOS study when the expense is separately recovered through a pass-through mechanism.

1 Q. DO SOME OF THE COST COMPONENTS REQUIRE COMBINATIONS

OF CLASSIFICATIONS?

A.

Yes, some cost components require combinations of classifications. While many cost of service components fall into a single classification, several components involve more than one classification category which require combinations of classifications. For example, the investment in Distribution Mains (Account 376) is driven by (1) the requirement to reach various customer locations and (2) the need to size the mains to meet the resulting load of these customers on the system peak. Therefore, the investment in distribution mains, as well as associated expenses, has both customer-related and demand-related costs.

As a second example, Mains and Services Expense (Account 874) is a distribution operating expense incurred to operate both mains and services. Services are classified as customer-related costs while mains have both customer-related and demand-related costs. Account 874 is classified based on the relative investment in mains and services, which results in a classification that contains both customer-related and demand-related costs.

In addition, various capital and expense costs support multiple classifications of the cost of service and are classified based on a composite of the applicable components. For example, Supervision and Engineering Expense (Account 885) is incurred to support a variety of maintenance activities. This expense is classified based on the composite classification of the maintenance expenses associated with distribution mains, measuring and regulating station equipment, services, and house regulators (Accounts 887 through 893).

| 1 | Q. | PLEASE EXPLAIN THE DIFFERENCE BETWEEN DIRECT |
|----|----|--|
| 2 | | ASSIGNMENT AND CAUSALLY-RELATED ALLOCATION FACTORS. |
| 3 | A. | Direct assignment ensures a more accurate reflection of cost causation. However, |
| 4 | | allocation factors must be used for the majority of the cost of service components |
| 5 | | because these components either involve joint or common costs or the data needed |
| 6 | | to make direct assignments are simply not available. For example, the allocation |
| 7 | | of distribution mains put in place to serve all classes cannot be directly assigned |
| 8 | | because the system of mains is a network that jointly provides service to all |
| 9 | | customers. Service charge revenue, customer deposits, interest on customer |
| 10 | | deposits and bad debt expense are directly assigned to the residential class and, to |
| 11 | | the extent practicable, to each of the non-residential classes. ³ |
| 12 | Q. | PLEASE DISCUSS THE DIFFERENT TYPES OF ALLOCATIONS USED |
| 13 | | IN THE STUDY. |
| 14 | A. | Customer-related costs are generally allocated to customer classes based on relative |
| 15 | | meter or bill counts. Weighted customer count factors are used, when necessary. |
| 16 | | For example, the investment in meters and related expenses is a customer cost, but |
| 17 | | smaller and lower cost meters are required by residential customers as compared to |
| 18 | | public authority or industrial customers. Weighted customer counts based on |
| 19 | | typical meter costs by class are used in the study to recognize the drivers of the |

20

investment in meters. Similar to meters, weighted customer factors are developed

³ The test year amounts for these cost of service components are available and direct assignments are made to the residential, commercial, industrial, public authority and compressed natural gas classes, including commercial, industrial, public authority, and compressed natural gas transportation service. Within the non-residential classes, allocations are required to split the assigned amounts between public schools space heating and the public authority class. For each of these classes, assigned service charge revenue, customer deposits and interest on customer deposits are allocated based on relative customer counts and bad debt expense is allocated based on relative margin.

1 for services and house regulators in order to recognize sizing and resulting cost 2 differences among customer classes. 3 Demand costs are allocated to classes based on relative class contributions to system peak usage. Commodity costs are allocated to classes based on each 4 5 class' annual volumes relative to total annual volumes. Revenue-related costs are 6 allocated to customer classes based on relative annual revenues. 7 After functionalizing each of the cost of service components, classifying the 8 functionalized components, and allocating the classified components, the revenue 9 requirement is entirely distributed to each of the customer classes. Each class' 10 fully-distributed revenue requirement represents its actual cost of service. 11 Q. HAS THE COMMISSION RECENTLY REVIEWED PRIOR CCOS 12 STUDIES CONDUCTED BY THE COMPANY USING THE METHODS YOU USE IN THIS CASE? 13 14 A. Yes, the Commission has reviewed prior CCOS studies conducted by the Company 15 using the same methods I use in this case. The Commission reviewed the 16 Company's CCOS study in Gas Utilities Docket ("GUD") No. 10506 and included 17 the following Findings of Fact in the Final Order: 18 98. TGS's class cost of service ("CCOS") study is reasonable to use. 19 99. TGS's CCOS study classifies and allocates costs in a fair, just, and 20 reasonable manner.4

⁴ Statement of Intent of Texas Gas Service Company, a Division of ONE Gas, Inc., to Increase Gas Utility Rates Within the Unincorporated Areas of the El Paso Service Area (EPSA), Permian Service Area (PSA), and Dell City Service Area (DCSA), GUD No. 10506, consol., Final Order at 8-9 (Sept. 27, 2016).

.

| 1 | Q. | DID YOU APPLY THE SAME METHODS, CLASSIFICATION AND |
|----|----|---|
| 2 | | ALLOCATION FACTORS THAT WERE USED BY THE COMPANY IN |
| 3 | | GUD NO. 10506 IN PREPARING THE CCOS STUDY IN THIS |
| 4 | | STATEMENT OF INTENT? |
| 5 | A. | Yes, I used the same methods, classification and allocation factors in this Statement |
| 6 | | of Intent as the Company used in the CCOS study that was found reasonable in |
| 7 | | GUD No. 10506. |
| 8 | Q. | ARE THESE SAME METHODS, CLASSIFICATION AND ALLOCATION |
| 9 | | FACTORS CONSISTENT WITH THE CCOS STUDIES THAT WERE |
| 10 | | CONDUCTED IN RECENT CTSA AND GCSA RATE CASES? |
| 11 | A. | Yes, these are the same methods, classification and allocation factors used in the |
| 12 | | CCOS studies conducted in recent CTSA and GCSA rate cases. |
| 13 | Q. | PLEASE DESCRIBE EXHIBIT CDD-2, WHICH IS THE CCOS STUDY IN |
| 14 | | THIS CASE. |
| 15 | A. | The CCOS study results for the proposed CGSA are provided in Exhibit CDD-2.5 |
| 16 | | Page 1 of Exhibit CDD-2 provides a summary of the results. Line 4 shows each |
| 17 | | class' cost of service, or revenue requirement, based on the classification and |
| 18 | | allocation methodology described in this testimony. Line 4, column (b) is the total |
| 19 | | revenue requirement shown in the Company's Schedule A. Exhibit CDD-2, lines |
| 20 | | 1 through 3 provide the customer-related, demand-related, and commodity-related |
| 21 | | costs that total to the cost of service for each class on line 4. |
| | | |

⁵ On Exhibit CDD-2, the transportation cost of service results have been combined into the corresponding gas sales customer classes and are shown on line 4. In addition, cogeneration cost of service results have been combined into the public authority class.

1 Q. WHAT ADDITIONAL REVENUES ARE INCLUDED IN THE REVENUE

ALLOCATION?

A.

A.

To determine how much revenue must be recovered through recurring monthly customer and usage charges from each class to meet the cost of service, revenue from other sources must be credited to the cost of service. The revenue credit is comprised of revenue from service charges, special contracts, and the irrigation class. Service charge revenue is directly assigned to the customer classes. Special contract revenue is associated with contract rates negotiated to keep these customers from bypassing the Company's system. Special contract revenue and irrigation revenue are credited to customer classes based on each class' cost of service relative to the total cost of service. The resulting revenue credits are shown on line 5 of Exhibit CDD-2. Line 6 shows the cost of service net of these revenue credits. Line 7 shows the current revenue for each customer class, and line 8 provides the required revenue change net of these revenue credits for each class. Line 8 shows the amounts that must be collected through monthly customer and usage charges from each class in order for each class to pay its cost of service.

Q. PLEASE DESCRIBE THE COST RATIOS FOUND IN EXHIBIT CDD-2 ON PAGE 1.

A revenue-to-cost ratio of one indicates that a class' revenue matches the cost to serve the class. A ratio of less than one indicates that a class' revenue falls short of the cost to serve the class, and a ratio greater than one indicates that class revenue exceeds the cost to serve the class. At current revenues, the revenue-to-cost ratio of less than one for the system [line 10, column (b)] indicates that an overall revenue increase is required. The residential class currently has a revenue-to-cost ratio less

| 1 | | than one [line 10, column (c)], indicating that the class is paying less than its cos |
|----|----|---|
| 2 | | of service today. The revenue-to-cost ratios of the non-residential classes are all |
| 3 | | greater than one [line 10, columns (d) through (h)], indicating that each class is |
| 4 | | currently paying more than its cost of service. Line 11 demonstrates that each class |
| 5 | | will pay its cost of service if the revenue changes shown on line 8 are assigned to |
| 6 | | each class. |
| 7 | Q. | PLEASE EXPLAIN WHERE THE CLASSIFICATION STEP IS FOUND IN |
| 8 | | EXHIBIT CDD-2. |
| 9 | A. | Pages 3 through 15 of Exhibit CDD-2 contain details on the classification step of |
| 10 | | the cost of service study, including the classification of individual plant accounts |
| 11 | | and other rate base items on pages 3 through 5. Pages 6 through 9 of Exhibit CDD- |
| 12 | | 2 show the classification of the individual components of the cost of service, or |
| 13 | | revenue requirement. Exhibit CDD-2, pages 10 through 15 provide the |
| 14 | | classification factors used on pages 3 through 9 of Exhibit CDD-2. |
| 15 | Q. | PLEASE EXPLAIN WHERE THE ALLOCATION STEP IS FOUND IN |
| 16 | | EXHIBIT CDD-2. |
| 17 | A. | Pages 16 through 35 of Exhibit CDD-2 contain details on the allocation step of the |
| 18 | | study, including the allocation of the classified components of rate base on pages |
| 19 | | 16 through 21. The allocation of each of the classified components of the cost of |
| 20 | | service to customer classes is shown on pages 22 through 32 of Exhibit CDD-2 |
| 21 | | The components of the allocated cost of service before revenue credits (shown or |
| 22 | | page 32, lines 354 through 358) are carried forward to lines 1 through 4 of the Cost |
| 23 | | of Service Study Summary (pages 1 and 2, Exhibit CDD-2). Pages 33 through 35 |
| | | |

24

of Exhibit CDD-2 provide the customer, demand, and commodity allocation factors

applied in the allocation of the rate base (pages 16 through 21) and the cost of service (pages 22 through 32) components.

Q. DID YOU PREPARE SEPARATE CCOS STUDIES FOR THE CTSA AND

4 GCSA?

3

12

15

16

17

18

19

20

21

22

Yes. I prepared separate CCOS studies based on the separate CTSA and GCSA revenue requirements in order to set rates if the Company's request for consolidation is not approved. Exhibit CDD-4 provides the CCOS study for the CTSA, and Exhibit CDD-6 provides the CCOS study for the GCSA based on each area's separate revenue requirement. Each of these studies is presented in the same format as the CGSA CCOS study in Exhibit CDD-2. Thus, my explanation of content of Exhibit CDD-2 applies to Exhibit CDD-4 and to Exhibit CDD-6.

III. CLASS REVENUE ALLOCATION

13 Q. PLEASE EXPLAIN THE CONCEPT OF CLASS REVENUE

14 **ALLOCATION.**

A. Class revenue allocation is the assignment of revenue to each customer class so that the total revenue assigned equals the revenue requirement. Upon assignment of revenue to each class, recurring monthly rates must be designed to collect the annual revenue assigned to the class. Conceptually, revenues should be fairly allocated to customer classes and rates should be designed to more accurately capture fixed and variable costs. Equitable class revenue allocations and rate designs are effective in attracting and retaining customers in all classes and keeping their rates reasonable. Interclass inequities that result from residential customers

⁶ City of Beaumont customers are included in the GCSA CCOS study.

1 paying less than their cost of service could, at some point, cause non-residential 2 customers to find gas service unattractive compared to other energy sources. If 3 these customers switch to other energy sources, residential customers will end up 4 paying higher rates in future rate cases in order to cover the Company's cost of 5 service. Similarly, maintaining superficially low customer charges with higher 6 usage charges could cause moderate- and high-use customers to consider 7 alternatives to gas service. 8 Q. HOW ARE THE CCOS STUDY RESULTS USED TO ASSIGN REVENUE 9 TO EACH CLASS? 10 A. The CGSA CCOS study results that are used for the proposed CGSA class revenue allocation are shown on page 2 of Exhibit CDD-2.⁷ For a specific class to cover its 11 12 cost of service, rates for monthly service for each customer class must be designed 13 to produce annual revenue totaling the Company's total cost of service, as shown 14 on line 6. 15 Page 2 of Exhibit CDD-2 combines both the sales and transportation 16 services. This is reasonable because the rate design proposed in this case by 17 Mr. Raab is based on identical usage blocks and usage rates for sales service and 18 corresponding transportation service. 19 WHAT FACTORS DID YOU CONSIDER TO DEVELOP THE PROPOSED Q. 20 **CGSA CLASS REVENUE ALLOCATION?**

 7 With the separate CTSA and GCSA revenue requirements, see page 2 of Exhibits CDD-4 and CDD-6 for the CTSA and GCSA, respectively.

The factors I considered in developing my recommendation were class costs and

the concept of Gradualism. First, the class revenue allocation must be based on the

A.

21

actual CGSA CCOS study results because interclass equity requires that each class pay its own cost of service. If cost-based revenue assignments are not made, a portion of the cost to serve certain classes (those paying less than the cost to serve them) are unfairly borne by other classes (those paying more than the cost of service). Implementing cost-based revenue assignments in this case requires that the proposed CGSA residential revenue increase while each of the non-residential classes are assigned revenue decreases.8

However, it is also important to consider the impacts on each customer class that result from cost-based revenue assignments. The concept of gradualism suggests that otherwise-sizable impacts for certain classes should be mitigated, while ensuring that there is movement toward each class' cost of service. To moderate the increase to the residential class, I prepared and evaluated two revenue allocations that represent a more gradual movement for the residential class' cost of service in this rate case. I also considered these same factors in developing appropriate class revenue allocations for the CTSA and GCSA if the Company's request for consolidation is not approved.

Q. PLEASE EXPLAIN EXHIBIT CDD-3.

18 The three class revenue allocations for the proposed CGSA that I considered are A. 19 shown on Exhibit CDD-3. Each class' revenue-to-cost ratio and assigned revenue

⁸ The CTSA and GCSA CCOS studies based on the separate revenue requirement for each area similarly show that cost-based revenue assignments required substantial residential revenue increases and nonresidential revenue decreases in each service area.

| 1 | | change is shown along with the resulting percentage change in non-gas revenue and |
|----|----|---|
| 2 | | in total revenue associated with the assigned revenue change.9 |
| 3 | Q. | PLEASE DESCRIBE THE THREE REVENUE ALLOCATIONS |
| 4 | | CONSIDERED FOR THE PROPOSED CGSA. |
| 5 | A. | Revenue Allocation One assigns revenue so that each class pays its actual cost of |
| 6 | | service. The resulting revenue change for each class is shown on line 5 of Exhibit |
| 7 | | CDD-3. |
| 8 | | Revenue Allocation Two incorporates the principle of gradualism into the |
| 9 | | allocation process. For each class for which a cost-based revenue decrease is |
| 10 | | required, Revenue Allocation Two assigns 20 percent of the cost-based required |
| 11 | | decrease to the class, with additional adjustments made between the industrial, |
| 12 | | public authority, and compressed natural gas classes to equalize the revenue to cost |
| 13 | | ratios between the classes. The benefit from not assigning the full cost-based |
| 14 | | decrease to these classes is assigned to the residential class. The revenue change |
| 15 | | for each class is shown on line 10 of Exhibit CDD-3. Importantly, the residential |
| 16 | | revenue increase in Revenue Allocation Two is smaller than the cost-based required |
| 17 | | increase, but there is still significant movement toward cost-based revenue |
| 18 | | assignments for each class, as shown by comparing the revenue-to-cost ratios in |
| 19 | | line 1 to those in line 9 for each customer class. |
| 20 | | Revenue Allocation Three minimizes the impact on the residential class, |
| 21 | | while ensuring that no other class is assigned revenue that will move it further from |

 9 The equity goal of achieving cost-based revenue assignments is reached when each class is assigned a revenue level so that its revenue-to-cost ratio equals one.

a cost-based revenue assignment than it is today. Exhibit CDD-3 shows that this

allocation results in movement toward a cost-based revenue assignment for the residential class, as shown by comparing the revenue-to-cost ratio in line 1, column (c) to the ratio in line 14, in column (c). Furthermore, this revenue allocation results in no movement away from cost-based revenue assignments for the commercial, industrial, public authority and compressed natural gas classes, as shown by comparing the revenue-to-cost ratios in line 1 to those in line 14, in columns (d), (e), (f), and (g).

8 Q. WHAT REVENUE ALLOCATION DO YOU RECOMMEND FOR THE

PROPOSED CGSA?

A. Based on the revenue requirement supported by the Company in this SOI, I recommend Revenue Allocation Three for the proposed CGSA. While it is preferable to improve the equity in revenue allocation for all customer classes, i.e., as demonstrated by Revenue Allocation One or Revenue Allocation Two, I recommend Revenue Allocation Three in this case in order to recognize and limit the required residential revenue increase and to reduce the number of litigated issues in this case.¹⁰

Q. PLEASE EXPLAIN EXHIBITS CDD-5 AND CDD-7.

A. If the Company's request for consolidation is not approved, I have prepared three class revenue allocations for the CTSA and GCSA that are comparable to those developed for the proposed CGSA. The CTSA revenue allocations are shown in Exhibit CDD-5 and the GCSA revenue allocations are shown in Exhibit CDD-7, based on their separate revenue requirements. These two Exhibits are structured in

¹⁰ In making class revenue assignments in GUD No. 10506, the Commission increased the residential revenue assignment with no change for any other class.

- the same manner as Exhibit CDD-3. If the proposed service area consolidation is
- 2 not approved, I recommend Revenue Allocation Three as shown in Exhibits CDD-
- 3 5 and CDD-7.
- 4 Q. DOES THIS CONCLUDE YOUR DIRECT TESTIMONY?
- 5 A. Yes, it does.

⁽¹⁾ Revenue-to-cost ratios are the ratios of each class' non-gas revenue (including revenue credits) to the cost of service.

⁽²⁾ Non-gas revenue is the sum of as adjusted test year base revenue (i.e., revenue from recurring monthly charges resulting from as adjusted billing determinants), service charge revenue, special contract revenue, and other revenue credited to the cost of service for each class.

⁽³⁾ Total revenue is the sum of non-gas revenue (see Note 2) and as adjusted gas costs. As adjusted gas costs are calculated by multiplying the test year average cost of gas (i.e., test year gas cost revenue divided by unadjusted sales service volumes) by as adjusted sales service volumes.

⁽⁵⁾ No revenue change assigned to a class for which the cost of service required revenue change calls for a decrease. The resulting benefit from not implementing the required deceases is assigned to the residential (4) For each class with a cost of service required revenue decrease, 20 percent of the required decrease is implemented. The benefit of implementing less than the required decreases is assigned to the residential

(1) Service charge, special contract, and other revenue are used to offset each class' cost of service. Service charge revenue is directly assigned to classes and is included in the revenue credit on line 5. Allocation of the remaining revenues to be credited is based on each class' cost of service relative to the total cost of service on line 4. The components of the total revenue credit are as follows: 2,138,318 Service Charges \$

| 1,739,116 | 20,483 | 3,897,918 |
